The utility is not required to extend service to any applicant outside of its CCN service area and will only do so, at the utility's sole option, under terms and conditions mutually agreeable to the utility and the applicant and upon extension of the utility's certificated service area boundaries by the PUC. Service applicants may be required to bear the cost of the service area amendment.

A "qualified service applicant" is an applicant who has: (1) met all of the utility's requirements of service contained in this tariff, PUC rules and/or PUC order, (2) has made all payments for tap fees and extension charges, (3) has provided all necessary easements and rights-of-way necessary to provide service to the requested location, including staking said easements or rights-of-way where necessary, (4) delivered an executed customer service inspection certificate to the utility and (5) has, for each location to which service is being requested, completed the verbal, written, or electronic transmission customer service request process.

Where a new tap or service connection is required, the service applicant shall be required to submit a service request by mail, by telephone, through an Internet website, or through another electronic transmission and request that a tap be made. The tap request must be accompanied with a plat, map, diagram, or written metes and bounds description of precisely where the applicant desires each tap or service connection is to be made and, if necessary, where the meter is to be installed, along the applicant's property line. The actual point of connection and meter installation must be readily accessible to utility personnel for inspection, servicing and meter reading while being reasonably secure from damage by vehicles and mowers. If the utility has more than one main adjacent to the service applicant's property, the tap or service connection will be made to the utility's nearest service main with adequate capacity to service the applicant's full potential service demand. If the tap or service connection cannot be made at the applicant's desired location, it will be made at another location mutually acceptable to the applicant and the utility. If no agreement on location can be made, applicant may refer the matter to the PUC for resolution. Unless otherwise ordered by the PUC, the tap or service connection will not be made until the location dispute is resolved.

DOCKET # 55818 1646

SECTION 3.20 - SPECIFIC UTILITY EXTENSION POLICY (Continued)

The utility shall require a developer (as defined by PUC rule) to provide permanent recorded public utility easements as a condition of service to any location within the developer's property. The developer shall be required to obtain all necessary easements and rights-of-way required to extend the utility's existing service facilities from their nearest point with adequate service capacity (as prescribed by PUC rules and local service conditions) to and throughout the developer's property. The easements shall be sufficient to allow the construction, installation, repair, maintenance, testing, and replacement of any and all utility plant necessary to provide continuous and adequate service to each and every potential service location within the property at full occupancy. Unless otherwise restricted by law, well plant sites shall convey with unrestricted rights to produce water for public drinking water supply. The developer shall be required to provide the utility with a minimum of a 160 ft. radius sanitary control easement or fee simple real property conveyance around the proposed well site acceptable to the PUC for each water well site to be located within the developer's property or otherwise being obtained to serve the developer's property. Unless otherwise agreed to by the utility, pipe line right-of-way easements must be at least 15 ft. wide to allow adequate room to facilitate backhoe and other heavy equipment operation and meters. Easements must be provided for all production, storage, treatment, pressurization, and disposal sites which are sufficient to construct and maintain all weather roads as prescribed by PUC rules. All easements shall be evidenced, at developer's expense, by recorded county-approved subdivision plat or by specific assignment supported by metes and bounds survey from a surveyor licensed by the State of Texas.

Prior to the extension of utility service to developers (as defined by PUC rules) or new subdivisions, the Developer shall comply with the following:

(a) The developer shall make a written request for service to property that is to be subdivided and developed. The developer shall submit to the utility a proposed plat on a scale of one inch (1") to two hundred feet (200') for review and determination of required easements, utility plant, and plant location. If sewer service is requested, the plat must contain elevation data. A reconcilable deposit in an amount set by the utility may be required to cover preliminary engineering, legal and copy cost to be incurred by the utility in reviewing and planning to meet this service request. The plat and/or accompanying information shall identify the type, location and number of houses and other planned structures that will be requiring utility service. If other than residential structures are to be located on the property, all other types of anticipated businesses and their service demands shall be identified with specificity. All areas requiring special irrigation and/or other unique water demands must be identified. To the extent reasonably possible, this information must be precise so that adequate facilities can be designed and constructed to meet all future service demands without hazard to the public, other utility customers and/or the environment.

(b) After the requirements of easements and rights-of-way have been determined, a red line copy will be returned by the utility to the developer for final plat preparation.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED

SECTION 3.20 - SPECIFIC UTILITY EXTENSION POLICY (Continued)

(c) Copies of all proposed plats and plans must be submitted to the utility prior to their submission to the county for approval to ensure that they are compatible with the adequate long-term utility needs of potential service customers. Copies will be returned after review by the utility so that necessary changes may be incorporated into the developer's final submitted plat(s) and plans.

(d) The utility shall be provided with three (3) certified copies of the final plat(s) approved by the County Commissioners Court. At this time, the utility will begin engineering the facilities necessary to serve the property. Plans and specifications will be prepared and submitted to the TCEQ by the utility if required by law. If further plat or plans changes are necessary to accommodate the specific service needs of the property and the anticipated customer demands, the developer will be so notified. Plat amendments must be obtained by the developer. The developer shall be notified when all required TCEQ or other governmental approvals or permits have been received. No construction of utility plant which requires prior TCEQ plans approval shall be commenced until that approval has been received by the utility and any conditions imposed by the TCEQ in association with its approvals have been satisfied.

(e) The developer shall be required to post bond or escrow the funds necessary to construct all required utility plant, except individual taps, meters, and sewer connections, required to serve the property. Construction shall not commence until funds are available. If the construction is to be done in coordination with the phased development of the property, funds must be provided in advance which are sufficient to complete each phase. No phase or facilities for any phase shall be constructed prior to the bonding or escrowing of all funds associated with that phase.

(f) At the sole option of the utility, the developer may be required to execute a Developer Extension Contract setting forth all terms and conditions of extending service to their property including all contributions-in-aid of construction and developer reimbursements, if any.

(g) The utility may require the developer to commence construction of subdivision improvements within three (3) months of utility plans approval or the utility may abate its construction activities until full development construction begins. If the developer stops construction of subdivision improvements for any purpose, the utility may abate its construction for a similar period.

(h) As soon as the roads are rough cut and prior to paving, extension lines will need to be constructed at each road crossing. The developer must notify the utility sufficiently in advance of this development stage to allow for the necessary utility construction without disruption to other service operations of the utility. Failure to provide adequate advance notice and cooperation in the construction of necessary utility plant may result in additional delays in obtaining service to the property. The developer shall be required to pay for all additional costs of road boring or other remedial construction necessary to install adequate utility plant throughout the affected property.

SECTION 3.20 - SPECIFIC UTILITY EXTENSION POLICY (Continued)

(i) The developer, not the utility, shall insure that developer's employees, agents, contractors, and others under its control coordinate their work or construction throughout the property with the utility to insure the orderly and timely construction of all utility plant necessary to serve the public.

Within its CCN service area, the utility shall bear the cost of the first 200 feet of any water main or sewer collection line necessary to extend service to an individual residential service applicant within a platted subdivision unless the utility can document:

(a) that the developer of the subdivision refused to provide facilities compatible with the utility's facilities in accordance with the utility's approved extension policy after receiving a written request from the utility; or,

(b) that the developer defaulted on the terms and conditions of a written agreement or contract existing between the utility and the developer or the terms of this tariff regarding payment for services, extensions, or other requirements; or in the event the developer declared bankruptcy and was therefore unable to meet obligations; and,

(c) that the residential service applicant purchased the property from the developer after the developer was notified of the need to provide facilities to the utility. A residential service applicant may be charged the remaining costs of extending service to his property; provided, however, that the residential service applicant may only be required to pay the cost equivalent to the cost of extending the nearest water main, whether or not that line has adequate capacity to serve that residential service applicant.

The following criteria shall be considered to determine the residential service applicant's cost for extending service:

(1) The residential service applicant shall not be required to pay for costs of main extensions greater than 2" in diameter for water distribution.
(2) Exceptions may be granted by the Commission if:
  (a) adequate service cannot be provided to the applicant using the maximum line sizes listed due to distance or elevation, in which case, it shall be the utility's burden to justify that a larger diameter pipe is required for adequate service;
  (b) larger minimum line sizes are required under subdivision platting requirements or applicable building codes.
(3) If an exception is granted, the utility shall establish a proportional cost plan for the specific extension or a rebate plan which may be limited to seven years to return the portion of the applicant's costs for oversizing as new customers are added to ensure that future applicants for service on the line pay at least as much as the initial service applicant.

SECTION 3.20 - SPECIFIC UTILITY EXTENSION POLICY (Continued)

For purposes of determining the costs that service applicants shall pay, commercial customers with service demands greater than residential customer demands in the certificated area, industrial, and wholesale customers shall be treated as developers.

A service applicant requesting a one inch meter for a lawn sprinkler system to service a residential lot is not considered nonstandard service.

# APPENDIX- C
## Aqua Texas - North Region Water Utility Tariff
## Regional Pass-Through Gallonage Charge True- up/Adjustment Provision and Report

The purpose of this true-up/adjustment provision is to true-up and adjust Aqua Texas' authorized Regional Pass-Through Gallonage Charge each year in an effort to provide the best opportunity for regional revenue collected from the charge to align with certain types and amounts of pass-through costs Aqua Texas has incurred in the preceding year for the region using a process that does not require the expense of a full rate proceeding. Additionally, this process is intended to ensure that Aqua Texas balances the collections versus the pass-through costs annually. The types of pass-through costs that form the basis for the Regional Pass-Through Gallonage Charge may be regional costs, fees, rates, and charges imposed by governmental entities, water authorities or districts having jurisdiction over Aqua Texas or its operations or by non-affiliated third party water suppliers or water rights holders selling water or water rights to Aqua Texas.

1) Regional Pass-Through Gallonage Charge true-up and adjustment calculations shall use historic, actual gallons billed to all regional retail water customers in the previous completed calendar year.

2) Amounts referred to in gallons shall be per 1,000 gallons, unless otherwise specified.

3) Aqua Texas has provided a list of all expenses (see attached) to be included in the regional pass through costs. The PUC has approved the attached list.

4) Aqua Texas shall only collect costs directly associated with the production of water in the pass-through and specifically shall not include impact fees and other fees associated with plant and equipment.

5) Normalization shall not be used in any pass through calculations.

6) No charges by affiliates (as defined by the Texas Water Code) of Aqua Texas shall be included in the pass through.

7) True-up Report to the regulatory authority ("Report"): Between the end of each calendar year and the following February 28, Aqua Texas shall provide a Report that reconciles the total Regional Pass-Through Gallonage Charge revenues billed during the previous completed calendar year within the North region to the total amount of all regional passed-through costs incurred during that year as reflected in the general ledger. The Report shall include the amount paid to each entity for allowed passed through costs, the names of the entities paid by Aqua Texas, and the total of costs incurred requested for the purpose of an adjusted Regional Pass-Through Gallonage Charge. Any supporting documentation shall be attached to the report. Aqua Texas may submit information regarding new district charges in the Report (other than fines or penalties - see 4 above). New district charges associated with newly acquired systems shall not be included unless otherwise approved in a rate determination or proceeding. Aqua Texas will not include new purchase water agreements unless approved in a rate proceeding.

**APPENDIX- C (Continued)**
**Aqua Texas - North Region Water Utility Tariff**
**Regional Pass-Through Gallonage Charge True- up/Adjustment Provision and Report**

***Calculations using this formula begins with the filing of the 2022 True-Up Report***

8) The true-up calculation for a completed calendar year Report shall be as follows:
   a) Regional Pass-Through Gallonage Charge revenues billed during completed calendar year ..... $XXXX
   b) Regional passed-through costs actually incurred during completed calendar year ..... $XXXX
   c) Difference between a) and b) ..... $XXXX

   where, **a) - b) = c)**

   d) Prior year's over/under collections ..... $XXXX
   e) This year's total over/under collections ..... $XXXX

   where, **c) + d) = e)**

   Annual Regional Pass-Through Gallonage Charge recalculations shall follow the following formula:

   b) Same as b) above. ..... $XXXX
   e) Same difference as e) above ..... $XXXX
   f) Total adjusted regional pass-through costs subject to adjusted Regional Pass-Through Gallonage Charge ..... $XXXX

   where, **b) - e) = f)**

**Divided by:**

g) Actual historic gallons billed to all regional customers in completed calendar year ..... XXXX

**Equals:**

h) Regional Pass-Through Gallonage Charge as adjusted ..... $XXXX

where **f) ÷ g) = h)**

Notice of any adjustments to the pass-through will be sent to the PUC or regulatory authority and to the affected customers. Notice to the customers may be in the form of a billing insert and must track the language required in 16 TAC § 24.25(b)(2)(F)(ii)(VI).

**APPENDIX- C (Continued)**
**Aqua Texas - North Region Water Utility Tariff**
**Regional Pass-Through Gallonage Charge True- up/Adjustment Provision and Report**

9) With the Report Aqua Texas files on February 28 setting forth its calculation and supporting documentation for its adjusted Regional Pass-Through Gallonage Charge in accordance with 5) and 6) above, Aqua Texas shall include a tariff page that incorporates the adjusted Regional Pass-Through Gallonage Charge reflected in the Report. Aqua Texas shall implement the adjusted filed rate as follows.
   a) Aqua Texas will bill the adjusted Regional Pass-Through Gallonage Charge for service rendered on or after March 1 each year and thereafter until the rate is modified.
   b) The first bill received each year incorporating the adjusted Regional Pass-Through Gallonage Charge will be prorated to apply the adjusted charge to service during those days in the billing cycle on or after March 1.
   c) The PUC or a successor agency with authority to regulate investor-owned utility rates (regulatory authority) shall review the Report and provide the results of its review to Aqua Texas in writing within 45 days after Aqua Texas submits the Report. If no written response is provided to Aqua Texas during that time, the adjusted Regional Pass-Through Gallonage Charge filed with the Report shall stand until modified.
   d) The PUC may dispute the calculation or supporting documentation as presented in the Report. If so, Aqua Texas and the PUC shall work in good faith to attempt resolution of the dispute.
   e) The process of implementing the Regional Pass-Through Gallonage Charge True-up/Adjustment and the regulatory authority's review of same is an informal proceeding and not a contested case hearing. However, if a dispute between Aqua Texas and the regulatory authority cannot be resolved through negotiation, only the PUC or Aqua Texas may request a hearing on Regional Pass-Through Gallonage Charge true-ups/adjustments. It shall not be considered a rate case under the Texas Water Code or PUC (or other regulatory authority) rules, and Texas Water Code § 13.187 shall not apply.
   f) In the event of a dispute or hearing concerning the Regional Pass-Through Gallonage Charge reflected in the tariff page filed with the Report, the filed rate shall be considered effective on an interim basis and previous charges will be adjusted in the next annual true-up, except that adjustments to the pass-through exceeding 50 percent may require immediate refunds or credits as directed by the regulatory authority. If the filed rate is modified pursuant to dispute or hearing resolution, a replacement tariff page shall be filed with the regulatory authority reflecting the modified rate.
   g) Notwithstanding the procedures outlined herein, if the Report indicates an increase to Aqua Texas' Regional Pass-through Gallonage Charge is appropriate for the calendar year assessed, Aqua Texas may elect not to implement the increase. Aqua Texas will submit a written notification of such an election with the Report, indicating the amount of foregone pass through revenues. Foregone pass through revenues due to such election shall not be collected.
   h) This pass through provision is not intended to negate any authority granted to the regulatory authority.

## SECTION 1.0 -- RATE SCHEDULE

Section 1.01 - Rates

| Meter Size | Monthly Minimum Charge (Includes 0 gallons) | Gallonage Charge $3.70 per 1,000 gallons used |
|---|---|---|
| 5/8" or 3/4" | $31.00 | |
| 1" | $87.50 | |
| 1½" | $175.00 | |
| 2" | $280.00 | |
| 3" | $560.00 | |
| 4" | $875.00 | |
| 6" | $1750.00 | |
| 8" | $2800.00 | |
| 10" | $4025.00 | |
| 12" | $8750.00 | |

Monthly minimum charge for any water meter size larger than 12" meter will be calculated using American Water Works Association approved meter equivalency factors.

System Improvement Charge - Not subject to Federal Tax Change Credit Rider.
(Effective October 1, 2023; ***Docket No. 53428)***

| Meter Size | Monthly Charge |
|---|---|
| 5/8" or 3/4" | $3.69 |
| 1" | $9.23 |
| 1½" | $18.45 |
| 2" | $29.52 |
| 3" | $59.04 |
| 4" | $92.25 |
| 6" | $184.50 |
| 8" | $295.20 |
| 10" | $424.35 |
| 12" | $793.35 |

Southeast Regional Pass through Gallonage Charge ..... $3.17 per 1,000 gallons
The calculation for the regional pass through gallonage charge must comply with the formula set out in Exhibit A of the settlement agreement entered into by all parties. Effective with the filing of the 2023 True-Up Report, which must be filed between the end of calendar year 2023 and February 28, 2024, see formula in Appendix D.
*(Tariff Control No. 54810)*

Federal Tax Change Credit Rider: ..... (6.38%) of the monthly retail bill
(Effective May 1, 2018; ***Tariff Control No. 48197***)

Federal Tax Change Credit Rider: ..... (4.58%) of the monthly retail bill
(Effective January 1, 2019; ***Tariff Control No. 48197***)

REGULATORY ASSESSMENT ..... 1.0%

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET 1665
FEB 28 2024
55818

PUC RULES REQUIRE THE UTILITY TO COLLECT A FEE OF ONE PERCENT OF THE RETAIL MONTHLY BILL AND TO REMIT FEE TO THE TEXAS COMMISSION ON ENVIRONMENTAL QUALITY (TCEQ).

## SECTION 1.0 -- RATE SCHEDULE (Continued)

FORM OF PAYMENT: The utility will accept the following forms of payment:

Cash X (if in person), Check X, Money Order X, Credit Card _, Other (specify)

THE UTILITY MAY REQUIRE EXACT CHANGE FOR PAYMENTS AND MAY REFUSE TO ACCEPT PAYMENTS MADE USING MORE THAN $1.00 IN SMALL COINS. A WRITTEN RECEIPT WILL BE GIVEN FOR CASH PAYMENTS.

### Section 1.02 – Miscellaneous Fees

TAP FEE ..... $750.00

THE TAP FEE COVERS THE UTILITY'S COSTS FOR MATERIALS AND LABOR TO INSTALL A STANDARD RESIDENTIAL 5/8" x 3/4" METER. AN ADDITIONAL FEE TO COVER UNIQUE COSTS IS PERMITTED AS LISTED ON THIS TARIFF.

TAP FEE (Unique costs)..... Actual Cost

FOR EXAMPLE, A ROAD BORE FOR CUSTOMERS OUTSIDE OF A SUBDIVISION IS A UNIQUE COST. UNIQUE COSTS WILL BE DETERMINED ON A CASE-BY-CASE BASIS.

TAP FEE (Large Meter)..... Actual Cost

THIS TAP FEE IS BASED ON THE UTILITY'S ACTUAL COST FOR MATERIALS AND LABOR FOR METERS LARGER THAN STANDARD 5/8" x 3/4" METERS. UNIQUE COSTS, SUCH AS ROAD BORES WILL BE CHARGED IN ADDITION TO THIS TAP FEE AT THEIR ACTUAL COST OF INSTALLATION.

RECONNECTION FEE

THE RECONNECT FEE MUST BE PAID BEFORE SERVICE CAN BE RESTORED TO A CUSTOMER WHO HAS BEEN DISCONNECTED FOR THE FOLLOWING REASONS (OR OTHER REASONS LISTED UNDER SECTION 2.0 OF THIS TARIFF):

a) Non-payment of bill (Maximum $25.00)..... $25.00
b) Customer's request ..... $75.00

SERVICE INITIATION FEE ..... $50.00

THE SERVICE INITIATION FEE WILL BE CHARGED FOR INITIATING AN ACCOUNT AT THE SERVICE LOCATION.

LATE CHARGE ..... 10%

PUC RULES ALLOW A ONE-TIME PENALTY MAY BE MADE ON DELINQUENT BILLS. A LATE CHARGE MAY NOT BE APPLIED TO ANY BALANCE TO WHICH THE PENALTY WAS APPLIED IN A PREVIOUS BILLING

RETURNED CHECK CHARGE ..... $25.00

RETURNED CHECK CHARGES MUST BE BASED ON THE UTILITY'S DOCUMENTABLE COST

CUSTOMER DEPOSIT - RESIDENTIAL ..... $50.00

CUSTOMER DEPOSITS - COMMERCIAL OR NON-RESIDENTIAL . 1/6TH OF ESTIMATED ANNUAL BILL

METER TEST FEE..... $25.00

THIS FEE, WHICH SHOULD REFLECT THE UTILITY'S COST MAY BE CHARGED IF A CUSTOMER REQUESTS A SECOND METER TEST WITHIN A TWO-YEAR PERIOD AND THE TEST INDICATES THAT THE METER IS RECORDING ACCURATELY. THE FEE MAY NOT EXCEED $25

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 28 2024
1666
55818

METER SERVICE RELOCATION FEE (Customer's Request) ..... Actual Cost

THIS FEE MAY BE CHARGED IF A CUSTOMER REQUESTS RELOCATION THAT AN EXISTING METER BE RELOCATED.

## SECTION 1.0 -- RATE SCHEDULE (Continued)

STANDARD METER INSTALLATION FEE ..... $150.00

TO BE CHARGED WITH UNMETERED SERVICE EXISTS ON THE SYSTEM THAT SHOULD BE METERED TO BE IN COMPLIANCE WITH THE UTILITY'S TARIFF BUT THE CONVERSION OF THE SERVICE WOULD NOT REQUIRE A FULL TAP AND ALL OF ITS COSTS. THIS FEE WILL BE A SHARING OF COSTS BETWEEN THE CUSTOMER AND THE UTILITY. THE CUSTOMER MAY HAVE THE OPTION OF PAYING THE FEE OVER NO MORE THAN THREE (3) MONTHS.

CUSTOMER SERVICE INSPECTION FEE ..... $100.00

SERVICE APPLICANTS MAY CHOOSE TO HAVE CUSTOMER SERVICE INSPECTIONS REQUIRED BY 30 TAC § 290.46(J) PERFORMED BY ANY STATE-LICENSED INSPECTOR OF THEIR CHOICE. UNLESS THE SERVICE APPLICANT CHOOSES TO ARRANGE FOR AND PAY FOR THE INSPECTION INDEPENDENTLY, THE UTILITY MAY CHARGE SERVICE APPLICANTS THE CUSTOMER SERVICE INSPECTION FEE AT THE TIME THEY APPLY FOR SERVICE. THE UTILITY MAY HAVE THE INSPECTION PERFORMED BY A LICENSED THIRD PARTY CONTRACTOR.

ILLEGAL RECONNECTION, LOCK REMOVAL OR DAMAGE FEE ..... $85.00

IN ORDER TO REIMBURSE THE UTILITY WITHOUT BURDENING OTHER CUSTOMERS WITH HIGHER RATES FOR THE ADDITIONAL COST OF SERVICE TRIPS TO DISCONNECT A CUSTOMER/ACCOUNT HOLDER WHO HAS BEEN DISCONNECTED FOR NONPAYMENT AND TO PAY FOR THE COST OF BROKEN OR CUT LOCKS AND SERVICE TIME, THIS FEE SHALL BE ASSESSED TO THE ACCOUNT HOLDER OF ANY DELINQUENT ACCOUNT THAT HAS BEEN DISONNECTED FOR NONPAYMENT BY VALVING OFF, LOCKING OR REMOVING THE METER WHEN SERVICE TO THE PREMISES IS SUBSEQUENTLY RECONNECTED BY NON-UTILITY PERSONNEL BY CUTTING OR REMOVING THE LOCK, REOPENING THE VALVE, OR REMOVING OR BYPASSING THE METER WITHOUT AUTHORIZATION BY THE UTILITY. THIS FEE MAY BE CHARGED EACH TIME AN EVENT OCCURS AND SERVICE WILL NOT BE RECONNECTED UNTIL THIS FEE IS PAID IN ADDITION TO ANY OTHER BALANCES AND RECONNECT FEES. THIS FEE SHALL NOT BE CHARGED IF A FEE FOR DAMAGED METER IS CHARGED OR IF THE ACCOUNT HOLDER OR HIS/HER REPRESENTATIVE INFORMS THE UTILITY WITHIN 24 HOURS AFTER DISCOVERING THAT SERVICE HAS BEEN RESTORED WITHOUT AUTHORIZATION OF THE UTILITY: (1) THAT SERVICE WAS RECONNECTED WITHOUT THE ACCOUNT HOLDER'S PERMISSION; AND (2) THE ACCOUNT HOLDER AGREES TO PAY FOR ALL WATER USED

DAMAGED METER AND APPURTENANCES FEE ..... Actual Cost

THIS FEE SHALL BE ACCESSED TO THE ACCOUNT HOLDER OF ANY DELINQUENT ACCOUNT THAT HAS BEEN DISCONNECTED FOR NON-PAYMENT BY VALVING OFF OR LOCKING THE METER WHEN THE METER AND/OR METER APPURTENANCES SUCH AS AN AMR UNIT OR THE CURB STOP ARE DAMAGED IN ORDER TO RESTORE WATER SERVICE TO THE ACCOUNT HOLDER'S ORIGINAL PLACE OF SERVICE REQUIRING THE UTILITY TO REPAIR OR REPLACE THEM. THE ACCOUNT HOLDER SHALL BE CHARGED THE FULL COST OF REPAIRING AND/OR REPLACING ALL DAMAGED PARTS AS THE UTILITY DEEMS NECESSARY, INCLUDING LABOR AND VEHICLE COSTS THIS WILL INCLUDE REPLACEMENT OF METERS THAT HAVE HAD THEIR LOCKING EYES BROKEN OFF THE FLANGES.

GOVERNMENTAL TESTING, INSPECTION AND COSTS SURCHARGE CLAUSE:

WHEN AUTHORIZED IN WRITING BY PUC AND AFTER NOTICE TO CUSTOMERS, THE UTILITY MAY INCREASE RATES TO RECOVER INCREASED COSTS FOR INSPECTION FEES AND WATER TESTING. [16 TAC § 24.25(b)(2)(G)]

LINE EXTENSION AND CONSTRUCTION CHARGES:

REFER TO SECTION 3.0--EXTENSION POLICY FOR TERMS, CONDITIONS, AND CHARGES WHEN NEW CONSTRUCTION IS NECESSARY TO PROVIDE SERVICE.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET

SECTION 1.0 -- RATE SCHEDULE (Continued)

REGIONAL TEMPORARY WATER RATE:

UNLESS OTHERWISE SUPERSEDED BY PUC ORDER OR RULE, IF THE UTILITY IS ORDERED BY A COURT OR GOVERNMENTAL BODY OF COMPETENT JURISDICTION TO REDUCE ITS PUMPAGE, PRODUCTION OR WATER SALES, AQUA TEXAS SHALL BE AUTHORIZED TO INCREASE ITS APPROVED LINE ITEM CHARGES PER 1,000 GALLONS USED (GALLONAGE CHARGE & REGIONAL PASS-THROUGH GALLONAGE CHARGE) BY THE AMOUNT OF THE REGIONAL TEMPORARY RATE INCREASE ("RTWR") CALCULATED ACCORDING TO THE FORMULA

$$RTWR = (((PRR)(CGC)(R))/(1.0-R))*((APV)/(RPV))$$

Where:

RTWR = Regional Temporary Water Rate increase per 1,000 gallons

CGC = current total volume charge per 1,000 gallons used (Gallonage Charge + Regional Pass-Through gallonage charge)

R = water use reduction expressed as a decimal fraction (the pumping restriction)

PRR = percentage of revenues to be recovered expressed as a decimal fraction, for this tariff PRR shall equal 0.5.

APV = Annual pumped and/or purchased volume from the most recent rate application for the system or systems where the temporary restrictions are imposed; or the most recent 12 months if more than 3 years have passed since the most recent rate application was filed; and

RPV = Annual pumped and purchased volume for Region from the most recent rate application; or the most recent 12 months if more than 3 years have passed since the most recent rate application was filed.

To implement the Regional Temporary Water Rate, Aqua Texas must comply with all notice and other requirements of 16 TAC § 24.25(j).

FEDERAL TAX CHANGE CREDIT RIDER (FTCCR):

The Federal Tax Change Credit Rider gives effect to the Tax Cuts and Jobs Act of 2017, which changed the federal corporate tax rate from 35% to 21%, by reducing the cost of service paid by customers taking service under this rate tariff. The FTCCR will provide credits to customers taking service under this rate tariff.

SECTION 1.0 -- RATE SCHEDULE (Continued)

REGIONAL PASS-THROUGH GALLONAGE CHARGE ADJUSTMENT:

INCREASES OR DECRESES IN COSTS, FEES, RATES AND CHARGES IMPOSED BY GOVERNMENTAL ENTITIES, WATER AUTHORITIES OR DISTRICTS HAVING JURISDICTION OVER AQUA TEXAS OR ITS OPERATIONS OR BY NON-AFFILIATED THIRD PARTY WATER SUPPLIERS OR WATER RIGHTS HOLDERS SELLING WATER OR WATER RIGHTS TO AQUA TEXAS SHALL BE PASSED THROUGH ON A REGIONAL BASIS AS A LINE ITEM REGIONAL PASS-THROUGH GALLONAGE CHARGE OR AN ADJUSTMENT TO THE EXISTING REGIONAL PASS-THROUGH GALLONAGE CHARGE USING THE FOLLOWING FORMULA:

NRPTGC = ORPTGC (+/-) CRPTGC

Where:

NRPTGC = New Regional Pass-Through Gallonage Charge;

ORPTGC = Original Regional Pass-Through Gallonage Charge;

CRPTGC = Change in Regional Pass-Through Gallonage Charge; and
CRPTGC = ((NVC + (VC*APV))/(RPV))/(1-WL) Sum of all changes (all increases or decreases) since the last adjustment in costs, fees, rates, and charges divided by the Regional Pumped and Purchases Volume divided by one minus water loss;

APV = Annual Pumped and/or Purchased Volume from the most recent rate application for the system or systems where the changes in costs, fees, rates, and charges occurred; or the most recent 12 months if more than 3 years have passed since the most recent rate application was filed;

RPV = Annual Pumped and/or Purchased Volume for Region from the most recent rate application; or the most recent 12 months if more than 3 years have passed since the most recent rate application was filed;

WL = Annual water loss average for Region in most recent rate application not to exceed 0.15; or water loss, not to exceed 0.15, for the most recent 12 months if more than 3 years have passed since the most recent application was filed;

NVC = Annual non-volumetric cost change = annual increases or decreases in costs, fees, rates, and charges that are not based on water purchased, pumped and/or billed;

VC = Volumetric Cost change = volumetric cost increases or decreases from costs, fees, rates, and charges based on water purchased, pumped and/or billed.

*Effective with the filing of the 2023 True-Up Report, which must be filed between the end of calendar year 2023 and February 28, 2024, see formula in Appendix D (***Tariff Control No. 54810)***

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED

SECTION 1.0 -- RATE SCHEDULE (Continued)

To implement a new Regional Pass-Through Gallonage Charge, Aqua Texas shall take the following actions:

1. Prior to the beginning of the billing period in which the revision takes place, submit written notice to the PUC with documentation supporting the line item Regional Pass-Through Gallonage Charge adjustment; and
2. Mail notice to affected customers separately at the beginning of the billing period or include written notice to affected customers with the billing sent out at the beginning of the billing period in which the new Regional Pass-Through Gallonage Charge becomes effective. The notice must contain: (a) the effective date of the change, (b) the then-present calculation of the line item Regional Pass-Through Gallonage Charge, (c) the new calculation of the line item Regional Pass-Through Gallonage Charge, and (d) the change in costs, fees, rates, or charges to Aqua Texas prompting the adjustment to the line item Regional Pass-Through Gallonage Charge.

The notice will include the following language:

"This tariff change is being implemented in accordance with Aqua Texas' approved Regional Pass-Through Gallonage Charge Adjustment provision to recognize (increases)(decreases) in the (costs), (fees), (rates) and (charges) imposed by (governmental entities), (water authorities) or (districts) (having jurisdiction over Aqua Texas or its operations) or (by non-affiliated third-party) (water suppliers) or (water rights holders) (selling water) or (water rights) to Aqua Texas. The cost of these charges to customers will not exceed the (increased)(decreased) cost of the (costs), (fees), (rates) and (charges) to Aqua Texas."

The process of implementing the Regional Pass-Through Gallonage Charge Adjustment provision and the Executive Director's review of a proposed revision to Aqua Texas' line item Regional Pass-Through Gallonage Charge is an informal proceeding and not a contested case hearing. Only the Commission or Aqua Texas may request a hearing on the proposed revision. It shall not be considered a rate case under the Texas Water Code or PUC rules, and Texas Water Code § 13.187 shall not apply.

*Effective with the filing of the 2023 True-Up Report, which must be filed between the end of calendar year 2023 and February 28, 2024, see formula in Appendix D ***(Tariff Control No. 54810)***

THIS FEE, WHICH SHOULD REFLECT THE UTILITY'S COST, MAY BE CHARGED IF A CUSTOMER REQUESTS A SECOND METER TEST WITHIN A TWO-YEAR PERIOD AND THE TEST INDICATES THAT THE METER IS RECORDING ACCURATELY. THE FEE MAY NOT EXCEED $25.

METER/SERVICE RELOCATION FEE (Customer's Request) ..... Actual Cost

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED 1672
DOC
FEB 28 2024 55818

THIS FEE MAY BE CHARGED IF A CUSTOMER REQUESTS THAT AN EXISTING METER BE RELOCATED.

## SECTION 1.0 -- RATE SCHEDULE (Continued)

STANDARD METER INSTALLATION FEE ..... $150.00

TO BE CHARGED WHEN UNMETERED SERVICE EXISTS ON THE SYSTEM THAT SHOULD BE METERED TO BE IN COMPLIANCE WITH THE UTILITY'S TARIFF BUT THE CONVERSION OF THE SERVICE WOULD NOT REQUIRE A FULL TAP AND ALL OF ITS COSTS THIS FEE WILL BE A SHARING OF COSTS BETWEEN THE CUSTOMER AND THE UTILITY. THE CUSTOMER MAY HAVE THE OPTION OF PAYING THE FEE OVER NO MORE THAN THREE (3) MONTHS.

CUSTOMER SERVICE INSPECTION FEE ..... $100.00

SERVICE APPLICANTS MAY CHOOSE TO HAVE CUSTOMER SERVICE INSPECTIONS REQUIRED BY 30 TAC § 290.46(j) PERFORMED BY ANY STATE LICENSED INSPECTOR OF THEIR CHOICE. UNLESS THE SERVICE APPLICANT CHOOSES TO ARRANGE FOR AND PAY FOR THE INSPECTION INDEPENDENTLY, THE UTILITY MAY CHARGE SERVICE APPLICANTS THE CUSTOMER SERVICE INSPECTION FEE AT THE TIME THEY APPLY FOR SERVICE IF A RE-INSPECTION IS REQUIRED TO BRING PLUMBING INTO COMPLIANCE WITH APPLICABLE REQUIREMENTS OR IF AN EXTRA INSPECTION APPOINTMENT IS REQUIRED BECAUSE A CUSTOMER DOES NOT PERMIT PERFORMANCE OF AN INSPECTION AT A PREVIOUSLY AGREED UPON APPOINTMENT TIME, THE CUSTOMER MAY CHOOSE TO HAVE ANY STATE LICENSED INSPECTOR OF THEIR CHOICE PERFORM THE INSPECTION IF THE CUSTOMER CHOOSES TO HAVE THE UTILITY PERFORM THE INSPECTION OR RE-INSPECTION, THE CUSTOMER WILL BE CHARGED $100.00 FOR EACH REQUIRED INSPECTION, RE-INSPECTION OR AGREED UPON INSPECTION APPOINTMENT AND WILL PAY THE UTILITY THE TOTAL AMOUNT OWED AT THE TIME AN INSPECTION OR RE-INSPECTION IS PERFORMED. THE UTILITY MAY, AT ITS OPTION, INCLUDE THE ADDITIONAL CHARGE OR CHARGES ON THE NEXT MONTH'S UTILITY BILL RATHER THAN REQUIRING PAYMENT AT THE TIME OF THE INSPECTION OR RE-INSPECTION. THE UTILITY MAY USE UTILITY EMPLOYEES OR MAY HAVE THE INSPECTION PERFORMED BY A LICENSED THIRD-PARTY CONTRACTOR

ILLEGAL RECONNECTION, LOCK REMOVAL OR DAMAGE FEE ..... $85.00

IN ORDER TO REIMBURSE THE UTILITY WITHOUT BURDENING OTHER CUSTOMERS WITH HIGHER RATES FOR THE ADDITIONAL COST OF SERVICE TRIPS TO DISCONNECT A CUSTOMER/ACCOUNT HOLDER WHO HAS BEEN DISCONNECTED FOR NONPAYMENT AND TO PAY FOR THE COST OF BROKEN OR CUT LOCKS AND SERVICE TIME, THIS FEE SHALL BE ASSESSED TO THE ACCOUNT HOLDER OF ANY DELINQUENT ACCOUNT THAT HAS BEEN DISCONNECTED FOR NONPAYMENT BY VALVING OFF, LOCKING OR REMOVING THE METER WHEN SERVICE TO THE PREMISES IS SUBSEQUENTLY RECONNECTED BY NON-UTILITY PERSONNEL BY CUTTING OR REMOVING THE LOCK, REOPENING THE VALVE, OR REMOVING OR BYPASSING THE METER WITHOUT AUTHORIZATION BY THE UTILITY. THIS FEE MAY BE CHARGED EACH TIME AN EVENT OCCURS AND SERVICE WILL NOT BE RECONNECTED UNTIL THIS FEE IS PAID IN ADDITION TO ANY OTHER BALANCES AND RECONNECT FEES THIS FEE SHALL NOT BE CHARGED IF A FEE FOR A DAMAGED METER IS CHARGED OR IF THE ACCOUNT HOLDER OR HIS/HER REPRESENTATIVE INFORMS THE UTILITY WITHIN 24 HOURS AFTER DISCOVERING THAT SERVICE HAS BEEN RESTORED WITHOUT AUTHORIZATION OF THE UTILITY: (1) THAT SERVICE WAS RECONNECTED WITHOUT THE ACCOUNT HOLDER'S PERMISSION; AND (2) THE ACCOUNT HOLDER AGREES TO PAY FOR ALL WATER USED.

DAMAGED METER AND APPURTENANCES FEE ..... Actual cost

THIS FEE SHALL BE ASSESSED TO THE ACCOUNT HOLDER OF ANY DELINQUENT ACCOUNT THAT HAS BEEN DISCONNECTED FOR NONPAYMENT BY VALVING OFF OR LOCKING THE METER WHEN THE METER AND/OR METER APPURTENANCES, SUCH AS AN AMR UNIT OR CURB STOP, ARE DAMAGED IN ORDER TO RESTORE WATER SERVICE TO THE ACCOUNT HOLDER'S ORIGINAL PLACE OF SERVICE REQUIRING THE UTILITY TO REPAIR OR REPLACE THEM THE ACCOUNT HOLDER SHALL BE CHARGED THE FULL COST OF REPAIRING AND/OR REPLACING ALL DAMAGED PARTS AS THE UTILITY DEEMS NECESSARY, INCLUDING LABOR AND VEHICLE COSTS THIS WILL INCLUDE REPLACEMENT OF VALVES OR CURB STOPS THAT HAVE HAD THEIR LOCKING EYES BROKEN OFF THE FLANGES.

GOVERNMENTAL TESTING, INSPECTION AND COSTS SURCHARGE:

WHEN AUTHORIZED IN WRITING BY PUC AND AFTER NOTICE TO CUSTOMERS, THE UTILITY MAY INCREASE RATES TO RECOVER INCREASED COSTS FOR INSPECTION FEES AND WATER TESTING. [16 TAC § 24.25(b)(2)(G)]

SECTION 1.0 -- RATE SCHEDULE (Continued)

LINE EXTENSION AND CONSTRUCTION CHARGES:

REFER TO SECTION 3.0--EXTENSION POLICY FOR TERMS, CONDITIONS, AND CHARGES WHEN NEW CONSTRUCTION IS NECESSARY TO PROVIDE SERVICE.

REGIONAL TEMPORARY WATER RATE:

UNLESS OTHERWISE SUPERSEDED BY PUC ORDER OR RULE, IF THE UTILITY IS ORDERED BY A COURT OR GOVERNMENTAL BODY OF COMPETENT JURISDICTION TO REDUCE ITS PUMPAGE, PRODUCTION OR WATER SALES, AQUA TEXAS SHALL BE AUTHORIZED TO INCREASE ITS APPROVED LINE ITEM CHARGES PER 1,000 GALLONS USED (GALLONAGE CHARGE & REGIONAL PASS-THROUGH GALLONAGE CHARGE) BY THE AMOUNT OF THE REGIONAL TEMPORARY WATER RATE INCREASE ("RTWR") CALCULATED ACCORDING TO THE FORMULA:

$$RTWR = (((PRR)(CGC)(R))/(1-R))*((APV)/(RPV))$$

Where:

| | | |
|---|---|---|
| RTWR | = | Regional Temporary Water Rate increase per 1,000 gallons |
| CGC | = | current total volume charge per 1,000 gallons used (Gallonage Charge + Regional Pass-Through gallonage charge) |
| R | = | water use reduction expressed as a decimal fraction (the pumping restriction) |
| PRR | = | percentage of revenues to be recovered expressed as a decimal fraction, for this tariff PRR shall equal 0.5. |
| APV | = | Annual Pumped and/or Purchased volume from the most recent rate application for the system or systems where the temporary restrictions are imposed; or the most recent 12 months if more than 3 years have passed since the most recent rate application was filed; and |
| RPV | = | Annual Pumped and Purchased volume for Region from the most recent rate application; or the most recent 12 months if more than 3 years have passed since the most recent rate application was filed |

To implement the Regional Temporary Water Rate, Aqua Texas must comply with all notice and other requirements of 16 TAC § 24.25(j).

FEDERAL TAX CHANGE CREDIT RIDER (FTCCR):

The Federal Tax Change Credit Rider gives effect to the Tax Cuts and Jobs Act of 2017, which changed the federal corporate tax rate from 35% to 21%, by reducing the cost of service paid by customers taking service under this rate tariff. The FTCCR will provide credits to customers taking service under this rate tariff.

REGIONAL PASS-THROUGH CHARGE ADJUSTMENT:

See Appendix C attached to Aqua Texas, Inc. CCN No. 13254 Water Utility Tariff for Southwest Region.

## SECTION 1.0 -- RATE SCHEDULE

### Section 1.01 - Rates

| Meter Size | Monthly Minimum Charge | Gallonage Charge |
|---|---|---|
| ⅝" or ¾" | $35.50 (Includes 5,000 gallons) | $1.90 per 1,000 gallons, 5,001-10,000 gallons |
| 1" | $35.50 | $3.05 per 1,000 gallons, 10,001-15,000 gallons |
| 1½" | $35.50 | $3.95 per 1,000 gallons, 15,001 gallons or more |
| 2" | $35.50 | |

Rates for System Improvement Charge - Not subject to Federal Tax Change Credit Rider.
(Effective October 1, 2023; ***Docket No. 53428***)

| Meter Size | Monthly Charge |
|---|---|
| 5/8" or 3/4" | $3.69 |
| 1" | $9.23 |
| 1½" | $18.45 |
| 2" | $29.52 |

The City of Houston Groundwater Reduction Plan (GRP) fee..... $.1.21 per each 1,000 gallons
***(Tariff Control No.54810)***

FORM OF PAYMENT: The utility will accept the following forms of payment:
Cash _X_, Check _X_, Money Order _X_, Credit Card _X_
THE UTILITY MAY REQUIRE EXACT CHANGE FOR PAYMENTS AND MAY REFUSE TO ACCEPT PAYMENTS MADE USING MORE THAN $1.00 IN SMALL COINS. A WRITTEN RECEIPT WILL BE GIVEN FOR CASH PAYMENTS.

REGULATORY ASSESSMENT ..... 1.0%
PUC RULES REQUIRE THE UTILITY TO COLLECT A FEE OF ONE PERCENT OF THE RETAIL MONTHLY BILL.

### Section 1.02 - Miscellaneous Fees

TAP FEE ..... $1,100.00
TAP FEE COVERS THE UTILITY'S COSTS FOR MATERIALS AND LABOR TO INSTALL A STANDARD RESIDENTIAL 5/8" OR 3/4" METER. AN ADDITIONAL FEE TO COVER UNIQUE COSTS IS PERMITTED IF LISTED ON THIS TARIFF.

TAP FEE (Unique costs)..... Actual Cost
FOR EXAMPLE, A ROAD BORE FOR CUSTOMERS OUTSIDE OF SUBDIVISIONS OR RESIDENTIAL AREAS

TAP FEE (Large meter) ..... Actual Cost
TAP FEE IS THE UTILITY'S ACTUAL COST FOR MATERIALS AND LABOR FOR METER SIZE INSTALLED

METER RELOCATION FEE ..... Actual Relocation Cost, Not to Exceed Tap Fee
THIS FEE MAY BE CHARGED IF A CUSTOMER REQUESTS THAT AN EXISTING METER BE RELOCATED.

METER TEST FEE..... $25.00

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 28 2024
DOCKET
55818
1675

THIS FEE WHICH SHOULD REFLECT THE UTILITY'S COST MAY BE CHARGED IF A CUSTOMER REQUESTS A SECOND METER TEST WITHIN A TWO-YEAR PERIOD AND THE TEST INDICATES THAT THE METER IS RECORDING ACCURATELY. THE FEE MAY NOT EXCEED $25.00.

SECTION 1.0 -- RATE SCHEDULE (Continued)

RECONNECTION FEE

THE RECONNECT FEE MUST BE PAID BEFORE SERVICE CAN BE RESTORED TO A CUSTOMER WHO HAS BEEN DISCONNECTED FOR THE FOLLOWING REASONS (OR OTHER REASONS LISTED UNDER SECTION 2.0 OF THIS TARIFF):

a) Non-payment of bill (Maximum $25.00) ..... $25.00
b) Customer's request that service be disconnected ..... $15.00

SERVICE INITIATION FEE ..... $15.00

THE SERVICE INITIATION FEE WILL BE CHARGED FOR INITIATING AN ACCOUNT AT THE SERVICE LOCATION.

LATE CHARGE (EITHER $5.00 OR 10% OF THE BILL) ..... 10%

PUC RULES ALLOW A ONE-TIME PENALTY TO BE CHARGED ON DELINQUENT BILLS. A LATE CHARGE MAY NOT BE APPLIED TO ANY BALANCE TO WHICH THE PENALTY WAS APPLIED IN A PREVIOUS BILLING.

RETURNED CHECK CHARGE ..... $25.00

RETURNED CHECK CHARGES MUST BE BASED ON THE UTILITY'S DOCUMENTABLE COST.

CUSTOMER DEPOSIT RESIDENTIAL (Maximum $50) ..... $50.00

COMMERCIAL & NON-RESIDENTIAL DEPOSIT ..... 1/6th of estimated annual bill

GOVERNMENTAL TESTING, INSPECTION AND COSTS SURCHARGE:

WHEN AUTHORIZED IN WRITING BY THE PUC AND AFTER NOTICE TO CUSTOMERS, THE UTILITY MAY INCREASE RATES TO RECOVER INCREASED COSTS FOR INSPECTION FEES AND WATER TESTING. [16 TAC § 24.25 (b)(2)](G)

LINE EXTENSION AND CONSTRUCTION CHARGES:

REFER TO SECTION 3.0--EXTENSION POLICY FOR TERMS, CONDITIONS, AND CHARGES WHEN NEW CONSTRUCTION IS NECESSARY TO PROVIDE SERVICE.

**Pass Through Provision**:

For Utilities subject to changes in costs imposed by any non-affiliated provider of purchased water or sewer or a groundwater conservation district having jurisdiction over the Utility, these increases (decreases) shall be passed through as an adjustment to the gallonage charge according to the formula:

AG = G + B/(1-L)

Where:

AG = adjusted gallonage charge, rounded to nearest one cent
G = approved gallonage charge, per 1,000 gallons
B = changed in fee (per 1,000 gallons)
L = water or sewer line loss for preceding 12 months, not to exceed 0.15 (15%)

THE UTILITY MAY REQUIRE EXACT CHANGE FOR PAYMENTS AND MAY REFUSE TO ACCEPT PAYMENTS MADE USING MORE THAN $1.00 IN SMALL COINS. A WRITTEN RECEIPT WILL BE GIVEN FOR CASH PAYMENTS.

UNAFFILIATED THIRD PARTIES WHO ACCEPT AND PROCESS CASH, CREDIT CARD, OR ELECTRONIC PAYMENTS FOR UTILITY BILLS MAY REQUIRE PAYMENT OF AN ADDITIONAL CONVENIENCE CHARGE FOR THIS SERVICE

REGULATORY ASSESSMENT ..... 1.0%
PUC RULES REQUIRE THE UTILITY TO COLLECT A FEE OF ONE PERCENT OF THE RETAIL MONTHLY BILL AND TO REMIT FEE TO THE TCEQ

Section 1.02 - Miscellaneous Fees

TAP FEE ..... $750.00
THE TAP FEE COVERS THE UTILITY'S COSTS FOR MATERIALS AND LABOR TO INSTALL A STANDARD RESIDENTIAL 5/8" x 3/4" METER. AN ADDITIONAL FEE TO COVER UNIQUE COSTS IS PERMITTED IF LISTED ON THIS TARIFF

TAP FEE (Unique costs) ..... Actual Cost
FOR EXAMPLE, A ROAD BORE FOR CUSTOMERS OUTSIDE A SUBDIVISION IS A UNIQUE COST. UNIQUE COSTS WILL BE DETERMINED ON A CASE-BY-CASE BASIS.

TAP FEE (Large meter) ..... Actual Cost
THIS TAP FEE IS BASED ON THE UTILITY'S ACTUAL COST FOR MATERIALS AND LABOR FOR METERS LARGER THAN STANDARD 5/8" x 3/4" METERS. UNIQUE COSTS, SUCH AS ROAD BORES, WILL BE CHARGED IN ADDITION TO THIS TAP FEE AT THEIR ACTUAL COST OF INSTALLATION.

RECONNECTION FEE
THE RECONNECT FEE MUST BE PAID BEFORE SERVICE CAN BE RESTORED TO A CUSTOMER WHO HAS BEEN DISCONNECTED FOR THE FOLLOWING REASONS (OR OTHER REASONS LISTED UNDER SECTION 2.0 OF THIS TARIFF):
a) Non-payment of bill (Maximum $25.00) ..... $25.00
b) Customer's request that service be disconnected ..... $75.00

SERVICE INITIATION FEE ..... $50.00
THE SERVICE INITIATION FEE WILL BE CHARGED FOR INITIATING AN ACCOUNT AT THE SERVICE LOCATION

LATE CHARGE ..... 10%
PUC RULES ALLOW A ONE-TIME PENALTY TO BE CHARGED ON DELINQUENT BILLS. A LATE CHARGE MAY NOT BE APPLIED TO ANY BALANCE TO WHICH THE PENALTY WAS APPLIED IN A PREVIOUS BILLING.

RETURNED CHECK CHARGE ..... $25.00
RETURNED CHECK CHARGES MUST BE BASED ON THE UTILITY'S DOCUMENTABLE COST.

CUSTOMER DEPOSIT - RESIDENTIAL ..... $50.00

CUSTOMER DEPOSIT - COMMERCIAL & NON-RESIDENTIAL . 1/6TH OF ESTIMATED ANNUAL BILL

METER TEST FEE ..... $25.00
THIS FEE, WHICH SHOULD REFLECT THE UTILITY'S COST, MAY BE CHARGED IF A CUSTOMER REQUESTS A SECOND METER TEST WITHIN A TWO-YEAR PERIOD AND THE TEST INDICATES THAT THE METER IS RECORDING ACCURATELY THE FEE MAY NOT EXCEED $25.

SECTION 1.0 -- RATE SCHEDULE (Continued)

METER/SERVICE RELOCATION FEE (Customer's Request) ..... Actual Cost

THIS FEE MAY BE CHARGED IF A CUSTOMER REQUESTS THAT AN EXISTING METER BE RELOCATED.

STANDARD METER INSTALLATION FEE ..... $150.00

TO BE CHARGED WHEN UNMETERED SERVICE EXISTS ON THE SYSTEM THAT SHOULD BE METERED TO BE IN COMPLIANCE WITH THE UTILITY'S TARIFF BUT THE CONVERSION OF THE SERVICE WOULD NOT REQUIRE A FULL TAP AND ALL OF ITS COSTS. THIS FEE WILL BE A SHARING OF COSTS BETWEEN THE CUSTOMER AND THE UTILITY. THE CUSTOMER MAY HAVE THE OPTION OF PAYING THE FEE OVER NO MORE THAN THREE (3) MONTHS.

CUSTOMER SERVICE INSPECTION FEE (RESIDENTIAL) ..... $100.00

CUSTOMER SERVICE INSPECTION FEE ..... Actual cost not to exceed $150.00
COMMERCIAL AND NON-RESIDENTIAL

SERVICE APPLICANTS MAY CHOOSE TO HAVE CUSTOMER SERVICE INSPECTIONS REQUIRED BY TCEQ RULE § 290.46(J) PERFORMED BY ANY STATE-LICENSED INSPECTOR OF THEIR CHOICE.UNLESS THE SERVICE APPLICANT CHOOSES TO ARRANGE FOR AND PAY FOR THE INSPECTION INDEPENDENTLY, THE UTILITY MAY CHARGE SERVICE APPLICANTS THE CUSTOMER SERVICE INSPECTION FEE AT THE TIME THEY APPLY FOR SERVICE. IF A RE-INSPECTION IS REQUIRED TO BRING THE PLUMBING INTO COMPLIANCE WITH APPLICABLE REQUIREMENTS OR IF AN EXTRA INSPECTION APPOINTMENT IS REQUIRED BECAUSE A CUSTOMER DOES NOT PERMIT PERFORMANCE OF AN INSPECTION AT A PREVIOUSLY AGREED UPON APPOINTMENT TIME, THE CUSTOMER MAY CHOOSE TO HAVE ANY STATE-LICENSED INSPECTOR OF THEIR CHOICE PERFORM THE INSPECTION. IF THE CUSTOMER CHOOSES TO HAVE THE UTILITY PERFORM THE INSPECTION OR RE-INSPECTION, THE CUSTOMER WILL BE CHARGED $100.00 FOR EACH REQUIRED INSPECTION, RE-INSPECTION OR AGREED UPON INSPECTION APPOINTMENT AND WILL PAY THE UTILITY THE TOTAL AMOUNT OWED AT THE TIME AN INSPECTION OR RE-INSPECTION IS PERFORMED. THE UTILITY MAY, AT ITS OPTION, INCLUDE THE ADDITIONAL CHARGE OR CHARGES ON THE NEXT MONTH'S UTILITY BILL RATHER THAN REQUIRING PAYMENT AT THE TIME OF THE INSPECTION OR RE-INSPECTION. THE UTILITY MAY USE UTILITY EMPLOYEES OR MAY HAVE THE INSPECTION PERFORMED BY A LICENSED THIRD PARTY CONTRACTOR.

ILLEGAL RECONNECTION, LOCK REMOVAL OR DAMAGE FEE ..... $85.00

IN ORDER TO REIMBURSE THE UTILITY WITHOUT BURDENING OTHER CUSTOMERS WITH HIGHER RATES FOR THE ADDITIONAL COST OF SERVICE TRIPS TO DISCONNECT A CUSTOMER/ACCOUNT HOLDER WHO HAS BEEN DISCONNECTED FOR NONPAYMENT AND TO PAY FOR THE COST OF BROKEN OR CUT LOCKS AND SERVICE TIME, THIS FEE SHALL BE ASSESSED TO THE ACCOUNT HOLDER OF ANY DELINQUENT ACCOUNT THAT HAS BEEN DISCONNECTED FOR NONPAYMENT BY VALVING OFF, LOCKING OR REMOVING THE METER WHEN SERVICE TO THE PERMISES IS SUBSEQUENTLY RECONNECTED BY NON-UTILITY PERSONNEL BY CUTTING OR REMOVING THE LOCK, REOPENING THE VALVE, OR REMOVING OR BYPASSING THE METER WITHOUT AUTHORIZATION BY THE UTILITY. THIS FEE MAY BE CHARGED EACH TIME AN EVENT OCCURS AND SERVICE WILL NOT BE RECONNECTED UNTIL THIS FEE IS PAID IN ADDITION TO ANY OTHER BALANCES AND RECONNECT FEES. THIS FEE SHALL NOT BE CHARGED IF A FEE FOR A DAMAGED METER IS CHARGED OR IF THE ACCOUNT HOLDER OR HIS/HER REPRESENTATIVE INFORMS THE UTILITY WITHIN 24 HOURS AFTER DISCOVERING THAT SERVICE HAS BEEN RESTORED WITHOUT AUTHORIZATION OF THE UTILITY. (1) THAT SERVICE WAS RECONNECTED WITHOUT THE ACCOUNT HOLDER'S PERMISSION: AND (2) THE ACCOUNT HOLDER AGREES TO PAY FOR ALL WATER USED.

DAMAGED METER AND APPURTENANCES FEE ..... Actual cost

THIS FEE SHALL BE ASSESSED TO THE ACCOUNT HOLDER OF ANY DELINQUENT ACCOUNT THAT HAS BEEN DISCONNECTED FOR NONPAYMENT BY VALVING OFF OR LOCKING THE METER WHEN THE METER AND/OR METER APPURTENANCES SUCH AS AN AMR UNIT OR CURB STOP ARE DAMAGED IN ORDER TO RESTORE WATER SERVICE TO THE ACCOUNT HOLDER'S ORIGINAL PLACE OF SERVICE REQUIRING THE UTILITY TO REPAIR OR REPLACE THEM. THE ACCOUNT HOLDER SHALL BE CHARGED THE FULL COST OF REPAIRING AND/OR REPLACING ALL DAMAGED PARTS AS THE UTILITY DEEMS NECESSARY, INCLUDING LABOR AND VEHICLE COSTS. THIS WILL INCLUDE REPLACEMENT OF VALVES OR CURB STOPS THAT HAVE HAD THEIR LOCKING EYES BROKEN OFF THE FLANGES.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED

SECTION 1.0 -- RATE SCHEDULE (Continued)

GOVERNMENTAL TESTING, INSPECTION, AND COSTS SURCHARGE:

WHEN AUTHORIZED IN WRITING BY PUC AND AFTER NOTICE TO CUSTOMERS, THE UTILITY MAY INCREASE RATES TO RECOVER INCREASED COSTS FOR INSPECTION FEES AND WATER TESTING. [16 TAC § 24.21(b)(2)(F)]

LINE EXTENSION AND CONSTRUCTION CHARGES:

REFER TO SECTION 3.0--EXTENSION POLICY FOR TERMS, CONDITIONS, AND CHARGES WHEN NEW CONSTRUCTION IS NECESSARY TO PROVIDE SERVICE.

REGIONAL TEMPORARY WATER RATE:

UNLESS OTHERWISE SUPERSEDED BY PUC ORDER OR RULE, IF THE UTILITY IS ORDERED BY A COURT OR GOVERNMENTAL BODY OF COMPETENT JURISDICTION TO REDUCE ITS PUMPAGE, PRODUCTION OR WATER SALES, AQUA TEXAS SHALL BE AUTHORIZED TO INCREASE ITS APPROVED LINE ITEM CHARGES PER 1,000 GALLONS USED (GALLONAGE CHARGE & REGIONAL PASS-THROUGH GALLONAGE CHARGE) BY THE AMOUNT OF THE REGIONAL TEMPORARY WATER RATE INCREASE ("RTWR") CALCULATED ACCORDING TO THE FORMULA

$$RTWR = (((PRR)(CGC)(R))/(1-R))*((APV)/(RPV))$$

Where:

| | | |
|---|---|---|
| RTWR | = | Regional Temporary Water Rate increase per 1,000 gallons |
| CGC | = | current total volume charge per 1,000 gallons used (Gallonage Charge + Regional Pass-Through gallonage charge) |
| R | = | water use reduction expressed as a decimal fraction (the pumping restriction) |
| PRR | = | percentage of revenues to be recovered expressed as a decimal fraction, for this tariff PRR shall equal 0.5. |
| APV | = | Annual Pumped and/or Purchased volume from the most recent rate application for the system or systems where the temporary restrictions are imposed; or the most recent 12 months if more than 3 years have passed since the most recent rate application was filed; and |
| RPV | = | Annual Pumped and Purchased volume for Region from the most recent rate application; or the most recent 12 months if more than 3 years have passed since the most recent rate application was filed |

To implement the Regional Temporary Water Rate, Aqua Texas must comply with all notice and other requirements of 16 TAC § 24.21(l).

FEDERAL TAX CHANGE CREDIT RIDER (FTCCR):

The Federal Tax Change Credit Rider gives effect to the Tax Cuts and Jobs Act of 2017, which changed the federal corporate tax rate from 35% to 21%, by reducing the cost of service paid by customers taking service under this rate tariff. The FTCCR will provide credits to customers taking service under this rate tariff.

PUBLIC UTILITY COMMISSION OF TEXAS

SECTION 1.0 -- RATE SCHEDULE (Continued)

REGIONAL PASS-THROUGH GALLONAGE CHARGE ADJUSTMENT:

INCREASES OR DECREASES IN COSTS, FEES, RATES AND CHARGES IMPOSED BY GOVERNMENTAL ENTITIES, WATER AUTHORITIES OR DISTRICTS HAVING JURISDICTION OVER AQUA TEXAS OR ITS OPERATIONS OR BY NON-AFFILIATED THIRD PARTY WATER SUPPLIERS OR WATER RIGHTS HOLDERS SELLING WATER OR WATER RIGHTS TO AQUA TEXAS SHALL BE PASSED THROUGH ON A REGIONAL BASIS AS A LINE ITEM REGIONAL PASS-THROUGH GALLONAGE CHARGE OR AN ADJUSTMENT TO THE EXISTING REGIONAL PASS-THROUGH GALLONAGE CHARGE USING THE FOLLOWING FORMULA.

NRPTGC = ORPTGC (+/-) CRPTGC

Where:

NRPTGC = New Regional Pass-Through Gallonage Charge;
ORPTGC = Original Regional Pass-Through Gallonage Charge from last rate application or pass-through adjustment application;
CRPTGC = Change in Regional Pass-Through Gallonage Charge; and,

CRPTGC = ((NVC+(VC*APV))/(RPV))/(1-WL)
Sum of all changes (all increases or decreases) since last adjustment in costs, fees, rates and charges divided by the Regional Pumped and Purchased Volume divided by one minus water loss;

APV = Annual Pumped and/or Purchased Volume from the most recent rate application for the system or systems where the changes in costs, fees, rates and charges occurred; or the most recent 12 months if more than 3 years have passed since the most recent rate application was filed;

RPV = Annual Pumped and/or Purchased Volume for Region from the most recent rate application; or the most recent 12 months if more than 3 years have passed since the most recent rate application was filed;

WL = Annual water loss average for Region in most recent rate application not to exceed 0.15; or water loss, not to exceed 0.15, for the most recent 12 months if more than 3 years have passed since the most recent application was filed;

NVC = Annual non-volumetric cost change = annual increases or decreases in costs, fees, rates and charges that are not based on water purchased, pumped and/or billed;

VC = Volumetric cost change = volumetric cost increases or decreases from costs, fees, rates and charges based on water purchased, pumped and/or billed.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 28 2024
DOCKET
55818 1681

SECTION 1.0 -- RATE SCHEDULE (Continued)

To implement a new Regional Pass-Through Gallonage Charge, Aqua Texas shall take the following actions:

1. Prior to the beginning of the billing period in which the revision takes place, submit written notice to the PUC with documentation supporting the line item Regional Pass-Through Gallonage Charge adjustment; and

2. Mail notice to affected customers separately at the beginning of the billing period or include written notice to affected customers with the billing sent out at the beginning of the billing period in which the new Regional Pass-Through Gallonage Charge becomes effective. The notice must contain: (a) the effective date of the change, (b) the then-present calculation of the line item Regional Pass-

   Through Gallonage Charge, (c) the new calculation of the line item Regional Pass-Through Gallonage Charge, and (d) the change in costs, fees, rates or charges to Aqua Texas prompting the adjustment to the line item Regional Pass-Through Gallonage Charge.

3. The notice will include the following language:
   "This tariff change is being implemented in accordance with Aqua Texas' approved Regional Pass-Through Gallonage Charge Adjustment provision to recognize (increases)(decreases) in the (costs), (fees), (rates) and (charges) imposed by (governmental entities), (water authorities) or (districts) (having jurisdiction over Aqua Texas or its operations) or (by non-affiliated third-party) (water suppliers) or (water rights holders) (selling water) or (water rights) to Aqua Texas. The cost of these charges to customers will not exceed the (increased) (decreased) cost of the (costs), (fees), (rates) and (charges) to Aqua Texas."

The process of implementing the Regional Pass-Through Gallonage Charge Adjustment provision and the PUC's review of a proposed revision to Aqua Texas' line item Regional Pass-Through Gallonage Charge is an informal proceeding and not a contested case hearing. Only the Commission or Aqua Texas may request a hearing on the proposed revision. It shall not be considered a rate case under the Texas Water Code or PUC rules, and Texas Water Code § 13.187 shall not apply.

SECTION 1.0 – RATE SCHEDULE (Continued)

FEDERAL TAX CHANGE CREDIT RIDER (FTCCR):
The Federal Tax Change Credit Rider gives effect to the Tax Cuts and Jobs Act of 2017, which changed the federal corporate tax rate from 35% to 21%, by reducing the cost of service paid by customers taking service under this rate tariff. The FTCCR will provide credits to customers taking service under this rate tariff.

**Greenwood Village, Colonial Hills and Bertrand Water Systems only**

MONTHLY GROUNDWATER REDUCTION PLAN FEE PASS THROUGH PROVISION:

This Groundwater Reduction Plan (GRP) Fee Surcharge applies only to the Greenwood Village, Colonial Hills, and Betrand Water Systems and represents an automatic pass-through of actual costs levied by the City of Houston under the Groundwater Reduction Plan (GRP) required by the Harris-Galveston Coastal Subsidence District. The GRP fees charges by the City of Houston will be charged monthly based on well pumpage and will be passed through directly to each customer served by the wells affected by the GRP and shown as a separate line item on the bill. The GRP fee monthly charge amount will be set once a year. The amount collected from customers will be accounted for in a separate balancing account. At the end of one year, any overage or underage will be estimated and applied as a credit or debit to the next year's GRP fee monthly charge based on the latest billing information from the City of Houston and the estimated usage per customer in each of the three subdivisions.

GRP Fee Charge per Monthly Connection = (GRP Fee per 1000 gallons) x (Total Usage in billing period in 1000 gallon units)

GRP Fee per 1000 gallons usage by customers = (Q x R x P) / GS, where:

Q = Quantity of groundwater pumped (in Greenwood Village, Colonial Hills and Bertrand systems) in billing period in 1000 gallons.

R = Groundwater Reduction Plan Fee per 1000 gallons pumped ($1.34 per 1000 gals. as of September 1, 2004, but subject to increase by City of Houston).

P = Percentage factor as set by City of Houston (30% as of September 1, 2004, but subject to increase by City of Houston).

GS = Total gallons billed (in Greenwood Village, Colonial Hills and Bertrand water systems) during billing period in 1000 gallons.

SECTION 1.0 – RATE SCHEDULE (Continued)

**Arrowhead Lakes/Frontier and Hidden Forest Estates Subdivisions**

GROUNDWATER REDUCTION PLAN FEE PASS THROUGH CLAUSE:

The San Jacinto River Authority (SJRA) under the GRP required by the Lone Star Groundwater Conservation District (LSGCD). This SJRA fee applies only to the Arrowhead Lakes/Frontier Subdivisions water system (PWS No. 1700171) and Hidden Forest Estates Subdivision water system (PWS No. 1700173) located in Montgomery County, Texas. The fee imposed by SJRA as of August 1, 2010, was $0.50/1,000 gallons pumped subject to change. Changes in fees imposed by SJRA shall be passed through as an adjustment to the water gallonage charge according to the following formula:

**Adjusted Gallonage Rate (AG) = G + [B/(1 - L)], Where:**

| | | |
|---|---|---|
| AG | = | adjusted gallonage charge, rounded to nearest one cent; |
| G | = | approved gallonage charge, per 1,000 gallons; |
| B | = | change in fee (per 1,000 gallons); |
| L | = | water or sewer line loss for preceding 12 months, not to exceed 0.15 (15%) |

## SECTION 2.0 - SERVICE RULES AND POLICIES

### Section 2.01 – Rules

The Utility will have the most current Public Utility Commission of Texas (PUC or Commission) Rules, Chapter 24, available at its office for reference purposes. The Rules and this tariff shall be available for public inspection and reproduction at a reasonable cost. The latest Rules or Commission approved changes to the Rules supersede any rules or requirements in this tariff.

### Section 2.02 – Request to Initiate, Transfer or Terminate Water or Sewer Service

A customer may initiate, transfer, or terminate retail water or sewer service by mail, by telephone, through an Internet website, or through another electronic transmission. If a service request is initiated by mail, the Utility's standard application or contract form (attached in the Appendix to this tariff) must be signed and submitted by the applicant before water service is provided by the Utility.

After the applicant has met all the requirements, conditions, and regulations for service, the Utility will install tap, meter, and utility cut-off valve and/or take all necessary actions to initiate service. The Utility will serve each qualified applicant for service within ten (10) working days unless line extensions or new facilities are required. If construction is required to fill the order and if it cannot be completed within 30 days, the Utility will provide the applicant with a written explanation of the construction required and an expected date of service. Notwithstanding any statement in this tariff to the contrary, the utility will serve each qualified applicant for service within the time limits prescribed in 16 TAC § 24.161(a) – (b) as that rule may be amended by the PUC.

Where service has previously been provided, service will be reconnected within three (3) working days after the applicant has met the requirements for reconnection.

The customer will be responsible for furnishing and laying the necessary customer service pipe from the meter location to the place of consumption. Customers may be required to install a customer owned cut-off valve on the customer's side of the meter or connection.

### Section 2.03 - Refusal of Service

The Utility may decline to serve an applicant until the applicant has complied with the regulations of the regulatory agencies (state and municipal regulations) and for the reasons outlined in the PUC Rules. In the event that the Utility refuses to serve an applicant, the Utility will inform the applicant in writing of the basis of its refusal. The Utility is also required to inform the applicant that a complaint may be filed with the Commission.

### Section 2.04 - Customer Deposits

If a residential applicant cannot establish credit to the satisfaction of the Utility, the applicant may be required to pay a deposit as provided for in Section 1.02 of this tariff.

The Utility will keep records of the deposit and credit interest in accordance with PUC Rules.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 28 2024
DOCKET
55818 1687

SECTION 2.0 - SERVICE RULES AND POLICIES (Continued)

Residential applicants 65 years of age or older may not be required to pay deposits unless the applicant has an outstanding account balance with the Utility or another water or sewer utility that accrued within the last two (2) years.

Nonresidential applicants who cannot establish credit to the satisfaction of the Utility may be required to make a deposit that does not exceed an amount equivalent to one-sixth (1/6) of the estimated annual billings.

Refund of deposit. If service is not connected, or after disconnection of service, the Utility will promptly refund the customer's deposit plus accrued interest or the balance, if any, in excess of the unpaid bills for service furnished. The Utility may refund the deposit at any time prior to termination of utility service but must refund the deposit plus interest for any customer who has paid 18 consecutive billings without being delinquent.

Section 2.05 - Meter Requirements, Readings, and Testing

All water sold by the Utility will be billed based on meter measurements. The Utility will provide, install, own, and maintain meters to measure amounts of water consumed by its customers. One meter is required for each residential, commercial, or industrial facility in accordance with the PUC Rules.

Service meters will be read at monthly intervals and as nearly as possible on the corresponding day of each monthly meter reading period unless otherwise authorized by the Commission.

Meter tests. The Utility will, upon the request of a customer, and, if the customer so desires, in his or her presence or in that of his or her authorized representative, make without charge a test of the accuracy of the customer's meter. If the customer asks to observe the test, the test will be made during the Utility's normal working hours at a time convenient to the customer. Whenever possible, the test will be made on the customer's premises, but may, at the Utility's discretion, be made at the Utility's testing facility. If within a period of two years the customer requests a new test, the Utility will make the test, but if the meter is found to be within the accuracy standards established by the American Water Works Association, the Utility will charge the customer a fee which reflects the cost to test the meter up to a maximum $25 for a residential customer. Following the completion of any requested test, the Utility will promptly advise the customer of the date of removal of the meter, the date of the test, the result of the test, and who made the test.

Section 2.06 - Billing

Bills from the Utility will be mailed monthly unless otherwise authorized by the Commission. The due date of the bills for utility service will be at least 21 days from the date of issuance. If the postmark on the bill or, if there is no postmark on the bill, the recorded date of mailing by the Utility will constitute proof of the date of issuance.

Payment for utility service is delinquent if full payment, including late fees and the regulatory assessment, is not received at the Utility or the Utility's authorized payment agency by 5:00 p.m. on the due date. If the due date falls on a holiday or weekend, the due date for payment purposes will be the next workday after the due date.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET 1688
FEB 28 2024 55818

SECTION 2.0 - SERVICE RULES AND POLICIES (Continued)

A late penalty of 10% will be charged on bills received after the due date. Customer payments post marked by the due date will not incur a late penalty. The penalty on delinquent bills will not be applied to any balance to which the penalty was applied in a previous billing. The utility must maintain a record of the date of mailing to charge the late penalty.

Each bill will provide all information required by the PUC Rules. For each of the systems it operates, the Utility will maintain and note on the monthly bill a telephone number (or numbers) which may be reached by a local call by customers. At the Utility's option, a toll-free telephone number or the equivalent may be provided.

In the event of a dispute between a customer and a Utility regarding any bill for utility service, the Utility will conduct an investigation and report the results to the customer. If the dispute is not resolved, the Utility will inform the customer that a complaint may be filed with the Commission.

Section 2.07 - Service Disconnection

Utility service may be disconnected if the bill has not been paid in full by the date listed on the termination notice. The termination date must be at least 10 days after the notice is mailed or hand delivered.

The Utility is encouraged to offer a deferred payment plan to a customer who cannot pay an outstanding bill in full and is willing to pay the balance in reasonable installments. However, a customer's utility service may be disconnected if a bill has not been paid or a deferred payment agreement has not been entered into within 31 days from the date of issuance of a bill and if proper notice of termination has been given.

Notice of termination must be a separate mailing or hand delivery in accordance with the PUC Rules.

Section 2.08 - Reconnection of Service

Service will be reconnected within 36 hours after the past due bill and any other outstanding charges are paid or correction of the conditions which caused service to be disconnected.

Section 2.09 - Service Interruptions

The Utility will make all reasonable efforts to prevent interruptions of service. If interruptions occur, the Utility will re-establish service within the shortest possible time. Except for momentary interruptions due to automatic equipment operations, the Utility will keep a complete record of all interruptions, both emergency and scheduled and will notify the Commission in writing of any service interruptions affecting the entire system or any major division of the system lasting more than four hours. The notice will explain the cause of the interruptions.

APPROVED
DOCKET
FEB 28 2024
55818
1689

SECTION 2.0 - SERVICE RULES AND POLICIES (Continued)

Section 2.11 - Customer Complaints and Disputes

Prorated Bills. If service is interrupted or seriously impaired for 24 consecutive hours or more, the Utility will prorate the monthly base bill in proportion to the time service was not available to reflect this loss of service.

Section 2.10 - Quality of Service

The Utility will plan, furnish, and maintain production, treatment, storage, transmission, and distribution facilities of sufficient size and capacity to provide a continuous and adequate supply of water for all reasonable consumer uses. Unless otherwise authorized by the Commission, the Utility will maintain facilities as described in the TCEQ Rules and Regulations for Public Water Systems.

If a customer or applicant for service lodges a complaint, the Utility will promptly make a suitable investigation and advise the complainant of the results. Service will not be disconnected pending completion of the investigation.

If the complainant is dissatisfied with the Utility's response, the Utility must advise the complainant that he has recourse through the PUC complaint process. Pending resolution of a complaint, the Commission may require continuation or restoration of service.

The Utility will maintain a record of all complaints which shows the name and address of the complainant, the date and nature of the complaint and the adjustment or disposition thereof, for a period of two years after the final settlement of the complaint.

## SECTION 2.20 - SPECIFIC UTILITY SERVICE RULES AND POLICIES

This section contains specific utility service rules in addition to the rules previously listed under Section 2.0. It must be reviewed and approved by the Commission and in compliance with PUC Rules to be effective.

The Utility adopts the administrative rules of the PUC, as the same may be amended from time to time, as its Company specific service rules and policies. These rules will be kept on file at the Utility's offices for customer inspection during regular business hours. In the event of a conflict between the PUC's amended rules and the provisions of this tariff, the amended rules shall prevail. Where necessary, any conflicting provision of this tariff shall be deemed to have been superseded by the PUC rule in question to the degree that the Utility may conduct its lawful business in conformance with all requirements of said rule.

All payments for utility service shall be delivered or mailed to the remittance address on the Utility's bill received or paid using any method described on the Utility bill received. Cash payments are only accepted in person at designated payment locations as described in the Utility bill received. If the Utility or its authorized agent fails to receive payment prior to the time of noticed disconnection for non-payment of a delinquent account, service will be terminated as scheduled. Utility service crews shall not be allowed to collect payments on customer accounts in the field.

Payment of an account by any means that has been dishonored and returned by the payor or payee's bank shall be deemed to be delinquent. All returned payments must be redeemed with a valid money order. If a customer has two returned payments within a twelve-month period, the customer shall be required to pay a deposit if one has not already been paid.

Customers shall not be allowed to use the Utility's cutoff valve on the Utility's side of the meter. Existing customers may install cutoff valves on their side of the meter and are encouraged to do so. All new customers must install customer-owned and maintained cutoff valves on their side of the meter.

No water connection from any public drinking water supply system shall be made to any establishment where an actual or potential contamination or system hazard exists without an air gap separation between the drinking water supply and the source of potential contamination. The containment air gap is sometimes impractical and, instead, reliance must be placed on individual "internal" air gaps or mechanical backflow prevention devices.

Under these conditions, additional protection shall be required at the meter in the form of a backflow prevention device (in accordance with AWWA Standards C510 and C511, and AWWA Manual M14) on those establishments handling substances deleterious or hazardous to the public health. The water purveyor need not require backflow protection at the water service entrance if an adequate cross-connection control program is in effect that includes an annual inspection and testing by a certified backflow prevention device tester. It will be the responsibility of the water purveyor to ensure that these requirements are met.

Customer shall be liable for any damage or injury to utility-owned property or personnel shown to be caused by the customer, his invitees, his agents, his employees, or others directly under his control.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 28 2024 55818 1691

SECTION 2.20 - SPECIFIC UTILITY SERVICE RULES AND POLICIES (Continued)

Limitation on Product/Service Liability. Public water utilities are required to deliver water to the customer's side of the meter or service connection that meets the potability and pressure standards of the TCEQ. The Utility will not accept liability for any injury or damage to individuals or their property occurring on the customer's side of the meter when the water delivered meets these state standards. The Utility makes no representations or warranties (expressed or implied) that customer's appliances will not be damaged by disruptions of or fluctuations in water service whatever the cause.

The Utility will not accept liability for injuries or damages to persons or property due to disruption of water service caused by: (1) acts of God, (2) acts of third parties not subject to the control of the Utility if the Utility has undertaken such preventive measures as are required by PUC and TCEQ rules, (3) electrical power failures in water systems not required by TCEQ rule to have auxiliary power supplies, or (4) termination of water service pursuant to the Utility's tariff and the PUC's rules. The Utility is not required by law and does not provide fire prevention, fire flow, or firefighting services. The Utility therefore does not accept liability for fire-related injuries or damages to persons or property caused or aggravated by the availability (or lack thereof) of water or water pressure (or lack thereof) during fire emergencies. The Utility will accept liability for any injury or damage to individuals or their property directly caused by defective utility plant (leaking water lines or meters) or the repairs to or construction of the utility's facilities.

If the services of a registered professional engineer are required as a result of a service initiation request received by the Utility for service to that applicant's service extension only, the Utility and the applicant will select such engineer, and the applicant shall bear all expenses incurred therein.

If an applicant requires service other than the standard service provided by the Utility, such applicant will be required to pay all expenses incurred by the Utility in excess of the expenses that would be incurred in providing the standard service and connection. Any applicant who places unique or non-standard service demands on the system may be required to provide contributions in aid of construction (as may be allowed by PUC rule) for the actual costs of any additional facilities required to maintain compliance with the TCEQ minimum design criteria for water production, treatment, pumping storage and transmission.

Any applicant or existing customer required to pay for any costs not specifically set forth in the rate schedule pages of this tariff shall be entitled to a written explanation of such costs prior to payment and/or commencement of construction. If the applicant or existing customer does not believe that these costs are reasonable or necessary, the applicant or existing customer shall have the right to appeal such costs to the PUC or such other regulatory authority having jurisdiction over the Utility's rates in that portion of the Utility's service area in which the applicant's or existing customer's property(ies) is located.

Tap fees may be increased by unique costs not normally incurred as may be permitted by 16 TAC §24.163(a)(1)(C).

The Utility adopts the Uniform Plumbing Code pursuant to 30 TAC § 290.46(i). The piping and other equipment on the premises furnished by the customer will be maintained by the customer at all times in conformity with the requirements of the TCEQ, the Uniform Plumbing Code and with the service rules and policies of the Utility. The customer will bring out his service line to his

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED 1692

SECTION 2.20 - SPECIFIC UTILITY SERVICE RULES AND POLICIES (Continued)

property line at the point on the customer's property mutually acceptable to the customer and the Utility subject to such requirements as may exist by PUC rule. No water service smaller than 5/8" will be connected. No pipe or pipe fitting which contains more than 8.0% lead can be used for the installation or repair of plumbing at any connection, which provides water for human use. No solder or flux, which contains more than 0.2% lead, can be used at any connection that provides water for human use.

The Utility will have the right of access to the customer's premises at all times reasonable for the purpose of installing, testing, inspecting or repairing water mains or other equipment used in connection with its provision of water service, or for the purpose of removing its property and disconnecting lines, and for all other purposes necessary to the operation of the Utility system including inspecting the customer's plumbing for code, plumbing or tariff violations. The customer shall allow the Utility and its personnel access to the customer's property to conduct any water quality tests or inspections required by law.

Unless necessary to respond to equipment failure, leak or other condition creating an immediate threat to public health and safety or the continued provision of adequate utility service to others, such entry upon the customer's property shall be during normal business hours. The customer may require any Utility representative, employee, contractor, or agent seeking to make such entry identify themselves, their affiliation with the Utility, and the purpose of their entry.

Threats to or assaults upon Utility personnel shall result in criminal prosecution.

Except in cases where the customer has a contract with the Utility for reserve or auxiliary service, no other water service will be used by the customer on the same installation in conjunction with the Utility's service, either by means of a crossover valve or any other connection. Customer shall not connect, or allow any other person or party to connect, onto any water lines on his premises. Two places shall not be permitted to be supplied with one service pipe where there is a water main abutting the premises.

No connection shall be allowed which allows water to be returned to the public drinking water supply. No backflow prevention device shall be permitted to be installed in the customer's plumbing without notice to and written permission from the Utility. Any backflow prevention devices so installed shall be inspected annually by a licensed backflow prevention device inspector or appropriately licensed plumber and a written report of such inspection delivered to the Utility.

No service request initiated by telephone, through an Internet website or other electronic transmission, written application, agreement, or contract for service may be assigned or transferred without the written consent of the Utility. It is agreed and understood that any and all meters, water lines, and other equipment furnished by the Utility (excepting the customer's individual service lines from the point of connection to customer's structures on customer's premises) are and shall remain the sole property of the Utility, and nothing contained herein or in a contract/application for service whether in verbal, written, or electronic transmission format, shall be construed to reflect a sale or transfer of any such meters, lines, or equipment to any customer. All tap and extension charges shall be for the privilege of connecting to said water lines and for installation, not purchase, of said meters and lines.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 28 2024
55818
1693

SECTION 2.20 - SPECIFIC UTILITY SERVICE RULES AND POLICIES (Continued)

Applicants for service at new consuming facilities or facilities which have undergone extensive plumbing modifications are required to deliver to the Utility a certificate that their facilities have been inspected by a state-licensed inspector and that they are in compliance with all applicable plumbing codes and are free of potential hazards to public health and safety. Service may be denied until the certificate is received or any identified violations or hazards are remedied. The Utility is not required to perform these inspections for the applicant/customer but will assist the applicant/customer to locate and obtain the services of a licensed inspector in a timely manner. When potential sources of contamination are identified which, in the opinion of the inspector or the Utility, require the installation of a state-approved backflow prevention device, such backflow prevention device shall be installed on the customer's service line or other necessary plumbing facilities by an appropriately licensed plumber/backflow prevention device specialist at the customer's expense. The backflow prevention device shall be maintained by the customer at his expense and inspected annually by a licensed inspector. Copies of the annual inspection report must be provided to the Utility. Failure to comply with this requirement may constitute grounds for termination of water service with notice.

All customers or service applicants shall provide access to meters and utility cutoff valves at all times reasonably necessary to conduct ordinary utility business and after normal business hours as needed to protect and preserve the integrity of the public drinking water supply. Access to meters and cutoff valves shall be controlled by the provisions of 16 TAC § 24.169(c).

Where necessary to serve an applicant's property, the Utility may require the applicant to provide it a permanent recorded public utility easement on and across the applicant's real property sufficient to provide service to that applicant.

Service applicants may be required to comply with any pre-condition to receiving service not printed herein as may exist under PUC rule, TCEQ rule (customer service, health and safety, water conservation, or environmental), USEPA rule, TWDB rule, local water or conservation district rule or health department rule. Existing customers shall be required to comply with such rules, including modification of their plumbing and/or consumption patterns, after notice.

Customers must make meters accessible to the Utility and its personnel. If they do not, the Utility may require the removal of the meter to another location according to 16 TAC § 24.169(c) of the PUC's rules. The Utility will give the customer the option of converting to a remote radio read meter at the customer's expense in lieu of bearing the cost of relocating the meter and any Utility water lines necessitated by the customer's actions. If the customer does not accept this option, the customer will be charged for all incurred meter relocation costs. Before relocating the meter, the Utility must provide the customer with written notice of its intent to do so.

This notice must include information on the estimated cost of relocating the meter, an explanation of the condition hindering access and what the customer can do to correct that condition, and information on how to contact the utility. The notice must give the customer a reasonable length of time to arrange for utility access so the customer may avoid incurring the relocation cost. A copy of the notice given to the customer shall be filed with the Utility's records on the customer's account.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 28 2024
DOCKET
55818
1694

SECTION 2.20 - SPECIFIC UTILITY SERVICE RULES AND POLICIES (Continued)

Customers shall not enclose meters with fences or other artificial barriers. If there is a fence in front of a meter, the customer shall install a gate or stile with 300 pound-load bearing capacity to enable meter readers and service crews to obtain ready access to the Utility's property.

Lock removal or damage fee - This fee shall be accessed to the account holder of any delinquent account that has been terminated for non-payment by locking the meter and the lock has subsequently been removed or damaged without authorization by the utility in order to restore water service to the account holder's original place of service. This fee shall not be charged if the damaged meter fee is charged.

Damaged meter and appurtenances fee - This fee shall be accessed to the account holder of any delinquent account that has been terminated for non-payment by locking the meter and meter or appurtenances such as the curb stop have been damaged requiring repair and/or replacement in an attempt to restore water service to the point of serve that was disconnected. The account holder shall be charged the full cost of repairing and/or replacing all damaged parts, including labor and vehicles. This will include replacement of meters that have had their locking eyes broken off the flanges.

Service applicants are free to have customer service inspections required by 30 TAC § 290.46(j) by any state-licensed inspector of their choice. They are encouraged to use a third party inspector and not an employee of the Utility. However, if they request the Utility to perform the inspection, it will be done at market prices. Since this is not a function of public water utility service, performing customer service inspections must take lower priority to fulfilling utility service responsibilities under 30 TAC §§ 290 and 291 rules.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 28 2024 55818 1695

# SECTION 3.0 - EXTENSION POLICY

## Section 3.01 - Standard Extension Requirements

LINE EXTENSION AND CONSTRUCTION CHARGES. No contribution in aid of construction may be required of any customer except as provided for in this approved extension policy.

The customer will be given an itemized statement of the costs, options such as rebates to the customer, sharing of construction costs between the Utility and the customer, or sharing of costs between the customer and other applicants before beginning construction.

The Utility will bear the full cost of any oversizing of water mains necessary to serve other customers in the immediate area. The individual residential customer shall not be charged for any additional production, storage, or treatment facilities. Contributions in aid of construction may not be required of individual residential customers for production, storage, treatment, or transmission facilities unless otherwise approved by the Commission under this specific extension policy.

COST UTILITIES SHALL BEAR. Within its Certificate of Convenience and Necessity ("CCN") service area, the Utility will pay the cost of the first 200 feet of any water main or distribution line necessary to extend service to an individual residential customer within a platted subdivision. However, if the residential customer requesting service purchased the property after the developer was notified of the need to provide facilities to the Utility, the Utility may charge for the first 200 feet. The Utility must also be able to document that the developer of the subdivision refused to provide facilities compatible with the Utility's facilities in accordance with the Utility's approved extension policy after receiving a written request from the Utility.

Developers may be required to provide contributions in aid of construction in amounts to furnish the system with all facilities necessary to comply with the PUC's Rules.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 28 2024
DOCKET

## SECTION 3.20 – SPECIFIC UTILITY EXTENSION POLICY

This section contains the Utility's specific extension policy that complies with the requirements already stated under Section 3.01. It must be reviewed and approved by the Commission and in compliance with PUC Rules to be effective.

Residential customers not covered under Section 3.01 will be charged the equivalent of the costs of extending service to their property from the nearest transmission or distribution line even if that line does not have adequate capacity to serve the customer. However, if the customer places unique, non-standard service demands upon the system, the customer may be charged the full cost of extending service to and throughout their property, including the cost of all necessary transmission and storage facilities necessary to meet the service demands anticipated to be created by that property.

Developers may be required to provide contributions in aid of construction in amounts sufficient to furnish the development with all facilities necessary to provide for reasonable local demand requirements and to comply with TCEQ minimum design criteria for facilities used in the production, transmission, pumping, or treatment of water or TCEQ minimum requirements. For purposes of this subsection, a developer is one who subdivides or requests more than two meters on a piece of property. Commercial, industrial, and wholesale customers will be treated as developers.

The Utility adopts the administrative rules of the PUC and the TCEQ, as amended from time to time, as its company specific extension policy. These rules will be kept on file at the company's business office for customer inspection during normal business hours. In the event of a conflict between the PUC's amended rules and the provisions of this tariff, the amended rules shall prevail. Where necessary, any conflicting provision of this tariff shall be deemed to have been superseded by the PUC rule in question to the degree that the Utility may conduct its lawful business in conformance with all requirements of said rule.

When an individual residential applicant requires an extension of a main line beyond 200 feet, the charge to that applicant shall be the actual cost of such extension in excess of 200 feet, plus the applicable tap fee plus such other approved costs as may be provided in this tariff and/or PUC rules.

Residential tap fees may be increased by other unique costs not normally incurred as permitted by PUC rule. Larger meter taps shall be made at actual cost associated with that tap which shall include such extraordinary expenses.

Any service extension to a subdivision (recorded or unrecorded) may be subject to the provisions and restrictions of 16 TAC § 24.163(d) and this tariff. When a developer wishes to extend the system to prepare to service multiple new connections, the charge shall be the cost of such extension, plus a pro-rata charge based upon the capacities of production, transmission, storage, pumping and treatment facilities, compliant with the TCEQ minimum design criteria, which must be committed to such extension. As provided by 16 TAC § 24.163(d)(4), for purposes of this section, commercial, industrial, and wholesale customers shall be treated as developers.

Any applicant who places unique or non-standard service demands on the system may be required to provide contributions in aid of construction for the actual costs of any additional, facilities

SECTION 3.20 – SPECIFIC EXTENSION POLICY (Continued)

required to maintain compliance with the TCEQ minimum design criteria for water production, treatment, pumping, storage, and transmission.

Unless expressly exempted by PUC rule or order, each point of use (as defined by 16 TAC § 24.3) must be individually metered.

The imposition of additional extension costs or charges as provided by Sections 2.12 and 3.02 of this tariff shall be subject to appeal as provided in this tariff, PUC rules, or the rules of such other regulatory authority as may have jurisdiction over the Utility's rates and services. Any applicant required to pay for any costs not specifically set forth in the rate schedule pages of this tariff shall be entitled to a written explanation of such costs before payment and/or commencement of construction. If the applicant does not believe that these costs are reasonable or necessary, the applicant shall have the right to appeal such costs to the PUC or such other regulatory authority having jurisdiction over the Utility's rates in that portion of the Utility's service area in which the applicant's property(ies) is located. Unless the PUC or other regulatory authority enters interlocutory orders to the contrary, service to the applicant may be delayed until such appeal is resolved.

The Utility may initiate, transfer, or terminate retail water or sewer service upon receipt of a customer request by mail, by telephone, through an Internet website, or through other electronic transmission. A separate request to initiate, transfer or terminate service shall be required for each potential service location if more than one service connection is desired by any individual applicant. Written service application forms will be available for applicant pick up at the Utility's business office during normal weekday business hours. Upon request, written service applications will also be sent by prepaid first class United States mail to the address provided by the applicant upon request.

The Utility shall serve each qualified service applicant within its CCN service area as soon as practical after receiving a request for service. All service requests will be fulfilled within the time limits prescribed by PUC rules once the applicant has met all conditions precedent to achieving a "qualified service applicant". If a service request cannot be fulfilled within the required period, the applicant shall be notified in writing of the delay, its cause, and the anticipated date that service will be available. The PUC service dates shall not become applicable until the service applicant has met all conditions precedent to becoming a "qualified service applicant" as defined herein or by PUC rules.

The Utility is not required to extend service to any applicant outside of its CCN service area and will only do so, at the Utility's sole option, under terms and conditions mutually agreeable to the Utility and the applicant and upon extension of the Utility's certificated service area boundaries by the PUC. Service applicants may be required to bear the cost of the service area amendment.

A "qualified service applicant" is an applicant who has: (1) met all of the Utility's requirements of service contained in this tariff, PUC rules and/or PUC order, (2) has made all payments for tap fees and extension charges, (3) has provided all necessary easements and rights-of-way necessary to provide service to the requested location, including staking said easements or rights-of-way where necessary, (4) delivered an executed customer service inspection certificate to the Utility and (5)

has, for each location to which service is being requested, completed the verbal, written, or electronic transmission customer service request process.

SECTION 3.20 – SPECIFIC EXTENSION POLICY (Continued)

Where a new tap or service connection is required, the service applicant shall be required to submit a service request by mail, by telephone, through an Internet website, or through another electronic transmission and request that a tap is made. The tap request must be accompanied with a plat, map, diagram, or written metes and bounds description of precisely where the applicant desires each tap or service connection is to be made and, if necessary, where the meter is to be installed along the applicant's property line. The actual point of connection and meter installation must be readily accessible to Utility personnel for inspection, servicing, and meter reading while being reasonably secure from damage by vehicles and mowers. If the Utility has more than one main adjacent to the service applicant's property, the tap or service connection will be made to the Utility's near service main with adequate capacity to service the applicant's full potential service demand.

If the tap or service connection cannot be made at the applicant's desired location, it will be made at another location mutually acceptable to the applicant and the Utility. If no agreement on location can be made, applicant may refer the matter to the PUC for resolution. Unless otherwise ordered by the PUC, the tap or service connection will not be made until the location dispute is resolved.

The Utility shall require a developer (as defined by PUC rule) to provide permanent recorded public utility easements as a condition of service to any location within the developer's property. The Developer shall be required to obtain all necessary easements and rights-of-way required to extend the Utility's existing service facilities from their nearest point with adequate service capacity (as prescribed by PUC rules and local service conditions) to and throughout the Developer's property. The easements shall be sufficient to allow the construction, installation, repair, maintenance, testing, and replacement of any and all utility plant necessary to provide continuous and adequate service to each and every potential service location within the property at full occupancy. Unless otherwise restricted by law, well plant sites shall convey with unrestricted rights to produce water for public drinking water supply. Developers shall be required to provide the utility with a minimum of a 160-foot radius sanitary control easement or fee simple real property conveyance around the proposed well site acceptable to the TCEQ for each water well site to be located within the developer's property or otherwise being obtained to serve the developer's property. Unless otherwise agreed to by the Utility, pipeline right-of-way easements must be at least 15 feet wide to allow adequate room to facilitate backhoe and other heavy equipment operation and meters. Easements must be provided for all production, storage, treatment, pressurization, and disposal sites that are sufficient to construct and maintain all weather roads as prescribed by TCEQ rules. All easements shall be evidenced, at Developer's expense, by recorded county-approved subdivision plat or by specific assignment supported by metes and bounds survey from a surveyor licensed by the State of Texas.

Before the extension of utility service to developers (as defined by PUC rules) or new subdivisions, the Developer shall comply with the following:

(a) The Developer shall make a written request for service to property that is to be subdivided and developed. The Developer shall submit to the Utility a proposed plat on a scale of one inch (1") to two hundred feet (200') for review and determination of required easements, utility plant, and plant location. If sewer service is requested, the plat must contain elevation data. A reconcilable deposit in an amount set by the Utility may be required to cover preliminary engineering, legal, and copy cost to be incurred by the Utility in reviewing and planning to meet this

SECTION 3.20 – SPECIFIC EXTENSION POLICY (Continued)

service request. The plat and/or accompanying information shall identify the type, location, and number of houses and other planned structures that will be requiring utility service. If other than residential structures are to be located on the property, all other types of anticipated businesses and their service demands shall be identified with specificity. All areas requiring special irrigation and/or other unique water demands must be identified. To the extent reasonably possible, this information must be precise so that adequate facilities can be designed and constructed to meet all future service demands without hazard to the public, other utility customers, and/or the environment.

(b) After the requirements of easements and rights-of-way have been determined, a red line copy will be returned by the Utility to the Developer for final plat preparation.

(c) Copies of all proposed plats and plans must be submitted to the Utility before their submission to the County for approval to ensure that they are compatible with the adequate long-term utility needs of potential service customers. Copies will be returned after review by the Utility so that necessary changes may be incorporated into the Developer's final submitted plat(s) and plans.

(d) The Utility shall be provided with three (3) certified copies of the final plat(s) approved by the County Commissioners Court. At this time, the Utility will begin engineering the facilities necessary to serve the property. Plans and specifications will be prepared and submitted to the TCEQ by the Utility if required by law. If further plat or plans changes are necessary to accommodate the specific service needs of the property and the anticipated customer demands, the Developer will be so notified. Plat amendments must be obtained by the Developer. The Developer shall be notified when all required PUC, TCEQ or other governmental approvals or permits have been received. No construction of utility plant that requires prior TCEQ plans approval shall be commenced until that approval has been received by the Utility and any conditions imposed by the PUC or TCEQ in association with its approvals have been satisfied.

(e) The Developer shall be required to post bond or escrow the funds necessary to construct all required utility plant, except individual taps, meters, and sewer connections, required to serve the property. Construction shall not commence until funds are available. If the construction is to be done in coordination with the phased development of the property, funds must be provided in advance which are sufficient to complete each phase.

No phase or facilities for any phase shall be constructed before the bonding or escrowing of all funds associated with that phase.

(f) At the sole option of the Utility, the Developer may be required to execute a Developer Extension Contract setting forth all terms and conditions of extending service to their property including all contributions-in-aid of construction and developer reimbursements, if any.

(g) The Utility may require the Developer to commence construction of subdivision improvements within three (3) months of utility plans approval or the Utility may abate its construction activities until full development construction begins. If the Developer stops construction of subdivision improvements for any purpose, the Utility may abate its construction for a similar period.

SECTION 3.20 – SPECIFIC EXTENSION POLICY (Continued)

(h) As soon as the roads are rough cut and before paving, extension lines will need to be constructed at each road crossing. The Developer must notify the Utility sufficiently in advance of this development stage to allow for the necessary utility construction without disruption to other service operations of the Utility. Failure to provide adequate advance notice and cooperation in the construction of necessary utility plant may result in additional delays in obtaining service to the property. The Developer shall be required to pay for all additional costs of road boring or other remedial construction necessary to install adequate utility plant throughout the affected property.

(i) The Developer, not the Utility, shall insure that Developer's employees, agents, contractors, and others under its control coordinate their work or construction throughout the property with the Utility to insure the orderly and timely construction of all utility plant necessary to serve the public.

(h) As soon as the roads are rough cut and before paving, extension lines will need to be constructed at each road crossing. The Developer must notify the Utility sufficiently in advance of this development stage to allow for the necessary utility construction without disruption to other service operations of the Utility. Failure to provide adequate advance notice and cooperation in the construction of necessary utility plant may result in additional delays in obtaining service to the property. The Developer shall be required to pay for all additional costs of road boring or other remedial construction necessary to install adequate utility plant throughout the affected property.

(i) The Developer, not the Utility, shall insure that Developer's employees, agents, contractors, and others under its control coordinate their work or construction throughout the property with the Utility to insure the orderly and timely construction of all utility plant necessary to serve the public.

Within its CCN area, the Utility shall bear the cost of the first 200 feet of any water main or sewer collection line necessary to extend service to an individual residential service applicant within a platted subdivision unless the Utility can document:

(a) That the Developer of the subdivision refused to provide facilities compatible with the Utility's facilities in accordance with the Utility's approved extension policy after receiving a written request from the Utility; or,

(b) That the Developer defaulted on the terms and conditions of a written agreement or contract existing between the Utility and the developer or the terms of this tariff regarding payment for services, extensions, or other requirements; or in the event the Developer declared bankruptcy and was therefore unable to meet obligations; and

(c) That the residential service applicant purchased the property from the Developer after the Developer was notified of the need to provide facilities to the Utility. A residential service applicant may be charged the remaining costs of extending service to his property; provided, however, that the residential service applicant may only be required to pay the cost equivalent to the cost of extending the nearest water main, whether or not that line has adequate capacity to serve that residential service applicant.

1701

SECTION 3.20 – SPECIFIC EXTENSION POLICY (Continued)

The following criteria shall be considered to determine the residential service applicant's cost for extending service:

(a) The residential service applicant shall not be required to pay for costs of main extensions greater than 2″ in diameter for water distribution.

(b) Exceptions may be granted by the PUC if:

(1) adequate service cannot be provided to the applicant using the maximum line sizes listed due to distance or elevation, in which case, it shall be the utility's burden to justify that a larger diameter pipe is required for adequate service;

(2) larger minimum line sizes are required under subdivision platting requirements or applicable building codes.

(c) If an exception is granted, the utility shall establish a proportional cost plan for the specific extension or a rebate plan which may be limited to seven years to return the portion of the applicant's costs for oversizing as new customers are added to ensure that future applicants for service on the line pay at least as much as the initial service applicant.

For purposes of determining the costs that service applicants shall pay, commercial customers with service demands greater than residential customer demands in the certificated area, industrial, and wholesale customers shall be treated as developers.

A service applicant requesting a one-inch meter for a lawn sprinkler system to service a residential lot is not considered nonstandard service.

## Aqua Texas – Southeast Region Water Utility Tariff
## Regional Pass-Through Gallonage Charge True- up/Adjustment Provision and Report

The purpose of this true-up/adjustment provision is to true-up and adjust Aqua Texas' authorized Regional Pass-Through Gallonage Charge each year in an effort to provide the best opportunity for regional revenue collected from the charge to align with certain types and amounts of pass-through costs Aqua Texas has incurred in the preceding year for the region using a process that does not require the expense of a full rate proceeding. Additionally, this process is intended to ensure that Aqua Texas balances the collections versus the pass-through costs annually. The types of pass-through costs that form the basis for the Regional Pass-Through Gallonage Charge may be regional costs, fees, rates and charges imposed by governmental entities, water authorities or districts having jurisdiction over Aqua Texas or its operations or by non-affiliated third party water suppliers or water rights holders selling water or water rights to Aqua Texas.

1) Regional Pass-Through Gallonage Charge true-up and adjustment calculations shall use historic, actual gallons billed to all regional retail water customers in the previous completed calendar year.

2) Amounts referred to in gallons shall be per 1,000 gallons, unless otherwise specified.

3) Aqua Texas has provided a list of all entities (see attached) to be included in the regional pass-through costs. The PUC has approved the attached list.

4) Aqua Texas shall only collect costs directly associated with the production of water in the pass-through and specifically shall not include impact fees and other fees associated with plant and equipment.

5) Normalization shall not be used in any pass-through calculations.

6) No charges by affiliates (as defined by the Texas Water Code) of Aqua Texas shall be included in the pass through.

7) True-up Report to the regulatory authority ("Report"): Between the end of each calendar year and the following February 28, Aqua Texas shall provide a Report that reconciles the total Regional Pass-Through Gallonage Charge revenues billed during the previous completed calendar year within the Southeast region to the total amount of all regional passed-through costs incurred during that year as reflected in the general ledger. The Report shall include the amount paid to each entity for allowed passed through costs, the names of the entities paid by Aqua Texas, and the total of costs incurred requested for the purpose of an adjusted Regional Pass-Through Gallonage Charge. Any supporting documentation shall be attached to the report. Aqua Texas may submit information regarding new district charges in the Report (other than fines or penalties - see 4 above). New district charges associated with newly acquired systems shall not be included unless otherwise approved in a rate determination or proceeding. Aqua Texas will not include new purchase water agreements unless approved in a rate proceeding.

APPENDIX – D (Continued)
Aqua Texas – Southeast Region Water Utility Tariff
Regional Pass-Through Gallonage Charge True- up/Adjustment Provision and Report

***Calculations using this formula begins with the filing of the 2023 True-Up Report, which must be filed between the end of calendar year 2023 and February 28, 2024***

8. The true-up calculation for a completed calendar year Report shall be as follows:
   a) Regional Pass-Through Gallonage Charge revenues billed during completed calendar year.....$XXXX
   b) Regional passed-through costs actually incurred during completed calendar year.....$XXXX
   c) Difference between a) and b).....$XXXX

      where, a) – b) = c)

   d) Prior year's over/under collections.....$XXXX
   e) This year's total over/under collections.....$XXXX

      Where, c) + d) = e)

   Annual Reginal Pass-Through Gallonage Charge recalculations shall follow the following formula:

   b) Same as b) above.....$XXXX
   e) Same difference as e) above.....$XXXX
   f) Total adjusted regional pass-through costs subject to adjusted Regional Pass-Through Gallonage Charge.....$XXXX

      where, **b) – e) = f) Divided by:**
   g) Actual historic gallons billed to all regional customers in completed calendar year.....$XXXX

      Equals:

   h) Regional Pass-Through Gallonage Charge as adjusted.....$XXXX

      Where f) ÷ g) = h)

   Notice of any adjustments to the pass-through will be sent to the PUC or regulatory authority and to the affected customers. Notice to the customers may be in the form of a billing insert and must track the language required in 16 TAC § 24.25(b)(2)(F)(ii).

APPENDIX – D (Continued)
Aqua Texas – Southeast Region Water Utility Tariff
Regional Pass-Through Gallonage Charge True- up/Adjustment Provision and Report

8) With the Report Aqua Texas files on February 28 setting forth its calculation and supporting documentation for its adjusted Regional Pass-Through Gallonage Charge in accordance with 5) and 6) above, Aqua Texas shall include a tariff page that incorporates the adjusted Regional Pass-Through Gallonage Charge reflected in the Report. Aqua Texas shall implement the adjusted filed rate as follows:

   a) Aqua Texas will bill the adjusted Regional Pass-Through Gallonage Charge for services rendered on or after March 1 each year and thereafter until the rate is modified.

   b) The PUC or a successor agency with authority to regulate investor-owned utility rates (regulatory authority) shall review the Report and provide the results of its review to Aqua Texas in writing within 45 days after Aqua Texas submits the Report. If no written response is provided to Aqua Texas during that time, the adjusted Regional Pass-Through Gallonage Charge filed with the Report shall stand until modified.

   c) The PUC may dispute the calculation or supporting documentation as presented in the Report. If so, Aqua Texas and the PUC shall work in good faith to attempt resolution of the dispute.

   d) The process of implementing the Regional Pass-Through Gallonage Charge True-up/Adjustment and the regulatory authority's review of same is an informal proceeding and not a contested case hearing. However, if a dispute between Aqua Texas and the regulatory authority cannot be resolved through negotiation, only the PUC or Aqua Texas may request a hearing on Regional Pass-Through Gallonage Charge true-ups/adjustments. It shall not be considered a rate case under the Texas Water Code or PUC (or other regulatory authority) rules, and Texas Water Code § 13.187 shall not apply.

   e) In the event of a dispute or hearing concerning the Regional Pass-Through Gallonage Charge reflected in the tariff page filed with the Report, the filed rate shall be considered effective on an interim basis and previous charges will be adjusted in the next annual true-up, except that adjustments to the pass-through exceeding 50 percent may require immediate refunds or credits as directed by the regulatory authority. If the filed rate is modified pursuant to dispute or hearing resolution, a replacement tariff page shall be filed with the regulatory authority reflecting the modified rate.

   f) Notwithstanding the procedures outlined herein, if the Report indicates an increase to Aqua Texas' Regional Pass-through Gallonage Charge is appropriate for the calendar year assessed, Aqua Texas may elect not to implement the increase. Aqua Texas will submit a written notification of such an election with the Report, indicating the amount of foregone pass through revenues. Foregone pass through revenues due to such election shall not be collected.

   g) This pass-through provision is not intended to negate any authority granted to the regulatory authority.

***(Effective March 1, 2023; Tariff Control No. 54680)***

Federal Tax Change Credit Rider:.....(7.33%) of the monthly retail bill
(Effective May 1, 2018; ***Tariff Control No. 48197***)

Federal Tax Change Credit Rider:.....(5.26%) of the monthly retail bill
(Effective January 1, 2019; ***Tariff Control No. 48197***)

FORM OF PAYMENT: The utility will accept the following forms of payment:
Cash X (If in person at designated locations), Check X, Money Order X, Credit Card X,
Other (specify) Electronic Billing and Payment (See Section 2.06 Billing)

THE UTILITY MAY REQUIRE EXACT CHANGE FOR PAYMENTS AND MAY REFUSE TO ACCEPT PAYMENTS MADE USING MORE THAN $1.00 IN SMALL COINS. A WRITTEN RECEIPT WILL BE GIVEN FOR CASH PAYMENTS.

UNAFFILIATED THIRD PARTIES WHO ACCEPT AND PROCESS CASH, CREDIT CARD, OR ELECTRONIC PAYMENTS FOR UTILITY BILLS MAY REQUIRE PAYMENT OF AN ADDITIONAL CONVENIENCE CHARGE FOR THIS SERVICE.

REGULATORY ASSESSMENT ..... 1.0%

PUC RULES REQUIRE THE UTILITY TO COLLECT A FEE OF ONE PERCENT OF THE RETAIL MONTHLY BILL AND TO REMIT FEE TO THE TCEQ.

Section 1.02 - Miscellaneous Fees

TAP FEE ..... $900.00

TAP FEE COVERS THE UTILITY'S COSTS FOR MATERIALS AND LABOR TO INSTALL A STANDARD RESIDENTIAL 5/8" x 3/4" METER. AN ADDITIONAL FEE TO COVER UNIQUE COSTS IS PERMITTED IF LISTED ON THIS TARIFF.

TAP FEE (Unique costs)..... Actual Cost

FOR EXAMPLE, A ROAD BORE FOR CUSTOMERS OUTSIDE A SUBDIVISION IS A UNIQUE COST. UNIQUE COSTS WILL BE DETERMINED ON A CASE-BY-CASE BASIS.

TAP FEE (Larger meter) ..... Actual Cost

THIS TAP FEE IS BASED ON THE UTILITY'S ACTUAL COST FOR MATERIALS AND LABOR FOR METERS LARGER THAN STANDARD 5/8" x 3/4" METERS. UNIQUE COSTS, SUCH AS ROAD BORES, WILL BE CHARGED IN ADDITION TO THIS TAP FEE AT THEIR ACTUAL COST OF INSTALLATION.

RECONNECTION FEE

THE RECONNECTION FEE MUST BE PAID BEFORE SERVICE CAN BE RESTORED TO A CUSTOMER WHO HAS BEEN DISCONNECTED FOR THE FOLLOWING REASONS (OR OTHER REASONS LISTED UNDER SECTION 2.0 OF THIS TARIFF):

a) Non-payment of bill (Maximum $25.00)..... $25.00
b) Customer's request that service be disconnected ..... $75.00

SERVICE INITIATION FEE ..... $50.00

THE SERVICE INITIATION FEE WILL BE CHARGED FOR INITIATING AN ACCOUNT AT THE SERVICE LOCATION.

LATE CHARGE ..... 10%

PUC RULES ALLOW A ONE-TIME PENALTY TO BE CHARGED ON DELINQUENT BILLS. A LATE CHARGE MAY NOT BE APPLIED TO ANY BALANCE TO WHICH THE PENALTY WAS APPLIED IN A PREVIOUS BILLING

## SECTION 1.0 -- RATE SCHEDULE (Continued)

RETURNED CHECK CHARGE ..... $25.00
RETURNED CHECK CHARGES MUST BE BASED ON THE UTILITY'S DOCUMENTABLE COST.

CUSTOMER DEPOSIT - RESIDENTIAL (Maximum $50) ..... $50.00

CUSTOMER DEPOSIT - COMMERCIAL & NON-RESIDENTIAL . . 1/6TH OF ESTIMATED ANNUAL BILL

METER TEST FEE ..... $25.00
THIS FEE, WHICH SHOULD REFLECT THE UTILITY'S COST, MAY BE CHARGED IF A CUSTOMER REQUESTS A SECOND METER TEST WITHIN A TWO-YEAR PERIOD AND THE TEST INDICATES THAT THE METER IS RECORDING ACCURATELY THE FEE MAY NOT EXCEED $25

METER/SERVICE RELOCATION FEE (Customer's Request) ..... Actual Cost
THIS FEE MAY BE CHARGED IF A CUSTOMER REQUESTS THAT AN EXISTING METER BE RELOCATED.

STANDARD METER INSTALLATION FEE ..... $150.00
TO BE CHARGED WHEN UNMETERED SERVICE EXISTS ON THE SYSTEM THAT SHOULD BE METERED TO BE IN COMPLIANCE WITH THE UTILITY'S TARIFF BUT THE CONVERSION OF THE SERVICE WOULD NOT REQUIRE A FULL TAP AND ALL OF ITS COSTS. THIS FEE WILL BE A SHARING OF COSTS BETWEEN THE CUSTOMER AND THE UTILITY. THE CUSTOMER MAY HAVE THE OPTION OF PAYING THE FEE OVER NO MORE THAN THREE (3) MONTHS.

CUSTOMER SERVICE INSPECTION FEE ..... $100.00
SERVICE APPLICANTS MAY CHOOSE TO HAVE CUSTOMER SERVICE INSPECTIONS REQUIRED BY 30 TAC § 290.46(j) PERFORMED BY ANY STATE LICENSED INSPECTOR OF THEIR CHOICE. UNLESS THE SERVICE APPLICANT CHOOSES TO ARRANGE FOR AND PAY FOR THE INSPECTION INDEPENDENTLY, THE UTILITY MAY CHARGE SERVICE APPLICANTS THE CUSTOMER SERVICE INSPECTION FEE AT THE TIME THEY APPLY FOR SERVICE IF A RE-INSPECTION IS REQUIRED TO BRING PLUMBING INTO COMPLIANCE WITH APPLICABLE REQUIREMENTS OR IF AN EXTRA INSPECTION APPOINTMENT IS REQUIRED BECAUSE A CUSTOMER DOES NOT PERMIT PERFORMANCE OF AN INSPECTION AT A PREVIOUSLY AGREED UPON APPOINTMENT TIME, THE CUSTOMER MAY CHOOSE TO HAVE ANY STATE LICENSED INSPECTOR OF THEIR CHOICE PERFORM THE INSPECTION. IF THE CUSTOMER CHOOSES TO HAVE THE UTILITY PERFORM THE INSPECTION OR RE-INSPECTION, THE CUSTOMER WILL BE CHARGED $100 00 FOR EACH REQUIRED INSPECTION, RE-INSPECTION OR AGREED UPON INSPECTION APPOINTMENT AND WILL PAY THE UTILITY THE TOTAL AMOUNT OWED AT THE TIME AN INSPECTION OR RE-INSPECTION IS PERFORMED THE UTILITY MAY, AT ITS OPTION, INCLUDE THE ADDITIONAL CHARGE OR CHARGES ON THE NEXT MONTH'S UTILITY BILL RATHER THAN REQUIRING PAYMENT AT THE TIME OF THE INSPECTION OR RE-INSPECTION. THE UTILITY MAY USE UTILITY EMPLOYEES OR MAY HAVE THE INSPECTION PERFORMED BY A LICENSED THIRD PARTY CONTRACTOR

ILLEGAL RECONNECTION, LOCK REMOVAL OR DAMAGE FEE ..... $85.00
IN ORDER TO REIMBURSE THE UTILITY WITHOUT BURDENING OTHER CUSTOMERS WITH HIGHER RATES FOR THE ADDITIONAL COST OF SERVICE TRIPS TO DISCONNECT A CUSTOMER/ACCOUNT HOLDER WHO HAS BEEN DISCONNECTED FOR NONPAYMENT AND TO PAY FOR THE COST OF BROKEN OR CUT LOCKS AND SERVICE TIME, THIS FEE SHALL BE ASSESSED TO THE ACCOUNT HOLDER OF ANY DELINQUENT ACCOUNT THAT HAS BEEN DISCONNECTED FOR NONPAYMENT BY VALVING OFF, LOCKING OR REMOVING THE METER WHEN SERVICE TO THE PREMISES IS SUBSEQUENTLY RECONNECTED BY NON-UTILITY PERSONNEL BY CUTTING OR REMOVING THE LOCK, REOPENING THE VALVE, OR REMOVING OR BYPASSING THE METER WITHOUT AUTHORIZATION BY THE UTILITY THIS FEE MAY BE CHARGED EACH TIME AN EVENT OCCURS AND SERVICE WILL NOT BE RECONNECTED UNTIL THIS FEE IS PAID IN ADDITION TO ANY OTHER BALANCES AND RECONNECT FEES THIS FEE SHALL NOT BE CHARGED IF A FEE FOR A DAMAGED METER IS CHARGED OR IF THE ACCOUNT HOLDER OR HIS/HER REPRESENTATIVE INFORMS THE UTILITY WITHIN 24 HOURS AFTER DISCOVERING THAT SERVICE HAS BEEN RESTORED WITHOUT AUTHORIZATION OF THE UTILITY: (1) THAT SERVICE WAS RECONNECTED WITHOUT THE ACCOUNT HOLDER'S PERMISSION; AND (2) THE ACCOUNT HOLDER AGREES TO PAY FOR ALL WATER USED

SECTION 1.0 -- RATE SCHEDULE (Continued)

DAMAGED METER AND APPURTENANCES FEE ..... Actual cost

THIS FEE SHALL BE ASSESSED TO THE ACCOUNT HOLDER OF ANY DELINQUENT ACCOUNT THAT HAS BEEN DISCONNECTED FOR NONPAYMENT BY VALVING OFF OR LOCKING THE METER WHEN THE METER AND/OR METER APPURTENANCES, SUCH AS AN AMR UNIT OR CURB STOP, ARE DAMAGED IN ORDER TO RESTORE WATER SERVICE TO THE ACCOUNT HOLDER'S ORIGINAL PLACE OF SERVICE REQUIRING THE UTILITY TO REPAIR OR REPLACE THEM. THE ACCOUNT HOLDER SHALL BE CHARGED THE FULL COST OF REPAIRING AND/OR REPLACING ALL DAMAGED PARTS AS THE UTILITY DEEMS NECESSARY, INCLUDING LABOR AND VEHICLE COSTS. THIS WILL INCLUDE REPLACEMENT OF VALVES OR CURB STOPS THAT HAVE HAD THEIR LOCKING EYES BROKEN OFF THE FLANGES.

GOVERNMENTAL TESTING, INSPECTION AND COSTS SURCHARGE:

WHEN AUTHORIZED IN WRITING BY PUC AND AFTER NOTICE TO CUSTOMERS, THE UTILITY MAY INCREASE RATES TO RECOVER INCREASED COSTS FOR INSPECTION FEES AND WATER TESTING. [16 TAC § 24.25(b)(2)(G)]

LINE EXTENSION AND CONSTRUCTION CHARGES:

REFER TO SECTION 3.0--EXTENSION POLICY FOR TERMS, CONDITIONS, AND CHARGES WHEN NEW CONSTRUCTION IS NECESSARY TO PROVIDE SERVICE.

SECTION 1.0 -- RATE SCHEDULE (Continued)

REGIONAL TEMPORARY WATER RATE:

UNLESS OTHERWISE SUPERSEDED BY PUC ORDER OR RULE, IF THE UTILITY IS ORDERED BY A COURT OR GOVERNMENTAL BODY OF COMPETENT JURISDICTION TO REDUCE ITS PUMPAGE, PRODUCTION OR WATER SALES, AQUA TEXAS SHALL BE AUTHORIZED TO INCREASE ITS APPROVED LINE ITEM CHARGES PER 1,000 GALLONS USED (GALLONAGE CHARGE & REGIONAL PASS-THROUGH GALLONAGE CHARGE) BY THE AMOUNT OF THE REGIONAL TEMPORARY WATER RATE INCREASE ("RTWR") CALCULATED ACCORDING TO THE FORMULA:

$$RTWR = (((PRR)(CGC)(R))/(1-R))*((APV)/(RPV))$$

Where:

| | | |
|---|---|---|
| RTWR | = | Regional Temporary Water Rate increase per 1,000 gallons |
| CGC | = | current total volume charge per 1,000 gallons used (Gallonage Charge + Regional Pass-Through gallonage charge) |
| R | = | water use reduction expressed as a decimal fraction (the pumping restriction) |
| PRR | = | percentage of revenues to be recovered expressed as a decimal fraction, for this tariff PRR shall equal 0.5. |
| APV | = | Annual Pumped and/or Purchased volume from the most recent rate application for the system or systems where the temporary restrictions are imposed; or the most recent 12 months if more than 3 years have passed since the most recent rate application was filed; and |
| RPV | = | Annual Pumped and Purchased volume for Region from the most recent rate application; or the most recent 12 months if more than 3 years have passed since the most recent rate application was filed |

To implement the Regional Temporary Water Rate, Aqua Texas must comply with all notice and other requirements of 16 TAC § 24.25(j).

REGIONAL PASS-THROUGH GALLONAGE CHARGE ADJUSTMENT: **See Attached Appendix C**

FEDERAL TAX CHANGE CREDIT RIDER (FTCCR):

The Federal Tax Change Credit Rider gives effect to the Tax Cuts and Jobs Act of 2017, which changed the federal corporate tax rate from 35% to 21%, by reducing the cost of service paid by customers taking service under this rate tariff. The FTCCR will provide credits to customers taking service under this rate tariff.

SECTION 1.0 - RATE SCHEDULE (Continued)

PURCHASED WATER AND /OR DISTRICT FEE PASS THROUGH CLAUSE

Changes in fees imposed by any non-affiliated third party water supplier or underground water district having jurisdiction over the Utility shall be passed through as an adjustment to the water gallonage charge according to the following formula:

AG = G+B/(1-L), where
- AG = adjusted gallonage charge, rounded to the nearest one cent:
- G = approved gallonage charge (per 1,000 gallons)
- B = change in purchased water/district gallonage charge (per 1,000 gallons);
- L = system average line loss for preceding 12 months not to exceed 0.15

FEDERAL TAX CHANGE CREDIT RIDER (FTCCR):
The Federal Tax Change Credit Rider gives effect to the Tax Cuts and Jobs Act of 2017, which changed the federal corporate tax rate from 35% to 21%, by reducing the cost of service paid by customers taking service under this rate tariff. System Improvement Charge - Not subject to Federal Tax Change Credit Rider

| Meter Size | Residential Monthly Charge | Commercial Monthly Charge |
|---|---|---|
| 5/8" x 3/4" | $11.26 | $11.26 |
| 1" | $28.15 | $28.15 |
| 1½" | $56.30 | $56.30 |
| 2" | $90.08 | $90.08 |
| 3" | $180.16 | $180.16 |
| 4" | $281.50 | $281.50 |
| 6" | $563.00 | $563.00 |
| 8" | $900.80 | $900.80 |
| 10" | $1,294.90 | $1,294.90 |
| 12" | $2,420.30 | $2,420.90 |

Federal Tax Change Credit Rider: .....(7.33%) of the monthly retail bill
(Effective May 1, 2018; ***Tariff Control No. 48197***)

Federal Tax Change Credit Rider: .....(5.26%) of the monthly retail bill
(Effective January 1, 2019; ***Tariff Control No. 48197***)

FORM OF PAYMENT: The utility will accept the following forms of payment:
Cash X (If in person at designated locations), Check X, Money Order X, Credit Card X,
Other (specify) Electronic Billing and Payment (See Section 2.06 Billing)

THE UTILITY MAY REQUIRE EXACT CHANGE FOR PAYMENTS AND MAY REFUSE TO ACCEPT PAYMENTS MADE USING MORE THAN $1.00 IN SMALL COINS. A WRITTEN RECEIPT WILL BE GIVEN FOR CASH PAYMENTS.

UNAFFILIATED THIRD PARTIES WHO ACCEPT AND PROCESS CASH, CREDIT CARD, OR ELECTRONIC PAYMENTS FOR UTILITY BILLS MAY REQUIRE PAYMENT OF AN ADDITIONAL CONVENIENCE CHARGE FOR THIS SERVICE.

REGULATORY ASSESSMENT .....1.0%

PUC RULES REQUIRE THE UTILITY TO COLLECT A FEE OF ONE PERCENT OF THE RETAIL MONTHLY BILL AND TO REMIT FEE TO THE TCEQ.

Section 1.02 - Miscellaneous Fees

TAP FEE .....$600.00

TAP FEE COVERS THE UTILITY'S COSTS FOR MATERIALS AND LABOR TO INSTALL A STANDARD RESIDENTIAL 5/8" x 3/4" METER AN ADDITIONAL FEE TO COVER UNIQUE COSTS IS PERMITTED IF LISTED ON THIS TARIFF.

TAP FEE (Unique costs).....Actual Cost

FOR EXAMPLE, A ROAD BORE FOR CUSTOMERS OUTSIDE OF SUBDIVISIONS OR RESIDENTIAL AREAS.

TAP FEE (Larger meter) .....Actual Cost

THIS TAP FEE IS BASED ON THE UTILITY'S ACTUAL COST FOR MATERIALS AND LABOR FOR METERS LARGER THAN STANDARD 5/8" x 3/4" METERS. UNIQUE COSTS, SUCH AS ROAD BORES, WILL BE CHARGED IN ADDITION TO THIS TAP FEE AT THEIR ACTUAL COST OF INSTALLATION

## SECTION 1.0 -- RATE SCHEDULE (Continued)

METER RELOCATION FEE ..... Actual Relocation Cost, Not to Exceed Tap Fee
THIS FEE, WHICH SHOULD REFLECT THE UTILITY'S COST, MAY BE CHARGED IF A CUSTOMER REQUESTS A SECOND METER TEST WITHIN A TWO-YEAR PERIOD AND THE TEST INDICATES THAT THE METER IS RECORDING ACCURATELY THE FEE MAY NOT EXCEED $25.

METER TEST FEE ..... $25.00
THIS FEE, WHICH SHOULD REFLECT THE UTILITY'S COST, MAY BE CHARGED IF A CUSTOMER REQUESTS A SECOND METER TEST WITHIN A TWO-YEAR PERIOD AND THE TEST INDICATES THAT THE METER IS RECORDING ACCURATELY. THE FEE MAY NOT EXCEED $25.

RECONNECTION FEE
THE RECONNECTION FEE MUST BE PAID BEFORE SERVICE CAN BE RESTORED TO A CUSTOMER WHO HAS BEEN DISCONNECTED FOR THE FOLLOWING REASONS (OR OTHER REASONS LISTED UNDER SECTION 2.0 OF THIS TARIFF):
a) Non-payment of bill (Maximum $25.00) ..... $25.00
b) Customer's request that service be disconnected ..... $45.00

SEASONAL RECONNECT FEE
BASE RATE FOR METER SIZE TIMES THE NUMBER OF MONTHS OFF SYSTEM NOT TO EXCEED SIX MONTHS WHEN LEAVE AND RETURN WITHIN A TWELVE MONTH PERIOD.

SERVICE INITIATION FEE ..... $45.00
THE SERVICE INITIATION FEE WILL BE CHARGED FOR INITIATING AN ACCOUNT AT THE SERVICE LOCATION.

LATE CHARGE ..... 10%
PUC RULES ALLOW A ONE-TIME PENALTY TO BE CHARGED ON DELINQUENT BILLS. A LATE CHARGE MAY NOT BE APPLIED TO ANY BALANCE TO WHICH THE PENALTY WAS APPLIED IN A PREVIOUS BILLING.

RETURNED CHECK CHARGE ..... $25.00
RETURNED CHECK CHARGES MUST BE BASED ON THE UTILITY'S DOCUMENTABLE COST.

CUSTOMER DEPOSIT - RESIDENTIAL (Maximum $50) ..... $50.00

CUSTOMER DEPOSIT - COMMERCIAL & NON-RESIDENTIAL .. 1/6TH OF ESTIMATED ANNUAL BILL

METER/SERVICE RELOCATION FEE (Customer's Request) ..... Actual Cost
THIS FEE MAY BE CHARGED IF A CUSTOMER REQUESTS THAT AN EXISTING METER BE RELOCATED

STANDARD METER INSTALLATION FEE ..... $150.00
TO BE CHARGED WHEN UNMETERED SERVICE EXISTS ON THE SYSTEM THAT SHOULD BE METERED TO BE IN COMPLIANCE WITH THE UTILITY'S TARIFF BUT THE CONVERSION OF THE SERVICE WOULD NOT REQUIRE A FULL TAP AND ALL OF ITS COSTS THIS FEE WILL BE A SHARING OF COSTS BETWEEN THE CUSTOMER AND THE UTILITY. THE CUSTOMER MAY HAVE THE OPTION OF PAYING THE FEE OVER NO MORE THAN THREE (3) MONTHS

GOVERNMENTAL TESTING, INSPECTION AND COSTS SURCHARGE:
WHEN AUTHORIZED IN WRITING BY PUC AND AFTER NOTICE TO CUSTOMERS, THE UTILITY MAY INCREASE RATES TO RECOVER INCREASED COSTS FOR INSPECTION FEES AND WATER TESTING. [16 TAC § 24 25(b)(2)(G)].

LINE EXTENSION AND CONSTRUCTION CHARGES:
REFER TO SECTION 3.0--EXTENSION POLICY FOR TERMS, CONDITIONS, AND CHARGES WHEN NEW CONSTRUCTION IS NECESSARY TO PROVIDE SERVICE.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
1728
FEB 28 2024
DOCKET 55818

## SECTION 1.0 -- RATE SCHEDULE (Continued)

TEMPORARY WATER RATE:

UNLESS OTHERWISE SUPERSEDED BY PUC ORDER OR RULE, IF THE UTILITY IS ORDERED BY A COURT OR GOVERNMENTAL BODY OF COMPETENT JURISDICTION TO REDUCE ITS PUMPAGE, PRODUCTION OR WATER SALES, AQUA TEXAS SHALL BE AUTHORIZED TO INCREASE ITS APPROVED GALLONAGE CHARGE ACCORDING TO THE FORMULA:

$$TGC = cgc + \frac{(prr)(cgc)(r)}{(1.0-r)}$$

Where:

| | | |
|---|---|---|
| TGC | = | temporary gallonage charge |
| cgc | = | current gallonage |
| r | = | water use reduction expressed as a decimal fraction (the pumping restriction) |
| prr | = | percentage of revenues to be recovered expressed as a decimal fraction, for this tariff prr shall equal 0.5. |

To implement the Regional Temporary Water Rate, Aqua Texas must comply with all notice and other requirements of 16 TAC § 24.25(j).

PURCHASED WATER AND/OR DISRICT FEE PASS THROUGH CLAUSE:

Changes in fees imposed by any non-affiliated third-party water supplier or underground water district having jurisdiction over the Utility shall be passed through to only the water system(s) affected by the increase or fee as an adjustment to toe gallonage charge according to the following formula:

| | | |
|---|---|---|
| AG | = | G + B / (1-L) |
| AG | = | adjusted gallonage charge, rounded to the nearest one cent: |
| G | = | approved gallonage charge (per 1,000 gallons); |
| B | = | change in purchased water/district gallonage charge (per 1,000 gallons); |
| L | = | system average line loss for preceding 12 months not to exceed 0.15 |

CUSTOMER SERVICE INSPECTION FEE ..... $75.00

SERVICE APPLICANTS ARE FREE TO HAVE CUSTOMER SERVICE INSPECTIONS REQUIRED BY TCEQ RULE 290.46(J) PERFORMED BY ANY STATE-LICENSED INSPECTOR OF THEIR CHOICE. THEY ARE ENCOURAGED TO USE A THIRD PARTY INSPECTOR AND NOT AN EMPLOYEE OF THE UTILITY. HOWEVER, IF THEY REQUEST THE UTILITY TO PERFORM THE INSPECTION AND THE UTILITY HAS AN APPROVED INSPECTOR AVAILABLE; IT WILL BE DONE AT A MARKET PRICE SINCE THIS IS NOT A NORMAL FUNCTION OF PUBLIC WATER UTILITY SERVICE. PERFORMING CUSTOMER SERVICE INSPECTIONS MUST TAKE LOWER PRIORITY TO FULFILLING UTILITY SERVICE RESPONSIBILITIES UNDER THE TCEQ'S CHAPTER 290 AND 291 RULES.

LOCK REMOVAL OR DAMAGE FEE ..... $10.00

THIS FEE SHALL BE ASSESSED TO THE ACCOUNT HOLDER OF ANY DELINQUENT ACCOUNT THAT HAS BEEN TERMINATED FOR NON-PAYMENT BY LOCKING THE METER AND THE LOCK HAS SUBSEQUENTLY BEEN REMOVED OR DAMAGED WITHOUT AUTHORIZATION BY THE UTILITY IN ORDER TO RESTORE WATER SERVICE TO THE ACCOUNT HOLDER'S ORIGINAL PLACE OF SERVICE. THIS FEE SHALL NOT BE CHARGED IF THE DAMAGED METER FEE IS CHARGED.

DAMAGED METER AND APPURTENANCES FEE ..... Actual cost

THIS FEE SHALL BE ASSESSED TO THE ACCOUNT HOLDER OF ANY DELINQUENT ACCOUNT THAT HAS BEEN TERMINATED FOR NON-PAYMENT BY LOCKING THE METER AND/OR METER APPURTENANCES SUCH AS AN AMR UNIT, OR THE CURB STOP HAS BEEN DAMAGED IN ORDER TO RESTORE WATER SERVICE TO THE ACCOUNT HOLDER'S ORIGINAL PLACE OF SERVICE REQUIRING THE UTILITY TO REPLACE OR REPAIR THEM. THE ACCOUNT HOLDER SHALL BE CHARGED THE FULL COST OF REPAIRING AND/OR REPLACING ALL DAMAGED PARTS, INCLUDING LABOR AND VEHICLE COSTS. THIS WILL INCLUDE REPLACEMENT OF METERS THAT HAVE HAD THEIR LOCKING EYES BROKEN OFF THE FLANGES

FEDERAL TAX CHANGE CREDIT RIDER (FTCCR):

THE FEDERAL TAX CHANGE CREDIT RIDER GIVES EFFECT TO THE TAX CUTS AND JOBS ACT OF 2017, WHICH CHANGED THE FEDERAL CORPORATE TAX RATE FROM 35% TO 21%, BY REDUCING THE COST OF SERVICE PAID BY CUSTOMERS TAKING SERVICE UNDER THIS RATE TARIFF. SECTION 1.0 - RATE SCHEDULE (continued)

LATE CHARGE (EITHER $5.00 OR 10% OF THE BILL).....$5.00
PUC RULES ALLOW A ONE-TIME PENALTY TO BE CHARGED ON DELINQUENT BILLS A LATE CHARGE MAY NOT BE APPLIED TO ANY BALANCE TO WHICH THE PENALTY WAS APPLIED IN A PREVIOUS BILLING.

RETURNED CHECK CHARGE.....$15.00
RETURNED CHECK CHARGES MUST BE BASED ON THE UTILITY'S DOCUMENTABLE COST.

CUSTOMER DEPOSIT RESIDENTIAL (Maximum $50).....$50.00

COMMERCIAL & NON-RESIDENTIAL DEPOSIT 1/6TH OF ESTIMATED ANNUAL BILL

GOVERNMENTAL TESTING, INSPECTION AND COSTS SURCHARGE
WHEN AUTHORIZED IN WRITING BY PUC AND AFTER NOTICE TO CUSTOMERS, THE UTILITY MAY INCREASE RATES TO RECOVER INCREASED COSTS FOR INSPECTION FEES AND WATER TESTING [16 TAC § 24.25(b)(2)(G)].

LINE EXTENSION AND CONSTRUCTION CHARGES:
REFER TO SECTION 3.0 EXTENSION POLICY FOR TERMS, CONDITIONS, AND CHARGES WHEN NEW CONSTRUCTION IS NECESSARY TO PROVIDE SERVICE

Section 1.04 – Purchased Water Adjustment Provision

The minimum bill and gallonage rate set forth in Section 1.01 are based upon a cost of wholesale water purchased from the City of Austin at a rate of $49.21 for the first 2,000 gallons and $2.26 for each additional 1,000 gallons. The gallonage rate in Section 1.01 (2.60 per 1,000 gallons) may be increased or decreased to reflect changes in the cost of water purchased from the City of Austin in accordance with the following procedures:

1. The current rate of $2.60 per 1,000 gallons will be increased or decreased when the City of Austin adjusts its current gallonage rate. For example:
   - If the City of Austin's gallonage rate increases by $.04 per 1,000 gallons to $2.30/1,000 gallons, the new gallonage rate for the Aqua Utilities, Inc. dba Aqua Texas, Inc.'s customers will also increase by $.04 to $2.64/1,000 gallons.
   - If the City of Austin's gallonage rate decreases by $.04 per 1,000 gallons to $2.22/1,000 gallons, the new gallonage rate for the Aqua Utilities, Inc. dba Aqua Texas, Inc.'s customers will also decrease by $.04 to $2.56/1,000 gallons.
2. The utility shall notify its customers and the Public Utility Commission of Texas in writing of the proposed change prior to the effective date of implementation of the changed rates. Notice to the customers, which may be in the form of a billing insert, shall contain the effective date of the change, the present rates, the new rates, and the change in charges to the Utility for purchased water. The notice shall also include the following language: "This tariff change is being implemented in accordance with the Utility's approved purchased water adjustment provision. The cost of these charges to the Utility's customers will not exceed the increased or decreased cost of purchased, water."
3. Notice to the Public Utility Commission of Texas shall include a copy of the notice sent to customers, proof that the cost of purchased water has changed by the stated amount, and the calculations and assumptions used to determine the new rates.

FEDERAL TAX CHANGE CREDIT RIDER (FTCCR):
The Federal Tax Change Credit Rider gives effect to the Tax Cuts and Jobs Act of 2017, which changed the federal corporate tax rate from 35% to 21%, by reducing the cost of service paid by customers taking service under this rate tariff. The FTCCR will provide credits to customers taking service under this rate tariff.

SECTION 1.0 -- RATE SCHEDULE

Section 1.01 - Rates

| Meter Size | Monthly Minimum Charge (Includes 0 gallons all meters) | Gallonage Charge |
|---|---|---|
| 5/8" | $37.42 | $2.75 per 1,000 gallons |
| 1" | $93.55 | Peak Season Volumetric Rates (June-Sept) |
| 1½" | $187.10 | |
| 2" | $299.36 | $2.10 per 1,000 gallons |
| 3" | $598.72 | Off-Peak Season Volumetric Rates (Oct-May) |
| 4" | $935.50 | |
| 6" | $1,871.00 | |
| 8" | $2,993.60 | |
| 10" | $4,303.30 | |
| 12" | $9,355.00 | |

Monthly Minimum Charge for any meter size larger than 12" will be calculated using American Water Works Association (AWWA) approved meter equivalency factors.

System Improvement Charge - Not subject to Federal Tax Change Credit Rider

| Meter Size | Monthly Charge |
|---|---|
| 5/8" x 3/4" | $11.26 |
| 1" | $28.15 |
| 1½" | $56.30 |
| 2" | $90.08 |
| 3" | $180.16 |
| 4" | $281.50 |
| 6" | $563.00 |
| 8" | $900.80 |
| 10" | $1,294.90 |
| 12" | $2,420.90 |

Federal Tax Change Credit Rider: .....(7.33%) of the monthly retail bill
(Effective May 1, 2018; ***Tariff Control No. 48197***)

Federal Tax Change Credit Rider: .....(5.26%) of the monthly retail bill
(Effective January 1, 2019; ***Tariff Control No. 48197***)

FORM OF PAYMENT: The utility will accept the following forms of payment:
Cash X (if in person at designated locations), Check X, Money Order X, Credit Card X,
Other Electronic Billing and Payment (See Section 2.06 Billing)

THE UTILITY MAY REQUIRE EXACT CHANGE FOR PAYMENTS AND MAY REFUSE TO ACCEPT PAYMENTS MADE USING MORE THAN $1.00 IN SMALL COINS. A WRITTEN RECEIPT WILL BE GIVEN FOR CASH PAYMENTS.

UNAFFILIATED THIRD PARTIES WHO ACCEPT AND PROCESS CASH, CREDIT CARD, OR ELECTRONIC PAYMENTS FOR UTILITY BILLS MAY REQUIRE AN ADDITIONAL CONVENIENCE CHARGE FOR THIS SERVICE

SECTION 1.0 -- RATE SCHEDULE (continued)

REGULATORY ASSESSMENT ..... 1.0%
PUC RULES REQUIRE THE UTILITY TO COLLECT A FEE OF ONE PERCENT OF THE RETAIL MONTHLY BILL AND TO REMIT FEE TO THE TCEQ.

Section 1.02 – Miscellaneous Fees

TAP FEE ..... $900.00
TAP FEE IS BASED ON THE AVERAGE OF THE UTILITY'S ACTUAL COST FOR MATERIALS AND LABOR FOR STANDARD RESIDENTIAL CONNECTION OF 5/8" METER PLUS UNIQUE COSTS AS PERMITTED BY PUC RULE AT COST.

TAP FEE (Unique costs) ..... Actual Cost
FOR EXAMPLE. A ROAD BORE FOR CUSTOMERS OUTSIDE OF SUBDIVISIONS OR RESIDENTIAL AREAS UNIQUE COSTS WILL BE DETERMINED ON A CASE-BY-CASE BASIS

LARGE METER TAP FEE ..... Actual Cost
TAP FEE IS BASED ON THE UTILITY'S ACTUAL COST FOR MATERIALS AND LABOR FOR METERS LARGER THAN STANDARD 5/8" METERS. UNIQUE COSTS SUCH AS ROAD BORES, WILL BE CHARGED IN ADDITION TO THIS TAP FEE AT THEIR ACTUAL COST OF INSTALLATION.

RECONNECTION FEE
THE RECONNECT FEE WILL BE CHARGED BEFORE SERVICE CAN BE RESTORED TO A CUSTOMER WHO HAS BEEN DISCONNECTED FOR THE FOLLOWING REASONS:

a) Non-payment of bill (Maximum $25.00) ..... $25.00
b) Customer's request ..... $75.00

SERVICE INITIATION FEE ..... $50.00
THE SERVICE INITIATION FEE WILL BE CHARGED FOR INITIATING AN ACCOUNT AT THE SERVICE LOCATION.

LATE CHARGE ..... 10%
A ONE-TIME PENALTY MAY BE MADE ON DELINQUENT BILLS BUT MAY NOT BE APPLIED TO ANY BALANCE TO WHICH THE PENALTY WAS APPLIED IN A PREVIOUS BILLING.

RETURNED CHECK CHARGE ..... $25.00
RETURNED CHECK CHARGES MUST BE BASED ON THE UTILITY'S DOCUMENTABLE COST.

CUSTOMER DEPOSIT RESIDENTIAL (Maximum $50) ..... $50.00

COMMERCIAL AND NON-RESIDENTIAL DEPOSIT ..... 1/6TH EST. ANNUAL BILL

METER TEST FEE (actual cost of testing the meter up to) ..... $25.00
THIS FEE MAY BE CHARGED IF A CUSTOMER REQUESTS A SECOND METER TEST WITHIN A TWO-YEAR PERIOD AND THE TEST INDICATES THAT THE METER IS RECORDING ACCURATELY.

METER RELOCATION FEE ..... Actual Relocation Cost
THIS FEE MAY BE CHARGED IF A CUSTOMER REQUESTS RELOCATION OF AN EXISTING METER

GOVERNMENTAL TESTING, INSPECTION AND COSTS SURCHARGE CLAUSE:
INCREASES IN INSPECTION FEES AND WATER TESTING COSTS IMPOSED BY STATE OR FEDERAL LAW MAY BE PASSED THROUGH AS AN ADJUSTMENT TO THE MONTHLY BASE RATE CHARGE UNDER THE TERMS AND CONDITIONS OF [16 TAC § 24.25(b)(2)(G)] AFTER NOTICE TO CUSTOMERS AND UPON WRITTEN APPROVAL BY THE PUC.

SECTION 1.0 -- RATE SCHEDULE (continued)

LINE EXTENSION AND CONSTRUCTION CHARGES:

REFER TO SECTION 3.0--EXTENSION POLICY FOR TERMS, CONDITIONS, AND CHARGES WHEN NEW CONSTRUCTION IS NECESSARY TO PROVIDE SERVICE.

**REGIONAL TEMPORARY WATER RATE:**

Unless otherwise superseded by PUC order or rule, if the Utility is ordered by a court or governmental body of competent jurisdiction to reduce its pumpage, production or water sales, the Utility shall be authorized to increase its approved gallonage charge according to the formula:

$$RTGC = cgc + \frac{(prr)(cgc)(r)}{(1.0-r)}$$

Where:

| | | |
|---|---|---|
| RTGC | = | regional temporary gallonage charge |
| cgc | = | current gallonage charge |
| r | = | water use reduction expressed as a decimal fraction (the pumping restriction) |
| prr | = | percentage of revenues to be recovered expressed as a decimal fraction, for this tariff prr shall equal 0.5. |

To implement the Temporary Water Rate, the utility must comply with all notice and other requirements of 16 TAC § 24.25(j).

FEDERAL TAX CHANGE CREDIT RIDER (FTCCR):

The Federal Tax Change Credit Rider gives effect to the Tax Cuts and Jobs Act of 2017, which changed the federal corporate tax rate from 35% to 21%, by reducing the cost of service paid by customers taking service under this rate tariff. The FTCCR will provide credits to customers taking service under this rate tariff.

## SECTION 2.0 - SERVICE RULES AND REGULATIONS

### Section 2.01 – Public Utility Commission of Texas Rules

The utility will have the most current Public Utility Commission (PUC) of Texas Rules, Chapter 24, available at its office for reference purposes. The Rules and this tariff shall be available for public inspection and reproduction at a reasonable cost. The latest Rules or Commission approved changes to the Rules supersede any rules or requirements in this tariff.

### Section 2.02 – Request to Initiate, Transfer or Terminate Water or Sewer Service

A customer may initiate, transfer or terminate retail water or sewer service by mail, by telephone, through an Internet website, or through another electronic transmission. If a service request is initiated by mail, the utility's standard application or contract form (attached in the Appendix to this tariff) must be signed and submitted by the applicant before water service is provided by the utility.

After the applicant has met all the requirements, conditions and regulations for service, the utility will install a tap, meter and utility cut-off valve and/or take all necessary actions to initiate service. The utility will serve each qualified applicant for service within ten working days unless line extensions or new facilities are required. If construction is required to fill the order and if it cannot be completed within 30 days, the utility will provide the applicant with a written explanation of the construction required and an expected date of service. Notwithstanding any statement in this tariff to the contrary, the utility will serve each qualified applicant for service within the time limits prescribed in 16 TAC § 24.161(a)-(b) as that rule may be amended by the PUC.

Where service has previously been provided, service will be reconnected within three working days after the applicant has met the requirements for reconnection.

The customer will be responsible for furnishing and laying the necessary customer service pipe from the meter location to the place of consumption. Customers may be required to install a customer owned cut-off valve on the customer's side of the meter or connection.

### Section 2.03 - Refusal of Service

The utility may decline to serve an applicant until the applicant has complied with the regulations of the regulatory agencies (state and municipal regulations) and for the reasons outlined in the PUC Rules. In the event that the utility refuses to serve an applicant, the utility will inform the applicant in writing of the basis of its refusal. The utility is also required to inform the applicant a complaint may be filed with the Commission.

### Section 2.04 - Customer Deposits

If a residential applicant cannot establish credit to the satisfaction of the utility, the applicant may be required to pay a deposit as provided for in Section 1.02 of this tariff. The utility will keep records of the deposit and credit interest in accordance with PUC Rules.

Residential applicants 65 years of age or older may not be required to pay deposits unless the applicant has an outstanding account balance with the utility or another water or sewer utility which accrued within the last two years.

Nonresidential applicants who cannot establish credit to the satisfaction of the utility may be required to make a deposit that does not exceed an amount equivalent to one-sixth of the estimated annual billings.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 28 2024
1740
55818

SECTION 2.0 - SERVICE RULES AND REGULATIONS (Continued)

Refund of deposit. - If service is not connected, or after disconnection of service, the utility will promptly refund the customer's deposit plus accrued interest or the balance, if any, in excess of the unpaid bills for service furnished. The utility may refund the deposit at any time prior to termination of utility service but must refund the deposit plus interest for any customer who has paid 18 consecutive billings without being delinquent.

Section 2.05 - Meter Requirements, Reading and Testing

All water sold by the utility will be billed based on meter measurements. The utility will provide, install, own and maintain meters to measure amounts of water consumed by its customers. One meter is required for each residential, commercial or industrial facility in accordance with the PUC Rules.

Service meters will be read at monthly intervals and as nearly as possible on the corresponding day of each monthly meter reading period unless otherwise authorized by the Commission.

Meter Tests. - The utility will, upon the request of a customer, and, if the customer so desires, in his or her presence or in that of his or her authorized representative, make without charge a test of the accuracy of the customer's meter. If the customer asks to observe the test, the test will be made during the utility's normal working hours at a time convenient to the customer. Whenever possible, the test will be made on the customer's premises, but may, at the utility's discretion, be made at the utility's testing facility. If within a period of two years the customer requests a new test, the utility will make the test, but if the meter is found to be within the accuracy standards established by the American Water Works Association, the utility will charge the customer a fee which reflects the cost to test the meter up to a maximum $25 for a residential customer. Following the completion of any requested test, the utility will promptly advise the customer of the date of removal of the meter, the date of the test, the result of the test, and who made the test.

Section 2.06 - Billing

Bills from the Utility will be mailed monthly unless authorized by the Commission or the customer voluntarily elects to be billed through a paperless electronic billing system which uses standard forms, protocols and conformation processes established and maintained by the utility or unaffiliated third parties providing online billing and payment services that are approved by the Utility. The due date to pay bills for utility service will be at least 21 days from the date of issuance. The postmark on the bill or, if there is no postmark on the bill, the recorded date of mailing or electronic mailing by the Utility or the Utility's billing service will constitute proof of the date of issuance. Payment for utility service is delinquent if full payment, including late fees and the regulatory assessment, is not received at the Utility or the Utility's authorized payment processor by 5:00 p.m. on the due date. If the due date falls on a holiday or weekend, the due date for payment purposes will be the next work day after the due date.

A late penalty of 10% will be charged on delinquent bills. Customer payments post marked by the due date will not incur a late penalty. The penalty on delinquent bills will not be applied to any balance to which the penalty was applied in a previous billing. The utility must maintain a record of the date of mailing to charge the late penalty.

Each bill will provide all information required by the PUC Rules. For each of the systems it operates, the utility will maintain and note on the monthly bill a telephone number (or numbers) which may be reached by a local call by customers. At the utility's option, a toll-free telephone number or the equivalent may be provided.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 28 2024
DOCKET
55818 41

SECTION 2.0 - SERVICE RULES AND REGULATIONS (Continued)

Cash Payments at Non-utility payment locations or Credit Card Payments – The Utility may use unaffiliated third parties to accept and process utility bill cash payments at non-utility payment locations or to accept and process utility bill credit card payments. Any charges required by the third party to accept and process such utility bill payments are the responsibility of the customer and are in addition to utility bill amounts.

Electronic Billing and Payment – A customer may voluntarily elect to be billed through a paperless electronic billing system which uses standard forms, protocols and conformation processes established and maintained by the Utility or unaffiliated third parties providing online billing and payment services that are approved by the Utility. Any charges required by the third party to process the electronic bill or payment are the responsibility of the customer and are in addition to utility bill amounts. In administering this electronic billing option, the Utility does not send the customer paper bills. Customers may sign up for electronic billing at www.aquaamerica.com. Required information that otherwise accompanies a paper bill is transmitted to the customer electronically, or an Internet link access to such information is transmitted electronically to the customer. Any applicable disconnection notice continues to be sent to the customer via United States mail. The Utility may utilize unaffiliated third parties to electronically transmit bills to the customer. The Utility is not responsible for any loss resulting from the customer's election to receive bills electronically, including but not limited to, any loss associated with damage to the customer's computer equipment or facilities and any loss associated with a third party's unauthorized use of the customer's information. Either the Utility or customer may, upon thirty (30) days notice to the other party, terminate electronic transmission of bills without any liability to the terminating party resulting from such termination, and without affecting the customer's obligation to pay all amounts due to the Utility. In such event, the Utility will begin to issue paper bills via United States mail to the customer as soon as reasonably practical. The Utility reserves the right to determine whether or not a customer is eligible to be billed through its paperless electronic billing system. A customer that elects electronic billing, who is a combination water and sewer service customer of the Utility, will receive electronic billing for both services.

Third party charges for processing utility bill payments- Any charges required by a third party to accept or process a cash utility bill payment at a non-utility payment location, a credit card utility bill payment, or an electronic utility bill or payment are the responsibility of the customer and are in addition to utility bill amounts.

In the event of a dispute between a customer and a utility regarding any bill for utility service, the utility will conduct an investigation and report the results to the customer. If the dispute is not resolved, the utility will inform the customer that a complaint may be filed with the Commission.

Section 2.07 - Service Disconnection

Utility service may be disconnected if the bill has not been paid in full by the date listed on the termination notice. The termination date must be at least 10 days after the notice is mailed or hand delivered.

The utility is encouraged to offer a deferred payment plan to a customer who cannot pay an outstanding bill in full and is willing to pay the balance in reasonable installments. However, a customer's utility service may be disconnected if a bill has not been paid or a deferred payment agreement entered into within 31 days from the date of issuance of a bill and if proper notice of termination has been given.

Notice of termination must be a separate mailing or hand delivery in accordance with the PUC Rules.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 28 2024 55818 1742

SECTION 2.0 - SERVICE RULES AND REGULATIONS (Continued)

Utility service may also be disconnected without notice for reasons as described in the PUC Rules.

Utility personnel must be available to collect payments and to reconnect service on the day of and the day after any disconnection of service unless service was disconnected at the customer's request or due to a hazardous condition.

Section 2.08 – Reconnection of Service

Service will be reconnected within 36 hours after the past due bill and any other outstanding charges are paid or correction of the conditions which caused service to be disconnected.

Section 2.09 - Service Interruptions

The utility will make all reasonable efforts to prevent interruptions of service. If interruptions occur, the utility will re-establish service within the shortest possible time. Except for momentary interruptions due to automatic equipment operations, the utility will keep a complete record of all interruptions, both emergency and scheduled and will notify the Commission in writing of any service interruptions affecting the entire system or any major division of the system lasting more than four hours. The notice will explain the cause of the interruptions.

Prorated Bills. - If service is interrupted or seriously impaired for 24 consecutive hours or more, except by an act of God, the utility will prorate the monthly base bill in proportion to the time service was not available to reflect this loss of service.

Section 2.10 - Quality of Service

The utility will plan, furnish, and maintain production, treatment, storage, transmission, and distribution facilities of sufficient size and capacity to provide a continuous and adequate supply of water for all reasonable consumer uses. Unless otherwise authorized by the Commission, the utility will maintain facilities as described in the PUC Rules or in the TCEQ's "Rules and Regulations for Public Water Systems." The utility will not provide supply for fire prevention, fire flow, or firefighting services as part of standard retail water utility service.

Section 2.11 - Customer Complaints and Disputes

If a customer or applicant for service lodges a complaint, the utility will promptly make a suitable investigation and advise the complainant of the results. Service will not be disconnected pending completion of the investigation. If the complainant is dissatisfied with the utility's response, the utility must advise the complainant that he has recourse through the PUC complaint process. Pending resolution of a complaint, the commission may require continuation or restoration of service.

The utility will maintain a record of all complaints which shows the name and address of the complainant, the date and nature of the complaint and the adjustment or disposition thereof, for a period of two years after the final settlement of the complaint.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 28 2024
DOCKET

1743

SECTION 2.20 - SPECIFIC UTILITY SERVICE RULES AND REGULATIONS

This section contains specific utility service rules in addition to the rules previously listed under Section 2.0. It must be reviewed and approved by the Commission and in compliance with PUC Rules to be effective.

The utility adopts the administrative rules of the PUC, as the same may be amended from time to time, as its company specific service rules and regulations. These rules will be kept on file at the company's offices for customer inspection during regular business hours. In the event of a conflict between the PUC's amended rules and the provisions of this tariff, the amended rules shall prevail. Where necessary, any conflicting provision of this tariff shall be deemed to have been superseded by the PUC rule in question to the degree that the utility may conduct its lawful business in conformance with all requirements of said rule.

All payments for utility service shall be delivered or mailed to the remittance address on the utility bill received or paid using any method described on the utility bill received. Cash payments are only accepted in person at designated payment locations as described in the utility bill received. If the utility or its authorized agent fails to receive payment prior to the time of noticed disconnection for non-payment of a delinquent account, service will be terminated as scheduled. Utility service crews shall not be allowed to collect payments on customer accounts in the field.

Payment of an account by any means that has been dishonored and returned by the payor or payee's bank, shall be deemed to be delinquent. All returned payments must be redeemed with cash or valid money order. If a customer has two returned payments within a twelve month period, the customer shall be required to pay a deposit if one has not already been paid.

Customers shall not be allowed to use the utility's cutoff valve on the utility's side of the meter. Existing customers may install cutoff valves on their side of the meter and are encouraged to do so. All new customers must install customer-owned and maintained cutoff valves on their side of the meter.

No water connection from any public drinking water supply system shall be made to any establishment where an actual or potential contamination or system hazard exists without an air gap separation between the drinking water supply and the source of potential contamination. The containment air gap is sometimes impractical and, instead, reliance must be placed on individual internal air gaps or mechanical backflow prevention devices.

Under these conditions, additional protection shall be required at the meter in the form of a backflow prevention device (in accordance with AWWA Standards C510 and C511, and AWWA Manual M14) on those establishments handling substances deleterious or hazardous to the public health. The water purveyor need not require backflow protection at the water service entrance if an adequate cross-connection control program is in effect that includes an annual inspection and testing by a certified backflow prevention device tester. It will be the responsibility of the water purveyor to ensure that these requirements are met.

Customer shall be liable for any damage or injury to utility-owned property or personnel shown to be caused by the customer, his invitees, his agents, his employees, or others directly under his control.

Limitation on Product/Service Liability. - Public water utilities are required to deliver water to the customer's side of the meter or service connection that meets the potability and pressure standards of the TCEQ. The utility will not accept liability for any injury or damage to individuals or their property occurring on the customer's side of the meter when the water delivered meets these state standards.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 28 2024
55818
1744

SECTION 2.20 - SPECIFIC UTILITY SERVICE RULES AND REGULATIONS (Continued)

The utility makes no representations or warranties (expressed or implied) that customer's appliances will not be damaged by disruptions of or fluctuations in water service whatever the cause. The utility will not accept liability for injuries or damages to persons or property due to disruption of water service caused by: (1) acts of God, (2) acts of third parties not subject to the control of the utility if the utility has undertaken such preventive measures as are required by PUC or TCEQ rules, (3) electrical power failures in water systems not required by TCEQ rule to have auxiliary power supplies, or (4) termination of water service pursuant to the utility's tariff and the PUC's rules. The utility is not required by law and does not provide fire prevention, fire flow, or fire fighting services. The utility therefore does not accept liability for fire-related injuries or damages to persons or property caused or aggravated by the availability (or lack thereof) of water or water pressure (or lack thereof) during fire emergencies. The utility will accept liability for any injury or damage to individuals or their property directly caused by defective utility plant facilities (*e.g.*, leaking water lines or meters) or the repairs to or construction of the utility's facilities.

If the services of a registered professional engineer are required as a result of a service initiation request received by the utility for service to that applicant's service extension only, such engineer will be selected by the utility and the applicant, and the applicant shall bear all expenses incurred therein.

If an applicant requires service other than the standard service provided by the utility, such applicant will be required to pay all expenses incurred by the utility in excess of the expenses that would be incurred in providing the standard service and connection. Any applicant who places unique or non-standard service demands on the system may be required to provide contributions in aid of construction (as may be allowed by PUC rule) for the actual costs of, any additional facilities required to maintain compliance with the TCEQ minimum design criteria for water production, treatment, pumping storage and transmission.

Any applicant or existing customer required to pay for any costs not specifically set forth in the rate schedule pages of this tariff shall be entitled to a written explanation of such costs prior to payment and/or commencement of construction. If the applicant or existing customer does not believe that these costs are reasonable or necessary, the applicant or existing customer shall have the right to appeal such costs to the PUC or such other regulatory authority having jurisdiction over the utility's rates in that portion of the utility's service area in which the applicant's or existing customer's property(ies) is located.

Tap fees may be increased by unique costs not normally incurred as may be permitted by 16 TAC § 24.163(a)(1)(C).

The utility adopts the Uniform Plumbing Code pursuant to 30 TAC § 290.46(i). The piping and other equipment on the premises furnished by the customer will be maintained by the customer at all times in conformity with the requirements of the TCEQ, the Uniform Plumbing Code and with the service rules and regulations of the utility. The customer will bring out his service line to his property line at the point on the customer's property mutually acceptable to the customer and the utility subject to such requirements as may exist by PUC rule. No meters smaller than those identified in Section 1.0 of this tariff will be connected. No pipe or pipe fitting which contains more than 8.0% lead can be used for the installation or repair of plumbing at any connection which provides water for human use. No solder or flux which contains more than 0.2% lead can be used at any connection which provides water for human use.

The utility will have the right of access to the customer's premises at all times reasonable for the purpose of installing, testing, inspecting or repairing water mains or other equipment used in connection with its provision of water service, or for the purpose of removing its property and disconnecting lines, and for all other purposes necessary to the operation of the utility system including inspecting the customer's plumbing for code, plumbing or tariff violations.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 28 2024
DOCKET
55810945

SECTION 2.20 - SPECIFIC UTILITY SERVICE RULES AND REGULATIONS (Continued)

The customer shall allow the utility and its personnel access to the customer's property to conduct any water quality tests or inspections required by law. Unless necessary to respond to equipment failure, leak or other condition creating an immediate threat to public health and safety or the continued provision of adequate utility service to others, such entry upon the customer's property shall be during normal business hours. The customer may require any utility representative, employee, contractor, or agent seeking to make such entry to identify themselves, their affiliation with the utility, and the purpose of their entry.

Threats to or assaults upon utility personnel shall result in criminal prosecution.

Except in cases where the customer has a contract with the utility for reserve or auxiliary service, no other water service will be used by the customer on the same installation in conjunction with the utility's service, either by means of a cross-over valve or any other connection. Customer shall not connect, or allow any other person or party to connect, onto any water lines on his premises. Two places shall not be permitted to be supplied with one service pipe where there is a water main abutting the premises.

No connection shall be allowed which allows water to be returned to the public drinking water supply. No backflow prevention device shall be permitted to be installed in the customer's plumbing without notice to and written permission from the utility. Any backflow prevention devices so installed shall be inspected annually by a licensed backflow prevention device inspector or appropriately licensed plumber and a written report of such inspection delivered to the utility.

No service request initiated by telephone, through an Internet website or other electronic transmission, written application, agreement or contract for service may be assigned or transferred without the written consent of the utility.

It is agreed and understood that any and all meters, water lines and other equipment furnished by the utility (excepting the customer's individual service lines from the point of connection to customer's structures on customer's premises) are and shall remain the sole property of the utility, and nothing contained herein or in a contract/application for service whether in verbal, written, or electronic transmission format, shall be construed to reflect a sale or transfer of any such meters, lines or equipment to any customer. All tap and extension charges shall be for the privilege of connecting to said water lines and for installation, not purchase, of said meters and lines.

Applicants for service at new consuming facilities or facilities which have undergone extensive plumbing modifications are required to deliver to the utility a certificate that their facilities have been inspected by a state-licensed inspector and that they are in compliance with all applicable plumbing codes and are free of potential hazards to public health and safety. Service may be denied until the certificate is received or any identified violations or hazards are remedied. The utility is not required to perform these inspections for the applicant/customer, but will assist the applicant/customer to locate and obtain the services of a licensed inspector in a timely manner. When potential sources of contamination are identified which, in the opinion of the inspector or the utility, require the installation of a state-approved backflow prevention device, such back flow prevention device shall be installed on the customer's service line or other necessary plumbing facilities by an appropriately licensed plumber/backflow prevention device specialist at the customer's expense. The backflow prevention device shall be maintained by the customer at his expense and inspected annually by a licensed inspector. Copies of the annual inspection report must be provided to the utility. Failure to comply with this requirement may constitute grounds for termination of water service with notice.

All customers or service applicants shall provide access to meters and utility cutoff valves at all times reasonably necessary to conduct ordinary utility business and after normal business hours as needed to protect and preserve the integrity of the public drinking water supply. Access to meters and cutoff valves shall be controlled by the provisions of 16 TAC § 24.169(c).

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED

SECTION 2.20 - SPECIFIC UTILITY SERVICE RULES AND REGULATIONS (Continued)

Where necessary to serve an applicant's property, the utility may require the applicant to provide it a permanent recorded public utility easement on and across the applicant's real property sufficient to provide service to that applicant.

Service applicants may be required to comply with any pre-condition to receiving service not printed herein as may exist under PUC rule (customer service, health and safety, water conservation, or environmental), USEPA rule, TWDB rule, local water or conservation district rule or health department rule. Existing customers shall be required to comply with such rules, including modification of their plumbing and/or consumption patterns, after notice.

Customers must make meters accessible to the Utility and its personnel. If they do not, the Utility may require the removal of the meter to another location according to 16 TAC § 24.169(c) of the PUC's rules. The Utility will give the customer the option of converting to a remote radio read meter at the customer's expense in lieu of bearing the cost of relocating the meter and any Utility water lines necessitated by the customer's actions. If the customer does not accept this option, the customer will be charged for all incurred meter relocation costs. Before relocating the meter, the utility must provide the customer with written notice of its intent to do so.

This notice must include information on the estimated cost of relocating the meter, an explanation of the condition hindering access and what the customer can do to correct that condition, and information on how to contact the utility. The notice must give the customer a reasonable length of time to arrange for utility access so the customer may avoid incurring the relocation cost. A copy of the notice given to the customer shall be filed with the utility's records on the customer's account.

Customers shall not enclose meters with fences or other artificial barriers. If there is a fence in front of a meter, the customer shall install a gate or stile with 300 pound-load bearing capacity to enable meter readers and service crews to obtain ready access to the utility's property.

## SECTION 3.0 - EXTENSION POLICY

### Section 3.01 - Standard Extension Requirements

LINE EXTENSION AND CONSTRUCTION CHARGES. No contribution in aid of construction may be required of any customer except as provided for in this approved extension policy.

The customer will be given an itemized statement of the costs, options such as rebates to the customer, sharing of construction costs between the utility and the customer, or sharing of costs between the customer and other applicants prior to beginning construction.

The utility will bear the full cost of any oversizing of water mains necessary to serve other customers in the immediate area. The individual residential customer shall not be charged for any additional production, storage, or treatment facilities. Contributions in aid of construction may not be required of individual residential customers for production, storage, treatment or transmission facilities unless otherwise approved by the Commission under this specific extension policy.

COST UTILITY SHALL BEAR. Within its Certificate of Convenience and Necessity ("CCN") service area, the utility will pay the cost of the first 200 feet of any water main or distribution line necessary to extend service to an individual residential customer within a platted subdivision. However, if the residential customer requesting service purchased the property after the developer was notified of the need to provide facilities to the utility, the utility may charge for the first 200 feet. The utility must also be able to document that the developer of the subdivision refused to provide facilities compatible with the utility's facilities in accordance with the utility's approved extension policy after receiving a written request from the utility.

Developers may be required to provide contributions in aid of construction in amounts to furnish the system with all facilities necessary to comply with the PUC's Rules.

## SECTION 3.20 - SPECIFIC UTILITY EXTENSION POLICY

This section contains the utility's specific extension policy that complies with the requirements already stated under Section 3.01. It must be reviewed and approved by the Commission and in compliance with PUC Rules to be effective.

Residential customers not covered under Section 3.01 will be charged the equivalent of the costs of extending service to their property from the nearest transmission or distribution line even if that line does not have adequate capacity to serve the customer. However, if the customer places unique, non-standard service demands upon the system, the customer may be charged the full cost of extending service to and throughout their property, including the cost of all necessary transmission and storage facilities necessary to meet the service demands anticipated to be created by that property.

Developers may be required to provide contributions in aid of construction in amounts sufficient to furnish the development with all facilities necessary to provide for reasonable local demand requirements and to comply with TCEQ minimum design criteria for facilities used in the production, transmission, pumping, or treatment of water or TCEQ minimum requirements. For purposes of this tariff, a developer is one who subdivides or requests more than two meters on a piece of property. Commercial, industrial, and wholesale customers will be treated as developers.

The utility adopts the administrative rules of the PUC, as amended from time to time, as its company specific extension policy. These rules will be kept on file at the company's business office for customer inspection during normal business hours. In the event of a conflict between the PUC's amended rules and the provisions of this tariff, the amended rules shall prevail. Where necessary, any conflicting provision of this tariff shall be deemed to have been superseded by the PUC rule in question to the degree that the utility may conduct its lawful business in conformance with all requirements of said rule.

When an individual residential applicant requires an extension of a main line beyond 200 feet, the charge to that applicant shall be the actual cost of such extension in excess of 200 feet, plus the applicable tap fee plus such other approved costs as may be provided in this tariff and/or PUC rules.

Residential tap fees may be increased by other unique costs not normally incurred as permitted by PUC rule. Larger meter taps shall be made at actual cost associated with that tap which shall include such extraordinary expenses.

Any service extension to a subdivision (record ed or unrecorded) may be subject to the provisions and restrictions of 16 TAC §24.163(d) and this tariff. When a developer wishes to extend the system to prepare to service multiple new connections, the charge shall be the cost of such extension, plus a pro-rata charge based upon the capacities of production, transmission, storage, pumping and treatment facilities, compliant with the PUC minimum design criteria, which must be committed to such extension. As provided by 16 TAC § 24.163(d)(4), for purposes of this tariff, commercial, industrial, and wholesale customers shall be treated as developers.

Any applicant who places unique or non-standard service demands on the system may be required to provide contributions in aid of construction for the actual costs of any additional facilities required to maintain compliance with the TCEQ minimum design criteria for water production, treatment, pumping, storage and transmission.

Unless expressly exempted by PUC rule or order, each point of use (as defined by 16 TAC § 24.3) must be individually metered.

SECTION 3.20 - SPECIFIC UTILITY EXTENSION POLICY (Continued)

The imposition of additional extension costs or charges as provided by Sections 2.20 and 3.20 of this tariff shall be subject to appeal as provided in this tariff, PUC rules, or the rules of such other regulatory authority as may have jurisdiction over the utility's rates and services. Any applicant required to pay for any costs not specifically set forth in the rate schedule pages of this tariff shall be entitled to a written explanation of such costs prior to payment and/or commencement of construction. If the applicant does not believe that these costs are reasonable or necessary, the applicant shall have the right to appeal such costs to the PUC or such other regulatory authority having jurisdiction over the utility's rates in that portion of the utility's service area in which the applicant's property(ies) is located. Unless the PUC or other regulatory authority enters interlocutory orders to the contrary, service to the applicant may be delayed until such appeal is resolved.

The Utility may initiate, transfer, or terminate retail water service upon receipt of a customer request by mail, by telephone, through an Internet website , or through other electronic transmission. A separate request to initiate, transfer or terminate service shall be required for each potential service location if more than one service connection is desired by any individual applicant. Written service applications forms will be available for applicant pick up at the utility's business office during normal weekday business hours. Upon request, written service applications will also be sent by prepaid first class United States mail to the address provided by the applicant upon request.

The utility shall serve each qualified service applicant within its CCN service area as soon as practical after receiving a request for service. All service requests will be fulfilled within the time limits prescribed by PUC rules once the applicant has met all conditions precedent to achieving a qualified service applicant. If a service request cannot be fulfilled within the required period, the applicant shall be notified in writing of the delay, its cause and the anticipated date that service will be available. The PUC service dates shall not become applicable until the service applicant has met all conditions precedent to becoming a "qualified service applicant" as defined herein or by PUC rules.

The utility is not required to extend service to any applicant outside of its CCN service area and will only do so, at the utility's sole option, under terms and conditions mutually agreeable to the utility and the applicant and upon extension of the utility's certificated service area boundaries by the PUC. Service applicants may be required to bear the cost of the service area amendment.

A "qualified service applicant" is an applicant who has: (1) met all of the utility's requirements of service contained in this tariff, PUC rules and/or PUC order, (2) has made all payments for tap fees and extension charges, (3) has provided all necessary easements and rights-of-way necessary to provide service to the requested location, including staking said easements or rights-of-way where necessary, (4) delivered an executed customer service inspection certificate to the utility and (5) has, for each location to which service is being requested, completed the verbal, written, or electronic transmission customer service request process.

Where a new tap or service connection is required, the service applicant shall be required to submit a service request by mail, by telephone, through an Internet website, or through another electronic transmission and request that a tap be made. The tap request must be accompanied with a plat, map, diagram or written metes and bounds description of precisely where the applicant desires each tap or service connection is to be made and, if necessary, where the meter is to be installed, along the applicant's property line. The actual point of connection and meter installation must be readily accessible to utility personnel for inspection, servicing and meter reading while being reasonably secure from damage by vehicles and mowers.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 28 2024
DOCKET
55818
1750

SECTION 3.20 - SPECIFIC UTILITY EXTENSION POLICY (Continued)

If the utility has more than one main adjacent to the service applicant's property, the tap or service connection will be made to the utility's nearest service main with adequate capacity to service the applicant's full potential service demand. If the tap or service connection cannot be made at the applicant's desired location, it will be made at another location mutually acceptable to the applicant and the utility. If no agreement on location can be made, applicant may refer the matter to the PUC for resolution. Unless otherwise ordered by the PUC, the tap or service connection will not be made until the location dispute is resolved.

The utility shall require a developer (as defined by PUC rule) to provide permanent recorded public utility easements as a condition of service to any location within the developer's property. The developer shall be required to obtain all necessary easements and rights-of-way required to extend the utility's existing service facilities from their nearest point with adequate service capacity (as prescribed by PUC rules and local service conditions) to and throughout the developer's property. The easements shall be sufficient to allow the construction, installation, repair, maintenance, testing, and replacement of any and all utility plant necessary to provide continuous and adequate service to each and every potential service location within the property at full occupancy. Unless otherwise restricted by law, well plant sites shall convey with unrestricted rights to produce water for public drinking water supply.

The developer shall be required to provide the utility with a minimum of a 160-foot radius sanitary control easement or fee simple real property conveyance around the proposed well site acceptable to the PUC for each water well site to be located within the developer's property or otherwise being obtained to serve the developer's property. Unless otherwise agreed to by the utility, pipe line right-of-way easements must be at least 15 feet wide to allow adequate room to facilitate backhoe and other heavy equipment operation and meters. Easements must be provided for all production, storage, treatment, pressurization and disposal sites which are sufficient to construct and maintain all weather roads as prescribed by PUC rules. All easements shall be evidenced, at developer's expense, by recorded county-approved subdivision plat or by specific assignment supported by metes and bounds survey from a surveyor licensed by the State of Texas.

Prior to the extension of utility service to developers (as defined by PUC rules) or new subdivisions, the Developer shall comply with the following:

(a) The developer shall make a written request for service to property that is to be subdivided and developed. The developer shall submit to the utility a proposed plat on a scale of one inch (1@) to two hundred feet (200') for review and determination of required easements, utility plant, and plant location. If sewer service is requested, the plat must contain elevation data. A reconcilable deposit in an amount set by the utility may be required to cover preliminary engineering, legal and copy cost to be incurred by the utility in reviewing and planning to meet this service request. The plat and/or accompanying information shall identify the type, location and number of houses and other planned structures that will be requiring utility service. If other than residential structures are to be located on the property, all other types of anticipated businesses and their service demands shall be identified with specificity. All areas requiring special irrigation and/or other unique water demands must be identified. To the extent reasonably possible, this information must be precise so that adequate facilities can be designed and constructed to meet all future service demands without hazard to the public, other utility customers and/or the environment.

(b) After the requirements of easements and rights-of-way have been determined, a red line copy will be returned by the utility to the developer for final plat preparation.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 28 2024
55818

SECTION 3.20 - SPECIFIC UTILITY EXTENSION POLICY (Continued)

(c) Copies of all proposed plats and plans must be submitted to the utility prior to their submission to the county for approval to ensure that they are compatible with the adequate long-term utility needs of potential service customers. Copies will be returned after review by the utility so that necessary changes may be incorporated into the developer's final submitted plat(s) and plans.

(d) The utility shall be provided with three (3) certified copies of the final plat(s) approved by the County Commissioners Court. At this time, the utility will begin engineering the facilities necessary to serve the property. Plans and specifications will be prepared and submitted to the TCEQ by the utility if required by law. If further plat or plans changes are necessary to accommodate the specific service needs of the property and the anticipated customer demands, the developer will be so notified. Plat amendments must be obtained by the developer. The developer shall be notified when all required TCEQ or other governmental approvals or permits have been received.

No construction of utility plant which requires prior TCEQ plans approval shall be commenced until that approval has been received by the utility and any conditions imposed by the PUC or the TCEQ in association with its approvals have been satisfied.

(e) The developer shall be required to post bond or escrow the funds necessary to construct all required utility plant, except individual taps, meters and sewer connections, required to serve the property. Construction shall not commence until funds are available. If the construction is to be done in coordination with the phased development of the property, funds must be provided in advance which are sufficient to complete each phase. No phase or facilities for any phase shall be constructed prior to the bonding or escrowing of all funds associated with that phase.

(f) At the sole option of the utility, the developer may be required to execute a Developer Extension Contract setting forth all terms and conditions of extending service to their property including all contributions-in-aid of construction and developer reimbursements, if any.

(g) The utility may require the developer to commence construction of subdivision improvements within three (3) months of utility plans approval or the utility may abate its construction activities until full development construction begins. If the developer stops construction of subdivision improvements for any purpose, the utility may abate its construction for a similar period.

(h) As soon as the roads are rough cut and prior to paving, extension lines will need to be constructed at each road crossing. The developer must notify the utility sufficiently in advance of this development stage to allow for the necessary utility construction without disruption to other service operations of the utility. Failure to provide adequate advance notice and cooperation in the construction of necessary utility plant may result in additional delays in obtaining service to the property. The developer shall be required to pay for all additional costs of road boring or other remedial construction necessary to install adequate utility plant throughout the affected property.

(i) The developer, not the utility, shall insure that developer's employees, agents, contractors and others under its control coordinate their work or construction throughout the property with the utility to insure the orderly and timely construction of all utility plant necessary to serve the public.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 28 2024
DOCKET
55818 1752

SECTION 3.20 - SPECIFIC UTILITY EXTENSION POLICY (Continued)

Within its CCN service area, the utility shall bear the cost of the first 200 feet of any water main or sewer collection line necessary to extend service to an individual residential service applicant within a platted subdivision unless the utility can document:

(a) that the developer of the subdivision refused to provide facilities compatible with the utility's facilities in accordance with the utility's approved extension policy after receiving a written request from the utility; or,

(b) that the developer defaulted on the terms and conditions of a written agreement or contract existing between the utility and the developer or the terms of this tariff regarding payment for services, extensions, or other requirements; or in the event the developer declared bankruptcy and was therefore unable to meet obligations; and,

(c) that the residential service applicant purchased the property from the developer after the developer was notified of the need to provide facilities to the utility. A residential service applicant may be charged the remaining costs of extending service to his property; provided, however, that the residential service applicant may only be required to pay the cost equivalent to the cost of extending the nearest water main, whether or not that line has adequate capacity to serve that residential service applicant.

The following criteria shall be considered to determine the residential service applicant's cost for extending service:

(1) The residential service applicant shall not be required to pay for costs of main extensions greater than 2" in diameter for water distribution.

(2) Exceptions may be granted by the PUC:

(a) adequate service cannot be provided to the applicant using the maximum line sizes listed due to distance or elevation, in which case, it shall be the utility's burden to justify that a larger diameter pipe is required for adequate service;

(b) larger minimum line sizes are required under subdivision platting requirements or applicable building codes.

(3) If an exception is granted, the utility shall establish a proportional cost plan for the specific extension or a rebate plan which may be limited to seven years to return the portion of the applicant's costs for oversizing as new customers are added to ensure that future applicants for service on the line pay at least as much as the initial service applicant.

For purposes of determining the costs that service applicants shall pay, commercial customers with service demands greater than residential customer demands in the certificated area, industrial, and wholesale customers shall be treated as developers.

A service applicant requesting a one inch meter for a lawn sprinkler system to service a residential lot is not considered nonstandard service.

## Aqua Texas, Inc. - Southwest Region Water Utility Tariff
## Regional Pass-Through Gallonage Charge True- up/Adjustment Provision and Report

The purpose of this true-up/adjustment provision is to true-up and adjust Aqua Texas' authorized Regional Pass-Through Gallonage Charge each year in an effort to provide the best opportunity for regional revenue collected from the charge to align with certain types and amounts of pass-through costs Aqua Texas has incurred in the preceding year for the region using a process that does not require the expense of a full rate proceeding. Additionally, this process is intended to ensure that Aqua Texas balances the collections versus the pass-through costs annually. The types of pass-through costs that form the basis for the Regional Pass-Through Gallonage Charge may be regional costs, fees, rates and charges imposed by governmental entities, water authorities or districts having jurisdiction over Aqua Texas or its operations or by non-affiliated third party water suppliers or water rights holders selling water or water rights to Aqua Texas.

1) Regional Pass-Through Gallonage Charge true-up and adjustment calculations shall use historic, actual gallons billed to all regional retail water customers in the previous completed calendar year.

2) Amounts referred to in gallons shall be per 1,000 gallons, unless otherwise specified.

3) Aqua Texas has provided a list of all expenses (see attached) to be included in the regional pass through costs. The PUC has approved the attached list.

4) Aqua Texas shall only collect costs directly associated with the production of water in the pass-through and specifically shall not include impact fees and other fees associated with plant and equipment.

5) Normalization shall not be used in any pass through calculations.

6) No charges by affiliates (as defined by the Texas Water Code) of Aqua Texas shall be included in the pass through.

7) True-up Report to the regulatory authority ("Report"): Between the end of each calendar year and the following February 28, Aqua Texas shall provide a Report that reconciles the total Regional Pass-Through Gallonage Charge revenues billed during the previous completed calendar year within the Southwest region to the total amount of all regional passed-through costs incurred during that year as reflected in the general ledger. The Report shall include the amount paid to each entity for allowed passed through costs, the names of the entities paid by Aqua Texas, and the total of costs incurred requested for the purpose of an adjusted Regional Pass-Through Gallonage Charge. Any supporting documentation shall be attached to the report. Aqua Texas may submit information regarding new district charges in the Report (other than fines or penalties - see 4 above). New district charges associated with newly acquired systems shall not be included unless otherwise approved in a rate determination or proceeding. Aqua Texas will not include new purchase water agreements unless approved in a rate proceeding.

**APPENDIX- C (Continued)**
**Aqua Texas, Inc. - Southwest Region Water Utility Tariff**
**Regional Pass-Through Gallonage Charge True- up/Adjustment Provision and Report**

9) With the Report Aqua Texas files on February 28 setting forth its calculation and supporting documentation for its adjusted Regional Pass-Through Gallonage Charge in accordance with 5) and 6) above, Aqua Texas shall include a tariff page that incorporates the adjusted Regional Pass-Through Gallonage Charge reflected in the Report. Aqua Texas shall implement the adjusted filed rate as follows.

a) Aqua Texas will bill the adjusted Regional Pass-Through Gallonage Charge for service rendered on or after March 1 each year and thereafter until the rate is modified.

b) The first bill received each year incorporating the adjusted Regional Pass-Through Gallonage Charge will be prorated to apply the adjusted charge to service during those days in the billing cycle on or after March 1.

c) The PUC or a successor agency with authority to regulate investor-owned utility rates (regulatory authority) shall review the Report and provide the results of its review to Aqua Texas in writing within 45 days after Aqua Texas submits the Report. If no written response is provided to Aqua Texas during that time, the adjusted Regional Pass-Through Gallonage Charge filed with the Report shall stand until modified.

d) The PUC may dispute the calculation or supporting documentation as presented in the Report. If so, Aqua Texas and the PUC shall work in good faith to attempt resolution of the dispute.

e) The process of implementing the Regional Pass-Through Gallonage Charge True-up/Adjustment and the regulatory authority's review of same is an informal proceeding and not a contested case hearing. However, if a dispute between Aqua Texas and the regulatory authority cannot be resolved through negotiation, only the PUC or Aqua Texas may request a hearing on Regional Pass-Through Gallonage Charge true-ups/adjustments. It shall not be considered a rate case under the Texas Water Code or PUC (or other regulatory authority) rules, and Texas Water Code § 13.187 shall not apply.

f) In the event of a dispute or hearing concerning the Regional Pass-Through Gallonage Charge reflected in the tariff page filed with the Report, the filed rate shall be considered effective on an interim basis and previous charges will be adjusted in the next annual true-up, except that adjustments to the pass-through exceeding 50 percent may require immediate refunds or credits as directed by the regulatory authority. If the filed rate is modified pursuant to dispute or hearing resolution, a replacement tariff page shall be filed with the regulatory authority reflecting the modified rate.

g) Aqua Texas has agreed to only collect eighty-five percent of the total pass-through amounts for the years 2013, 2014, and 2015 and to resume collecting one hundred percent in 2016 as part of its agreement with the Southwest Region customers to waive the pass-through charge to customers in newly acquired systems referenced in Table B of the tariff until 2016. Aqua Texas will indicate the adjustment in its Reports for 2013 through 2015.

SECTION 1.0 -- RATE SCHEDULE

Section 1.01 - Rates

| Meter Size | Monthly Flat Rate |
|---|---|
| 5/8" or 3/4" | $73.30 (Includes 0 gallons) |
| 1" | $183.25 |
| 1½ " | $366.50 |
| 2" | $586.41 |
| 3" | $1,172.81 |
| 4" | $1,832.52 |
| 6" | $3,665.03 |
| 8" | $5,864.05 |
| 10" | $8,429.50 |

System Improvement Charge - Not subject to Federal Tax Change Credit Rider

| Meter Size | Monthly Charge |
|---|---|
| 5/8" x 3/4" | $6.00 |
| 1" | $15.00 |
| 1½" | $30.00 |
| 2" | $48.00 |
| 3" | $96.00 |
| 4" | $150.00 |
| 6" | $300.00 |
| 8" | $480.00 |
| 10" | $690.00 |
| 12" | $1,290.00 |

Federal Tax Change Credit Rider: ..... (5.33%) of the monthly retail bill
(Effective May 1, 2018; ***Tariff Control No. 48197***)

Federal Tax Change Credit Rider: ..... (3.83%) of the monthly retail bill
(Effective January 1, 2019; ***Tariff Control No. 48197***)

**Rate Case Expense Surcharge:** $2.50 per month per connection for each water and sewer customers for 24 months or until the total amount of $2,751,170.50 is collected, whichever comes first, starting January 1, 2009.

**Deferred Expense Surcharge:** $9.94 per month per connection for each water and sewer customers for 24 months or until the total amount of $10,946,000.00 is collected, whichever comes first, starting January 1, 2009.

**Non-residential customers who purchase sewer service only and who have no reliable water consumption data available will be charged the applicable monthly fee for their meter size multiplied by 1.69. If a water meter is not available, a meter size will be imputed by the utility based upon the size of the water service pipe.**

SECTION 1.0 -- RATE SCHEDULE (Continued)

FORM OF PAYMENT: The utility will accept the following forms of payment:
Cash X (If in Person), Check X, Money Order X, Credit Card _, Other (specify)_
THE UTILITY MAY REQUIRE EXACT CHANGE FOR PAYMENTS AND MAY REFUSE TO ACCEPT PAYMENTS MADE USING MORE THAN $1.00 IN SMALL COINS. A WRITTEN RECEIPT WILL BE GIVEN FOR CASH PAYMENTS

REGULATORY ASSESSMENT ..... 1.0%
PUC RULES REQUIRE THE UTILITY TO COLLECT A FEE OF ONE PERCENT OF THE RETAIL MONTHLY BILL AND TO REMIT THE FEE TO THE TCEQ.

Section 1.02 - Miscellaneous Fees

TAP FEE ..... $650.00
TAP FEE COVERS THE UTILITY'S COSTS FOR MATERIALS AND LABOR TO INSTALL A STANDARD RESIDENTIAL 5/8" or 3/4" METER. AN ADDITIONAL FEE TO COVER UNIQUE COSTS IS PERMITTED IF LISTED ON THIS TARIFF.

TAP FEE (Unique costs) ..... Actual Cost
FOR EXAMPLE, A ROAD BORE FOR CUSTOMERS OUTSIDE OF SUBDIVISIONS OR RESIDENTIAL AREAS.

TAP FEE (Large meter) ..... Actual Cost
TAP FEE IS THE UTILITY'S ACTUAL COST FOR MATERIALS AND LABOR FOR METER SIZE INSTALLED.

METER RELOCATION FEE ..... Actual Relocation Cost, Not to Exceed Tap Fee
THIS FEE MAY BE CHARGED IF A CUSTOMER REQUESTS THAT AN EXISTING METER BE RELOCATED.

METER TEST FEE ..... $25.00
THIS FEE WHICH SHOULD REFLECT THE UTILITY'S COST MAY BE CHARGED IF A CUSTOMER REQUESTS A SECOND METER TEST WITHIN A TWO-YEAR PERIOD AND THE TEST INDICATES THAT THE METER IS RECORDING ACCURATELY. THE FEE MAY NOT EXCEED $25.

RECONNECTION FEE
THE RECONNECT FEE MUST BE PAID BEFORE SERVICE CAN BE RESTORED TO A CUSTOMER WHO HAS BEEN DISCONNECTED FOR THE FOLLOWING REASONS (OR OTHER REASONS LISTED UNDER SECTION 2.0 OF THIS TARIFF).

a) Non payment of bill (Maximum $25.00) ..... $25.00
b) Customer's request that service be disconnected ..... $45.00

SEASONAL RECONNECTION FEE:
BASE RATE FOR METER SIZE TIMES NUMBER OF MONTHS OFF SYSTEM NOT TO EXCEED SIX MONTHS WHEN LEAVE AND RETURN WITHIN A TWELVE MONTH PERIOD.

SERVICE INITIATION FEE ..... $45.00
THE SERVICE INITIATION FEE WILL BE CHARGED FOR INITIATING AN ACCOUNT AT THE SERVICE LOCATION.

LATE CHARGE (EITHER $5.00 OR 10% OF THE BILL) ..... 10%
PUC RULES ALLOW A ONE-TIME PENALTY TO BE CHARGED ON DELINQUENT BILLS. A LATE CHARGE MAY NOT BE APPLIED TO ANY BALANCE TO WHICH THE PENALTY WAS APPLIED IN A PREVIOUS BILLING.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 28 2024

SECTION 1.0 -- RATE SCHEDULE (Continued)

RETURNED CHECK CHARGE ..... $25.00
RETURNED CHECK CHARGES MUST BE BASED ON THE UTILITY'S DOCUMENTABLE COST.

CUSTOMER DEPOSIT RESIDENTIAL (Maximum $50) ..... $50.00

COMMERCIAL & NON-RESIDENTIAL DEPOSIT ..... 1/6TH OF ESTIMATED ANNUAL BILL

GOVERNMENTAL TESTING, INSPECTION AND COSTS SURCHARGE:
WHEN AUTHORIZED IN WRITING BY PUC AND AFTER NOTICE TO CUSTOMERS, THE UTILITY MAY INCREASE RATES TO RECOVER INCREASED COSTS FOR INSPECTION FEES AND WATER TESTING. [[16 TAC § 24.21(b)(2)(F)]

LINE EXTENSION AND CONSTRUCTION CHARGES:
REFER TO SECTION 3.0--EXTENSION POLICY FOR TERMS, CONDITIONS, AND CHARGES WHEN NEW CONSTRUCTION IS NECESSARY TO PROVIDE SERVICE.

PURCHASED WATER AND/OR DISTRICT FEE PASS THROUGH CLAUSE:
Changes in fees imposed by any non-affiliated third party water supplier or underground water district having jurisdiction over the Utility shall be passed through to only the water system(s) affected by the increase or fee as an adjustment to the water gallonage charge according to the following formula:

AG = G + B/(1-L), where
AG = adjusted gallonage charge, rounded to the nearest one cent:
G = approved gallonage charge (per 1,000 gallons);
B = change in purchased water/district gallonage charge (per 1,000 gallons);
L = system average line loss for preceding 12 months not to exceed 0.15

Charges shall be passed on to flat rate customers by imputing 5,000 gallons monthly wastewater generation and increasing the monthly flat rate according to the following formula:

AMR = MR + (Bx5), where
AMR = adjusted monthly flat rate, rounded to the nearest one cent;
MR = approved monthly flat rate;
B = change in purchased wastewater treatment charge (per 1,000 gallons)

FEDERAL TAX CHANGE CREDIT RIDER (FTCCR):
The Federal Tax Change Credit Rider gives effect to the Tax Cuts and Jobs Act of 2017, which changed the federal corporate tax rate from 35% to 21%, by reducing the cost of service paid by customers taking service under this rate tariff. The FTCCR will provide credits to customers taking service under this rate tariff.

## SECTION 2.0--SERVICE RULES AND REGULATIONS

### Section 2.01—Public Utility Commission Rules

The utility will have the most current Public Utility Commission (PUC) Rules, Chapter 24, available at its office for reference purposes. The Rules and this tariff shall be available for public inspection and reproduction at a reasonable cost. The latest Rules or Commission approved changes to the Rules supersede any rules or requirements in this tariff.

### Section 2.02—Request to Initiate, Transfer or Terminate Water or Sewer Service

A customer may initiate, transfer, or terminate retail water or sewer service by mail, by telephone, through an Internet website, or through another electronic transmission. If a service request is initiated by mail, the utility's standard application or contract form (attached in the Appendix to this tariff) must be signed and submitted by the applicant before sewer service is provided by the utility.

After the applicant has met all the requirements, conditions and regulations for service, the utility will install service connections, which may include a utility cut-off valve and/or take all necessary actions to initiate service. The utility will serve each qualified applicant for service within 5 working days unless line extensions or new facilities are required. If construction is required to fill the order and if it cannot be completed within 30 days, the utility will provide the applicant with a written explanation of the construction required and an expected date of service.

Where service has previously been provided, the utility will reconnect the service within one working day after the applicant has met the requirements for reconnection.

The customer will be responsible for furnishing and laying the necessary customer service pipe from the connection location to the place of use.

### Section 2.03--Refusal of Service

The utility may decline to serve an applicant until the applicant has complied with the regulations of the regulatory agencies (state and municipal regulations) and for the reasons outlined in the PUC Rules. In the event that the utility refuses to serve an applicant, the utility will inform the applicant in writing of the basis of its refusal. The utility is also required to inform the applicant that a complaint may be filed with the Commission.

### Section 2.04--Customer Deposits

If a residential applicant cannot establish credit to the satisfaction of the utility, the applicant will be required to pay a deposit as provided for in Section 1.02 of this tariff. The utility will keep records of the deposit and credit interest in accordance with PUC Rules.

Residential applicants 65 years of age or older may not be required to pay deposits unless the applicant has an outstanding account balance with the utility or another water or sewer utility which accrued within the last two years.

Nonresidential applicants who cannot establish credit to the satisfaction of the utility may be required to make a deposit that does not exceed an amount equivalent to one-sixth of the estimated annual billings.

SECTION 2.0--SERVICE RULES AND REGULATIONS (Continued)

Refund of deposit - If service is not connected, or after disconnection of service, the utility will promptly refund the customer's deposit plus accrued interest or the balance, if any, in excess of the unpaid bills for service furnished. The utility may refund the deposit at any time prior to termination of utility service but must refund the deposit plus interest for any customer who has paid 18 consecutive billings without being delinquent.

Section 2.05--Meter Requirements, Readings, and Testing

It is not a requirement that the utility use meters to measure the quantity of sewage disposed of by individual customers. One connection is required for each residential, commercial or industrial facility in accordance with the PUC Rules.

Section 2.06--Billing

Bills from the utility will be mailed monthly unless otherwise authorized by the Commission. The due date of the bills for utility service will be at least twenty-one (21) days from the date of issuance. The postmark on the bill or, if there is no postmark on the bill, the recorded date of mailing by the utility will constitute proof of the date of issuance. If the due date falls on a holiday or weekend, the due date for payment purposes will be the next work day after the due date.

A late penalty of 10% of the bill will be charged on bills received after the due date. Customer payments postmarked by the due date will not incur a late penalty. The penalty on delinquent bills will not be applied to any balance to which the penalty was applied in a previous billing. The utility must maintain a record of the date of mailing to charge the late penalty.

Each bill will provide all information required by the PUC Rules. For each of the systems it operates, the utility will maintain and note on the monthly billing a telephone number (or numbers) which may be reached by a local call by customers. At the utility's option, a toll-free telephone number or the equivalent may be provided.

In the event of a dispute between a customer and a utility regarding any bill for utility service, the utility will conduct an investigation and report the results to the customer. If the dispute is not resolved, the utility will inform the customer that a complaint may be filed with the Commission.

Section 2.07--Service Disconnection

Utility service may be disconnected if the bill has not been paid in full by the date listed on the termination notice. The termination date must be at least 10 days after the notice is mailed or hand delivered.

The utility is encouraged to offer a deferred payment plan to a customer who cannot pay an outstanding bill in full and is willing to pay the balance in reasonable installments. However, a customer's utility service may be disconnected if a bill has not been paid or a deferred payment agreement entered into within 31 days from the date of issuance of a bill and if proper notice of termination has been given.

Notice of termination must be a separate mailing or hand delivery in accordance with the PUC Rules.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 28 2024
55818 775

SECTION 2.0--SERVICE RULES AND REGULATIONS (Continued)

Utility service may also be disconnected without notice for reasons as described in the PUC Rules.

Utility personnel must be available to collect payments and to reconnect service on the day of and the day after any disconnection of service unless service was disconnected at the customer's request or due to a hazardous condition.

Section 2.08--Reconnection of Service

Service will be reconnected within 36 hours after the past due bill and any other outstanding charges are paid or correction of the conditions which caused service to be disconnected.

Section 2.09--Service Interruptions

The utility will make all reasonable efforts to prevent interruptions of service. If interruptions occur, the utility will re-establish service within the shortest possible time. Except for momentary interruptions due to automatic equipment operations, the utility will keep a complete record of all interruptions, both emergency and scheduled and will notify the Commission in writing of any service interruptions affecting the entire system or any major division of the system lasting more than four hours. The notice will explain the cause of the interruptions.

Prorated Bills - If service is interrupted or seriously impaired for 24 consecutive hours or more, the utility will prorate the monthly base bill in proportion to the time service was not available to reflect this loss of service.

Section 2.10--Quality of Service

The utility will plan, furnish, and maintain and operate a treatment and collection facility of sufficient size and capacity to provide a continuous and adequate service for all reasonable consumer uses and to treat sewage and discharge the effluent at the quality required by its discharge permit issued by the Commission. Unless otherwise authorized by the Commission, the utility will maintain facilities as described in the TCEQ Rules.

Section 2.11--Customer Complaints and Disputes

If a customer or applicant for service lodges a complaint, the utility will promptly make a suitable investigation and advise the complainant of the results. Service will not be disconnected pending completion of the investigation. If the complainant is dissatisfied with the utility's response, the utility must advise the complainant that he has recourse through the PUC complaint process. Pending resolution of a complaint, the commission may require continuation or restoration of service.

The utility will maintain a record of all complaints which shows the name and address of the complainant, the date and nature of the complaint and the adjustment or disposition thereof, for a period of two years after the final settlement of the complaint.

SECTION 2.20 SPECIFIC UTILITY SERVICE RULES AND REGULATIONS

This section contains specific utility service rules in addition to the rules previously listed under Section 2.0. It must be reviewed and approved by the Commission and in compliance with the PUC Rules to be effective.

The utility adopts the administrative rules of the PUC, as the same may be amended from time to time, as its company specific service rules and regulations. These rules will be kept on file at the company's offices for customer inspection during regular business hours. In the event of a conflict between the PUC's amended rules and the provisions of this tariff, the amended rules shall prevail. Where necessary, any conflicting provision of this tariff shall be deemed to have been superseded by the PUC rule in question to the degree that the Utility may conduct its lawful business in conformance with all requirements of said rule.

All payments for utility service shall be delivered or mailed to the utility's business office. If the business office fails to receive payment prior to the time of noticed disconnection for non-payment of a delinquent account, service will be terminated as scheduled. Utility service crews shall not be allowed to collect payments on customer accounts in the field.

Payment of an account by any means that has been dishonored and returned by the payor or payee's bank, shall be deemed to be delinquent. All returned payments must be redeemed with cash or valid money order. If a customer has two returned payments within a twelve month period, the customer shall be required to pay a deposit if one has not already been paid.

Customer shall be liable for any damage or injury to utility-owned property or personnel shown to be caused by the customer, his invitees, his agents, his employees, or others directly under his control.

Limitation on Product/Service Liability - The utility will not accept liability for any injury or damage to individuals or their property occurring on the customer's premises. The utility makes no representations or warranties (expressed or implied) that customer's appliances will not be damaged by disruptions of or fluctuations in sewer service whatever the cause. The utility will not accept liability for injuries or damages to persons or property due to disruption of sewer service caused by: (1) acts of God, (2) acts of third parties not subject to the control of the utility if the utility has undertaken such preventive measures as are required by PUC or TCEQ rules, (3) electrical power failures in sewer systems not required by TCEQ rule to have auxiliary power supplies, or (4) termination of sewer service pursuant to the utility's tariff and the PUC's rules.

If the services of a registered professional engineer are required as a result of a service initiation request received by the Utility for service to that applicant's service extension only, such engineer will be selected by the Utility and the applicant, and the applicant shall bear all expenses incurred therein.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 28 2024
DOCKET
55818777

SECTION 2.20 SPECIFIC UTILITY SERVICE RULES AND REGULATIONS (Continued)

If an applicant requires service other than the standard service provided by the utility, such applicant will be required to pay all expenses incurred by the utility in excess of the expenses that would be incurred in providing the standard service and connection.

Any applicant who places unique or non-standard service demands on the system may be required to provide contributions in aid of construction (as may be allowed by PUC rule) for the actual costs of any additional facilities required to maintain compliance with the TCEQ's minimum design criteria for sewer collection, treatment, pumping and discharge.

Any applicant or existing customer required to pay for any costs not specifically set forth in the rate schedule pages of this tariff shall be entitled to a written explanation of such costs prior to payment and/or commencement of construction. If the applicant or existing customer does not believe that these costs are reasonable or necessary, the applicant or existing customer shall have the right to appeal such costs to the PUC or such other regulatory authority having jurisdiction over the utility's rates in that portion of the utility's service area in which the applicant's or existing customer's property(ies) is located.

Tap fees may be increased by unique costs not normally incurred as may be permitted by 16 TAC § 24.86(b)(1)(C).

The Utility adopts the Uniform Plumbing Code pursuant to TCEQ Rule 290.46(i). The piping and other equipment on the premises furnished by the customer will be maintained by the customer at all times in conformity with the requirements of the PUC, the Uniform Plumbing Code and with the service rules and regulations of the Utility. The customer will bring out his service line to his property line at the point on the customer's property mutually acceptable to the customer and the Utility subject to such requirements as may exist by PUC rule.

The utility will have the right of access to the customer's premises at all times reasonable for the purpose of installing, testing, inspecting or repairing sewer mains or other equipment used in connection with its provision of sewer service, or for the purpose of removing its property and disconnecting lines, and for all other purposes necessary to the operation of the utility system including inspecting the customer's plumbing for code, plumbing or tariff violations. The customer shall allow the utility and its personnel access to the customer's property to conduct any tests or inspections required by law. Unless necessary to respond to equipment failure, leak or other condition creating an immediate threat to public health and safety or the continued provision of adequate utility service to others, such entry upon the customer's property shall be during normal business hours. The customer may require any utility representative, employee, contractor, or agent seeking to make such entry identify themselves, their affiliation with the utility, and the purpose of their entry.

Threats to or assaults upon utility personnel shall result in criminal prosecution.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 28 2024 55818 1778

SECTION 2.20 SPECIFIC UTILITY SERVICE RULES AND REGULATIONS (Continued)

Except in cases where the customer has a contract with the utility for reserve or auxiliary service, no other sewer service will be used by the customer on the same installation in conjunction with the utility's service, either by means of a cross-over valve or any other connection. Customer shall not connect, or allow any other person or party to connect, onto any sewer lines on his premises. Two places shall not be permitted to be supplied with one service pipe where there is a sewer main abutting the premises.

No service request initiated by telephone, through an Internet website or other electronic transmission, written application, agreement or contract for service may be assigned or transferred without the written consent of the utility.

It is agreed and understood that any and all sewer lines and other equipment furnished by the utility (excepting the customer's individual service lines from the point of connection to customer's structures on customer's premises) are and shall remain the sole property of the utility, and nothing contained herein or in a contract/application for service whether in verbal, written, or electronic transmission format, shall be construed to reflect a sale or transfer of any such lines or equipment to any customer. All tap and extension charges shall be for the privilege of connecting to said sewer lines and for installation, not purchase, of said lines.

Service applicants may be required to comply with any pre-condition to receiving service not printed herein as may exist under PUC rule (customer service, health and safety or environmental), USEPA rule, TWDB rule, local regulatory district rule or health department rule. Existing customer shall be required to comply with such rules, including modification of their plumbing and/or consumption patterns, after notice.

The disposal into the utility's sewer collection system of bulk quantities of food or food scraps not previously processed by a grinder or similar garbage disposal unit and grease and oils, except as incidental waste in process or wash water, used in or resulting from food preparation by sewer utility customers engaged in the preparation and/or processing of food for other than domestic consumption for sale to the public shall be prohibited. Specifically included in this prohibition are grease and oils from grease traps to other grease and/or oil storage containers. These substances are defined as "garbage" under Section 361.003 (12) of the Solid Waste Disposal Act, Texas Health and Safety Code, and are not "sewage" as defined by Section 26.001 (7) of the Texas Water Code. The utility only provides "sewage" collection and disposal service to the public. This service is limited to the collection, treatment and disposal of waterborne human waste and waste from domestic activities such as washing, bathing, and food preparation. This service does not include the collection, treatment or disposal of waste of such high BOD or TSS characteristics that it cannot reasonably be processed by the utility's state-approved waste water treatment plant within the parameters of the utility's state and federal waste water discharge permits. **THIS SERVICE DOES NOT INCLUDE THE COLLECTION AND DISPOSAL OF STORM WATERS OR RUN OFF WATERS, WHICH MAY NOT BE DIVERTED INTO OR DRAINED INTO THE UTILITY'S COLLECTION SYSTEM.**

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 28 2024
55818 1779

SECTION 2.20 SPECIFIC UTILITY SERVICE RULES AND REGULATIONS (Continued)

Pursuant to 16 TAC § 24.87(n), the utility may charge for all labor, material, equipment, and other costs necessary to repair to replace all equipment damaged due to service diversion or the discharge of wastes which the system cannot properly treat. This shall include all repair and clean up costs associated with discharges of grease and oils, except as incidental waste in process or wash water, used in or resulting from food preparation by sewer utility customers engaged in the preparation and/or processing of food for other than domestic consumption or for sale to the public discharged from grease traps or other grease and/or oil storage containers. The utility may charge for all costs necessary to correct service diversion or unauthorized taps where there is no equipment damage, including incidents where service is reconnected without authority.

The utility may not charge any additional penalty or charge other than actual costs unless such penalty has been expressly approved by the regulatory authority having rate/tariff jurisdiction and filed in the utility's tariff.

Pursuant to 16 TAC § 24.86(b)(3)(A) and (B), the customer's service line and appurtenances shall be construed in accordance with the laws and regulations of the State of Texas, local plumbing codes, or, in the absence of such local codes, the Uniform Plumbing Code. It shall be the customer's responsibility to maintain the service line and appurtenances in good operating condition, i.e., clear of obstruction, defects, or blockage.

If the utility can provide evidence of excessive infiltration or inflow or failure to provide proper pretreatment, the utility may, with the written approval of the PUC, require the customer to repair the line or eliminate the infiltration or inflow or take such actions necessary to correct the problem. If the customer fails to correct the problem within a reasonable time, the utility may disconnect service after proper notice.

In accordance with the requirements of Utility's Wastewater discharge Permit, any and all repairs and maintenance of Utility's lines, tanks, pumps and equipment located on Customer's premises shall be performed exclusively by the Utility.

Copies of the utility's state and federal waste water discharge permits shall be available for public inspection and copying in the utility's business office during normal business hours.

Non-residential customers electing the pretreatment option for sewage with non-standard characteristics may be charged those costs set forth in the utility's extension policy if such pretreatment fails or otherwise causes the utility's facilities to violate their waste-water discharge permits.

RESIDENTIAL SINGLE FAMILY GRINDER/SEWAGE STATIONS

Prior to the installation of a grinder/sewage station, the utility must be given a complete listing of all materials and equipment that will be used.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 28 2024
5 5 8 1 8 0

SECTION 2.20 SPECIFIC UTILITY SERVICE RULES AND REGULATIONS (Continued)

In order to prevent inflow and infiltration, the materials must comply with standard specifications, approved by the PUC and the utility.

After the utility has approved the proposed grinder/sewage station, the construction may begin. Once the work has been completed, the utility will do an inspection of the grinder/sewage station to ensure the complete installation was as specified.

The customer will retain ownership of receiving tanks or lift stations on the customer's property, and all maintenance, repairs and replacement are the customer's responsibility. The customer shall own and maintain the grinder pump and appurtenances.

The repairs may be performed by anyone selected by the customer, who is competent to perform such repairs. The utility requires that parts and equipment meet the minimum standards approved by the TCEQ, to insure proper and efficient operation of the sewer system.

MULTI-FAMILY AND COMMERCIAL RECEIVING TANK/LIFT STATIONS

Prior to the installation of a grinder/sewage station, the utility must be given a complete listing of all materials and equipment that will be used, along with the storage for that development.

In order to minimize inflow and infiltration into the collection system, the installation and materials must comply with standard specifications approved by the TCEQ.

After the utility has approved the proposed grinder / sewage station, the construction may begin. Once the work has been completed, the utility will do an inspection of the grinder / sewage station to ensure the complete installation was as specified.

Prior to acceptance of an existing receiving tank or lift station that is being used as an interceptor tank for primary treatment, waste water storage or pump tanks prior to discharge into an alternative or conventional sewage system must be cleaned, inspected, repaired, modified, or replaced if necessary to minimize inflow and infiltration into the collection system.

Existing pumps and tanks must be of adequate size to insure proper pumpage in the event of high flow or if one pump is out of service. If the existing pumps and receiving tanks or lift stations are of inadequate size the utility will not accept liability for backups due to: high flows, one pump out of service, rainfall causing inflow or infiltration, power outages, lack of proper storage capacity, etc.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 28 2024
55818

SECTION 2.20 SPECIFIC UTILITY SERVICE RULES AND REGULATIONS (Continued)

If the collection system that discharges into the receiving tank/lift station has an inflow or infiltration problem and collects rainfall discharge, the owner or P.O.A. will correct it within 90 days of written notice from the utility. If no action is taken to correct the problem within 90 days, the utility may take the responsibility to make corrections at the owner's/P.O.A.'s expense. The utility is not responsible for the collection system that discharges into the receiving tank/lift station.

The owner / P.O.A. shall be responsible for the monthly electric bill.

An adequate easement must encompass the receiving tank / lift station by a 15 foot radius and also a 15 foot access easement to the receiving tank / lift station site. If this easement does not exist, one must be created and filed of record.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED

## SECTION 3.0--EXTENSION POLICY

Section 3.01--Standard Extension Requirements

LINE EXTENSION AND CONSTRUCTION CHARGES. No contribution in aid of construction may be required of any customer except as provided for in this approved extension policy.

The customer will be given an itemized statement of the costs, options such as rebates to the customer, sharing of construction costs between the utility and the customer, or sharing of costs between the customer and other applicants prior to beginning construction.

The utility will bear the full cost of any oversizing of collection mains necessary to serve other customers in the immediate area. The individual residential customer shall not be charged for any additional treatment capacity or facilities. Contributions in aid of construction may not be required of individual residential customers for treatment capacity or collection facilities unless otherwise approved by the Commission under this specific extension policy.

COST UTILITIES SHALL BEAR. Within its certificate area, the utility will pay the cost of the first 200 feet of any sewer collection line necessary to extend service to an individual residential customer within a platted subdivision. However, if the residential customer requesting service purchased the property after the developer was notified of the need to provide facilities to the utility, the utility may charge for the first 200 feet. The utility must also be able to document that the developer of the subdivision refused to provide facilities compatible with the utility's facilities in accordance with the utility's approved extension policy after receiving a written request from the utility.

Developers may be required to provide contributions in aid of construction in amounts to furnish the system with all facilities necessary to comply with the PUC's Rules.

This section contains the utility's specific extension policy which complies with the requirements already stated under Section 3.01. It must be reviewed an approved by the Commission and in compliance with PUC Rules to be effective.

Residential customers not covered under Section 3.01 will be charged the equivalent of the costs of extending service to their property from the nearest collection line even if that line does not have adequate capacity to serve the customer. However, if the customer places unique, non-standard service demands upon the system, the customer may be charged the full cost of extending service to and throughout their property, including the cost of all necessary treatment capacity necessary to meet the service demands anticipated to be created by that property.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 28 2024
DOCKET
55818
1783

## SECTION 3.20--SPECIFIC UTILITY EXTENSION POLICY

Developers will be required to provide contributions in aid of construction in amounts sufficient to furnish the development with all facilities necessary to provide for reasonable local demand requirements and to comply with TCEQ's minimum design criteria for facilities used in collecting, treating, transmitting, and discharging of wastewater effluent. For purposes of this subsection, a developer is one who subdivides or requests more than two connections on a piece of property. Commercial, industrial, and wholesale customers will be treated as developers.

The utility adopts the administrative rules of the PUC, as amended from time to time, as its company specific extension policy. These rules will be kept on file at the company's business office for customer inspection during normal business hours.

Non-residential customers generating sewage creating unique or non-standard treatment demands which might reasonably be expected to cause the utility's treatment facilities to operate outside their current waste-water discharge permit parameters may be charged the cost of all studies, engineering plans, permit costs, and collection treatment or discharge facilities construction or modification costs necessary to enable the utility to treat said sewage within permit limits acceptable to the TCEQ, EPA and other regulatory agencies. In the alternative, the customer may have the option of pre-treating said sewage in such a manner to that it may not reasonably be expected to cause the utility's facilities to operate outside their permit parameters. In such case, the customer shall be required to pay the utility's costs of evaluating such pretreatment processes and cost of obtaining regulatory approval of such pretreatment processes. In the event of the pretreatment facilities of a customer making this election fail and cause the utility's facilities to operate outside their permit parameters, the customer shall indemnify the utility for all costs incurred for clean ups or environmental remediation and all fines, penalties, and costs imposed by regulatory or judicial enforcement actions relating to such permit violations.

Non-residential sewer customers producing water borne waste significantly different from waste generated by residential customers may be required to provide a suitable sampling point at the property line for testing the customer's waste for chemicals or substances, e.g., grease, oils, solvents, pesticides, etc., which can reasonably be believed to have an injurious effect on the Utility's plant and/or its ability to treat and dispose of such wastes within the parameters of the Utility's permit. Utility shall have reasonable access to the sampling point at all times.

Any service extension to a subdivision (recorded or unrecorded) may be subject to the provisions and restrictions of 16 TAC § 24.86(d) and this tariff. When a developer wishes to extend the system to prepare to service multiple new connections, the charge shall be the cost of such extension, plus a pro-rata charge based upon the capacities of collection, transmission, storage, treatment and discharge facilities, compliant with the TCEQ minimum design criteria, which must be committed to such extension. As provided by 16 TAC § 24.86(d)(4), for purposes of this section, commercial, industrial, and wholesale customers shall be treated as developers.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 28 2024
DOCKET
55818 1784

SECTION 3.20--SPECIFIC UTILITY EXTENSION POLICY (Continued)

The imposition of additional extension costs or charges as provided by Sections 2.20 and 3.20 of this tariff shall be subject to appeal as provided in this tariff, PUC rules, or the rules of such other regulatory authority as may have jurisdiction over the utility's rates and services. Any applicant required to pay for any costs not specifically set forth in the rate schedule pages of this tariff shall be entitled to a written explanation of such costs prior to payment and/or commencement of construction. If the applicant does not believe that these costs are reasonable or necessary, the applicant shall have the right to appeal such costs to the PUC or such other regulatory authority having jurisdiction over the utility's rates in that portion of the utility's service area in which the applicant's property(ies) is located. Unless the PUC or other regulatory authority enters interlocutory orders to the contrary, service to the applicant may be delayed until such appeal is resolved.

The Utility may initiate, transfer, or terminate retrial water or sewer service upon receipt of a customer request by mail, by telephone, through an Internet website, or through other electronic transmission. A separate request to initiate, transfer, or terminate service, shall be required for each potential service location if more than one service connection is desired by any individual applicant. Written service application forms will be available for applicant pick up at the Utility's business office during normal weekday business hours. Upon request, written service applications will also be sent by prepaid first class United States mail to the address provided by the applicant upon request.

The Utility shall serve each qualified service applicant within its certificated service area as soon as practical after receiving a request for service. All service requests will be fulfilled within the time limits prescribed by PUC rules once the applicant has met all conditions precedent to achieving a "qualified service applicant". If a service request cannot be fulfilled within the required period, the applicant shall be notified in writing of the delay, its cause and the anticipated date that service will be available. The PUC service dates shall not become applicable until the service applicant has met all conditions precedent to becoming a "qualified service applicant" as defined herein or by PUC rules.

The Utility is not required to extend service to any applicant outside of its certificated service area and will only do so, at the Utility's sole option, under terms and conditions mutually agreeable to the Utility and the applicant and upon extension of the Utility's certificated service area boundaries by the PUC. Service applicants may be required to bear the cost of the service area amendment.

A "qualified service applicant" is an applicant who has: (1) met all of the Utility's requirements of service contained in this tariff, PUC rules and/or PUC order, (2) has made all payments for tap fees and extension charges, (3) has provided all necessary easements and rights-of-way necessary to provide service to the requested location, including staking said easements or rights-of-way where necessary, and (4) has for each location to which service is being requested, completed the verbal, written, or electronic transmission customer service request process.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 20 2024
55818 785

SECTION 3.20--SPECIFIC UTILITY EXTENSION POLICY (Continued)

Where a new tap or service connection is required, the service applicant shall be required to submit a service request by mail, by telephone, through an Internet website, or through another electronic transmission and request that a tap be made. The tap request must be accompanied with a plat, map, diagram or written metes and bounds description of precisely where the applicant desires each tap or service connection is to be made and, if necessary, where the connection is to be installed, along the applicant's property line. The actual point of connection must be readily accessible to Utility personnel for inspection, servicing and testing while being reasonably secure from damage by vehicles and mowers. If the Utility has more than one main adjacent to the service applicant's property, the tap or service connection will be made to the Utility's near service main with adequate capacity to service the applicant's full potential service demand.

If the tap or service connection cannot be made at the applicant's desired location, it will be made at another location mutually acceptable to the applicant and the Utility. If no agreement on location can be made, applicant may refer the matter to the PUC for resolution. Unless otherwise ordered by the PUC, the tap or service connection will not be made until the location dispute is resolved.

The Utility shall require a developer (as defined by PUC rule) to provide permanent recorded public utility easements as a condition of service to any location within the developer's property. The Developer shall be required to obtain all necessary easements and rights-of-way required to extend the Utility's existing service facilities from their nearest point with adequate service capacity (as prescribed by PUC rules and local service conditions) to and throughout the Developer's property. The easements shall be sufficient to allow the construction, installation, repair, maintenance, testing, and replacement of any and all utility plant necessary to provide continuous and adequate service to each and every potential service location within the property at full occupancy. Unless otherwise restricted by law, sewage treatment, holding tank sites, lift station sites shall convey with all permanent easements and buffers required by TCEQ rules. Unless otherwise agreed to by the Utility, pipe line right-of-way easements must be at least 15 feet wide to allow adequate room to facilitate backhoe and other heavy equipment operation and meters.

Easements must be provided for all storage, treatment, pressurization and disposal sites which are sufficient to construct and maintain all weather roads as prescribed by TCEQ rules. All easements shall be evidenced, at Developer's expense, by recorded county-approved subdivision plat or by specific assignment supported by metes and bounds survey from a surveyor licensed by the State of Texas.

Prior to the extension of utility service to developers (as defined by PUC rules) or new subdivisions, the Developer shall comply with the following:

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 28 2024
55818

SECTION 3.20--SPECIFIC UTILITY EXTENSION POLICY (Continued)

(a) The Developer shall make a written request for service to property that is to be subdivided and developed. The Developer shall submit to the Utility a proposed plat on a scale of one inch (1") to two hundred feet (200') for review and determination of required easements, utility plant, and plant location. If sewer service is requested, the plat must contain elevation data. A reconcilable deposit in an amount set by the Utility may be required to cover preliminary engineering, legal and copy cost to be incurred by the Utility in reviewing and planning to meet this service request. The plat and/or accompanying information shall identify the type, location and number of houses and other planned structures that will be requiring utility service. If other than residential structures are to be located on the property, all other types of anticipated businesses and their service demands shall be identified with specificity. All areas requiring special irrigation and/or other unique water demands must be identified.

To the extent reasonably possible, this information must be precise so that adequate facilities can be designed and constructed to meet all future service demands without hazard to the public, other utility customers and/or the environment.

(b) After the requirements of easements and rights-of-way have been determined, a red line copy will be returned by the Utility to the Developer for final plat preparation.

(c) Copies of all proposed plats and plans must be submitted to the Utility prior to their submission to the county for approval to insure that they are compatible with the adequate long-term utility needs of potential service customers. Copies will be returned after review by the Utility so that necessary changes may be incorporated into the Developer's final submitted plat(s) and plans.

(d) The Utility shall be provided with three (3) certified copies of the final plat(s) approved by the County Commissioners Court. At this time, the Utility will begin engineering the facilities necessary to serve the property. Plans and specifications will be prepared and submitted to the TCEQ by the Utility if required by law. If further plat or plans changes are necessary to accommodate the specific service needs of the property and the anticipated customer demands, the Developer will be so notified. Plat amendments must be obtained by the Developer.

The Developer shall be notified when all required TCEQ or other governmental approvals or permits have been received. No construction of utility plant which requires prior TCEQ plans approval shall be commenced until that approval has been received by the Utility and any conditions imposed by the TCEQ or the PUC in association with its approvals have been satisfied.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 28 2024
DOCKET
55818 1787

SECTION 3.20--SPECIFIC UTILITY EXTENSION POLICY (Continued)

(e) The Developer shall be required to post bond or escrow the funds necessary to construct all required utility plant, except individual sewer connections, required to serve the property. Construction shall not commence until funds are available. If the construction is to be done in coordination with the phased development of the property, funds must be provided in advance which are sufficient to complete each phase. No phase or facilities for any phase shall be constructed prior to the bonding or escrowing of all funds associated with that phase.

(f) At the sole option of the Utility, the Developer may be required to execute a Developer Extension Contract setting forth all terms and conditions of extending service to their property including all contributions-in-aid of construction and developer reimbursements, if any.

(g) The Utility may require the Developer to commence construction of subdivision improvements within three (3) months of utility plans approval or the Utility may abate its construction activities until full development construction begins. If the Developer stops construction of subdivision improvements for any purpose, the Utility may abate its construction for a similar period.

(h) As soon as the roads are rough cut and prior to paving, extension lines will need to be constructed at each road crossing. The Developer must notify the Utility sufficiently in advance of this development stage to allow for the necessary utility construction without disruption to other service operations of the Utility. Failure to provide adequate advance notice and cooperation in the construction of necessary utility plant may result in additional delays in obtaining service to the property. The Developer shall be required to pay for all additional costs of road boring or other remedial construction necessary to install adequate utility plant throughout the affected property.

Within its certificated area, the Utility shall bear the cost of the first 200 feet of any water main or sewer collection line necessary to extend service to an individual residential service applicant within a platted subdivision unless the Utility can document:

(a) that the developer of the subdivision refused to provide facilities compatible with the utility's facilities in accordance with the Utility's approved extension policy after receiving a written request from the Utility; or,

(b) that the Developer defaulted on the terms and conditions of a written agreement or contract existing between the utility and the developer or the terms of this tariff regarding payment for services, extensions, or other requirements; or in the event the Developer declared bankruptcy and was therefore unable to meet obligations; and,

SECTION 3.20--SPECIFIC UTILITY EXTENSION POLICY (Continued)

(c) that the residential service applicant purchased the property from the Developer after the Developer was notified of the need to provide facilities to the utility. A residential service applicant may be charged the remaining costs of extending service to his property; provided, however, that the residential service applicant may only be required to pay the cost equivalent to the cost of extending the nearest water main or wastewater collection line, whether or not that line has adequate capacity to serve that residential service applicant.

The following criteria shall be considered to determine the residential service applicant's cost for extending service:

(a) The residential service applicant shall not be required to pay for costs of main extensions greater than 2" in diameter for pressure wastewater collection lines and 6" in diameter for gravity wastewater lines.

(b) Exceptions may be granted by the PUC if:

(1) adequate service cannot be provided to the applicant using the maximum line sizes listed due to distance or elevation, in which case, it shall be the utility's burden to justify that a larger diameter pipe is required for adequate service;

(2) larger minimum line sizes are required under subdivision platting requirements or applicable building codes.

(c) If an exception is granted, the Utility shall establish a proportional cost plan for the specific extension or a rebate plan which may be limited to seven years to return the portion of the applicant's costs for oversizing as new customers are added to ensure that future applicants for service on the line pay at least as much as the initial service applicant.

For purposes of determining the costs that service applicants shall pay, commercial customers with service demands greater than residential customer demands in the certificated area, industrial, and wholesale customers shall be treated as developers.

## Southeast Region
## Docket Number: 55818

Aqua Texas, Inc. d/b/a Aqua Texas
(Utility Name)

1106 Clayton Lane, Suite 400W
(Business Address)

Austin, TX 78723
(City, State, Zip Code)

(512) 990-4400
(Area Code/Telephone)

This tariff is effective for utility operations under the following Certificate of Convenience and Necessity:

21065

This tariff is effective in the following counties:

Brazoria, Fort Bend, Harris, Jefferson, Montgomery, Polk, Trinity, and Victoria

This tariff is effective in the following cities or unincorporated towns (if any):

City of Conroe, City of Houston, & City of Port Arthur

**The rates set or approved by the city for the systems entirely within its corporate boundary are not presented in thie tariff. Those rates are not under the original jurisdiction of the PUC and will have to be obtained from the city or utility. The rates charged within the City of Houston were established through a settlement agreement. Those rates will have to be obtained from the city or the utilty.**

This tariff is effective in the following subdivisions or systems:

See attached Table

SECTION 1.0 -- RATE SCHEDULE

Section 1.01 - Rates

| Meter Size | Monthly Flat Rate (Includes 0 gallons all meters) |
|---|---|
| 5/8" or 3/4" | $63.80 |
| 1" | $159.49 |
| 1½" | $318.99 |
| 2" | $510.38 |
| 3" | $1020.76 |
| 4" | $1594.93 |
| 6" | $3189.87 |
| 8" | $5,103.79 |
| 10" | $7337.00 |

**Non-residential customers who purchase sewer service only and who have no reliable sewer consumption data available will be charged the applicable monthly fee for their meter size multiplied by 1.69. If a sewer meter is not available a meter size will be imputed by the utility based upon the size of the sewer service pipe.**

System Improvement Charge - Not subject to Federal Tax Change Credit Rider

| Meter Size | Monthly Charge |
|---|---|
| 5/8" or 3/4" | $9.20 |
| 1" | $23.00 |
| 1½" | $46.00 |
| 2" | $73.60 |
| 3" | $147.20 |
| 4" | $230.00 |
| 6" | $460.00 |
| 8" | $736.00 |
| 10" | $1058.00 |
| 12" | $1,978.00 |

Federal Tax Change Credit Rider: ..... (6.94%) of the monthly retail bill
(Effective May 1, 2018; ***Tariff Control No. 48197***)

Federal Tax Change Credit Rider: ..... (4.99%) of the monthly retail bill
(Effective January 1, 2019; ***Tariff Control No. 48197***)

FORM OF PAYMENT: The utility will accept the following forms of payment:
Cash X (if in person), Check X, Money Order X, Credit Card ____, Other (specify)__
THE UTILITY MAY REQUIRE EXACT CHANGE FOR PAYMENTS AND MAY REFUSE TO ACCEPT PAYMENTS MADE USING MORE THAN $1.00 IN SMALL COINS. A WRITTEN RECEIPT WILL BE GIVEN FOR CASH PAYMENTS.

Sewer Utility Tariff Page No. 3

REGULATORY ASSESSMENT ..... 1.0%
PUC RULES REQUIRE THE UTILITY TO COLLECT A FEE OF ONE PERCENT OF THE RETAIL MONTHLY BILL AND TO REMIT FEE TO THE TEXAS COMMISSION ON ENVIRONMENTAL QUALITY (TCEQ).

Section 1.02 – Miscellaneous Fees

TAP FEE ..... $650.00
TAP FEE IS BASED ON THE AVERAGE OF THE UTILITY'S ACTUAL COST FOR MATERIALS AND LABOR FOR STANDARD RESIDENTIAL CONNECTION OF 5/8" METER PLUS UNIQUE COSTS AS PERMITTED BY PUC RULE AT COST.

TAP FEE (Unique costs) ..... Actual Cost
FOR EXAMPLE, A ROAD BORE FOR CUSTOMERS OUTSIDE OF SUBDIVISIONS OR RESIDENTIAL AREAS.

TAP FEE (Large Meter) ..... Actual Cost
TAP FEE IS THE UTILITY'S ACTUAL COST FOR MATERIALS AND LABOR FOR METER SIZE INSTALLED.

RECONNECTION FEE
THE RECONNECT FEE MUST BE PAID BEFORE SERVICE CAN BE RESTORED TO A CUSTOMER WHO HAS BEEN DISCONNECTED FOR THE FOLLOWING REASONS (OR OTHER REASONS LISTED UNDER SECTION 2.0 OF THIS TARIFF)

a) Non-payment of bill (Maximum $25.00) ..... $25.00
b) Customer's request that service be disconnected ..... $45.00

SEASONAL RECONNECTION FEE:
BASE RATE FOR METER SIZE TIMES NUMBER OF MONTHS OFF THE SYSTEM NOT TO EXCEED SIX MONTHS WHEN LEAVE AND RETURN WITHIN A TWELVE MONTH PERIOD.

SERVICE INITIATION FEE ..... $45.00
THE SERVICE INITIATION FEE WILL BE CHARGED FOR INITIATING AN ACCOUNT AT THE SERVICE LOCATION.

LATE CHARGE (EITHER $5.00 OR 10% OR THE BILL) ..... 10%
PUC RULES ALLOW A ONE-TIME PENALTY TO BE CHARGED ON DELINQUENT BILLS. A LATE CHARGE MAY NOT BE APPLIED TO ANY BALANCE TO WHICH THE PENALTY WAS APPLIED IN A PREVIOUS BILLING.

RETURNED CHECK CHARGE ..... $25.00

CUSTOMER DEPOSIT RESIDENTIAL (Maximum $50) ..... $50.00

COMMERCIAL & NON-RESIDENTIAL DEPOSIT ..... 1/6TH OF ESTIMATED ANNUAL BILL

GOVERNMENTAL TESTING, INSPECTION AND COSTS SURCHARGE CLAUSE:
WHEN AUTHORIZED IN WRITING BY PUC AND AFTER NOTICE TO CUSTOMERS, THE UTILITY MAY INCREASE RATES TO RECOVER INCREASED COSTS FOR INSPECTION FEES AND SEWER TESTING. [16 TEXAS ADMINISTRATIVE CODE (TAC) § 24.25(b)(2)(G)]

LINE EXTENSION AND CONSTRUCTION CHARGES:
REFER TO SECTION 3.0--EXTENSION POLICY FOR TERMS, CONDITIONS, AND CHARGES WHEN NEW CONSTRUCTION IS NECESSARY TO PROVIDE SERVICE.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 28 2024
55818
1796

SECTION 1.0 -- RATE SCHEDULE (Continued)

PURCHASED SEWER AND/OR DISTRICT FEE PASS THROUGH CLAUSE:
Changes in fees imposed by any non-affiliated third party sewer supplier or underground sewer district having jurisdiction over the Utility shall be passed through to only the sewer system(s) affected by the increase or fee as an adjustment to the sewer gallonage charge according to the following formula:

AG = G + B/(1-L), Where:
AG = adjusted gallonage charge, rounded to the nearest one cent:
G = approved gallonage charge (per 1,000 gallons);
B = change in purchased sewer/district gallonage charge (per 1,000 gallons);
L = system average line loss for preceding 12 months not to exceed 0.15

Charges shall be passed on to flat rate customers by imputing 5,000 gallons monthly wastewater generation and increasing the monthly flat rate according to the following formula:

AMR = MR + (B x 5), Where:
AMR = adjusted monthly flat rate, rounded to the nearest one cent;
MR = approved monthly flat rate;
B = change in purchased wastewater treatment charge (per 1,000 gallons)

FEDERAL TAX CHANGE CREDIT RIDER (FTCCR):
The Federal Tax Change Credit Rider gives effect to the Tax Cuts and Jobs Act of 2017, which changed the federal corporate tax rate from 35% to 21%, by reducing the cost of service paid by customers taking service under this rate tariff. The FTCCR will provide credits to customers taking service under this rate tariff.

REFER TO SECTION 3 0--EXTENSION POLICY FOR TERMS, CONDITIONS, AND CHARGES WHEN NEW CONSTRUCTION IS NECESSARY TO PROVIDE SERVICE.

PURCHASED WASTEWATER TREATMENT FEE PASS THROUGH CLAUSE:
Changes in fees imposed by any non-affiliated third party wastewater treatment supplier shall be passed through an adjustment to the applicable gallonage charge according to the following formula:

AG = G + B, where
AG = adjusted gallonage charge, rounded to the nearest one cent:
G = approved gallonage charge (per 1,000 gallons);
B = change in purchased water/district gallonage charge (per 1,000 gallons);

Charges shall be passed on to flat rate customers by imputing 5,000 gallons monthly wastewater generation and increasing the monthly flat rate according to the following formula:

Section 1.02 - Miscellaneous Fees

TAP FEE ..... $500.00
TAP FEE COVERS THE UTILITY'S COSTS FOR MATERIALS AND LABOR TO INSTALL A STANDARD RESIDENTIAL 5/8" or 3/4" METER. AN ADDITIONAL FEE TO COVER UNIQUE COSTS IS PERMITTED IF LISTED ON THIS TARIFF.

TAP FEE (Large meter) ..... Actual Cost
TAP FEE IS THE UTILITY'S ACTUAL COST FOR MATERIALS AND LABOR FOR METER SIZE INSTALLED.

RECONNECTION FEE
THE RECONNECT FEE MUST BE PAID BEFORE SERVICE CAN BE RESTORED TO A CUSTOMER WHO HAS BEEN DISCONNECTED FOR THE FOLLOWING REASONS (OR OTHER REASONS LISTED UNDER SECTION 2.0 OF THIS TARIFF):

a) Nonpayment of bill (Maximum $25.00) ..... $25.00
b) Customer's request that service be disconnected ..... $50.00

SERVICE INITIATION FEE ..... $25.00
THE SERVICE INITIATION FEE WILL BE CHARGED FOR INITIATING AN ACCOUNT AT THE SERVICE LOCATION.

LATE CHARGE (EITHER $5.00 OR 10% OF THE BILL) ..... $5.00
PUC RULES ALLOW A ONE-TIME PENALTY TO BE CHARGED ON DELINQUENT BILLS. A LATE CHARGE MAY NOT BE APPLIED TO ANY BALANCE TO WHICH THE PENALTY WAS APPLIED IN A PREVIOUS BILLING.

RETURNED CHECK CHARGE ..... $20.00
RETURNED CHECK CHARGES MUST BE BASED ON THE UTILITY'S DOCUMENTABLE COST.

CUSTOMER DEPOSIT RESIDENTIAL (Maximum $50) ..... $50.00

COMMERCIAL & NON-RESIDENTIAL DEPOSIT . 1/6TH OF ESTIMATED ANNUAL BILL

GOVERNMENTAL TESTING, INSPECTION AND COSTS SURCHARGE:
WHEN AUTHORIZED IN WRITING BY PUC AND AFTER NOTICE TO CUSTOMERS, THE UTILITY MAY INCREASE RATES TO RECOVER INCREASED COSTS FOR INSPECTION FEES AND WATER TESTING. [16 TAC § 24.21(b)(2)(F)]

LINE EXTENSION AND CONSTRUCTION CHARGES:
REFER TO SECTION 3.0--EXTENSION POLICY FOR TERMS, CONDITIONS, AND CHARGES WHEN NEW CONSTRUCTION IS NECESSARY TO PROVIDE SERVICE.

FEDERAL TAX CHANGE CREDIT RIDER (FTCCR):
The Federal Tax Change Credit Rider gives effect to the Tax Cuts and Jobs Act of 2017, which changed the federal corporate tax rate from 35% to 21%, by reducing the cost of service paid by customers taking service under this rate tariff. Sewer Utility Tariff Page No. 11

SECTION 1.0 -- RATE SCHEDULE (Continued)

REGULATORY ASSESSMENT ..... 1.0%

PUC RULES REQUIRE THE UTILITY TO COLLECT A FEE OF ONE PERCENT OF THE RETAIL MONTHLY BILL AND TO REMIT THE FEE TO THE TCEQ.

FORM OF PAYMENT: The utility will accept the following forms of payment:
Cash X (If in person at designated locations),Check X, Money Order X, Credit Card X,
Other (specify) Electronic Billing & Payment (See Section 2.06 – Billing)

THE UTILITY MAY REQUIRE EXACT CHANGE FOR PAYMENTS AND MAY REFUSE TO ACCEPT PAYMENTS MADE USING MORE THAN $1.00 IN SMALL COINS. A WRITTEN RECEIPT WILL BE GIVEN FOR CASH PAYMENTS.

UNAFFILIATED THIRD PARTIES WHO ACCEPT AND PROCESS CASH, CREDIT CARD, OR ELECTRONIC PAYMENTS FOR UTILITY BILLS MAY REQUIRE PAYMENT OF AN ADDITIONAL CONVENIENCE CHARGE FOR THIS SERVICE.

Section 1.02 - Miscellaneous Fees

TAP FEE (Residential) ..... $650.00

THE TAP FEE COVERS THE UTILITY'S COSTS FOR MATERIALS AND LABOR TO INSTALL A STANDARD RESIDENTIAL SEWER CONNECTION. AN ADDITIONAL FEE TO COVER UNIQUE COSTS IS PERMITTED IF LISTED ON THIS TARIFF.

TAP FEE (Unique costs) ..... Actual Cost

FOR EXAMPLE, A ROAD BORE FOR CUSTOMERS OUTSIDE A SUBDIVISION IS A UNIQUE COST. UNIQUE COSTS WILL BE DETERMINED ON A CASE-BY-CASE BASIS.

TAP FEE (Non-Residential) ..... Actual Cost

THIS TAP FEE IS BASED ON THE UTILITY'S ACTUAL COST FOR MATERIALS AND LABOR FOR NON-RESIDENTIAL SEWER CONNECTIONS. UNIQUE COSTS, SUCH AS ROAD BORES, WILL BE CHARGED IN ADDITION TO THIS TAP FEE AT THEIR ACTUAL COST OF INSTALLATION.

SERVICE RELOCATION FEE (Customer's Request) ..... Actual Cost

THIS FEE MAY BE CHARGED IF A CUSTOMER REQUESTS THAT AN EXISTING SERVICE CONNECTION BE RELOCATED.

RECONNECTION FEE

THE RECONNECT FEE MUST BE PAID BEFORE SERVICE CAN BE RESTORED TO A CUSTOMER WHO HAS BEEN DISCONNECTED FOR THE FOLLOWING REASONS (OR OTHER REASONS LISTED UNDER SECTION 2.0 OF THIS TARIFF):

a) Non-payment of bill (Maximum $25.00) ..... $25.00
b) Customer's request that service be disconnected ..... $45.00
c) Non-residential customer failure to correct improper wastewater discharges (see Section 2.20 of this Tariff) ..... $150.00

IF A NON-RESIDENTIAL CUSTOMER FAILS TO CORRECT IMPROPER GREASE TRAP CONDITIONS OR TO BRING SEWER DISCHARGESFROM ANY GREASE TRAP OR OTHER PRETREATMENT UNIT INTO COMPLIANCE WITH THE "CONDITIONS FOR NON-RESIDENTIAL SEWER SERVICE" INCLUDED IN APPENDIX B WITHIN 10 DAYS AFTER WRITTEN NOTICE IS PROVIDED, SERVICE WILL BE DISCONNECTED UNTIL THE IMPROPER CONDITIONS ARE CORRECTED. RECONNECTION OF SERVICE WILL REQUIRE PAYMENT OF THIS FEE AND AN ONSITE INSPECTION OF THE GREASE TRAP OR OTHER PRETREATMENT UNIT BY UTILITY PERSONNEL.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED

SECTION 1.0 -- RATE SCHEDULE (Continued)

OR A UTILITY CONTRACTOR BEFORE SERVICE IS RESTORED. SEPARATE INSPECTION AND SAMPLING FEES MAY ALSO APPLY AS DESCRIBED ELSEWHERE IN THIS TARIFF.

SERVICE INITIATION FEE ..... $45.00
THE SERVICE INITIATION FEE WILL BE CHARGED FOR INITIATING AN ACCOUNT AT THE SERVICE LOCATION.

LATE CHARGE ..... 10% of Bill
PUC RULES ALLOW A ONE-TIME PENALTY TO BE CHARGED ON DELINQUENT BILLS. A LATE CHARGE MAY NOT BE APPLIED TO ANY BALANCE TO WHICH THE PENALTY WAS APPLIED IN A PREVIOUS BILLING.

RETURNED CHECK CHARGE ..... $25.00
RETURNED CHECK CHARGES MUST BE BASED ON THE UTILITY'S DOCUMENTABLE COST.

CUSTOMER DEPOSIT - RESIDENTIAL ..... $50.00

CUSTOMER DEPOSIT – COMMERCIAL AND NON-RESIDENTIAL..... 1/6$^{th}$ of estimated annual bill

ILLEGAL RECONNECTION OR SHUT-OFF EQUIPMENT DAMAGE FEE ..... $250.00
IN ORDER TO REIMBURSE THE UTILITY WITHOUT BURDENING OTHER CUSTOMERS WITH HIGHER RATES FOR THE ADDITIONAL COST OF SERVICE TRIPS AND EQUIPMENT REQUIRED TO MORE FORCEFULLY DISCONNECT A CUSTOMER/ACCOUNT HOLDER PREVIOUSLY DISCONNECTED FOR NONPAYMENT, FAILURE TO CORRECT IMPROPER WATEWATER DISCHARGES, OR OTHER LAWFUL REASONS WHO HAS ILLEGALLY RECONNNECTED SERVICE OR BEGUN TO DISCHARGE WASTEWATER TO THE UTILITY'S SYSTEM AGAIN WITHOUT PAYING PAST DUE CHARGES, CORRECTING IMPROPER GREASE TRAP OPERATING CONDITIONS, OR OTHERWISE ACHIEVING COMPLIANCE WITH THE "CONDITIONS FOR NON-RESIDENTIAL SEWER SERVICE" INCLUDED IN APPENDIX B, AND TO PAY FOR THE COST OF DAMAGE TO EQUIPMENT NECESSARY TO KEEP A DELINQUENT CUSTOMER DISCONNECTED, THIS FEE SHALL BE ASSESSED TO THE ACCOUNT HOLDER OF ANY DELINQUENT ACCOUNT DISCONNECTED FOR NONPAYMENT BY ANY PHYSICAL MEANS, INCLUDING INSTALLING A PHYSICAL BLOCKING DEVICE IN THE SERVICE LINE, WHEN NON-UTILITY PERSONNEL RECONNECT SERVICE TO THE PREMISES BY CUTTING, DAMAGING OR REMOVING THE PHYSICAL BLOCKING DEVICE OR WHEN WASTEWATER IS OTHERWISE DISCHARGED THROUGH THE SERVICE CONNECTION WITHOUT AUTHORIZATION BY THE UTILITY. THIS FEE MAY BE CHARGED EACH TIME AN EVENT OCCURS AND SERVICE WILL NOT BE RECONNECTED UNTIL THIS FEE IS PAID IN ADDITION TO ANY OTHER BALANCES AND RECONNECT FEES. THIS FEE SHALL NOT BE CHARGED IF THE ACCOUNT HOLDER OR HIS/HER REPRESENTATIVE INFORMS THE UTILITY WITHIN 24 HOURS AFTER DISCOVERING THAT SERVICE HAS BEEN RESTORED WITHOUT AUTHORIZATION OF THE UTILITY: (1) THAT SERVICE WAS RECONNECTED WITHOUT THE ACCOUNT HOLDER'S PERMISSION; AND (2) THE ACCOUNT HOLDER AGREES TO PAY FOR ALL WASTEWATER SERVICE PROVIDED.

DAMAGED SEWER CONNECTION FEE..... Actual cost
THIS FEE SHALL BE ASSESSED TO THE ACCOUNT HOLDER OF ANY DELINQUENT ACCOUNT THAT HAS BEEN DISCONNECTED FOR NON-PAYMENT, OR OF AN ACCOUNT DISCONNECTED FOR FAILURE TO CORRECT IMPROPER WATEWATER DISCHARGES OR OTHER LAWFUL REASONS, BY VALVING OFF OR LOCKING THE SEWER CONNECTION WHEN THE SEWER CONNECTION AND/OR SEWER CONNECTION APPURTENANCES ARE DAMAGED IN ORDER TO RESTORE SEWER SERVICE TO THE ACCOUNT HOLDER'S ORIGINAL PLACE OF SERVICE

SECTION 1.0 -- RATE SCHEDULE (Continued)

REQUIRING THE UTILITY TO REPAIR OR REPLACE THEM. THE ACCOUNT HOLDER SHALL BE CHARGED THE FULL COST OF REPAIRING AND/OR REPLACING ALL DAMAGED PARTS AS THE UTILITY DEEMS NECESSARY, INCLUDING LABOR AND VEHICLE COSTS.

GREASE TRAP, PRETREATMENT UNIT, SAMPLING WELL INSPECTION, REINSPECTION AND TESTING:

IN ORDER TO ENSURE THAT DISCHARGES FROM NON-RESIDENTIAL WASTEWATER CUSTOMERS UTILIZING GREASE TRAP OR PRETREATMENT UNIT FACILITIES/EQUIPMENT CAN BE PROPERLY TREATED AND DISCHARGED ACCORDING TO TCEQ PERMIT REQUIREMENTS, INSPECTIONS OF SUCH FACILITIES/EQUIPMENT AND DISCHARGE TESTING ARE REQUIRED. THE FOLLOWING FEES WILL BE CHARGED RELATED TO THESE ACTIVITIES:

BEFORE INITIAL SERVICE (INITIAL INSPECTION AND, IF NEEDED, RE-INSPECTION) ..... $75.00

TO ENSURE PROPOSED DISCHARGES CAN MEET THE "CONDITIONS FOR NON-RESIDENTIAL SEWER SERVICE" INCLUDED IN APPENDIX B, AN ONSITE INSPECTION OF ALL GREASE TRAPS, PRETREATMENT UNITS AND SAMPLING WELLS FOR THOSE CUSTOMERS REQUIRED TO HAVE ONE WILL BE CONDUCTED BY UTILITY PERSONNEL OR A UTILITY CONTRACTOR BEFORE SERVICE IS INITIATED. IF THE INSPECTION IDENTIFIES DEFICIENCIES THAT NEED TO BE CORRECTED, THE SAME FEE WILL BE CHARGED FOR EACH RE-INSPECTION BEFORE SERVICE BEGINS. THE INITIAL INSPECTION FEE WILL BE CHARGED WHEN THE TAP FEE IS ASSESSED AND IS TO BE PAID SIMULTANEOUSLY. ALL REINSPECTION FEES, IF REQUIRED, MUST BE PAID BEFORE SERVICE IS INITIATED.

PERIODIC GREASE TRAP INSPECTION FEE AFTER SERVICE COMMENCES ..... $75.00

TO ENSURE EFFECTIVENESS AND PROPER MAINTENANCE OF GREASE TRAPS, PERIODIC INSPECTIONS OF ALL GREASE TRAPS WILL BE CONDUCTED BY UTILITY PERSONNEL OR A UTILITY CONTRACTOR AFTER SERVICE COMMENCES AND THIS FEE WILL BE ASSESSED EACH TIME SUCH AN INSPECTION OCCURS. INSPECTIONS WILL TYPICALLY BE CONDUCTED QUARTERLY, BUT IF AN INSPECTION IDENTIFIES PERFORMANCE ISSUES, REVEALS IMPROPER MAINTENANCE, OR FINDS EXCESSIVE OIL/GREASE IN A MANHOLE(S) DOWNSTREAM FROM A CUSTOMER INDICATING GREASE TRAP PROBLEMS EXIST, INSPECTIONS MAY BE CONDUCTED MONTHLY FOR THE NEXT QUARTER. IF AN INSPECTION IDENTIFIES PERFORMANCE ISSUES, DEFICIENCIES, OR IMPROPER MAINTENANCE, A WRITTEN NOTICE OF SUCH DEFICIENCIES WILL BE PROVIDED TO THE CUSTOMER. A RE-INSPECTION WILL BE REQUIRED AFTER THE CUSTOMER INFORMS THE UTILITY THAT ISSUES IDENTIFIED IN THE NOTICE ARE CORRECTED. IF A RE-INSPECTION REVEALS CORRECTIONS ARE NOT SATISFACTORY, ANOTHER RE-INSPECTION WILL BE REQUIRED. RE-INSPECTIONS SHALL BE REQUIRED UNTIL ALL IDENTIFIED DEFICIENCIES ARE ADDRESSED TO THE UTILITY'S SATISFACTION. THIS FEE WILL BE ASSESSED EACH TIME A RE-INSPECTION IS PERFORMED.

PERIODIC SAMPLING OF GREASE TRAPS OR PRETREATMENT UNITS ..... $50.00

SAMPLES FOR OIL, GREASE OR OTHER CONSTITUENTS DETERMINED TO BE A COMPONENT OF A NON-RESIDENTIAL CUSTOMER'S DISCHARGE FROM EITHER THE CUSTOMER'S INITIAL APPLICATION FOR SERVICE OR BY LATER INVESTIGATION MAY BE COLLECTED BY UTILITY PERSONNEL OR A UTILITY CONTRACTOR DURING INSPECTIONS IF IT APPEARS A GREASE TRAP OR PRETREATMENT UNIT IS NOT FUNCTIONING PROPERLY. THIS FEE WILL BE ASSESSED IF SUCH SAMPLES ARE TAKEN. SAMPLES WILL BE ANALYZED TO DETERMINE IF THE DISCHARGE MEETS LIMITS SET FORTH IN THE "CONDITIONS FOR NON-RESIDENTIAL SEWER SERVICE" INCLUDED IN APPENDIX B. IF IT DOES NOT, THE GREASE TRAP OR PRETREATMENT UNIT MUST BE CLEANED, SERVICED, OR REPAIRED AS NEEDED WITHIN 7 DAYS. UTILITY PERSONNEL OR A UTILITY CONTRACTOR WILL COLLECT SAMPLES AFTER CORRECTIONS ARE MADE TO

PUBLIC UTILITY COMMISSION OF TEXAS

SECTION 1.0 -- RATE SCHEDULE (Continued)

ENSURE PROPER FUNCTIONALITY. THIS FEE WILL BE ASSESSED EACH TIME SAMPLES ARE COLLECTED AND ANALYZED.

GOVERNMENTAL TESTING, INSPECTION, AND COSTS SURCHARGE:

WHEN AUTHORIZED IN WRITING BY PUC AND AFTER NOTICE TO CUSTOMERS, THE UTILITY MAY INCREASE RATES TO RECOVER INCREASED COSTS FOR INSPECTION FEES AND TESTING. [16 TAC § 24.21(b)(2)(F)]

LINE EXTENSION AND CONSTRUCTION CHARGES:

REFER TO SECTION 3.0--EXTENSION POLICY FOR TERMS, CONDITIONS, AND CHARGES WHEN NEW CONSTRUCTION IS NECESSARY TO PROVIDE SERVICE.

REGIONAL WASTEWATER PASS-THROUGH PROVISION:

INCREASES OR DECREASES IN WASTEWATER COSTS, FEES, RATES AND CHARGES IMPOSED BY ANY NON-AFFILIATED THIRD PARTY WASTEWATER TREATMENT SERVICE PROVIDER OR GOVERNMENTAL ENTITY SHALL BE PASSED THROUGH TO SEWER CUSTOMERS ON A REGIONAL BASIS BY CALCULATING AN ADJUSTED MONTHLY FLAT RATE FOR EACH METER SIZE USING THE FOLLOWING FORMULA:

AMR = MR + (((CAC-PAC)/(TSCE * 12)) * SCE for customer), where:

- AMR = Adjusted Monthly Rate – The adjusted monthly flat rate rounded to the nearest one cent;
- MR = Monthly Rate – The approved monthly flat rate with or without prior pass-through adjustment;
- CAPTC = Current Annual Pass-Through Costs –Total regional pass-through costs, fees, rates, and charges to Aqua Texas over a 12 month period;
- PAPTC = Previous Annual Pass-Through Costs – Total regional pass-through costs, fees, rates, and charges to Aqua Texas over 12 month period last used to set MR;
- SCE = Sewer Customer Equivalent – The AWWA meter equivalency factor that corresponds to the meter size rate being calculated for AMR (for a standard residential 5/8" x 3/4" meter this number is 1; for sewer only customers without a meter, the meter equivalency factor used will be based on meter size needed to meet estimated customer demand); and
- TSCE = Total Sewer Customer Equivalents – Total number of sewer connections multiplied by corresponding SCEs for region at end of 12 month period used for CAC.

To implement a new Adjusted Monthly Flat Rate, Aqua Texas shall take the following actions:

1. Prior to the beginning of the billing period in which the revision takes place, submit written notice to the PUC with documentation supporting the adjustment; and
2. Mail notice to affected customers separately at the beginning of the billing period or include written notice to affected customers with the billing sent out at the beginning of the billing period in which the new Adjusted Monthly Flat Rate becomes effective. The notice must contain: (a) the effective date of the change, (b) the then-present calculation of pass-through costs included in the Monthly Flat Rate, (c) the calculation

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET

55818

SECTION 1.0 -- RATE SCHEDULE (Continued)

of the new Adjusted Monthly Flat Rate, and (d) the change in costs, fees, rates or charges to Aqua Texas prompting the adjustment to the Monthly Flat Rate.

3. The notice will include the following language:

*"This tariff change is being implemented in accordance with Aqua Texas' approved Regional Wastewater Pass-Through Provision to recognize (increases)(decreases) in the wastewater (costs), (fees), (rates) and (charges) imposed by (non-affiliated third-party wastewater treatment service providers) (selling wastewater treatment services) to Aqua Texas or by (governmental entities). The cost of these charges to customers will not exceed the (increased) (decreased) cost of the (costs), (fees), (rates) and (charges) to Aqua Texas."*

The process of implementing the Regional Wastewater Pass-Through Provision and the Executive Director's review of a proposed Adjusted Monthly Flat Rate is an informal proceeding and not a contested case hearing. Only the Commission, the Executive Director, or Aqua Texas may request a hearing on the proposed revision. It shall not be considered a rate case under the Texas Water Code or PUC rules, and Texas Water Code § 13.187 shall not apply.

FEDERAL TAX CHANGE CREDIT RIDER (FTCCR):
The Federal Tax Change Credit Rider gives effect to the Tax Cuts and Jobs Act of 2017, which changed the federal corporate tax rate from 35% to 21%, by reducing the cost of service paid by customers taking service under this rate tariff. The FTCCR will provide credits to customers taking service under this rate tariff.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 26 2024

## SECTION 2.0 - SERVICE RULES AND POLICIES

### Section 2.01 – Rules

The Utility will have the most current Public Utility Commission of Texas (PUC or Commission) Rules, 16 TAC Chapter 24, available at its office for reference purposes. The Rules and this tariff shall be available for public inspection and reproduction at a reasonable cost. The latest Rules or Commission approved changes to the Rules supersede any rules or requirements in this tariff.

### Section 2.02 – Request to Initiate, Transfer or Terminate Water or Sewer Service

A customer may initiate, transfer, or terminate retail water or sewer service by mail, by telephone, through an Internet website, or through another electronic transmission. If a service request is initiated by mail, the Utility's standard application or contract form (attached in the Appendix to this tariff) must be signed and submitted by the applicant before sewer service is provided by the Utility.

After the applicant has met all the requirements, conditions, and regulations for service, the Utility will install service connections, which may include a utility cut-off valve and/or take all necessary actions to initiate service. The Utility will serve each qualified applicant for service within 5 working days unless line extensions or new facilities are required. If construction is required to fill the order and if it cannot be completed within 30 days, the Utility will provide the applicant with a written explanation of the construction required and an expected date of service.

Where service has previously been provided, the Utility will reconnect the service within one working day after the applicant has met the requirements for reconnection.

The customer will be responsible for furnishing and laying the necessary customer service pipe from the connection location to the place of use.

### Section 2.03 - Refusal of Service

The Utility may decline to serve an applicant until the applicant has complied with the regulations of the regulatory agencies (state and municipal regulations) and for the reasons outlined in the PUC Rules. In the event that the Utility refuses to serve an applicant, the Utility will inform the applicant in writing of the basis of its refusal. The Utility is also required to inform the applicant that a complaint may be filed with the Commission.

### Section 2.04 - Customer Deposits

If a residential applicant cannot establish credit to the satisfaction of the Utility, the applicant may be required to pay a deposit as provided for in Section 1.02 of this tariff. The Utility will keep records of the deposit and credit interest in accordance with PUC Rules.

Residential applicants 65 years of age or older may not be required to pay deposits unless the applicant has an outstanding account balance with the Utility or another sewer or sewer utility that accrued within the last two years.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 28 2024
DOCKET
5581013

SECTION 2.0 - SERVICE RULES AND POLICIES (Continued)

Nonresidential applicants who cannot establish credit to the satisfaction of the Utility may be required to make a deposit that does not exceed an amount equivalent to one-sixth of the estimated annual billings.

Refund of deposit. If service is not connected, or after disconnection of service, the Utility will promptly refund the customer's deposit plus accrued interest or the balance, if any, in excess of the unpaid bills for service furnished. The Utility may refund the deposit at any time prior to termination of utility service but must refund the deposit plus interest for any customer who has paid 18 consecutive billings without being delinquent.

Section 2.05 - Meter Requirements, Readings, and Testing

It is not a requirement that the Utility use meters to measure the quantity of sewage disposed of by individual customers. One connection is required for each residential, commercial, or industrial facility in accordance with the PUC rules.

Section 2.06 - Billing

Bills from the Utility will be mailed monthly unless otherwise authorized by the Commission. The due date of the bills for utility service will be at least twenty-one (21) days from the date of issuance. The postmark on the bill or, if there is no postmark on the bill, the recorded date of mailing by the Utility will constitute proof of the date of issuance. If the due date falls on a holiday or weekend, the due date for payment purposes will be the next workday after the due date.

A late penalty of 10% will be charged on bills received after the due date. Customer payments postmarked by the due date will not incur a late penalty. The penalty on delinquent bills will not be applied to any balance to which the penalty was applied in a previous billing. The Utility must maintain a record of the date of mailing to charge the late penalty.

Each bill will provide all information required by the PUC Rules. For each of the systems it operates, the Utility will maintain and note on the monthly bill a telephone number (or numbers) which may be reached by a local call by customers. At the Utility's option, a toll-free telephone number or the equivalent may be provided.

In the event of a dispute between a customer and the Utility regarding any bill for utility service, the Utility will conduct an investigation and report the results to the customer. If the dispute is not resolved, the Utility will inform the customer that a complaint may be filed with the Commission.

Section 2.07 – Service Disconnection

Utility service may be disconnected if the bill has not been paid in full by the date listed on the termination notice. The termination date must be at least 10 days after the notice is mailed or hand delivered.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 28 2024
55818 1814

SECTION 2.0 - SERVICE RULES AND POLICIES (Continued)

The Utility is encouraged to offer a deferred payment plan to a customer who cannot pay an outstanding bill in full and is willing to pay the balance in reasonable installments. However, a customer's utility service may be disconnected if a bill has not been paid or a deferred payment agreement entered into within 31 days from the date of issuance of a bill and if proper notice of termination has been given.

Notice of termination must be a separate mailing or hand delivery in accordance with PUC rules.

Utility service may also be disconnected without notice for reasons as described in the PUC rules.

Utility personnel must be available to collect payments and to reconnect service on the day of and the day after any disconnection of service unless service was disconnected at the customer's request or due to a hazardous condition.

Section 2.08 - Reconnection of Service

Service will be reconnected within 36 hours after the past due bill and any other outstanding charges are paid or correction of the conditions which caused service to be disconnected.

Section 2.09 - Service Interruptions

The Utility will make all reasonable efforts to prevent interruptions of service. If interruptions occur, the Utility will re-establish service within the shortest possible time. Except for momentary interruptions due to automatic equipment operations, the Utility will keep a complete record of all interruptions, both emergency and scheduled and will notify the TCEQ and the Commission in writing of any service interruptions affecting the entire system or any major division of the system lasting more than four hours. The notice will explain the cause of the interruptions.

Prorated Bills. If service is interrupted or seriously impaired for 24 consecutive hours or more, the Utility will prorate the monthly base bill in proportion to the time service was not available to reflect this loss of service.

Section 2.10 - Quality of Service

The Utility will plan, furnish, and maintain and operate a treatment and collection facility of sufficient size and capacity to provide a continuous and adequate service for all reasonable consumer uses and to treat sewage and discharge the effluent at the quality required by its discharge permit issued by the TCEQ. Unless otherwise authorized by the Commission, the Utility will maintain facilities as described in the TCEQ Rules and Regulations for Public Sewer Systems.

Section 2.11 - Customer Complaints and Disputes

If a customer or applicant for service lodges a complaint, the Utility will promptly make a suitable investigation and advise the complainant of the results. Service will not be disconnected pending completion of the investigation. If the complainant is dissatisfied with the Utility's response, the

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 28 2024
DOCKET
55818 1815

SECTION 2.20 - SPECIFIC UTILITY SERVICE RULES AND POLICIES

Utility must advise the complainant that he has recourse through the PUC complaint process. Pending resolution of a complaint, the Commission may require continuation or restoration of service.

The Utility will maintain a record of all complaints which shows the name and address of the complainant, the date and nature of the complaint and the adjustment or disposition thereof, for a period of two years after the final settlement of the complaint.

This section contains specific utility service rules in addition to the rules previously listed under Section 2.0. It must be reviewed and approved by the Commission and in compliance with the PUC Rules to be effective.

The Utility adopts the administrative rules of the PUC, as the same may be amended from time to time, as its Company specific service rules and policies. These rules will be kept on file at the Utility's offices for customer inspection during regular business hours. In the event of a conflict between the PUC's amended rules and the provisions of this tariff, the amended rules shall prevail. Where necessary, any conflicting provision of this tariff shall be deemed to have been superseded by the PUC rule in question to the degree that the Utility may conduct its lawful business in conformance with all requirements of said rule.

All payments for utility service shall be delivered or mailed to the Utility's business office. If the business office fails to receive payment before the time of noticed disconnection for non-payment of a delinquent account, service will be terminated as scheduled. Utility service crews shall not be allowed to collect payments on customer accounts in the field.

Payment of an account by any means that has been dishonored and returned by the payor or payee's bank, shall be deemed to be delinquent. All returned payments must be redeemed with a valid money order. If a customer has two returned payments within a twelve month period, the customer shall be required to pay a deposit if one has not already been paid.

Customer shall be liable for any damage or injury to utility-owned property or personnel shown to be caused by the customer, his invitees, his agents, his employees, or others directly under his control.

Limitation on Product/Service Liability. The Utility will not accept liability for any injury or damage to individuals or their property occurring on the customer's premises. The Utility makes no representations or warranties (expressed or implied) that customer's appliances will not be damaged by disruptions of or fluctuations in sewer service whatever the cause. The Utility will not accept liability for injuries or damages to persons or property due to disruption of sewer service caused by: (1) acts of God, (2) acts of third parties not subject to the control of the Utility if the Utility has undertaken such preventive measures as are required by PUC and TCEQ rules, (3) electrical power failures in sewer systems not required by TCEQ rule to have auxiliary power supplies, or (4) termination of sewer service pursuant to the Utility's tariff and the PUC's rules.

SECTION 2.20 - SPECIFIC UTILITY SERVICE RULES AND POLICIES (Continued)

If the services of a registered professional engineer are required as a result of service initiation request received by the Utility for service to that applicant's service extension only, such engineer will be selected by the Utility and the applicant, and the applicant shall bear all expenses incurred therein.

If an applicant requires service other than the standard service provided by the Utility, such applicant will be required to pay all expenses incurred by the Utility in excess of the expenses that would be incurred in providing the standard service and connection.

Any applicant who places unique or non-standard service demands on the system may be required to provide contributions in aid of construction (as may be allowed by PUC rule) for the actual costs of any additional facilities required to maintain compliance with the TCEQ minimum design criteria for sewer collection, treatment, pumping and discharge.

Any applicant or existing customer required to pay for any costs not specifically set forth in the rate schedule pages of this tariff shall be entitled to a written explanation of such costs prior to payment and/or commencement of construction.

If the applicant or existing customer does not believe that these costs are reasonable or necessary, the applicant or existing customer shall have the right to appeal such costs to the PUC or such other regulatory authority having jurisdiction over the Utility's rates in that portion of the Utility's service area in which the applicant's or existing customer's property(ies) is located.

Tap fees may be increased by unique costs not normally incurred as may be permitted by 16 TAC § 24.163(b)(1)(C).

The Utility adopts the Uniform Plumbing Code pursuant to 30 TAC § 290.46(i). The piping and other equipment on the premises furnished by the customer will be maintained by the customer at all times in conformity with the requirements of the TCEQ, the Uniform Plumbing Code and with the service rules and policies of the Utility. The customer will bring out his service line to his property line at the point on the customer's property mutually acceptable to the customer and the Utility subject to such requirements as may exist by PUC rule.

The Utility will have the right of access to the customer's premises at all times reasonable for the purpose of installing, testing, inspecting, or repairing sewer mains or other equipment used in connection with its provision of sewer service, or for the purpose of removing its property and disconnecting lines, and for all other purposes necessary to the operation of the Utility system including inspecting the customer's plumbing for code, plumbing or tariff violations. The customer shall allow the Utility and its personnel access to the customer's property to conduct any tests or inspections required by law. Unless necessary to respond to equipment failure, leak or other condition creating an immediate threat to public health and safety or the continued provision of adequate utility service to others, such entry upon the customer's property shall be during normal business hours. The customer may require any Utility representative, employee, contractor, or agent seeking to make such entry identify themselves, their affiliation with the Utility, and the purpose of their entry.

SECTION 2.20 - SPECIFIC UTILITY SERVICE RULES AND POLICIES (Continued)

If the applicant or existing customer does not believe that these costs are reasonable or necessary, the applicant or existing customer shall have the right to appeal such costs to the PUC or such other regulatory authority having jurisdiction over the Utility's rates in that portion of the Utility's service area in which the applicant's or existing customer's property(ies) is located.

Tap fees may be increased by unique costs not normally incurred as may be permitted by 16 TAC § 24.163(b)(1)(C).

The Utility adopts the Uniform Plumbing Code pursuant to 30 TAC § 290.46(i). The piping and other equipment on the premises furnished by the customer will be maintained by the customer at all times in conformity with the requirements of the TCEQ, the Uniform Plumbing Code and with the service rules and policies of the Utility. The customer will bring out his service line to his property line at the point on the customer's property mutually acceptable to the customer and the Utility subject to such requirements as may exist by PUC rule.

The Utility will have the right of access to the customer's premises at all times reasonable for the purpose of installing, testing, inspecting or repairing sewer mains or other equipment used in connection with its provision of sewer service, or for the purpose of removing its property and disconnecting lines, and for all other purposes necessary to the operation of the Utility system including inspecting the customer's plumbing for code, plumbing or tariff violations. The customer shall allow the Utility and its personnel access to the customer's property to conduct any tests or inspections required by law. Unless necessary to respond to equipment failure, leak or other condition creating an immediate threat to public health and safety or the continued provision of adequate utility service to others, such entry upon the customer's property shall be during normal business hours. The customer may require any Utility representative, employee, contractor, or agent seeking to make such entry identify themselves, their affiliation with the Utility, and the purpose of their entry.

Threats to or assaults upon Utility personnel shall result in criminal prosecution.

Except in cases where the customer has a contract with the Utility for reserve or auxiliary service, no other sewer service will be used by the customer on the same installation in conjunction with the Utility's service, either by means of a crossover valve or any other connection. Customer shall not connect, or allow any other person or party to connect, onto any sewer lines on his premises. Two places shall not be permitted to be supplied with one service pipe where there is a sewer main abutting the premises.

No service request initiated by telephone, through an Internet website or other electronic transmission, written application, agreement, or contract for service may be assigned or transferred without the written consent of the Utility.

It is agreed and understood that any and sewer lines, and other equipment furnished by the Utility (excepting the customer's individual service lines from the point of connection to customer's structures on customer's premises) are and shall remain the sole property of the Utility, and nothing contained herein or in a contract/application for service whether in verbal, written, or electronic transmission format, shall be construed to reflect a sale or transfer

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED

SECTION 2.20 - SPECIFIC UTILITY SERVICE RULES AND POLICIES (Continued)

of any such lines or equipment to any customer. All tap and extension charges shall be for the privilege of connecting to said sewer lines and for installation, not purchase, of said lines.

Service applicants may be required to comply with any pre-condition to receiving service not printed herein as may exist under PUC rule, TCEQ rule (customer service, health and safety, sewer conservation, or environmental), USEPA rule, TWDB rule, local sewer or conservation district rule or health department rule. Existing customers shall be required to comply with such rules, including modification of their plumbing and/or consumption patterns, after notice.

The disposal into the Utility's sewer collection system of bulk quantities of food or food scraps not previously processed by a grinder or similar garbage disposal unit and grease and oils, except as Incidental waste in process or wash water, used in or resulting from food preparation by sewer utility customers engaged in the preparation and/or processing of food for other than domestic consumption for sale to the public shall be prohibited. Specifically included in this prohibition are grease and oils from grease traps to other grease and/or oil storage containers. These substances are defined as "garbage" under Section 361.003 (12) of the Solid Waste Disposal Act, Texas Health and Safety Code, and are not "sewage" as defined by Section 26.001 (7), of the Texas Sewer Code. The Utility only provides "sewage" collection and disposal service to the public. This service is limited to the collection, treatment and disposal of waterborne human waste and waste from domestic activities such as washing, bathing, and food preparation. This service does not include the collection, treatment, or disposal of waste of such high BOD or TSS characteristics that it cannot reasonably be processed by the Utility's state approved waste water treatment plant within the parameters of the Utility's state and federal waste water discharge permits, THIS SERVICE DOES NOT INCLUDE THE COLLECTION AND DISPOSAL OF STORM WATERS OR RUN OFF WATERS, WHICH MAY NOT BE DIVERTED INTO OR DRAINED INTO THE UTILITY'S COLLECTION SYSTEM.

Pursuant to 16 TAC § 24.165(o), the Utility may charge for all labor, material, equipment, and other costs necessary to repair or replace all equipment damaged due to service diversion or the discharge of wastes which the system cannot properly treat. This shall include all repair and cleanup costs associated with discharges of grease and oils, except as incidental waste in process or wash sewer, used in or resulting from food preparation by sewer utility customers engaged in the preparation and/or processing of food for other than domestic consumption or for sale to the public discharged from grease traps or other grease and/or oil storage containers. The Utility may charge for all costs necessary to correct service diversion or unauthorized taps where there is no equipment damage, including incidents where service is reconnected without authority.

The Utility may not charge any additional penalty or charge other than actual costs unless such penalty has been expressly approved by the regulatory authority having rate/tariff jurisdiction and filed in the Utility's tariff.

Pursuant to 16 TAC § 24.163(b)(3)(A) and (B), the customer's service line and appurtenances shall be construed in accordance with the laws and regulations of the State of Texas, local plumbing

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED

SECTION 2.20 - SPECIFIC UTILITY SERVICE RULES AND POLICIES (Continued)

codes, or, in the absence of such local codes, the Uniform Plumbing Code. It shall be the customer's responsibility to maintain the service line and appurtenances in good operating condition, i.e., clear of obstruction, defects, or blockage. If the Utility can provide evidence of excessive infiltration or inflow or failure to provide proper pretreatment, the Utility may, with the written approval of the Commission, require the customer to repair the line or eliminate the infiltration or inflow or take such actions necessary to correct the problem. If the customer fails to correct the problem within a reasonable time, the Utility may disconnect service after proper notice.

In accordance with the requirements of Utility's Wastewater discharge Permit, any and all repairs and maintenance of Utility's lines, tanks, pumps, and equipment located on Customer's premises shall be performed exclusively by the Utility.

Copies of the Utility's state and federal waste water discharge permits shall be available for public inspection and copying in the Utility's business office during normal business hours.

Non-residential customers electing the pretreatment option for sewage with non-standard characteristics may be charged those costs set forth in the Utility's extension policy if such pretreatment fails or otherwise causes the Utility's facilities to violate their waste-water discharge permits.

RESIDENTIAL SINGLE FAMILY GRINDER / SEWAGE STATIONS

Prior to the installation of a grinder / sewage station, the Utility must be given a complete listing of all materials and equipment that will be used.

In order to prevent inflow and infiltration, the materials must comply with standard specifications, approved by the TCEQ and the Utility.

After the Utility has approved the proposed grinder / sewage station, the construction may begin. Once the work has been completed, the Utility will do an inspection of the grinder / sewage station to ensure the complete installation was as specified.

The customer will retain ownership of receiving tanks or lift stations on the customer's property, and all maintenance, repairs and replacement are the customer's responsibility. The customer shall own and maintain the grinder pump and appurtenances.

The repairs may be performed by anyone selected by the customer, who is competent to perform such repairs. The Utility requires that parts and equipment meet the minimum standards approved by the TCEQ, to insure proper and efficient operation of the sewer system.

1820

SECTION 2.20 - SPECIFIC UTILITY SERVICE RULES AND POLICIES (Continued)

MULTI-FAMILY AND COMMERCIAL RECEIVING TANK / LIFT STATIONS

Prior to the installation of a grinder / sewage station, the Utility must be given a complete listing of all materials and equipment that will be used, along with the storage for that development.

In order to minimize inflow and infiltration into the collection system, the installation and materials must comply with standard specifications approved by the TCEQ.

After the Utility has approved the proposed grinder / sewage station, the construction may begin. Once the work has been completed, the Utility will do an inspection of the grinder / sewage station to ensure the complete installation was as specified.

Prior to acceptance of an existing receiving tank or lift station that is being used as an interceptor tank for primary treatment, waste sewer storage or pump tanks prior to discharge into an alternative or conventional sewage system must be cleaned, inspected, repaired, modified, or replaced if necessary to minimize inflow and infiltration into the collection system.

Existing pumps and tanks must be of adequate size to insure proper pumpage in the event of high flow or if one pump is out of service. If the existing pumps and receiving tanks or lift stations are of inadequate size the Utility will not accept liability for backups due to high flows, one pump out of service, rainfall causing inflow or infiltration, power outages, lack of proper storage capacity, etc.

If the collection system that discharges into the receiving tank / lift station has an inflow or infiltration problem and collects rainfall discharge, the owner or P.O.A. will correct it within 90 days of written notice from the Utility. If no action is taken to correct the problem within 90 days, the Utility may take the responsibility to make corrections at the owner's / P.O.A.'s expense. The Utility is not responsible for the collection system that discharges into the receiving tank / lift station.

The owner / P.O.A. shall be responsible for the monthly electric bill.

An adequate easement must encompass the receiving tank / lift station by a 15 foot radius and also a 15 foot access easement to the receiving tank / lift station site. If this easement does not exist, one must be created and filed of record.

## SECTION 3.0 - EXTENSION POLICY

### Section 3.01 - Standard Extension Requirements

LINE EXTENSION AND CONSTRUCTION CHARGES. No contribution in aid of construction may be required of any customer except as provided for in this approved extension policy.

The customer will be given an itemized statement of the costs, options such as rebates to the customer, sharing of construction costs between the Utility and the customer, or sharing of costs between the customer and other applicants before beginning construction.

The Utility will bear the full cost of any oversizing of mains necessary to serve other customers in the immediate area. The individual residential customer shall not be charged for any additional treatment capacity or facilities. Contributions in aid of construction may not be required of individual residential customers for treatment capacity or collection facilities unless otherwise approved by the Commission under this specific extension policy.

COST UTILITIES SHALL BEAR. Within its certificate area, the Utility will pay the cost of the first 200 feet of any sewer collection line necessary to extend service to an individual residential customer within a platted subdivision. However, if the residential customer requesting service purchased the property after the developer was notified of the need to provide facilities to the Utility, the Utility may charge for the first 200 feet. The Utility must also be able to document that the developer of the subdivision refused to provide facilities compatible with the Utility's facilities in accordance with the Utility's approved extension policy after receiving a written request from the Utility.

Developers may be required to provide contributions in aid of construction in amounts to furnish the system with all facilities necessary to comply with the PUC's Rules.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 28 2024 55818

## SECTION 3.20 - SPECIFIC UTILITY EXTENSION POLICY

This section contains the Utility's specific extension policy which complies with the requirements already stated under Section 3.01. It must be reviewed and approved by the Commission and in compliance with PUC Rules to be effective.

Residential customers not covered under Section 3.01 will be charged the equivalent of the costs of extending service to their property from the nearest collection line even if that line does not have adequate capacity to serve the customer. However, if the customer places unique, non-standard service demands upon the system, the customer may be charged the full cost of extending service to and throughout their property, including the cost of all necessary treatment capacity necessary to meet the service demands anticipated to be created by that property.

Developers may be required to provide contributions in aid of construction in amounts sufficient to furnish the development with all facilities necessary to provide for reasonable local demand requirements and to comply with TCEQ's minimum design criteria for facilities used in collecting, treating, transmitting, and discharging of wastewater effluent. For purposes of this subsection, a developer is one who subdivides or requests more than two connections on a piece of property. Commercial, industrial, and wholesale customers will be treated as developers.

The Utility adopts the administrative rules of the PUC, as amended from time to time, as its company specific extension policy. These rules will be kept on file at the company's business office for customer inspection during normal business hours.

The utility adopts the administrative rules of the PUC and the TCEQ, as amended from time to time, as its company specific extension policy. These rules will be kept on file at the company's business office for customer inspection during normal business hours.

Non-residential customers generating sewage creating unique or non-standard treatment demands which might reasonably be expected to cause the Utility's treatment facilities to operate outside their current waste-water discharge permit parameters may be charged the cost of all studies, engineering plans, permit costs, and collection treatment or discharge facilities construction or modification costs necessary to enable the Utility to treat said sewage within permit limits acceptable to the TCEQ, EPA and other regulatory agencies. In the alternative, the customer may have the option of pre-treating said sewage in such a manner to that it may not reasonably be expected to cause the Utility's facilities to operate outside their permit parameters. In such case, the customer shall be required to pay the Utility's costs of evaluating such pretreatment processes and cost of obtaining regulatory approval of such pretreatment processes. In the event of the pretreatment facilities of a customer making this election fail and cause the Utility's facilities to operate outside their permit parameters, the customer shall indemnify the Utility for all costs incurred for clean ups or environmental remediation and all fines, penalties, and costs imposed by regulatory or judicial enforcement actions relating to such permit violations.

Non-residential sewer customers producing water borne waste significantly different from waste generated by residential customers may be required to provide a suitable sampling point at the property line for testing the customer's waste for chemicals or substances, e.g., grease, oils, solvents, pesticides, etc., which can reasonably be believed to have an injurious effect on the Utility's plant

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED

DOCKET
55818
1823

SECTION 3.20--SPECIFIC UTILITY EXTENSION POLICY (Continued)

and/or its ability to treat and dispose of such wastes within the parameters of the Utility's permit. Utility shall have reasonable access to the sampling point at all times.

Any service extension to a subdivision (recorded or unrecorded) may be subject to the provisions and restrictions of 16 TAC § 24.163(d) and this tariff. When a developer wishes to extend the system to prepare to service multiple new connections, the charge shall be the cost of such extension, plus a pro-rata charge based upon the capacities of collection, transmission, storage, treatment, and discharge facilities, compliant with the TCEQ minimum design criteria, which must be committed to such extension. As provided by 16 TAC § 24.163(d)(4), for purposes of this section, commercial, industrial, and wholesale customers shall be treated as developers.

The imposition of additional extension costs or charges as provided by Sections 2.20 and 3.20 of this tariff shall be subject to appeal as provided in this tariff, PUC rules, or the rules of such other regulatory authority as may have jurisdiction over the Utility's rates and services. Any applicant required to pay for any costs not specifically set forth in the rate schedule pages of this tariff shall be entitled to a written explanation of such costs prior to payment and/or commencement of construction. If the applicant does not believe that these costs are reasonable or necessary, the applicant shall have the right to appeal such costs to the PUC or such other regulatory authority having jurisdiction over the utility's rates in that portion of the utility's service area in which the applicant's property(ies) is located. Unless the PUC or other regulatory authority enters interlocutory orders to the contrary, service to the applicant may be delayed until such appeal is resolved.

The Utility may initiate, transfer, or terminate retail water or sewer service upon receipt of a customer request by mail, by telephone, through an Internet website, or through other electronic transmission. A separate request to initiate, transfer or terminate service shall be required for each potential service location if more than one service connection is desired by any individual applicant. Written service applications forms will be available for applicant pick up at the Utility's business office during normal weekday business hours. Upon request, written service applications will also be sent by prepaid first class United States mail to the address provided by the applicant upon request.

The Utility shall serve each qualified service applicant within its certificated service area as soon as practical after receiving a request for service. All service requests will be fulfilled within the time limits prescribed by PUC rules once the applicant has met all conditions precedent to achieving a qualified service applicant. If a service request cannot be fulfilled within the required period, the applicant shall be notified in writing of the delay, its cause, and the anticipated date that service will be available. The PUC service dates shall not become applicable until the service applicant has met all conditions precedent to becoming a "qualified service applicant" as defined herein or by PUC rules.

The Utility is not required to extend service to any applicant outside of its certificated service area and will only do so, at the Utility's sole option, under terms and conditions mutually agreeable to the Utility and the applicant and upon extension of the Utility's certificated service area boundaries by the PUC. Service applicants may be required to bear the cost of the service area amendment.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 28 2024
DOCKET
55818
1824

SECTION 3.20--SPECIFIC UTILITY EXTENSION POLICY (Continued)

A "qualified service applicant" is an applicant who has: (1) met all of the Utility's requirements of service contained in this tariff, PUC rules and/or PUC order, (2) has made all payments for tap fees and extension charges, (3) has provided all necessary easements and rights-of-way necessary to provide service to the requested location, including staking said easements or rights-of-way where necessary, and (4) has for each location to which service is being requested, completed the verbal, written, or electronic transmission customer service request process.

Where a new tap or service connection is required, the service applicant shall be required to submit a service request by mail, by telephone, through an Internet website, or through another electronic transmission and request that a tap be made.

The tap request must be accompanied with a plat, map, diagram, or written metes and bounds description of precisely where the applicant desires each tap or service connection is to be made and, if necessary, where the connection is to be installed, along the applicant's property line. The actual point of connection must be readily accessible to Utility personnel for inspection, servicing and testing while being reasonably secure from damage by vehicles and mowers. If the Utility has more than one main adjacent to the service applicant's property, the tap or service connection will be made to the Utility's near service main with adequate capacity to service the applicant's full potential service demand.

If the tap or service connection cannot be made at the applicant's desired location, it will be made at another location mutually acceptable to the applicant and the Utility. If no agreement on location can be made, applicant may refer the matter to the Commission for resolution. Unless otherwise ordered by the Commission, the tap or service connection will not be made until the location dispute is resolved.

The Utility shall require a developer (as defined by PUC rule) to provide permanent recorded public utility easements as a condition of service to any location within the developer's property. The Developer shall be required to obtain all necessary easements and rights-of-way required to extend the Utility's existing service facilities from their nearest point with adequate service capacity (as prescribed by TCEQ rules and local service conditions) to and throughout the Developer's property. The easements shall be sufficient to allow the construction, installation, repair, maintenance, testing, and replacement of any and all utility plant necessary to provide continuous and adequate service to each and every potential service location within the property at full occupancy. Unless otherwise restricted by law, sewage treatment, holding tank sites, lift station sites shall convey with all permanent easements and buffers required by TCEQ rules. Unless otherwise agreed to by the Utility, pipeline right-of-way easements must be at least 15 feet wide to allow adequate room to facilitate backhoe and other heavy equipment operation and meters.

Easements must be provided for all storage, treatment, pressurization, and disposal sites which are sufficient to construct and maintain all weather roads as prescribed by TCEQ rules. All easements shall be evidenced, at Developer's expense, by recorded county-approved subdivision plat or by specific assignment supported by metes and bounds survey from a surveyor licensed by the State of Texas.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 28 2024
55818 25

SECTION 3.20--SPECIFIC UTILITY EXTENSION POLICY (Continued)

Prior to the extension of utility service to developers (as defined by PUC rules) or new subdivisions, the Developer shall comply with the following:

(a) The Developer shall make a written request for service to property that is to be subdivided and developed. The Developer shall submit to the Utility a proposed plat on a scale of one inch (1") to two hundred feet (200') for review and determination of required easements, utility plant, and plant location. If sewer service is requested, the plat must contain elevation data. A reconcilable deposit in an amount set by the Utility may be required to cover preliminary engineering, legal and copy cost to be incurred by the Utility in reviewing and planning to meet this service request. The plat and/or accompanying information shall identify the type, location and number of houses and other planned structures that will be requiring utility service. If other than residential structures are to be located on the property, all other types of anticipated businesses and their service demands shall be identified with specificity. All areas requiring special irrigation and/or other unique sewer demands must be identified. To the extent reasonably possible, this information must be precise so that adequate facilities can be designed and constructed to meet all future service demands without hazard to the public, other utility customers and/or the environment.

(b) After the requirements of easements and rights-of-way have been determined, a red line copy will be returned by the Utility to the Developer for final plat preparation.

(c) Copies of all proposed plats and plans must be submitted to the Utility prior to their submission to the county for approval to ensure that they are compatible with the adequate long-term utility needs of potential service customers. Copies will be returned after review by the Utility so that necessary changes may be incorporated into the Developer's final submitted plat(s) and plans.

(d) The Utility shall be provided with three (3) certified copies of the final plat(s) approved by the County Commissioners Court. At this time, the Utility will begin engineering the facilities necessary to serve the property. Plans and specifications will be prepared and submitted to the TCEQ by the Utility if required by law. If further plat or plans changes are necessary to accommodate the specific service needs of the property and the anticipated customer demands, the Developer will be so notified, Plat amendments must be obtained by the Developer. The Developer shall be notified when all required TCEQ or other governmental approvals or permits have been received. No construction of utility plant which requires prior TCEQ plans approval shall be commenced until that approval has been received by the Utility and any conditions imposed by the TCEQ in association with its approvals have been satisfied.

(e) The Developer shall be required to post bond or escrow the funds necessary to construct all required utility plant, except individual sewer connections, required to serve the property. Construction shall not commence until funds are available. If the construction is to be done in coordination with the phased development of the property, funds must be provided in advance which are sufficient to complete each phase. No phase or facilities for any phase shall be constructed prior to the bonding or escrowing of all funds associated with that phase.

SECTION 3.20--SPECIFIC UTILITY EXTENSION POLICY (Continued)

(f) After the requirements of easements and rights-of-way have been determined, a red line copy will be returned by the Utility to the Developer for final plat preparation.

(g) Copies of all proposed plats and plans must be submitted to the Utility prior to their submission to the county for approval to ensure that they are compatible with the adequate long-term utility needs of potential service customers. Copies will be returned after review by the Utility so that necessary changes may be incorporated into the Developer's final submitted plat(s) and plans.

(h) The Utility shall be provided with three (3) certified copies of the final plat(s) approved by the County Commissioners Court. At this time, the Utility will begin engineering the facilities necessary to serve the property. Plans and specifications will be prepared and submitted to the TCEQ by the Utility if required by law. If further plat or plans changes are necessary to accommodate the specific service needs of the property and the anticipated customer demands, the Developer will be so notified, Plat amendments must be obtained by the Developer. The Developer shall be notified when all required TCEQ or other governmental approvals or permits have been received. No construction of utility plant which requires prior TCEQ plans approval shall be commenced until that approval has been received by the Utility and any conditions imposed by the TCEQ in association with its approvals have been satisfied.

(i) The Developer shall be required to post bond or escrow the funds necessary to construct all required utility plant, except individual sewer connections, required to serve the property. Construction shall not commence until funds are available. If the construction is to be done in coordination with the phased development of the property, funds must be provided in advance which are sufficient to complete each phase. No phase or facilities for any phase shall be constructed prior to the bonding or escrowing of all funds associated with that phase.

(j) At the sole option of the Utility, the Developer may be required to execute a Developer Extension Contract setting forth all terms and conditions of extending service to their property including all contributions-in-aid of construction and developer reimbursements, if any.

(k) The Utility may require the Developer to commence construction of subdivision improvements within three (3) months of utility plans approval or the Utility may abate its construction activities until full development construction begins. If the Developer stops construction of subdivision improvements for any purpose, the Utility may abate its construction for a similar period.

(l) As soon as the roads are rough cut and prior to paving, extension lines will need to be constructed at each road crossing. The Developer must notify the Utility sufficiently in advance of this development stage to allow for the necessary utility construction without disruption to other service operations of the Utility. Failure to provide adequate advance

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED

55818

SECTION 3.20--SPECIFIC UTILITY EXTENSION POLICY (Continued)

notice and cooperation in the construction of necessary utility plant may result in additional delays in obtaining service to the property. The Developer shall be required to pay for all additional costs of road boring or other remedial construction necessary to install adequate utility plant throughout the affected property.

Within its certificated area, the Utility shall bear the cost of the first 200 feet of any sewer main or sewer collection line necessary to extend service to an individual residential service applicant within a platted subdivision unless the Utility can document:

(a) that the developer of the subdivision refused to provide facilities compatible with the utility's facilities in accordance with the Utility's approved extension policy after receiving a written request from the Utility; or,

(b) that the Developer defaulted on the terms and conditions of a written agreement or contract existing between the Utility and the Developer or the terms of this tariff regarding payment for services, extensions, or other requirements; or in the event the Developer declared bankruptcy and was therefore unable to meet obligations; and,

(c) that the residential service applicant purchased the property from the Developer after the Developer was notified of the need to provide facilities to the utility. A. residential service applicant may be charged the remaining costs of extending service to his property; provided, however, that the residential service applicant may only be required to pay the cost equivalent to the cost of extending the nearest water main or wastewater collection line, whether or not that line has adequate capacity to serve that residential service applicant.

The following criteria shall be considered to determine the residential service applicant's cost for extending service:

(a) The residential service applicant shall not be required to pay for costs of main extensions greater than 2" in diameter for pressure wastewater collection lines and 6" in diameter for gravity wastewater lines.

(b) Exceptions may be granted by the PUC if:

(1) adequate service cannot be provided to the applicant using the maximum line sizes listed due to distance or elevation, in which case, it shall be the Utility's burden to justify that a larger diameter pipe is required for adequate service;

(2) larger minimum line sizes are required under subdivision platting requirements or applicable building codes.

(c) If an exception is granted, the Utility shall establish a proportional cost plan for the specific extension or a rebate plan which may be limited to seven years to return the portion of the applicant's costs for oversizing as new customers are added to ensure that future applicants for service on the line pay at least as much as the initial service applicant.

# SEWER UTILITY TARIFF
## Southwest Region
## Docket Number: 55818

Aqua Texas, Inc.
(Southwest Region)
(Utility Name)

1106 Clayton Lane, Suite 400W
(Business Address)

Austin, Texas 78723
(City, State, Zip Code)

(512) 990-4400
(Area Code/Telephone)

This tariff is effective for utility operations under the following Certificate of Convenience and Necessity:

21116

This tariff is effective in the following counties:

Please See Table – Southwest Region

This tariff is effective in the following cities or unincorporated towns (if any):

City of Granite Shoals, Village of Wimberley & City of Woodcreek

**The rates set or approved by the city for the systems entirely within its corporate boundary are not presented in this tariff. Those rates are not under the original jurisdiction of the PUC and will have to be obtained from the city or utility. The rates charged within the Village of Wimberly and the City of Woodcreek were established through a settlement agreement. Those rates will have to be obtained from the city or the utility.**

This tariff is effective in the following subdivisions and public wastewater systems:

Please See Table – Southwest Region

TABLE OF CONTENTS

The above utility lists the following sections of its tariff (if additional pages are needed for a section, all pages should be numbered consecutively):

SECTION 1.0 -- RATE SCHEDULE ..... 2
SECTION 2.0 -- SERVICE RULES AND REGULATIONS ..... 6
SECTION 2.20 – SPECIFIC UTILITY RULES AND REGULATIONS ..... 9
SECTION 3.0 -- EXTENSION POLICY ..... 14
SECTION 3.20 -- SPECIFIC UTILITY EXTENSION POLICY ..... 15

(Effective January 1, 2019; ***Tariff Control No. 48197***)

**Non-residential customers who purchase sewer service only and who have no reliable water consumption data available will be charged the applicable monthly fee for their meter size multiplied by 1.69. If a water meter is not available, a meter size will be imputed by the utility based upon the size of the water service pipe.**

FORM OF PAYMENT: The utility will accept the following forms of payment:
Cash X (If in Person), Check X, Money Order X, Credit Card_____, Other (specify)____
THE UTILITY MAY REQUIRE EXACT CHANGE FOR PAYMENTS AND MAY REFUSE TO ACCEPT PAYMENTS MADE USING MORE THAN $1.00 IN SMALL COINS. A WRITTEN RECEIPT WILL BE GIVEN FOR CASH PAYMENTS.

REGULATORY ASSESSMENT..... 1.0%
PUC RULES REQUIRE THE UTILITY TO COLLECT A FEE OF ONE PERCENT OF THE RETAIL MONTHLY BILL AND TO REMIT THE FEE TO THE TCEQ.

Section 1.02 - Miscellaneous Fees

TAP FEE.....$650.00
TAP FEE COVERS THE UTILITY'S COSTS FOR MATERIALS AND LABOR TO INSTALL A STANDARD RESIDENTIAL 5/8" or 3/4" METER AN ADDITIONAL FEE TO COVER UNIQUE COSTS IS PERMITTED IF LISTED ON THIS TARIFF.

TAP FEE (Unique costs) .....Actual Cost
FOR EXAMPLE, A ROAD BORE FOR CUSTOMERS OUTSIDE OF SUBDIVISIONS OR RESIDENTIAL AREAS.

TAP FEE (Large meter) ..... Actual Cost
TAP FEE IS THE UTILITY'S ACTUAL COST FOR MATERIALS AND LABOR FOR METER SIZE INSTALLED.

SECTION 1.0 -- RATE SCHEDULE (Continued)

METER RELOCATION FEE ..... Actual Relocation Cost, Not to Exceed Tap Fee
THIS FEE MAY BE CHARGED IF A CUSTOMER REQUESTS THAT AN EXISTING METER BE RELOCATED.

METER TEST FEE ..... $25.00
THIS FEE WHICH SHOULD REFLECT THE UTILITY'S COST MAY BE CHARGED IF A CUSTOMER REQUESTS A SECOND METER TEST WITHIN A TWO-YEAR PERIOD AND THE TEST INDICATES THAT THE METER IS RECORDING ACCURATELY. THE FEE MAY NOT EXCEED $25.

RECONNECTION FEE
THE RECONNECT FEE MUST BE PAID BEFORE SERVICE CAN BE RESTORED TO A CUSTOMER WHO HAS BEEN DISCONNECTED FOR THE FOLLOWING REASONS (OR OTHER REASONS LISTED UNDER SECTION 2.0 OF THIS TARIFF):

a) Nonpayment of bill (Maximum $25.00) ..... $25.00
b) Customer's request that service be disconnected ..... $45.00

SEASONAL RECONNECTION FEE
BASE RATE FOR METER SIZE TIMES NUMBER OF MONTHS OFF SYSTEM NOT TO EXCEED SIX MONTHS WHEN LEAVE AND RETURN WITHIN A TWELVE-MONTH PERIOD

SERVICE INITIATION FEE ..... $45.00
THE SERVICE INITIATION FEE WILL BE CHARGED FOR INITIATING AN ACCOUNT AT THE SERVICE LOCATION.

LATE CHARGE (EITHER $5.00 OR 10% OF THE BILL) ..... 10%
PUC RULES ALLOW A ONE-TIME PENALTY TO BE CHARGED ON DELINQUENT BILLS. A LATE CHARGE MAY NOT BE APPLIED TO ANY BALANCE TO WHICH THE PENALTY WAS APPLIED IN A PREVIOUS BILLING.

RETURNED CHECK CHARGE ..... $25.00
RETURNED CHECK CHARGES MUST BE BASED ON THE UTILITY'S DOCUMENTABLE COST.

CUSTOMER DEPOSIT RESIDENTIAL (Maximum $50) ..... $50.00

COMMERCIAL & NON-RESIDENTIAL DEPOSIT ..... 1/6TH OF ESTIMATED ANNUAL BILL

GOVERNMENTAL TESTING, INSPECTION AND COSTS SURCHARGE:
WHEN AUTHORIZED IN WRITING BY PUC AND AFTER NOTICE TO CUSTOMERS, THE UTILITY MAY INCREASE RATES TO RECOVER INCREASED COSTS FOR INSPECTION FEES AND WATER TESTING [16 TAC § 24.25(b)(2)(G)]

LINE EXTENSION AND CONSTRUCTION CHARGES:
REFER TO SECTION 3.0--EXTENSION POLICY FOR TERMS, CONDITIONS, AND CHARGES WHEN NEW CONSTRUCTION IS NECESSARY TO PROVIDE SERVICE.

FEDERAL TAX CHANGE CREDIT RIDER (FTCCR):
THE FEDERAL TAX CHANGE CREDIT RIDER GIVES EFFECT TO THE TAX CUTS AND JOBS ACT OF 2017, WHICH CHANGED THE FEDERAL CORPORATE TAX RATE FROM 35% TO 21%, BY REDUCING THE COST OF SERVICE PAID BY CUSTOMERS TAKING SERVICE UNDER THIS RATE TARIFF. THE FTCCR WILL PROVIDE CREDITS TO CUSTOMERS TAKING SERVICE UNDER THIS RATE TARIFF.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 28 2024
DOCKET 55818

## SECTION 2.0--SERVICE RULES AND REGULATIONS

### Section 2.01—Public Utility Commission Rules

The utility will have the most current Public Utility Commission (PUC) Rules, Chapter 24, Water and Sewer Rates, available at its office for reference purposes. The Rules and this tariff shall be available for public inspection and reproduction at a reasonable cost. The latest Rules or Commission approved changes to the Rules supersede any rules or requirements in this tariff.

### Section 2.02—Request to Initiate, Transfer or Terminate Water or Sewer Service

A customer may initiate, transfer or terminate retail water or sewer service by mail, by telephone, through an Internet website, or through another electronic transmission. If service request is initiated by mail, the utility's standard application or contract form (attached in the Appendix to this tariff) must be signed and submitted by the applicant before sewer service is provided by the utility.

After the applicant has met all the requirements, conditions and regulations for service, the utility will install service connections, which may include a utility cut-off valve and/or take all necessary actions to initiate service. The utility will serve each qualified applicant for service within 5 working days unless line extensions or new facilities are required. If construction is required to fill the order and if it cannot be completed within 30 days, the utility will provide the applicant with a written explanation of the construction required and an expected date of service.

Where service has previously been provided, the utility will reconnect the service within one working day after the applicant has met the requirements for reconnection.

The customer will be responsible for furnishing and laying the necessary customer service pipe from the connection location to the place of use.

### Section 2.03--Refusal of Service

The utility may decline to serve an applicant until the applicant has complied with the regulations of the regulatory agencies (state and municipal regulations) and for the reasons outlined in the PUC Rules. In the event that the utility refuses to serve an applicant, the utility will inform the applicant in writing of the basis of its refusal. The utility is also required to inform the applicant that a complaint may be filed with the Commission.

### Section 2.04--Customer Deposits

If a residential applicant cannot establish credit to the satisfaction of the utility, the applicant will be required to pay a deposit as provided for in Section 1.02 of this tariff. The utility will keep records of the deposit and credit interest in accordance with PUC Rules.

Residential applicants 65 years of age or older may not be required to pay deposits unless the applicant has an outstanding account balance with the utility or another water or sewer utility which accrued within the last two years.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 28 2024
DOCKET
55818 1837

SECTION 2.0--SERVICE RULES AND REGULATIONS (Continued)

Nonresidential applicants who cannot establish credit to the satisfaction of the utility may be required to make a deposit that does not exceed an amount equivalent to one-sixth of the estimated annual billings.

Refund of deposit. - If service is not connected, or after disconnection of service, the utility will promptly refund the customer's deposit plus accrued interest or the balance, if any, in excess of the unpaid bills for service furnished. The utility may refund the deposit at any time prior to termination of utility service but must refund the deposit plus interest for any customer who has paid 18 consecutive billings without being delinquent.

Section 2.05--Meter Requirements, Readings, and Testing

It is not a requirement that the utility use meters to measure the quantity of sewage disposed of by individual customers. One connection is required for each residential, commercial or industrial facility in accordance with the PUC Rules.

Section 2.06--Billing

Bills from the utility will be mailed monthly unless otherwise authorized by the Commission. The due date of the bills for utility service will be at least twenty-one (21) days from the date of issuance. The postmark on the bill or, if there is no postmark on the bill, the recorded date of mailing by the utility will constitute proof of the date of issuance. If the due date falls on a holiday or weekend, the due date for payment purposes will be the next workday after the due date.

A late penalty of $5.00 will be charged on bills received after the due date. Customer payments postmarked by the due date will not incur a late penalty. The penalty on delinquent bills will not be applied to any balance to which the penalty was applied in a previous billing. The utility must maintain a record of the date of mailing to charge the late penalty.

Each bill will provide all information required by the PUC Rules. For each of the systems it operates, the utility will maintain and note on the monthly billing a telephone number (or numbers) which may be reached by a local call by customers. At the utility's option, a toll-free telephone number or the equivalent may be provided.

In the event of a dispute between a customer and a utility regarding any bill for utility service, the utility will conduct an investigation and report the results to the customer. If the dispute is not resolved, the utility will inform the customer that a complaint may be filed with the Commission.

Section 2.07--Service Disconnection

Utility service may be disconnected if the bill has not been paid in full by the date listed on the termination notice. The termination date must be at least 10 days after the notice is mailed or hand delivered.

The utility is encouraged to offer a deferred payment plan to a customer who cannot pay an outstanding bill in full and is willing to pay the balance in reasonable installments. However, a customer's utility service may be disconnected if a bill has not been paid or a deferred payment agreement entered into within 31 days from the date of issuance of a bill and if proper notice of termination has been given.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 28 2024 55818
1838

SECTION 2.0--SERVICE RULES AND REGULATIONS (Continued)

Notice of termination must be a separate mailing or hand delivery in accordance with the PUC Rules.

Utility service may also be disconnected without notice for reasons as described in the PUC Rules.

Utility personnel must be available to collect payments and to reconnect service on the day of and the day after any disconnection of service unless service was disconnected at the customer's request or due to a hazardous condition.

Section 2.08--Reconnection of Service

Service will be reconnected within 36 hours after the past due bill and any other outstanding charges are paid or correction of the conditions which caused service to be disconnected.

Section 2.09--Service Interruptions

The utility will make all reasonable efforts to prevent interruptions of service. If interruptions occur, the utility will re-establish service within the shortest possible time. Except for momentary interruptions due to automatic equipment operations, the utility will keep a complete record of all interruptions, both emergency and scheduled and will notify the Commission in writing of any service interruptions affecting the entire system or any major division of the system lasting more than four hours. The notice will explain the cause of the interruptions.

Prorated Bills - If service is interrupted or seriously impaired for 24 consecutive hours or more, the utility will prorate the monthly base bill in proportion to the time service was not available to reflect this loss of service.

Section 2.10--Quality of Service

The utility will plan, furnish, and maintain and operate a treatment and collection facility of sufficient size and capacity to provide a continuous and adequate service for all reasonable consumer uses and to treat sewage and discharge the effluent at the quality required by its discharge permit issued by the Commission. Unless otherwise authorized by the Commission, the utility will maintain facilities as described in the PUC Rules.

Section 2.11--Customer Complaints and Disputes

If a customer or applicant for service lodges a complaint, the utility will promptly make a suitable investigation and advise the complainant of the results. Service will not be disconnected pending completion of the investigation. If the complainant is dissatisfied with the utility's response, the utility must advise the complainant that he has recourse through the PUC complaint process. Pending resolution of a complaint, the commission may require continuation or restoration of service.

The utility will maintain a record of all complaints which shows the name and address of the complainant, the date and nature of the complaint and the adjustment or disposition thereof, for a period of two years after the final settlement of the complaint.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 28 2024 55818

## SECTION 2.20 SPECIFIC UTILITY SERVICE RULES AND REGULATIONS

This section contains specific utility service rules in addition to the rules previously listed under Section 2.0. It must be reviewed and approved by the Commission and in compliance with the PUC Rules to be effective.

The utility adopts the administrative rules of the PUC, as the same may be amended from time to time, as its company specific service rules and regulations. These rules will be kept on file at the company's offices for customer inspection during regular business hours. In the event of a conflict between the PUC's amended rules and the provisions of this tariff, the amended rules shall prevail. Where necessary, any conflicting provision of this tariff shall be deemed to have been superseded by the PUC rule in question to the degree that the Utility may conduct its lawful business in conformance with all requirements of said rule.

All payments for utility service shall be delivered or mailed to the utility's business office. If the business office fails to receive payment prior to the time of noticed disconnection for non-payment of a delinquent account, service will be terminated as scheduled. Utility service crews shall not be allowed to collect payments on customer accounts in the field.

Payment of an account by any means that has been dishonored and returned by the payor or payee's bank, shall be deemed to be delinquent. All returned payments must be redeemed with cash or valid money order. If a customer has two returned payments within a twelve-month period, the customer shall be required to pay a deposit if one has not already been paid.

Customer shall be liable for any damage or injury to utility-owned property or personnel shown to be caused by the customer, his invitees, his agents, his employees, or others directly under his control.

Limitation on Product/Service Liability. - The utility will not accept liability for any injury or damage to individuals or their property occurring on the customer's premises. The utility makes no representations or warranties (expressed or implied) that customer's appliances will not be damaged by disruptions of or fluctuations in sewer service whatever the cause. The utility will not accept liability for injuries or damages to persons or property due to disruption of sewer service caused by: (1) acts of God, (2) acts of third parties not subject to the control of the utility if the utility has undertaken such preventive measures as are required by PUC or TCEQ rules, (3) electrical power failures in sewer systems not required by TCEQ rule to have auxiliary power supplies, or (4) termination of sewer service pursuant to the utility's tariff and PUC rules.

If the services of a registered professional engineer are required as a result of a service initiation request received by the Utility for service to that applicant's service extension only, such engineer will be selected by the Utility and the applicant, and the applicant shall bear all expenses incurred therein.

If an applicant requires service other than the standard service provided by the utility, such applicant will be required to pay all expenses incurred by the utility in excess of the expenses that would be incurred in providing the standard service and connection.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 28 2024
DOCKET
55818 1840

SECTION 2.20 SPECIFIC UTILITY SERVICE RULES AND REGULATIONS (Continued)

Any applicant who places unique or non-standard service demands on the system may be required to provide contributions in aid of construction (as may be allowed by PUC rule) for the actual costs of any additional facilities required to maintain compliance with the TCEQ minimum design criteria for sewer collection, treatment, pumping and discharge.

Any applicant or existing customer required to pay for any costs not specifically set forth in the rate schedule pages of this tariff shall be entitled to a written explanation of such costs prior to payment and/or commencement of construction. If the applicant or existing customer does not believe that these costs are reasonable or necessary, the applicant or existing customer shall have the right to appeal such costs to the PUC or such other regulatory authority having jurisdiction over the utility's rates in that portion of the utility's service area in which the applicant's or existing customer's property(ies) is located.

Tap fees may be increased by unique costs not normally incurred as may be permitted by 16 TAC § 24.163(b)(1)(C).

The Utility adopts the Uniform Plumbing Code pursuant to 30 TAC § 290.46(i). The piping and other equipment on the premises furnished by the customer will be maintained by the customer at all times in conformity with the requirements of the TCEQ, the Uniform Plumbing Code and with the service rules and regulations of the Utility. The customer will bring out his service line to his property line at the point on the customer's property mutually acceptable to the customer and the Utility subject to such requirements as may exist by PUC rule.

The utility will have the right of access to the customer's premises at all times reasonable for the purpose of installing, testing, inspecting or repairing sewer mains or other equipment used in connection with its provision of sewer service, or for the purpose of removing its property and disconnecting lines, and for all other purposes necessary to the operation of the utility system including inspecting the customer's plumbing for code, plumbing or tariff violations. The customer shall allow the utility and its personnel access to the customer's property to conduct any tests or inspections required by law. Unless necessary to respond to equipment failure, leak or other condition creating an immediate threat to public health and safety or the continued provision of adequate utility service to others, such entry upon the customer's property shall be during normal business hours. The customer may require any utility representative, employee, contractor, or agent seeking to make such entry identify themselves, their affiliation with the utility, and the purpose of their entry.

Threats to or assaults upon utility personnel shall result in criminal prosecution.

Except in cases where the customer has a contract with the utility for reserve or auxiliary service, no other sewer service will be used by the customer on the same installation in conjunction with the utility's service, either by means of a cross-over valve or any other connection. Customer shall not connect, or allow any other person or party to connect, onto any sewer lines on his premises. Two places shall not be permitted to be supplied with one service pipe where there is a sewer main abutting the premises.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 28 2024
55818
1641

SECTION 2.20 SPECIFIC UTILITY SERVICE RULES AND REGULATIONS (Continued)

No service request initiated by telephone, through an Internet website or other electronic transmission, written application, agreement or contract for service may be assigned or transferred without the written consent of the utility.

It is agreed and understood that any and all sewer lines and other equipment furnished by the utility (excepting the customer's individual service lines from the point of connection to customer's structures on customer's premises) are and shall remain the sole property of the utility, and nothing contained herein or in a contract/application for service whether in verbal, written, or electronic transmission format, shall be construed to reflect a sale or transfer of any such lines or equipment to any customer. All tap and extension charges shall be for the privilege of connecting to said sewer lines and for installation, not purchase, of said lines.

Service applicants may be required to comply with any pre-condition to receiving service not printed herein as may exist under PUC rule (customer service, health and safety or environmental), USEPA rule, TWDB rule, local regulatory district rule or health department rule. Existing customer shall be required to comply with such rules, including modification of their plumbing and/or consumption patterns, after notice.

The disposal into the utility's sewer collection system of bulk quantities of food or food scraps not previously processed by a grinder or similar garbage disposal unit and grease and oils, except as incidental waste in process or wash water, used in or resulting from food preparation by sewer utility customers engaged in the preparation and/or processing of food for other than domestic consumption for sale to the public shall be prohibited. Specifically included in this prohibition are grease and oils from grease traps to other grease and/or oil storage containers. These substances are defined as "garbage" under Texas Health and Safety and Code § 361.003(12), and are not "sewage" as defined by Texas Water Code § 26.001(7). The utility only provides "sewage" collection and disposal service to the public. This service is limited to the collection, treatment and disposal of waterborne human waste and waste from domestic activities such as washing, bathing, and food preparation. This service does not include the collection, treatment or disposal of waste of such high BOD or TSS characteristics that it cannot reasonably be processed by the utility's state-approved wastewater treatment plant within the parameters of the utility's state and federal wastewater discharge permits. **THIS SERVICE DOES NOT INCLUDE THE COLLECTION AND DISPOSAL OF STORM WATERS OR RUN OFF WATERS, WHICH MAY NOT BE DIVERTED INTO OR DRAINED INTO THE UTILITY'S COLLECTION SYSTEM.**

Pursuant to 16 TAC § 24.165(o), the utility may charge for all labor, material, equipment, and other costs necessary to repair to replace all equipment damaged due to service diversion or the discharge of wastes which the system cannot properly treat. This shall include all repair and clean up costs associated with discharges of grease and oils, except as incidental waste in process or wash water, used in or resulting from food preparation by sewer utility customers engaged in the preparation and/or processing of food for other than domestic consumption or for sale to the public discharged from grease traps or other grease and/or oil storage containers. The utility may charge for all costs necessary to correct service diversion or unauthorized taps where there is no equipment damage, including incidents where service is reconnected without authority.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 28 2024
DOCKET
55818 42

SECTION 2.20 SPECIFIC UTILITY SERVICE RULES AND REGULATIONS (Continued)

The utility may not charge any additional penalty or charge other than actual costs unless such penalty has been expressly approved by the regulatory authority having rate/tariff jurisdiction and filed in the utility's tariff.

Pursuant to 16 TAC § 24.163(b)(3)(A) and (B), the customer's service line and appurtenances shall be construed in accordance with the laws and regulations of the State of Texas, local plumbing codes, or, in the absence of such local codes, the Uniform Plumbing Code. It shall be the customer's responsibility to maintain the service line and appurtenances in good operating condition, i.e., clear of obstruction, defects, or blockage.

If the utility can provide evidence of excessive infiltration or inflow or failure to provide proper pretreatment, the utility may, with the written approval of the PUC, require the customer to repair the line or eliminate the infiltration or inflow or take such actions necessary to correct the problem. If the customer fails to correct the problem within a reasonable time, the utility may disconnect service after proper notice.

In accordance with the requirements of Utility's Wastewater discharge Permit, any and all repairs and maintenance of Utility's lines, tanks, pumps and equipment located on Customer's premises shall be performed exclusively by the Utility.

Copies of the utility's state and federal wastewater discharge permits shall be available for public inspection and copying in the utility's business office during normal business hours.

Non-residential customers electing the pretreatment option for sewage with non-standard characteristics may be charged those costs set forth in the utility's extension policy if such pretreatment fails or otherwise causes the utility's facilities to violate their waste-water discharge permits.

RESIDENTIAL SINGLE-FAMILY GRINDER / SEWAGE STATIONS

Prior to the installation of a grinder / sewage station, the utility must be given a complete listing of all materials and equipment that will be used.

In order to prevent inflow and infiltration, the materials must comply with standard specifications, approved by the TCEQ and the utility.

After the utility has approved the proposed grinder / sewage station, the construction may begin. Once the work has been completed, the utility will do an inspection of the grinder / sewage station to ensure the complete installation was as specified.

The customer will retain ownership of receiving tanks or lift stations on the customer's property, and all maintenance, repairs and replacement are the customer's responsibility. The customer shall own and maintain the grinder pump and appurtenances.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 28 2024
1843
55818

SECTION 2.20 SPECIFIC UTILITY SERVICE RULES AND REGULATIONS (Continued)

The repairs may be performed by anyone selected by the customer, who is competent to perform such repairs. The utility requires that parts and equipment meet the minimum standards approved by the TCEQ, to insure proper and efficient operation of the sewer system.

MULTI-FAMILY AND COMMERCIAL RECEIVING TANK / LIFT STATIONS

Prior to the installation of a grinder / sewage station, the utility must be given a complete listing of all materials and equipment that will be used, along with the storage for that development.

In order to minimize inflow and infiltration into the collection system, the installation and materials must comply with standard specifications approved by the TCEQ.

After the utility has approved the proposed grinder / sewage station, the construction may begin. Once the work has been completed, the utility will do an inspection of the grinder / sewage station to ensure the complete installation was as specified.

Prior to acceptance of an existing receiving tank or lift station that is being used as an interceptor tank for primary treatment, waste water storage or pump tanks prior to discharge into an alternative or conventional sewage system must be cleaned, inspected, repaired, modified, or replaced if necessary to minimize inflow and infiltration into the collection system.

Existing pumps and tanks must be of adequate size to insure proper pumpage in the event of high flow or if one pump is out of service. If the existing pumps and receiving tanks or lift stations are of inadequate size the utility will not accept liability for backups due to high flows, one pump out of service, rainfall causing inflow or infiltration, power outages, lack of proper storage capacity, etc.

If the collection system that discharges into the receiving tank / lift station has an inflow or infiltration problem and collects rainfall discharge, the owner or P.O.A. will correct it within 90 days of written notice from the utility. If no action is taken to correct the problem within 90 days, the utility may take the responsibility to make corrections at the owner's / P.O.A.'s expense. The utility is not responsible for the collection system that discharges into the receiving tank / lift station.

The owner / P.O.A. shall be responsible for the monthly electric bill.

An adequate easement must encompass the receiving tank / lift station by a 15-foot radius and also a 15-foot access easement to the receiving tank / lift station site. If this easement does not exist, one must be created and filed of record.

## SECTION 3.0--EXTENSION POLICY

Section 3.01--Standard Extension Requirements

LINE EXTENSION AND CONSTRUCTION CHARGES. No contribution in aid of construction may be required of any customer except as provided for in this approved extension policy.

The customer will be given an itemized statement of the costs, options such as rebates to the customer, sharing of construction costs between the utility and the customer, or sharing of costs between the customer and other applicants prior to beginning construction.

The utility will bear the full cost of any oversizing of collection mains necessary to serve other customers in the immediate area. The individual residential customer shall not be charged for any additional treatment capacity or facilities. Contributions in aid of construction may not be required of individual residential customers for treatment capacity or collection facilities unless otherwise approved by the Commission under this specific extension policy.

COST UTILITIES SHALL BEAR. Within its certificate area, the utility will pay the cost of the first 200 feet of any sewer collection line necessary to extend service to an individual residential customer within a platted subdivision. However, if the residential customer requesting service purchased the property after the developer was notified of the need to provide facilities to the utility, the utility may charge for the first 200 feet. The utility must also be able to document that the developer of the subdivision refused to provide facilities compatible with the utility's facilities in accordance with the utility's approved extension policy after receiving a written request from the utility.

Developers may be required to provide contributions in aid of construction in amounts to furnish the system with all facilities necessary to comply with the PUC Rules.

## SECTION 3.20--SPECIFIC UTILITY EXTENSION POLICY

This section contains the utility's specific extension policy which complies with the requirements already stated under Section 3.01. It must be reviewed an approved by the Commission and in compliance with PUC Rules to be effective.

Residential customers not covered under Section 3.01 will be charged the equivalent of the costs of extending service to their property from the nearest collection line even if that line does not have adequate capacity to serve the customer. However, if the customer places unique, non-standard service demands upon the system, the customer may be charged the full cost of extending service to and throughout their property, including the cost of all necessary treatment capacity necessary to meet the service demands anticipated to be created by that property.

Developers will be required to provide contributions in aid of construction in amounts sufficient to furnish the development with all facilities necessary to provide for reasonable local demand requirements and to comply with TCEQ's minimum design criteria for facilities used in collecting, treating, transmitting, and discharging of wastewater effluent. For purposes of this subsection, a developer is one who subdivides or requests more than two connections on a piece of property. Commercial, industrial, and wholesale customers will be treated as developers.

The utility adopts the administrative rules of the PUC, as amended from time to time, as its company specific extension policy. These rules will be kept on file at the company's business office for customer inspection during normal business hours.

Non-residential customers generating sewage creating unique or non-standard treatment demands which might reasonably be expected to cause the utility's treatment facilities to operate outside their current waste-water discharge permit parameters may be charged the cost of all studies, engineering plans, permit costs, and collection treatment or discharge facilities construction or modification costs necessary to enable the utility to treat said sewage within permit limits acceptable to the TCEQ, EPA and other regulatory agencies. In the alternative, the customer may have the option of pre-treating said sewage in such a manner to that it may not reasonably be expected to cause the utility's facilities to operate outside their permit parameters. In such case, the customer shall be required to pay the utility's costs of evaluating such pretreatment processes and cost of obtaining regulatory approval of such pretreatment processes. In the event of the pretreatment facilities of a customer making this election fail and cause the utility's facilities to operate outside their permit parameters, the customer shall indemnify the utility for all costs incurred for clean ups or environmental remediation and all fines, penalties, and costs imposed by regulatory or judicial enforcement actions relating to such permit violations.

Non-residential sewer customers producing water borne waste significantly different from waste generated by residential customers may be required to provide a suitable sampling point at the property line for testing the customer's waste for chemicals or substances, e.g., grease, oils, solvents, pesticides, etc., which can reasonably be believed to have an injurious effect on the Utility's plant and/or its ability to treat and dispose of such wastes within the parameters of the Utility's permit. Utility shall have reasonable access to the sampling point at all times.

SECTION 3.20--SPECIFIC UTILITY EXTENSION POLICY (Continued)

Any service extension to a subdivision (recorded or unrecorded) may be subject to the provisions and restrictions of 16 TAC 24.163(d) and this tariff. When a developer wishes to extend the system to prepare to service multiple new connections, the charge shall be the cost of such extension, plus a pro-rata charge based upon the capacities of collection, transmission, storage, treatment and discharge facilities, compliant with the TCEQ minimum design criteria, which must be committed to such extension. As provided by 16 TAC § 24.163(d)(4), for purposes of this section, commercial, industrial, and wholesale customers shall be treated as developers.

The imposition of additional extension costs or charges as provided by Sections 2.20 and 3.20 of this tariff shall be subject to appeal as provided in this tariff, PUC rules, or the rules of such other regulatory authority as may have jurisdiction over the utility's rates and services. Any applicant required to pay for any costs not specifically set forth in the rate schedule pages of this tariff shall be entitled to a written explanation of such costs prior to payment and/or commencement of construction. If the applicant does not believe that these costs are reasonable or necessary, the applicant shall have the right to appeal such costs to the PUC or such other regulatory authority having jurisdiction over the utility's rates in that portion of the utility's service area in which the applicant's property(ies) is located. Unless the PUC or other regulatory authority enters interlocutory orders to the contrary, service to the applicant may be delayed until such appeal is resolved.

The Utility may initiate, transfer, or terminate retail water or sewer service upon receipt of a customer request by mail, by telephone, through an Internet website, or through electronic transmission. A separate request to initiate, transfer or terminate service shall be required for each potential service location if more than one service connection is desired by any individual applicant. Written service applications forms will be available for applicant pick up at the Utility's business office during normal weekday business hours. Upon request, written service applications will also be sent by prepaid first-class United States mail to the address provided by the applicant upon request. Completed applications should be returned by hand delivery in case there are questions which might delay fulfilling the service request.

The Utility shall serve each qualified service applicant within its certificated service area as soon as practical after receiving a request for service. All service requests will be fulfilled within the time limits prescribed by PUC rules once the applicant has met all conditions precedent to achieving a "qualified service applicant". If a service request cannot be fulfilled within the required period, the applicant shall be notified in writing of the delay, its cause and the anticipated date that service will be available. The PUC service dates shall not become applicable until the service applicant has met all conditions precedent to becoming a "qualified service applicant" as defined herein or by PUC rules.

The Utility is not required to extend service to any applicant outside of its certificated service area and will only do so, at the Utility's sole option, under terms and conditions mutually agreeable to the Utility and the applicant and upon extension of the Utility's certificated service area boundaries by the PUC. Service applicants may be required to bear the cost of the service area amendment.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 28 2024
DOCKET NO. 55818 1847

SECTION 3.20--SPECIFIC UTILITY EXTENSION POLICY (Continued)

A "qualified service applicant" is an applicant who has: (1) met all of the Utility's requirements of service contained in this tariff and/or PUC rules, (2) has made all payments for tap fees and extension charges, (3) has provided all necessary easements and rights-of-way necessary to provide service to the requested location, including staking said easements or rights-of-way where necessary, and (4) has for each location to which service is being requested, completed the verbal, written, or electronic transmission customer service request process.

Where a new tap or service connection is required, the service applicant shall be required to submit a service request by mail, by telephone, through an Internet website, or through another electronic transmission and request that a tap be made. The tap request must be accompanied with a plat, map, diagram or written metes and bounds description of precisely where the applicant desires each tap or service connection is to be made and, if necessary, where the connection is to be installed, along the applicant's property line. The actual point of connection must be readily accessible to Utility personnel for inspection, servicing and testing while being reasonably secure from damage by vehicles and mowers. If the Utility has more than one main adjacent to the service applicant's property, the tap or service connection will be made to the Utility's near service main with adequate capacity to service the applicant's full potential service demand.

If the tap or service connection cannot be made at the applicant's desired location, it will be made at another location mutually acceptable to the applicant and the Utility. If no agreement on location can be made, applicant may refer the matter to the PUC for resolution. Unless otherwise ordered by the PUC, the tap or service connection will not be made until the location dispute is resolved.

The Utility shall require a developer (as defined by PUC rule) to provide permanent recorded public utility easements as a condition of service to any location within the developer's property. The Developer shall be required to obtain all necessary easements and rights-of-way required to extend the Utility's existing service facilities from their nearest point with adequate service capacity (as prescribed by PUC rules and local service conditions) to and throughout the Developer's property. The easements shall be sufficient to allow the construction, installation, repair, maintenance, testing, and replacement of any and all utility plant necessary to provide continuous and adequate service to each and every potential service location within the property at full occupancy. Unless otherwise restricted by law, sewage treatment, holding tank sites, lift station sites shall convey with all permanent easements and buffers required by TCEQ rules. Unless otherwise agreed to by the Utility, pipeline right-of-way easements must be at least 15 feet wide to allow adequate room to facilitate backhoe and other heavy equipment operation and meters.

Easements must be provided for all storage, treatment, pressurization and disposal sites which are sufficient to construct and maintain all weather roads as prescribed by TCEQ rules. All easements shall be evidenced, at Developer's expense, by recorded county-approved subdivision plat or by specific assignment supported by metes and bounds survey from a surveyor licensed by the State of Texas.

APPROVED
FEB 28 2024
DOCKET 55818
1848

SECTION 3.20--SPECIFIC UTILITY EXTENSION POLICY (Continued)

Prior to the extension of utility service to developers (as defined by PUC rules) or new subdivisions, the Developer shall comply with the following:

(a) The Developer shall make a written request for service to property that is to be subdivided and developed. The Developer shall submit to the Utility a proposed plat on a scale of one inch (1") to two hundred feet (200') for review and determination of required easements, utility plant, and plant location. If sewer service is requested, the plat must contain elevation data. A reconcilable deposit in an amount set by the Utility may be required to cover preliminary engineering, legal and copy cost to be incurred by the Utility in reviewing and planning to meet this service request. The plat and/or accompanying information shall identify the type, location and number of houses and other planned structures that will be requiring utility service. If other than residential structures are to be located on the property, all other types of anticipated businesses and their service demands shall be identified with specificity. All areas requiring special irrigation and/or other unique water demands must be identified.

To the extent reasonably possible, this information must be precise so that adequate facilities can be designed and constructed to meet all future service demands without hazard to the public, other utility customers and/or the environment.

(b) After the requirements of easements and rights-of-way have been determined, a red line copy will be returned by the Utility to the Developer for final plat preparation.

(c) Copies of all proposed plats and plans must be submitted to the Utility prior to their submission to the county for approval to ensure that they are compatible with the adequate long-term utility needs of potential service customers. Copies will be returned after review by the Utility so that necessary changes may be incorporated into the Developer's final submitted plat(s) and plans.

(d) The Utility shall be provided with three (3) certified copies of the final plat(s) approved by the County Commissioners Court. At this time, the Utility will begin engineering the facilities necessary to serve the property. Plans and specifications will be prepared and submitted to the TCEQ by the Utility if required by law. If further plat or plans changes are necessary to accommodate the specific service needs of the property and the anticipated customer demands, the Developer will be so notified. Plat amendments must be obtained by the Developer.

The Developer shall be notified when all required TCEQ or other governmental approvals or permits have been received. No construction of utility plant which requires prior TCEQ plans approval shall be commenced until that approval has been received by the Utility and any conditions imposed by the TCEQ in association with its approvals have been satisfied.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
FEB 20 2024
DOCKET 55818

SECTION 3.20--SPECIFIC UTILITY EXTENSION POLICY (Continued)

(e) The Developer shall be required to post bond or escrow the funds necessary to construct all required utility plant, except individual sewer connections, required to serve the property. Construction shall not commence until funds are available. If the construction is to be done in coordination with the phased development of the property, funds must be provided in advance which are sufficient to complete each phase. No phase or facilities for any phase shall be constructed prior to the bonding or escrowing of all funds associated with that phase.

(f) At the sole option of the Utility, the Developer may be required to execute a Developer Extension Contract setting forth all terms and conditions of extending service to their property including all contributions-in-aid of construction and developer reimbursements, if any.

(g) The Utility may require the Developer to commence construction of subdivision improvements within three (3) months of utility plans approval or the Utility may abate its construction activities until full development construction begins. If the Developer stops construction of subdivision improvements for any purpose, the Utility may abate its construction for a similar period.

(h) As soon as the roads are rough cut and prior to paving, extension lines will need to be constructed at each road crossing. The Developer must notify the Utility sufficiently in advance of this development stage to allow for the necessary utility construction without disruption to other service operations of the Utility. Failure to provide adequate advance notice and cooperation in the construction of necessary utility plant may result in additional delays in obtaining service to the property. The Developer shall be required to pay for all additional costs of road boring or other remedial construction necessary to install adequate utility plant throughout the affected property.

Within its certificated area, the Utility shall bear the cost of the first 200 feet of any water main or sewer collection line necessary to extend service to an individual residential service applicant within a platted subdivision unless the Utility can document:

(a) that the developer of the subdivision refused to provide facilities compatible with the utility's facilities in accordance with the Utility's approved extension policy after receiving a written request from the Utility; or,

(b) that the Developer defaulted on the terms and conditions of a written agreement or contract existing between the utility and the developer or the terms of this tariff regarding payment for services, extensions, or other requirements; or in the event the Developer declared bankruptcy and was therefore unable to meet obligations; and,

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
FEB 28 2024 55818

SECTION 3.20--SPECIFIC UTILITY EXTENSION POLICY (Continued)

(c) that the residential service applicant purchased the property from the Developer after the Developer was notified of the need to provide facilities to the utility. A residential service applicant may be charged the remaining costs of extending service to his property; provided, however, that the residential service applicant may only be required to pay the cost equivalent to the cost of extending the nearest water main or wastewater collection line, whether or not that line has adequate capacity to serve that residential service applicant.

The following criteria shall be considered to determine the residential service applicant's cost for extending service:

(a) The residential service applicant shall not be required to pay for costs of main extensions greater than 2" in diameter for pressure wastewater collection lines and 6" in diameter for gravity wastewater lines.

(b) Exceptions may be granted by the PUC if:
(1) adequate service cannot be provided to the applicant using the maximum line sizes listed due to distance or elevation, in which case, it shall be the utility's burden to justify that a larger diameter pipe is required for adequate service;
(2) larger minimum line sizes are required under subdivision platting requirements or applicable building codes.

(c) If an exception is granted, the Utility shall establish a proportional cost plan for the specific extension or a rebate plan which may be limited to seven years to return the portion of the applicant's costs for oversizing as new customers are added to ensure that future applicants for service on the line pay at least as much as the initial service applicant.

For purposes of determining the costs that service applicants shall pay, commercial customers with service demands greater than residential customer demands in the certificated area, industrial, and wholesale customers shall be treated as developers.

**Non-residential customers who purchase sewer service only and who have no reliable water consumption data available will be charged the applicable monthly fee for their meter size multiplied by 1.69. If a water meter is not available, a meter size will be imputed by the utility based upon the size of the water service pipe.**

FORM OF PAYMENT: The utility will accept the following forms of payment:
Cash X (If in Person), Check X, Money Order X, Credit Card_____, Other (specify)___
THE UTILITY MAY REQUIRE EXACT CHANGE FOR PAYMENTS AND MAY REFUSE TO ACCEPT PAYMENTS MADE USING MORE THAN $1.00 IN SMALL COINS. A WRITTEN RECEIPT WILL BE GIVEN FOR CASH PAYMENTS

REGULATORY ASSESSMENT ..... 1.0%
PUC RULES REQUIRE THE UTILITY TO COLLECT A FEE OF ONE PERCENT OF THE RETAIL MONTHLY BILL AND TO REMIT THE FEE TO THE TCEQ.

Section 1.02 - Miscellaneous Fees

TAP FEE ..... $650.00
TAP FEE COVERS THE UTILITY'S COSTS FOR MATERIALS AND LABOR TO INSTALL A STANDARD RESIDENTIAL 5/8" or 3/4" METER. AN ADDITIONAL FEE TO COVER UNIQUE COSTS IS PERMITTED IF LISTED ON THIS TARIFF.

TAP FEE (Unique costs) ..... Actual Cost
FOR EXAMPLE, A ROAD BORE FOR CUSTOMERS OUTSIDE OF SUBDIVISIONS OR RESIDENTIAL AREAS

**Docket Number 56200**

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET 56200
OCT 10 2024
1860

TAP FEE (Large meter) ..... Actual Cost
TAP FEE IS THE UTILITY'S ACTUAL COST FOR MATERIALS AND LABOR FOR METER SIZE INSTALLED

## SECTION 1.0 -- RATE SCHEDULE (Continued)

METER RELOCATION FEE ..... Actual Relocation Cost, Not to Exceed Tap Fee
THIS FEE MAY BE CHARGED IF A CUSTOMER REQUESTS THAT AN EXISTING METER BE RELOCATED.

METER TEST FEE ..... $25.00
THIS FEE WHICH SHOULD REFLECT THE UTILITY'S COST MAY BE CHARGED IF A CUSTOMER REQUESTS A SECOND METER TEST WITHIN A TWO-YEAR PERIOD AND THE TEST INDICATES THAT THE METER IS RECORDING ACCURATELY. THE FEE MAY NOT EXCEED $25

RECONNECTION FEE
THE RECONNECT FEE MUST BE PAID BEFORE SERVICE CAN BE RESTORED TO A CUSTOMER WHO HAS BEEN DISCONNECTED FOR THE FOLLOWING REASONS (OR OTHER REASONS LISTED UNDER SECTION 2.0 OF THIS TARIFF)

a) Nonpayment of bill (Maximum $25.00). ..... $25.00
b) Customer's request that service be disconnected ..... $45.00

SEASONAL RECONNECTION FEE
BASE RATE FOR METER SIZE TIMES NUMBER OF MONTHS OFF SYSTEM NOT TO EXCEED SIX MONTHS WHEN LEAVE AND RETURN WITHIN A TWELVE-MONTH PERIOD.

SERVICE INITIATION FEE ..... $45.00
THE SERVICE INITIATION FEE WILL BE CHARGED FOR INITIATING AN ACCOUNT AT THE SERVICE LOCATION

LATE CHARGE (EITHER $5.00 OR 10% OF THE BILL) ..... 10%
PUC RULES ALLOW A ONE-TIME PENALTY TO BE CHARGED ON DELINQUENT BILLS. A LATE CHARGE MAY NOT BE APPLIED TO ANY BALANCE TO WHICH THE PENALTY WAS APPLIED IN A PREVIOUS BILLING

RETURNED CHECK CHARGE ..... $25.00
RETURNED CHECK CHARGES MUST BE BASED ON THE UTILITY'S DOCUMENTABLE COST

CUSTOMER DEPOSIT RESIDENTIAL (Maximum $50) ..... $50.00

COMMERCIAL & NON-RESIDENTIAL DEPOSIT ..... 1/6TH OF ESTIMATED ANNUAL BILL

GOVERNMENTAL TESTING, INSPECTION AND COSTS SURCHARGE:
WHEN AUTHORIZED IN WRITING BY PUC AND AFTER NOTICE TO CUSTOMERS, THE UTILITY MAY INCREASE RATES TO RECOVER INCREASED COSTS FOR INSPECTION FEES AND WATER TESTING. [16 TAC § 24.25(b)(2)(G)]

LINE EXTENSION AND CONSTRUCTION CHARGES:
REFER TO SECTION 3.0--EXTENSION POLICY FOR TERMS, CONDITIONS, AND CHARGES WHEN NEW CONSTRUCTION IS NECESSARY TO PROVIDE SERVICE

FEDERAL TAX CHANGE CREDIT RIDER (FTCCR):
THE FEDERAL TAX CHANGE CREDIT RIDER GIVES EFFECT TO THE TAX CUTS AND JOBS ACT OF 2017, WHICH CHANGED THE FEDERAL CORPORATE TAX RATE FROM 35% TO 21%, BY REDUCING THE COST OF SERVICE PAID BY CUSTOMERS TAKING SERVICE UNDER THIS RATE TARIFF. THE FTCCR WILL PROVIDE CREDITS TO CUSTOMERS TAKING SERVICE UNDER THIS RATE TARIFF.

OCT 10 2024 56200

## SECTION 2 0--SERVICE RULES AND REGULATIONS

### Section 2 01—Public Utility Commission Rules

The utility will have the most current Public Utility Commission (PUC) Rules, Chapter 24, Water and Sewer Rates, available at its office for reference purposes. The Rules and this tariff shall be available for public inspection and reproduction at a reasonable cost. The latest Rules or Commission approved changes to the Rules supersede any rules or requirements in this tariff.

### Section 2.02—Request to Initiate, Transfer or Terminate Water or Sewer Service

A customer may initiate, transfer or terminate retail water or sewer service by mail, by telephone, through an Internet website, or through another electronic transmission. If service request is initiated by mail, the utility's standard application or contract form (attached in the Appendix to this tariff) must be signed and submitted by the applicant before sewer service is provided by the utility.

After the applicant has met all the requirements, conditions and regulations for service, the utility will install service connections, which may include a utility cut-off valve and/or take all necessary actions to initiate service. The utility will serve each qualified applicant for service within 5 working days unless line extensions or new facilities are required. If construction is required to fill the order and if it cannot be completed within 30 days, the utility will provide the applicant with a written explanation of the construction required and an expected date of service.

Where service has previously been provided, the utility will reconnect the service within one working day after the applicant has met the requirements for reconnection

The customer will be responsible for furnishing and laying the necessary customer service pipe from the connection location to the place of use.

### Section 2.03--Refusal of Service

The utility may decline to serve an applicant until the applicant has complied with the regulations of the regulatory agencies (state and municipal regulations) and for the reasons outlined in the PUC Rules. In the event that the utility refuses to serve an applicant, the utility will inform the applicant in writing of the basis of its refusal. The utility is also required to inform the applicant that a complaint may be filed with the Commission.

### Section 2 04--Customer Deposits

If a residential applicant cannot establish credit to the satisfaction of the utility, the applicant will be required to pay a deposit as provided for in Section 1.02 of this tariff. The utility will keep records of the deposit and credit interest in accordance with PUC Rules.

Residential applicants 65 years of age or older may not be required to pay deposits unless the applicant has an outstanding account balance with the utility or another water or sewer utility which accrued within the last two years

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
OCT 10 2024
DOCKET
56200 1862

SECTION 2.0--SERVICE RULES AND REGULATIONS (Continued)

Nonresidential applicants who cannot establish credit to the satisfaction of the utility may be required to make a deposit that does not exceed an amount equivalent to one-sixth of the estimated annual billings.

Refund of deposit. - If service is not connected, or after disconnection of service, the utility will promptly refund the customer's deposit plus accrued interest or the balance, if any, in excess of the unpaid bills for service furnished. The utility may refund the deposit at any time prior to termination of utility service but must refund the deposit plus interest for any customer who has paid 18 consecutive billings without being delinquent.

Section 2.05--Meter Requirements, Readings, and Testing

It is not a requirement that the utility use meters to measure the quantity of sewage disposed of by individual customers. One connection is required for each residential, commercial or industrial facility in accordance with the PUC Rules.

Section 2.06--Billing

Bills from the utility will be mailed monthly unless otherwise authorized by the Commission. The due date of the bills for utility service will be at least twenty-one (21) days from the date of issuance. The postmark on the bill or, if there is no postmark on the bill, the recorded date of mailing by the utility will constitute proof of the date of issuance. If the due date falls on a holiday or weekend, the due date for payment purposes will be the next workday after the due date

A late penalty of $5.00 will be charged on bills received after the due date. Customer payments postmarked by the due date will not incur a late penalty The penalty on delinquent bills will not be applied to any balance to which the penalty was applied in a previous billing. The utility must maintain a record of the date of mailing to charge the late penalty.

Each bill will provide all information required by the PUC Rules. For each of the systems it operates, the utility will maintain and note on the monthly billing a telephone number (or numbers) which may be reached by a local call by customers. At the utility's option, a toll-free telephone number or the equivalent may be provided.

In the event of a dispute between a customer and a utility regarding any bill for utility service, the utility will conduct an investigation and report the results to the customer If the dispute is not resolved, the utility will inform the customer that a complaint may be filed with the Commission

Section 2.07--Service Disconnection

Utility service may be disconnected if the bill has not been paid in full by the date listed on the termination notice. The termination date must be at least 10 days after the notice is mailed or hand delivered.

The utility is encouraged to offer a deferred payment plan to a customer who cannot pay an outstanding bill in full and is willing to pay the balance in reasonable installments. However, a customer's utility service may be disconnected if a bill has not been paid or a deferred payment agreement entered into within 31 days from the date of issuance of a bill and if proper notice of termination has been given

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
1863
OCT 10 2024
56200

SECTION 2.0--SERVICE RULES AND REGULATIONS (Continued)

Notice of termination must be a separate mailing or hand delivery in accordance with the PUC Rules.

Utility service may also be disconnected without notice for reasons as described in the PUC Rules.

Utility personnel must be available to collect payments and to reconnect service on the day of and the day after any disconnection of service unless service was disconnected at the customer's request or due to a hazardous condition.

Section 2.08--Reconnection of Service

Service will be reconnected within 36 hours after the past due bill and any other outstanding charges are paid or correction of the conditions which caused service to be disconnected.

Section 2.09--Service Interruptions

The utility will make all reasonable efforts to prevent interruptions of service. If interruptions occur, the utility will re-establish service within the shortest possible time Except for momentary interruptions due to automatic equipment operations, the utility will keep a complete record of all interruptions, both emergency and scheduled and will notify the Commission in writing of any service interruptions affecting the entire system or any major division of the system lasting more than four hours The notice will explain the cause of the interruptions.

Prorated Bills - If service is interrupted or seriously impaired for 24 consecutive hours or more, the utility will prorate the monthly base bill in proportion to the time service was not available to reflect this loss of service

Section 2.10--Quality of Service

The utility will plan, furnish, and maintain and operate a treatment and collection facility of sufficient size and capacity to provide a continuous and adequate service for all reasonable consumer uses and to treat sewage and discharge the effluent at the quality required by its discharge permit issued by the Commission Unless otherwise authorized by the Commission, the utility will maintain facilities as described in the PUC Rules.

Section 2.11--Customer Complaints and Disputes

If a customer or applicant for service lodges a complaint, the utility will promptly make a suitable investigation and advise the complainant of the results. Service will not be disconnected pending completion of the investigation. If the complainant is dissatisfied with the utility's response, the utility must advise the complainant that he has recourse through the PUC complaint process. Pending resolution of a complaint, the commission may require continuation or restoration of service.

The utility will maintain a record of all complaints which shows the name and address of the complainant, the date and nature of the complaint and the adjustment or disposition thereof, for a period of two years after the final settlement of the complaint.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET

SECTION 2.20 SPECIFIC UTILITY SERVICE RULES AND REGULATIONS

This section contains specific utility service rules in addition to the rules previously listed under Section 2.0. It must be reviewed and approved by the Commission and in compliance with the PUC Rules to be effective

The utility adopts the administrative rules of the PUC, as the same may be amended from time to time, as its company specific service rules and regulations. These rules will be kept on file at the company's offices for customer inspection during regular business hours. In the event of a conflict between the PUC's amended rules and the provisions of this tariff, the amended rules shall prevail. Where necessary, any conflicting provision of this tariff shall be deemed to have been superseded by the PUC rule in question to the degree that the Utility may conduct its lawful business in conformance with all requirements of said rule.

All payments for utility service shall be delivered or mailed to the utility's business office. If the business office fails to receive payment prior to the time of noticed disconnection for non-payment of a delinquent account, service will be terminated as scheduled. Utility service crews shall not be allowed to collect payments on customer accounts in the field.

Payment of an account by any means that has been dishonored and returned by the payor or payee's bank, shall be deemed to be delinquent. All returned payments must be redeemed with cash or valid money order. If a customer has two returned payments within a twelve-month period, the customer shall be required to pay a deposit if one has not already been paid.

Customer shall be liable for any damage or injury to utility-owned property or personnel shown to be caused by the customer, his invitees, his agents, his employees, or others directly under his control.

Limitation on Product/Service Liability - The utility will not accept liability for any injury or damage to individuals or their property occurring on the customer's premises. The utility makes no representations or warranties (expressed or implied) that customer's appliances will not be damaged by disruptions of or fluctuations in sewer service whatever the cause. The utility will not accept liability for injuries or damages to persons or property due to disruption of sewer service caused by. (1) acts of God, (2) acts of third parties not subject to the control of the utility if the utility has undertaken such preventive measures as are required by PUC or TCEQ rules, (3) electrical power failures in sewer systems not required by TCEQ rule to have auxiliary power supplies, or (4) termination of sewer service pursuant to the utility's tariff and PUC rules.

If the services of a registered professional engineer are required as a result of a service initiation request received by the Utility for service to that applicant's service extension only, such engineer will be selected by the Utility and the applicant, and the applicant shall bear all expenses incurred therein.

If an applicant requires service other than the standard service provided by the utility, such applicant will be required to pay all expenses incurred by the utility in excess of the expenses that would be incurred in providing the standard service and connection.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
OCT 10 2024 56200 1865

SECTION 2 20 SPECIFIC UTILITY SERVICE RULES AND REGULATIONS (Continued)

Any applicant who places unique or non-standard service demands on the system may be required to provide contributions in aid of construction (as may be allowed by PUC rule) for the actual costs of any additional facilities required to maintain compliance with the TCEQ minimum design criteria for sewer collection, treatment, pumping and discharge

Any applicant or existing customer required to pay for any costs not specifically set forth in the rate schedule pages of this tariff shall be entitled to a written explanation of such costs prior to payment and/or commencement of construction. If the applicant or existing customer does not believe that these costs are reasonable or necessary, the applicant or existing customer shall have the right to appeal such costs to the PUC or such other regulatory authority having jurisdiction over the utility's rates in that portion of the utility's service area in which the applicant's or existing customer's property(ies) is located.

Tap fees may be increased by unique costs not normally incurred as may be permitted by 16 TAC § 24.163(b)(1)(C).

The Utility adopts the Uniform Plumbing Code pursuant to 30 TAC § 290 46(i). The piping and other equipment on the premises furnished by the customer will be maintained by the customer at all times in conformity with the requirements of the TCEQ, the Uniform Plumbing Code and with the service rules and regulations of the Utility. The customer will bring out his service line to his property line at the point on the customer's property mutually acceptable to the customer and the Utility subject to such requirements as may exist by PUC rule

The utility will have the right of access to the customer's premises at all times reasonable for the purpose of installing, testing, inspecting or repairing sewer mains or other equipment used in connection with its provision of sewer service, or for the purpose of removing its property and disconnecting lines, and for all other purposes necessary to the operation of the utility system including inspecting the customer's plumbing for code, plumbing or tariff violations. The customer shall allow the utility and its personnel access to the customer's property to conduct any tests or inspections required by law Unless necessary to respond to equipment failure, leak or other condition creating an immediate threat to public health and safety or the continued provision of adequate utility service to others, such entry upon the customer's property shall be during normal business hours. The customer may require any utility representative, employee, contractor, or agent seeking to make such entry identify themselves, their affiliation with the utility, and the purpose of their entry.

Threats to or assaults upon utility personnel shall result in criminal prosecution.

Except in cases where the customer has a contract with the utility for reserve or auxiliary service, no other sewer service will be used by the customer on the same installation in conjunction with the utility's service, either by means of a cross-over valve or any other connection. Customer shall not connect, or allow any other person or party to connect, onto any sewer lines on his premises Two places shall not be permitted to be supplied with one service pipe where there is a sewer main abutting the premises.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
OCT 10 2024

SECTION 2 20 SPECIFIC UTILITY SERVICE RULES AND REGULATIONS (Continued)

No service request initiated by telephone, through an Internet website or other electronic transmission, written application, agreement or contract for service may be assigned or transferred without the written consent of the utility.

It is agreed and understood that any and all sewer lines and other equipment furnished by the utility (excepting the customer's individual service lines from the point of connection to customer's structures on customer's premises) are and shall remain the sole property of the utility, and nothing contained herein or in a contract/application for service whether in verbal, written, or electronic transmission format, shall be construed to reflect a sale or transfer of any such lines or equipment to any customer All tap and extension charges shall be for the privilege of connecting to said sewer lines and for installation, not purchase, of said lines

Service applicants may be required to comply with any pre-condition to receiving service not printed herein as may exist under PUC rule (customer service, health and safety or environmental), USEPA rule, TWDB rule, local regulatory district rule or health department rule. Existing customer shall be required to comply with such rules, including modification of their plumbing and/or consumption patterns, after notice.

The disposal into the utility's sewer collection system of bulk quantities of food or food scraps not previously processed by a grinder or similar garbage disposal unit and grease and oils, except as incidental waste in process or wash water, used in or resulting from food preparation by sewer utility customers engaged in the preparation and/or processing of food for other than domestic consumption for sale to the public shall be prohibited. Specifically included in this prohibition are grease and oils from grease traps to other grease and/or oil storage containers. These substances are defined as "garbage" under Texas Health and Safety and Code § 361.003(12), and are not "sewage" as defined by Texas Water Code § 26.001(7) The utility only provides "sewage" collection and disposal service to the public. This service is limited to the collection, treatment and disposal of waterborne human waste and waste from domestic activities such as washing, bathing, and food preparation This service does not include the collection, treatment or disposal of waste of such high BOD or TSS characteristics that it cannot reasonably be processed by the utility's state-approved wastewater treatment plant within the parameters of the utility's state and federal wastewater discharge permits. **THIS SERVICE DOES NOT INCLUDE THE COLLECTION AND DISPOSAL OF STORM WATERS OR RUN OFF WATERS, WHICH MAY NOT BE DIVERTED INTO OR DRAINED INTO THE UTILITY'S COLLECTION SYSTEM.**

Pursuant to 16 TAC § 24.165(o), the utility may charge for all labor, material, equipment, and other costs necessary to repair to replace all equipment damaged due to service diversion or the discharge of wastes which the system cannot properly treat. This shall include all repair and clean up costs associated with discharges of grease and oils, except as incidental waste in process or wash water, used in or resulting from food preparation by sewer utility customers engaged in the preparation and/or processing of food for other than domestic consumption or for sale to the public discharged from grease traps or other grease and/or oil storage containers The utility may charge for all costs necessary to correct service diversion or unauthorized taps where there is no equipment damage, including incidents where service is reconnected without authority.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
OCT 10 2024 56200 1867

SECTION 2.20 SPECIFIC UTILITY SERVICE RULES AND REGULATIONS (Continued)

The utility may not charge any additional penalty or charge other than actual costs unless such penalty has been expressly approved by the regulatory authority having rate/tariff jurisdiction and filed in the utility's tariff.

Pursuant to 16 TAC § 24.163(b)(3)(A) and (B), the customer's service line and appurtenances shall be construed in accordance with the laws and regulations of the State of Texas, local plumbing codes, or, in the absence of such local codes, the Uniform Plumbing Code. It shall be the customer's responsibility to maintain the service line and appurtenances in good operating condition, i.e., clear of obstruction, defects, or blockage.

If the utility can provide evidence of excessive infiltration or inflow or failure to provide proper pretreatment, the utility may, with the written approval of the PUC, require the customer to repair the line or eliminate the infiltration or inflow or take such actions necessary to correct the problem. If the customer fails to correct the problem within a reasonable time, the utility may disconnect service after proper notice.

In accordance with the requirements of Utility's Wastewater discharge Permit, any and all repairs and maintenance of Utility's lines, tanks, pumps and equipment located on Customer's premises shall be performed exclusively by the Utility.

Copies of the utility's state and federal wastewater discharge permits shall be available for public inspection and copying in the utility's business office during normal business hours.

Non-residential customers electing the pretreatment option for sewage with non-standard characteristics may be charged those costs set forth in the utility's extension policy if such pretreatment fails or otherwise causes the utility's facilities to violate their waste-water discharge permits

RESIDENTIAL SINGLE-FAMILY GRINDER / SEWAGE STATIONS

Prior to the installation of a grinder / sewage station, the utility must be given a complete listing of all materials and equipment that will be used.

In order to prevent inflow and infiltration, the materials must comply with standard specifications, approved by the TCEQ and the utility.

After the utility has approved the proposed grinder / sewage station, the construction may begin. Once the work has been completed, the utility will do an inspection of the grinder / sewage station to ensure the complete installation was as specified.

The customer will retain ownership of receiving tanks or lift stations on the customer's property, and all maintenance, repairs and replacement are the customer's responsibility. The customer shall own and maintain the grinder pump and appurtenances.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
OCT 10 2024 56200
1868

SECTION 2 20 SPECIFIC UTILITY SERVICE RULES AND REGULATIONS (Continued)

The repairs may be performed by anyone selected by the customer, who is competent to perform such repairs. The utility requires that parts and equipment meet the minimum standards approved by the TCEQ, to insure proper and efficient operation of the sewer system.

MULTI-FAMILY AND COMMERCIAL RECEIVING TANK / LIFT STATIONS

Prior to the installation of a grinder / sewage station, the utility must be given a complete listing of all materials and equipment that will be used, along with the storage for that development.

In order to minimize inflow and infiltration into the collection system, the installation and materials must comply with standard specifications approved by the TCEQ.

After the utility has approved the proposed grinder / sewage station, the construction may begin Once the work has been completed, the utility will do an inspection of the grinder / sewage station to ensure the complete installation was as specified.

Prior to acceptance of an existing receiving tank or lift station that is being used as an interceptor tank for primary treatment, waste water storage or pump tanks prior to discharge into an alternative or conventional sewage system must be cleaned, inspected, repaired, modified, or replaced if necessary to minimize inflow and infiltration into the collection system.

Existing pumps and tanks must be of adequate size to insure proper pumpage in the event of high flow or if one pump is out of service. If the existing pumps and receiving tanks or lift stations are of inadequate size the utility will not accept liability for backups due to high flows, one pump out of service, rainfall causing inflow or infiltration, power outages, lack of proper storage capacity, etc.

If the collection system that discharges into the receiving tank / lift station has an inflow or infiltration problem and collects rainfall discharge, the owner or P.O.A. will correct it within 90 days of written notice from the utility. If no action is taken to correct the problem within 90 days, the utility may take the responsibility to make corrections at the owner's / P.O.A.'s expense. The utility is not responsible for the collection system that discharges into the receiving tank / lift station.

The owner / P.O.A. shall be responsible for the monthly electric bill.

An adequate easement must encompass the receiving tank / lift station by a 15-foot radius and also a 15-foot access easement to the receiving tank / lift station site. If this easement does not exist, one must be created and filed of record.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED

SECTION 3.0--EXTENSION POLICY

Section 3.01--Standard Extension Requirements

LINE EXTENSION AND CONSTRUCTION CHARGES No contribution in aid of construction may be required of any customer except as provided for in this approved extension policy

The customer will be given an itemized statement of the costs, options such as rebates to the customer, sharing of construction costs between the utility and the customer, or sharing of costs between the customer and other applicants prior to beginning construction

The utility will bear the full cost of any oversizing of collection mains necessary to serve other customers in the immediate area. The individual residential customer shall not be charged for any additional treatment capacity or facilities. Contributions in aid of construction may not be required of individual residential customers for treatment capacity or collection facilities unless otherwise approved by the Commission under this specific extension policy.

COST UTILITIES SHALL BEAR. Within its certificate area, the utility will pay the cost of the first 200 feet of any sewer collection line necessary to extend service to an individual residential customer within a platted subdivision. However, if the residential customer requesting service purchased the property after the developer was notified of the need to provide facilities to the utility, the utility may charge for the first 200 feet. The utility must also be able to document that the developer of the subdivision refused to provide facilities compatible with the utility's facilities in accordance with the utility's approved extension policy after receiving a written request from the utility.

Developers may be required to provide contributions in aid of construction in amounts to furnish the system with all facilities necessary to comply with the PUC Rules

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
OCT 10 2024 5 6 2 0 0

## SECTION 3 20--SPECIFIC UTILITY EXTENSION POLICY

This section contains the utility's specific extension policy which complies with the requirements already stated under Section 3.01. It must be reviewed an approved by the Commission and in compliance with PUC Rules to be effective.

Residential customers not covered under Section 3.01 will be charged the equivalent of the costs of extending service to their property from the nearest collection line even if that line does not have adequate capacity to serve the customer. However, if the customer places unique, non-standard service demands upon the system, the customer may be charged the full cost of extending service to and throughout their property, including the cost of all necessary treatment capacity necessary to meet the service demands anticipated to be created by that property.

Developers will be required to provide contributions in aid of construction in amounts sufficient to furnish the development with all facilities necessary to provide for reasonable local demand requirements and to comply with TCEQ's minimum design criteria for facilities used in collecting, treating, transmitting, and discharging of wastewater effluent. For purposes of this subsection, a developer is one who subdivides or requests more than two connections on a piece of property. Commercial, industrial, and wholesale customers will be treated as developers.

The utility adopts the administrative rules of the PUC, as amended from time to time, as its company specific extension policy. These rules will be kept on file at the company's business office for customer inspection during normal business hours.

Non-residential customers generating sewage creating unique or non-standard treatment demands which might reasonably be expected to cause the utility's treatment facilities to operate outside their current waste-water discharge permit parameters may be charged the cost of all studies, engineering plans, permit costs, and collection treatment or discharge facilities construction or modification costs necessary to enable the utility to treat said sewage within permit limits acceptable to the TCEQ, EPA and other regulatory agencies. In the alternative, the customer may have the option of pre-treating said sewage in such a manner to that it may not reasonably be expected to cause the utility's facilities to operate outside their permit parameters. In such case, the customer shall be required to pay the utility's costs of evaluating such pretreatment processes and cost of obtaining regulatory approval of such pretreatment processes. In the event of the pretreatment facilities of a customer making this election fail and cause the utility's facilities to operate outside their permit parameters, the customer shall indemnify the utility for all costs incurred for clean ups or environmental remediation and all fines, penalties, and costs imposed by regulatory or judicial enforcement actions relating to such permit violations

Non-residential sewer customers producing water borne waste significantly different from waste generated by residential customers may be required to provide a suitable sampling point at the property line for testing the customer's waste for chemicals or substances, e.g., grease, oils, solvents, pesticides, etc , which can reasonably be believed to have an injurious effect on the Utility's plant and/or its ability to treat and dispose of such wastes within the parameters of the Utility's permit. Utility shall have reasonable access to the sampling point at all times

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
OCT 10 2024

1871

SECTION 3 20--SPECIFIC UTILITY EXTENSION POLICY (Continued)

Any service extension to a subdivision (recorded or unrecorded) may be subject to the provisions and restrictions of 16 TAC 24 163(d) and this tariff. When a developer wishes to extend the system to prepare to service multiple new connections, the charge shall be the cost of such extension, plus a pro-rata charge based upon the capacities of collection, transmission, storage, treatment and discharge facilities, compliant with the TCEQ minimum design criteria, which must be committed to such extension As provided by 16 TAC § 24.163(d)(4), for purposes of this section, commercial, industrial, and wholesale customers shall be treated as developers.

The imposition of additional extension costs or charges as provided by Sections 2.20 and 3 20 of this tariff shall be subject to appeal as provided in this tariff, PUC rules, or the rules of such other regulatory authority as may have jurisdiction over the utility's rates and services Any applicant required to pay for any costs not specifically set forth in the rate schedule pages of this tariff shall be entitled to a written explanation of such costs prior to payment and/or commencement of construction. If the applicant does not believe that these costs are reasonable or necessary, the applicant shall have the right to appeal such costs to the PUC or such other regulatory authority having jurisdiction over the utility's rates in that portion of the utility's service area in which the applicant's property(ies) is located. Unless the PUC or other regulatory authority enters interlocutory orders to the contrary, service to the applicant may be delayed until such appeal is resolved

The Utility may initiate, transfer, or terminate retail water or sewer service upon receipt of a customer request by mail, by telephone, through an Internet website, or through electronic transmission. A separate request to initiate, transfer or terminate service shall be required for each potential service location if more than one service connection is desired by any individual applicant. Written service applications forms will be available for applicant pick up at the Utility's business office during normal weekday business hours Upon request, written service applications will also be sent by prepaid first-class United States mail to the address provided by the applicant upon request Completed applications should be returned by hand delivery in case there are questions which might delay fulfilling the service request.

The Utility shall serve each qualified service applicant within its certificated service area as soon as practical after receiving a request for service. All service requests will be fulfilled within the time limits prescribed by PUC rules once the applicant has met all conditions precedent to achieving a "qualified service applicant". If a service request cannot be fulfilled within the required period, the applicant shall be notified in writing of the delay, its cause and the anticipated date that service will be available. The PUC service dates shall not become applicable until the service applicant has met all conditions precedent to becoming a "qualified service applicant" as defined herein or by PUC rules.

The Utility is not required to extend service to any applicant outside of its certificated service area and will only do so, at the Utility's sole option, under terms and conditions mutually agreeable to the Utility and the applicant and upon extension of the Utility's certificated service area boundaries by the PUC. Service applicants may be required to bear the cost of the service area amendment.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
DOCKET
OCT 10 2024
5 6 2 0 0 1872

SECTION 3 20--SPECIFIC UTILITY EXTENSION POLICY (Continued)

A "qualified service applicant" is an applicant who has. (1) met all of the Utility's requirements of service contained in this tariff and/or PUC rules, (2) has made all payments for tap fees and extension charges, (3) has provided all necessary easements and rights-of-way necessary to provide service to the requested location, including staking said easements or rights-of-way where necessary, and (4) has for each location to which service is being requested, completed the verbal, written, or electronic transmission customer service request process

Where a new tap or service connection is required, the service applicant shall be required to submit a service request by mail, by telephone, through an Internet website, or through another electronic transmission and request that a tap be made The tap request must be accompanied with a plat, map, diagram or written metes and bounds description of precisely where the applicant desires each tap or service connection is to be made and, if necessary, where the connection is to be installed, along the applicant's property line. The actual point of connection must be readily accessible to Utility personnel for inspection, servicing and testing while being reasonably secure from damage by vehicles and mowers. If the Utility has more than one main adjacent to the service applicant's property, the tap or service connection will be made to the Utility's near service main with adequate capacity to service the applicant's full potential service demand.

If the tap or service connection cannot be made at the applicant's desired location, it will be made at another location mutually acceptable to the applicant and the Utility. If no agreement on location can be made, applicant may refer the matter to the PUC for resolution. Unless otherwise ordered by the PUC, the tap or service connection will not be made until the location dispute is resolved.

The Utility shall require a developer (as defined by PUC rule) to provide permanent recorded public utility easements as a condition of service to any location within the developer's property. The Developer shall be required to obtain all necessary easements and rights-of-way required to extend the Utility's existing service facilities from their nearest point with adequate service capacity (as prescribed by PUC rules and local service conditions) to and throughout the Developer's property. The easements shall be sufficient to allow the construction, installation, repair, maintenance, testing, and replacement of any and all utility plant necessary to provide continuous and adequate service to each and every potential service location within the property at full occupancy. Unless otherwise restricted by law, sewage treatment, holding tank sites, lift station sites shall convey with all permanent easements and buffers required by TCEQ rules Unless otherwise agreed to by the Utility, pipeline right-of-way easements must be at least 15 feet wide to allow adequate room to facilitate backhoe and other heavy equipment operation and meters.

Easements must be provided for all storage, treatment, pressurization and disposal sites which are sufficient to construct and maintain all weather roads as prescribed by TCEQ rules. All easements shall be evidenced, at Developer's expense, by recorded county-approved subdivision plat or by specific assignment supported by metes and bounds survey from a surveyor licensed by the State of Texas.

PUBLIC UTILITY COMMISSION OF TEXAS
APPROVED
OCT 10 2024
DOCKET
56200
1873

SECTION 3 20--SPECIFIC UTILITY EXTENSION POLICY (Continued)

Prior to the extension of utility service to developers (as defined by PUC rules) or new subdivisions, the Developer shall comply with the following:

(a) The Developer shall make a written request for service to property that is to be subdivided and developed. The Developer shall submit to the Utility a proposed plat on a scale of one inch (1") to two hundred feet (200') for review and determination of required easements, utility plant, and plant location. If sewer service is requested, the plat must contain elevation data. A reconcilable deposit in an amount set by the Utility may be required to cover preliminary engineering, legal and copy cost to be incurred by the Utility in reviewing and planning to meet this service request. The plat and/or accompanying information shall identify the type, location and number of houses and other planned structures that will be requiring utility service. If other than residential structures are to be located on the property, all other types of anticipated businesses and their service demands shall be identified with specificity. All areas requiring special irrigation and/or other unique water demands must be identified.

To the extent reasonably possible, this information must be precise so that adequate facilities can be designed and constructed to meet all future service demands without hazard to the public, other utility customers and/or the environment.

(b) After the requirements of easements and rights-of-way have been determined, a red line copy will be returned by the Utility to the Developer for final plat preparation.

(c) Copies of all proposed plats and plans must be submitted to the Utility prior to their submission to the county for approval to ensure that they are compatible with the adequate long-term utility needs of potential service customers. Copies will be returned after review by the Utility so that necessary changes may be incorporated into the Developer's final submitted plat(s) and plans

(d) The Utility shall be provided with three (3) certified copies of the final plat(s) approved by the County Commissioners Court At this time, the Utility will begin engineering the facilities necessary to serve the property. Plans and specifications will be prepared and submitted to the TCEQ by the Utility if required by law. If further plat or plans changes are necessary to accommodate the specific service needs of the property and the anticipated customer demands, the Developer will be so notified. Plat amendments must be obtained by the Developer.

The Developer shall be notified when all required TCEQ or other governmental approvals or permits have been received. No construction of utility plant which requires prior TCEQ plans approval shall be commenced until that approval has been received by the Utility and any conditions imposed by the TCEQ in association with its approvals have been satisfied

SECTION 3.20--SPECIFIC UTILITY EXTENSION POLICY (Continued)

(e) The Developer shall be required to post bond or escrow the funds necessary to construct all required utility plant, except individual sewer connections, required to serve the property Construction shall not commence until funds are available If the construction is to be done in coordination with the phased development of the property, funds must be provided in advance which are sufficient to complete each phase. No phase or facilities for any phase shall be constructed prior to the bonding or escrowing of all funds associated with that phase.

(f) At the sole option of the Utility, the Developer may be required to execute a Developer Extension Contract setting forth all terms and conditions of extending service to their property including all contributions-in-aid of construction and developer reimbursements, if any.

(g) The Utility may require the Developer to commence construction of subdivision improvements within three (3) months of utility plans approval or the Utility may abate its construction activities until full development construction begins If the Developer stops construction of subdivision improvements for any purpose, the Utility may abate its construction for a similar period.

(h) As soon as the roads are rough cut and prior to paving, extension lines will need to be constructed at each road crossing The Developer must notify the Utility sufficiently in advance of this development stage to allow for the necessary utility construction without disruption to other service operations of the Utility. Failure to provide adequate advance notice and cooperation in the construction of necessary utility plant may result in additional delays in obtaining service to the property. The Developer shall be required to pay for all additional costs of road boring or other remedial construction necessary to install adequate utility plant throughout the affected property.

Within its certificated area, the Utility shall bear the cost of the first 200 feet of any water main or sewer collection line necessary to extend service to an individual residential service applicant within a platted subdivision unless the Utility can document:

(a) that the developer of the subdivision refused to provide facilities compatible with the utility's facilities in accordance with the Utility's approved extension policy after receiving a written request from the Utility; or,

(b) that the Developer defaulted on the terms and conditions of a written agreement or contract existing between the utility and the developer or the terms of this tariff regarding payment for services, extensions, or other requirements; or in the event the Developer declared bankruptcy and was therefore unable to meet obligations, and,

SECTION 3 20--SPECIFIC UTILITY EXTENSION POLICY (Continued)

(c) that the residential service applicant purchased the property from the Developer after the Developer was notified of the need to provide facilities to the utility. A residential service applicant may be charged the remaining costs of extending service to his property; provided, however, that the residential service applicant may only be required to pay the cost equivalent to the cost of extending the nearest water main or wastewater collection line, whether or not that line has adequate capacity to serve that residential service applicant.

The following criteria shall be considered to determine the residential service applicant's cost for extending service:

(a) The residential service applicant shall not be required to pay for costs of main extensions greater than 2" in diameter for pressure wastewater collection lines and 6" in diameter for gravity wastewater lines.

(b) Exceptions may be granted by the PUC if:
(1) adequate service cannot be provided to the applicant using the maximum line sizes listed due to distance or elevation, in which case, it shall be the utility's burden to justify that a larger diameter pipe is required for adequate service;
(2) larger minimum line sizes are required under subdivision platting requirements or applicable building codes.

(c) If an exception is granted, the Utility shall establish a proportional cost plan for the specific extension or a rebate plan which may be limited to seven years to return the portion of the applicant's costs for oversizing as new customers are added to ensure that future applicants for service on the line pay at least as much as the initial service applicant

For purposes of determining the costs that service applicants shall pay, commercial customers with service demands greater than residential customer demands in the certificated area, industrial, and wholesale customers shall be treated as developers.

Schedule II-A-3.10
Deferred Credits
Witness: Trey Reginelli

| Line No | Account | Description | Reference | Balance |
|---|---|---|---|---|
| | (a) | (b) | (c) | (d) |
| 1 | 252 | Advances for Construction | II-A-3 | $ (1,206,897) |
| 2 | 253.x | Reg Liability Excess DIT | | $ (12,128,151) |
| 3 | 253.x | Reg Liability Excess DIT GU | | $ (3,223,939) |
| 4 | 253.x | Reg Liability Excess DIT Pending | | $ (3,194,301) |
| 5 | 253.x | Reg Liability Excess DIT GU Pending | | $ (849,118) |
| 6 | 253.x | Deferred Credit - Current | | $ (112,695) |
| 7 | 253.x | Pension and OPEB Liability | | $ 13,587 |
| 8 | | Total Deferred Credits | | (20,701,514) |
| 9 | | | | |
| 10 | 253 | **Reg Liability Excess DIT:** This account represents the amount of the Regulatory Liability for Excess Deferred Taxes as a result | | |
| 11 | | of the Tax Cuts and Jobs Act of 2017 ("TCJA"), which reduced the federal income tax rate from 35% to 21%. Pursuant to the | | |
| 12 | | IRS normalization rules, the Company will amortize the excess deferred taxes over the life of the underlying property using | | |
| 13 | | the Average Rate Assumption Method ("ARAM"). Amounts will be amortized by a credit to deferred income tax expense | | |
| 14 | | (account 6320046) over the remaining life of the underlying property. An annual amortization of $334,924 before gross-up | | |
| 15 | | for taxes has been included in this case to refund the excess deferred taxes to ratepayers. | | |
| 16 | | | | |
| 17 | 253 | **Reg Liability Excess DIT GU:** This account represents the tax gross-up on the Regulatory Liability for Excess Deferred Taxes in | | |
| 18 | | account 2220110 as a result of the TCJA. There is an offsetting balance in account 1261020 Deferred income tax asset. This | | |
| 19 | | account will reverse over the life of the underlying property through a balance sheet only entry with no effect on net income. | | |
| 20 | | | | |
| 21 | 253 | **Reg Liability Excess DIT Pending:** This account represents the amount of the Regulatory Liability for Excess Deferred Taxes as a | | |
| 22 | | result of the TCJA that would have amortized from 1/1/2018 to 12/31/2024. The Company recorded amounts to this | | |
| 23 | | account for determination of the refund of excess deferred taxes to ratepayers pending this base rate proceeding | | |
| 24 | | pursuant to Commission Orders in PUC Project No. 47945. Once approved for ratepayers to receive the benefits of the | | |
| 25 | | return return of excess deferred income taxes under the Average Rate Assumption Method ("ARAM"), amounts will be | | |
| 26 | | amortized by a credit to deferred income tax expense over the remaining life of the underlying property. | | |
| 27 | | | | |
| 28 | 253 | **Reg Liability Excess DIT GU Pending:** This account represents the tax gross-up on the Regulatory Liability for Excess Deferred | | |
| 29 | | Taxes Pending in account 2220115, as a result of the TCJA. There is an offsetting balance in account 1261020 Deferred | | |
| 30 | | income tax asset. This account will reverse over the life of the underlying property through a balance sheet only entry with | | |
| 31 | | no effect on net income. | | |
| 32 | | | | |
| 33 | 253 | **Deferred Credit - Current:** This account represents a reserve for the Texas American acquisition diasllowance**.** | | |
| 34 | | | | |
| 35 | 253 | **Pension and OPEB Liability:** This account represents an under accrual for Pension and OPEB Liability. | | |

Advances to/from Parent Corporation
Witness: Trey Reginelli

TOC

| Line No. | Description |
|---|---|
| 1 | Advances made by the utility to its parent corporation arise from the parent company cash management policies to sweep any cash balances from the utility. |
| 2 | |
| 3 | Advances made by the parent company to the utility arise from the following: |
| 4 | |
| 5 | - Cash management policy to make Cash payments for accounts payable from the parent Company Cash account |
| 6 | |
| 7 | - Allocation of parent company indirect costs for services related to executive management, legal, information technology, finance, human resources, facilities and internal audit (see Cost Allocation Manual for more detail) |
| 8 | |
| 9 | - Capital requirements |
| 10 | |
| 11 | Future advances from or repayments to Essential will depend on future capital requirements and the level of earnings by Aqua Texas, Inc. It is anticipated that capital requirements will increase the advances made by Essential in the near future. |

The $7.6 million adjustment to Account 333 Services and its associated accumulated depreciation represents a reclassification of retirements based on a depreciation study. This reclassification assigned retirements to more appropriate ages, which ultimately reduced the total retirement amount. This adjustment does not impact the rate base.

Note: The source of any amounts included in this schedule without formulas or other references is from the underlying accounting records.

The $7.6 million adjustment to Account 333 Services and its associated accumulated depreciation represents a reclassification of retirements based on a depreciation study. This reclassification assigned retirements to more appropriate ages, which ultimately reduced the total retirement amount. This adjustment does not impact the rate base.

Note: The source of any amounts included in this schedule without formulas or other references is from the underlying accounting records.

Engineer's Affidavit
Witness: Gautam Patwardhan

TOC

The Engineer's Affidavit is provided in PDF format titled,"Schedule II-B-1.5 - Engineer's Affidavit".

**THE STATE OF PENNSYLVANIA §**
**§**
**COUNTY OF MONTGOMERY §**

**AFFIDAVIT OF GAUTAM PATWARDHAN, PH.D, P.E.**

Before me, the undersigned authority, personally appeared Gautam Patwardhan, Ph.D, P.E., known to me to be the person whose name is subscribed below who, upon oath, deposed and stated as follows.

1. "My name is Gautam Patwardhan. I am of sound mind and capable of making this affidavit. I am employed as Corporate Lead Process Engineer at Aqua America ("Aqua"), an Essential Utilities Company, and am submitting this affidavit in support of Aqua Texas, Inc. ("Aqua Texas"), the applicant in this proceeding.

2. This affidavit is being filed in compliance with the requirements pursuant to the Class A Investor-Owned Utilities Water and/or Sewer Rate Filing Package for Cost-of-Service Determination, Section II-B:1(5).

3. I am a licensed Professional Engineer in the state of Texas (PE No. 102313) and have more than fifteen years of experience in the civil, environmental, water and wastewater industry serving a wide range of industrial and municipal clients.

4. My current and previous experience includes site supervision, operations management, construction management, environmental design and permitting, compliance reporting, system design, maintenance, and trouble shooting.

5. I currently provide direct project management support in the design and construction management of several large capital projects, including those undertaken by Aqua Texas. In this capacity, I oversee the scope and quality of work to achieve the intent of all design concepts and Aqua's standards for capacity, performance, reliability, safety, and compliance. In this capacity, I am familiar with Aqua Texas' water and wastewater systems and facilities in Texas. I am also

familiar with the multiple engineers and contractors with whom Aqua Texas contracts to perform work in Texas.

6. I conducted due diligence on a majority of large Aqua Texas' non-retired assets for which original costs are claimed as a part of that rate base seeks to recover in connection with this proceeding. This due diligence includes reviewing engineering design plans submitted by third party consultants engaged with Aqua Texas and conducting site visits to multiple large scale non-retired assets to ensure construction matches the design.

7. Based on my familiarity with Aqua Texas' non-retired assets and the due diligence conducted, I can attest that all non-retired assets for which original costs are claimed as a part of rate base in this proceeding are currently used and useful in providing utility service as of the date of this affidavit.

8. The facts stated herein are true and correct based on my personal knowledge."

Further affiant sayeth not.

Gautam Patwardhan, Ph.D., P.E.

SUBSCRIBED AND SWORN TO BEFORE me on this 20th day of May, 2025.

Notary Public in and for the State of Pennsylvania

Schedule II-D-2
Bad Debt Expense
Witness: Trey Reginelli

| Line No | Account | Description | Test Year | 2023 | 2022 |
|---|---|---|---|---|---|
| | (a) | (b) | (c) | (d) | (e) |
| 1 | 670 | Water | $ 750,593 | $ 715,259 | $ 523,136 |
| 2 | 770 | Wastewater | 387,351 | 296,122 | 202,359 |
| **3** | **670** | **Total** | **$ 1,137,943** | **$ 1,011,381** | **$ 725,496** |

Aqua Texas, Inc. Reserves According To These Percentages Of Accounts Receivable That Are Past Due:
0% Current
3% 31-60 days past due
8% 61-90 days past due
15% 91-120 days past due
40% 121-180 days past due
100% Over 180 days past due

Each month the balance in the reserve account is compared to the amount expected to be uncollectible using the above percentages or the avarage of 3 prior years net write off which ever is larger. The balaance is then adjusted to the expected amount and the difference is charged to Bad Debt Expense.

Note: The source of any amounts included in this schedule without formulas or other references is from the underlying accounting records.

Docket No. 58124
Test Year Ending: December 31, 2024
Schedule II-E-3.6
Accumulated Deferred Income Taxes - Description of Timing Differences
Witness: Bobby Estep

**Accumulated Deferred Income Taxes - Due to Property:**
For income tax purposes the company uses prescribed methods and lives which differ from the method and lives used to calculate depreciation expense for book purposes. The company also has adjustments to the book basis of property under the IRS rules. Deferred taxes are calculated and recorded to provide for the tax effect of the timing differences due to depreciation and basis differences.

**Accumulated Deferred Income Taxes - Due to Bad Debt Reserve**
Any increases in the book reserve for bad debts must be reversed for tax purposes. Only debts that are specifically charged off are deductible for tax. Deferred taxes are calculated and recorded to provide for the tax impact to the company when the book versus tax differences in recognizing bad debt expense reverse.

**Accumulated Deferred Income Taxes - Due to Leases**
The amount of lease expense deductible for book purposes differs from the amount allowable as a tax deduction. Deferred taxes are calculated and recorded to provide for the future tax impact of lease expense to be added back or deducted by the company.

**Accumulated Deferred Income Taxes - Due to Pension:**
For book purposes pension expense is recorded in accordance with GAAP. For tax purposes, the actual payments made are deductible when paid as long as the maximum funding limitation is not exceeded. Deferred taxes are calculated and recorded to provide for the tax effect of the timing difference.

**Accumulated Deferred Income Taxes - Due to Miscellaneous Prepaids**
Deferred taxes are calculated and recorded to provide for the tax impact of future tax liabilities to be paid by the company when the deduction for miscellaneous prepaids is not available to offset taxable income in future years. Expense for miscellaneous prepaids is recognized for book purposes as it incurred. For income tax purposes miscellaneous prepaids are deducted when actually paid.

**Accumulated Deferred Income Taxes - Due to Regulatory Assets:**
For book purposes costs that are deferred to a regulatory asset for recovery are deducted when amortized. For tax purposes these costs are deducted when incurred. Deferred taxes are calculated and recorded to provide for the tax effect of the timing difference.

**Accumulated Deferred Income Taxes - Due to Excess DIT Tax Gross-Up**
FAS109 requires the establishment of deferred income taxes for all book/tax timing differences at the current income tax rate. A corresponding regulatory liability is established for the excess deferred taxes when there is an income tax rate decrease. The regulatory liability reflects the effect of future revenues to be returned to customers as the tax effect of the book/tax timing differences are reflected in rates. The regulatory liability must be grossed-up for tax so deferred taxes are calculated and recorded to provide for the tax gross-up.

**Accumulated Deferred Income Taxes - Incentive Plans**
Deferred taxes are calculated and recorded to provide for the tax impact of future benefits to be received by the company when the deduction for accrued incentive plan compensation is used to offset taxable income in future years. Expense for incentive compensation is recognized for book purposes when accrued. For income tax purposes incentive compensation is deducted when actually paid.

**Accumulated Deferred Income Taxes - Due to OPEB**
For book purposes costs are required to be accrued for other post-retirement benefits. For tax purposes, these reserves cannot be deducted until paid, so deferred taxes are calculated and recorded to provide for the tax effect of the timing difference.

**Accumulated Deferred Income Taxes - Due to Stock Options/Restricted Stock**
For book purposes expenses related to certain stock awards and stock options have been recorded. The amount is not deductible for tax purposes until vested to the employee and included on their W-2. Deferred taxes are calculated and recorded to provide for the tax effect of the timing difference.

Schedule II-E-3.20
History of Tax Normalization
Witness: Bobby Estep

TOC

The rate determination in Aqua Texas' previous general rate case, test year ending December 31, 2003, included no deferred tax balance per the approved settlement between the parties to the case. For this rate application, Aqua Texas has calculated its deferred tax balance as of the end of the test year, December 31, 2024. In addition to accelerated depreciation, deferred taxes may be recorded for other timing differences such as property basis differences (AFUDC, CPI, CIAC, COR). With respect to all of Aqua Texas' property, the Company has followed a normalization method of accounting (within the meaning of IRC section 168(i)(9)) since the normalization rules have been in effect and continues to follow a normalization method of accounting for both property and non-property related book versus tax timing differences. Non property related book vs tax timing differences such as bad debts, pension, OPEB, incentive compensation are not deducted for tax purposes until paid.See Schedule E-3-II.6 for additional details. For non property related differences, Aqua Texas' general method is to compare the basis for book purposes with the basis for tax purposes, determine the difference, multiply that difference by the tax rate, and record the result into the deferred taxes payable account.

Schedule II-G-2.6(W)
Customer Adjustments
Witness: Greg Herbert
TOC

Customer adjustments are not done on a routine basis or following any formula for calculations.

Customer adjustments are done individually. Any adjustments that may be made aredone by the customer service representatives depending on the circumstances.The bill analysis provided in Exhibit No. GRH-3 accounts for partial billings (move-ins/move-outs), final bills, and any adjustments to customers' bills that were resolved by the Company's customer service department.These adjustments are incorporated in the bill analysis in order to reconcile with per book revenues.

Unaccounted for Water - Narrative
Witness: Trey Reginelli

Aqua Texas serves customers across 377 Public Water Systems across both urban and rural areas, each with its own set of unique challenges as it relates to non-revenue water (NRW).This includes, distribution systems installed by developers in segments over time and with varying degrees of quality control as to workmanship and materials.

Aqua Texas's approach follows AWWA's best practices, leverages technology, and leverages a cross-functional team to address water loss and maximize system efficiency. To ensure proper Aqua Texas regularly meets with the Corporate Engineering, Asset Management, and Metrology teams to discuss progress, emerging problem, and planned actions.

Our GIS-based asset management system provides asset inventory details (age, condition, history, etc.) and spatial awareness needed to realize long-term real loss reductions gained through targeted capital investment. A comprehensive set of dashboards quantifies and visualizes system-level production vs. consumption mass balance allowing Aqua Texas to prioritize high-loss systems and quickly implement system-specific action plans.

To address apparent loss, Aqua Texas follows AWWA aged meter exchange guidelines. This limits losses attributable to meter inaccuracies and ensures consistently accurate customer billing. To gather reads, Aqua Texas employs an RF Advanced Metering Reading (AMR) system, collecting meter reads and meter-level alerts on a monthly basis at over 99% of Aqua Texas accounts. Production meters are also read through the AMR system, allowing back-office verification of values collected for the TCEQ required daily operating reports. This data is used to create a series of monthly exception reports highlighting anomalies (zero-reads, negative consumption, etc) for field investigation.

Diligent efforts are made by Aqua Texas staff to reduce system losses wherever possible. Lines are regularly walked to find leaks, production meters are calibrated or exchanged at standard intervals, and main replacements are planned to address high-risk infrastructure.

The Corporate History is provided in PDF format titled,"Schedule V-5 - Corporate History".

Aqua Texas, Inc.
Schedule V-5

## Corporate History

Aqua Texas, Inc. ("Aqua Texas") is a wholly owned subsidiary of Essential Utilities, Inc ("Essential"). Essential was first incorporated as Springfield Water Company ("Springfield") in Delaware County, Pennsylvania on January 4, 1886. In April 1925, Springfield changed its name to Philadelphia Suburban Corporation ("PSC"). In 2004, PSC was renamed Aqua America, Inc. following the acquisition of AquaSource, Inc., and in 2020, Aqua America, Inc. was renamed Essential following the acquisition of Peoples Natural Gas. Essential owns and operates water and wastewater utilities providing service to customers in eight states: Illinois, Indiana, New Jersey, North Carolina, Ohio, Pennsylvania, Texas, and Virginia. Essential maintains corporate offices in Bryn Mawr, Pennsylvania.

In 2003, Philadelphia Suburban Corporation acquired AquaSource, Inc. and with it most of the systems that now make up Aqua Texas. Aqua Texas is the operating entity and holder of the Texas certificates of convenience and necessity (Water CCNs 13201, 13203, and 13254 and Sewer CCNs 21059, 21065, and 21116). Aqua Texas maintains corporate offices in Austin, Texas.

See Schedule IV-3 for the corporate structure.

The predecessor of Aqua Texas, AquaSource, Inc.'s Texas holdings itself was consolidated into water and sewer CCNs from numerous Texas acquisitions. These acquired companies included D Lux Utility Company WA, Central Texas Utilities, Inc. WA, H2M Water Systems, Inc. WA, Granbury Water Service, Inc. WA, The Gap Water Company WA, Drop M Estates WA, Hood Country Water WA, T & C Water Company WA, Lunar Lane Water Supply Corp. WA, McKee Water Service Company WA, AAD New Systems WA, TEC Industries, Tri Country (Williams Water) WA, Clear Lakes Water System WA, HASCO Water Systems Co. WA, Crestwood Water Company WA, Dogwood Water System WA, McCurley Water Systems WA, Forest Lake Estates Longview WA, Lake Palestine Water Co. WA, Willie Ware Water Works, The Woodlands WA, Eagles Bluff WA, GreenField on Sqaw WA, Highland Hills WA, Prairie Ridge Estates WA, Reatta Ranch WA, Chisolm Springs WA, Heritage Estates WA, Mountain Lake/Bluffdale WA, AAD New Systems WW, Carson Ranch Water System WA, Peninsula on LG WA, Boling Ranch WA, Diamond Ridge Estates WA, Ponderosa Valley WA, Van Zandt Farms WA, Cherokee Point WA, The Resort WA, Stone Creek (Shale Creek) WA, S & B Water System Mgmt WA, Rivercrest Water Systems, Inc. WA, Smith Water Company, Inc. WA, 1 Meadow Woods Water Supply, Inc. WA, Mooreland Water Supply LLC WA, Harper Water, Onion Creek Mead WA, Shady Hollow Estates WSC WA, South Central Water Supply WA, Southwest Territory Water Co. WA, Tal/Tex Utilities WA, Wagner Utility Company, Inc. WA, Ingram Water Supply, Woodcreek Utility Water, B & W Gathering Company WA, Cypress Springs WA, Canyon Ridge WA, Sierra West WA, Medina River Ranch, Park Place Water System WA, Candlelight Service Company WA, Forest Water WA, Alton Thiess Water Well WA, Astro Commercial Enterprises WA, Blue Bell Manor Utility WA, H

& J Water Company WA, Brushy Creek Utilities, Inc. WA, 3278, Inc. WA, Cedar Point Utility Mgmt, Inc. WA, Creekside/TEC Industries WA, East Texas Utility Ops. Water, J & W Utility WA, Newton Company W.S. WA, Peek Road/TEC Industries WA, Pine Trails Utlility Co, Inc. WA, Plantation on Cotton Bayou WA, Pyssen Live Oaks Estates WA, Rose Hill Water Co. WA, B & B Sewer WW, Wagon Wheel Utility Inc. WA, Timber Lochs Estates WA, Fairway Crossing WA, Woodland Ranch WA, Heron Lakes WA, Hunters Village WA, Classic Pines WA, Country Club Green WA, Cypress Creek Ranch WA, Full Brook Water System WA, Indigo Ranch WA, Shadow Grove Estates WA, Stable Gate WA, Old Egypt WA, Riverwood Forest WA, Rose Meadows WA, AAD Development WA, Tejas Creek WA, Imperial Valley Water System WA, Henley Group / Blanchard WA, and Champion Water WA.

Between 2004 and 2024, Aqua Texas, Inc. made multiple acquisitions of utilities in the state:

Hood County Utilities Water
Kerrville South Water
Saddle Club Water
Mountain Crest Water Co.
Cardinal Valley Water
Rio Ancho System WA
Tyron Development and Holigan Family Investments
Holiday Estates
LCRA-Harper Water System
LCRA-London Water System
Darryl and Marjorie Winstead
Canyon Springs Water Co
VLS, Inc
Tommy Patterson T & A Water
Burris / Pecan Utilities
Burris / Cavern Springs
Carrizo Water Corp Forest Grove
Gray Utilities
Kelly Well Services
Texas American
1404 Properties, Ltd
Nighthawk Water Supply, Inc.
E M Parker / Royal Oaks Water
Wingert
Union Hill WSC
Texas H2O
Brushy Bend MUD
The Commons Water Supply, Inc
Forest Grove, Inc.

During that same time period, Aqua Texas sought to consolidate its organizational structure in Texas through the transferring to Aqua Texas, Inc. the assets, customers, and service areas of the following affiliate utilities:

Aqua Utilities, Inc. DBA Aqua Texas
Aqua Development, Inc.
Aqua Operations, Inc.
Aqua Infrastructure, Inc.

Aqua Texas also currently has applications requesting approval of additional acquisitions pending before the Commission; however, they are not included in this rate filing. Today, Aqua Texas provides retail, commercial, and industrial utility service through 377 separate public water systems and 70 separate wastewater systems to customers in 56 Texas counties and 34 municipal entities.

The system is short 3.6 gpm (7%). | Submit compliance documentation to the TCEQ Houston Region Office demonstrating corrective measures have been taken to resolve the alleged violation. | Records Maintenance | 04/04/2024 | |
| 5 | TX - East - Spring Northeast | Alton Theiss | 3803 | 2/21/2023 | 04/19/2023 | Regulatory Inspection | Safe Drinking Water Inspection | Routine Compliance Inspection | NOV | TX1012806_ Alton Thesis_ NOV for CCI*** Additional Compliance Documentation letter dated 02.02.2025 received *** | OPEN | Tracking # 841105; Failure to comply with site-specific requirements established by the executive director for a granted exception.At the time of the investigation, the regulated entity had a revised sanitary control easement exception dated June 26, 2019. The conditions of the exception were:1-Due to past E. coli-positive raw samples from the well (04/16/2018 and 01/02/2019), the raw sampling frequency was increased to 2 per month, with the samples being collected no fewer than 10 days apart.2-By no later than June, 2020, all water produced by the well (Well 1, Source ID No. G1012806A), must be treated by a disinfection process that will achieve 4-log inactivation of viruses. This disinfection process must be maintained for as long as the well remains in use as a public water source,3-If the system can't achieve 4-log viral inactivation with existing storage capacity at the well site, the PWS must submit plans and specifications for the construction/installation of storage facilities required to achieve 4-log inactivation no later than December 26, 2019.The investigator found:1-From the monthly bacteriological results in the Drinking Water Watch database, one raw sample per month was being collected at the time of the investigation.2-During the on-site investigation, the investigator observed the water is being treated with sodium hypochlorite before the pressure tank. It's unknown whether this process is achieving the required 4-log inactivation.3-The investigator was unable to locate in any TCEQ database confirmation that any plans or specifications have been submitted.As of December 19, 2024, two raw bacteriological samples are collected each month as indicated by Condition 1 of the June 26, 2019, sanitary control easement exception letter. However, no documentation was provided or located that showed the regulated entity has met Conditions 2, 3, and 4. The alleged violation remains outstanding. | Submit compliance documentation to the TCEQ's Houston Region Office indicating that the regulated entity is complying will all conditions of the exception letter, demonstrating corrective measures have been taken to resolve the alleged violation. | Report | | Engineer working on design. |
| 6 | TX - East - Spring Northeast | Alton Theiss | 3803 | 2/21/2023 | 04/19/2023 | Regulatory Inspection | Safe Drinking Water Inspection | Routine Compliance Inspection | NOV | TX1012806_ Alton Thesis_ NOV for CCI*** Additional Compliance Documentation letter dated 02.02.2025 received *** | RESOLVED | Tracking# 841106; Failure to maintain all pressure maintenance facilities in a watertight condition.At the time of the investigation, the pressure tank had a rusted spot on the side, facing away from the gate of the water plant fence, which was leaking water | Submit compliance documentation to the TCEQ's Houston Region Office indicating the leak has been repaired, demonstrating corrective measures have been taken to resolve the alleged violation | Report | 05/09/2023 | This alleged violation was resolved on May 8, 2023, based on photographic documentation via email from Mr. Thomas Shepard, Jr., Field Supervisor with Aqua Texas, Inc., by the TCEQ Houston Region Office indicating that the pressure tank had been repaired and is no longer leaking. Further photographic documentation received via email from Mr. Shepard on December 3, 2024, confirms the pressure tank remains in a watertight condition |

| 103 | TX - East - Spring Northwest | Candlelights Wastewater | 3006 | 3/8/2022 | 07/25/2022 | Regulatory Inspection | Wastewater inspection | Routine Compliance Inspection | NOV | NOV for 03.08.2022 CCI_WQ0011314001_Candlelight Hills WWTP | RESOLVED | Track No. 761447_The facility failed to maintain compliance with regulations for domestic wastewater plant siting location standards [30 Texas Administrative Code (TAC) Chapter 309.13 (e) and (f)]. Specifically, the facility submitted a permit application with a major amendment on May 29, 2019, which shows non-compliance with the 150-feet buffer zone between treatment units and residential property lines on the submitted facility schematic. The schematic shows two residential property lines lie within 150-feet of the facility. If the facility will not meet one of the alternatives described in subsection (e) of 30 TAC 309.13, the applicant shall include in the application for the discharge permit a request for a variance. A variance request was not submitted with the major amendment permit application.A Water Quality Record Review was conducted on April 8, 2021 to evaluate the regulated entity's compliance with this regulation. The documentation submitted on May 3, 2021 does not resolve the alleged violation. According to the regulated entity, a variance request is being prepared.The pending variance request for the buffer zone requirement was submitted July 12, 2021 and is currently under review by the TCEQ Wastewater Permitting Section MC148. | For a facility for which a permit application, other than a renewal application, is made after October 8, 1990, if the facility will not meet one of the alternatives described in subsection (e) of 30 TAC 309.13, the applicant shall include in the application for the discharge permit a request for a variance. Submit documentation to the Houston Region Office and Wastewater Permitting Section MC148, either indicating compliance with one of the alternatives listed in 30 TAC 309.13(e)(1-3) to abate and control a nuisance of odor, or submit a variance request. | Other | | Facility constructed prior to homes being built odor/noise abatement plan filed. |

During investigation in response to complaint, the investigator documented on 10.05.2021, that the color concentration in the water from the sample tap at Hideaway Road, was 35 color units using the Hach DR 900 Program 122. On 10.22.2021, the investigator checked the color on Hideaway Road, which was 23 color units. He also checked color from water leaving Plant 1, which was 16 color units. | Submit compliance plan to TCEQ | Monitoring | 03/01/2023 | SWF - TCEQ resolved in their database |

Submit copies of the correspondence to and from the Permitting Section to the San Antonio Regional Office. | Review | | |
| 244 | TX - North - Lake Palestine | Eagles Bluff | 6239 | 8/29/2024 | 09/17/2024 | Orders w/ Actions & Multiple Event Citations | Capacity Event - Water | Routine Compliance Inspection | ORDER-With Actions | Eagles Bluff TX0370052_Proposed Agreed Order for 08.29.2024 CCI_Docket No. 2024-1710-PWS-E | NEGOTIATING | Track No: 860553; Failure to provide the minimum total production capacity requirements. 30 TAC 290.45(a)(2) states, "The executive director will require additional supply, storage, service pumping, and pressure maintenance facilities if a normal operating pressure of 35pounds per square inch (psi) cannot be maintained throughout the system, or if the system's maximum daily demand exceeds its total production and treatment capacity." 30 TAC 290.45(b)(1)(D)(i) states, "Groundwater supplies must meet the following requirements: two or more wells having a total capacity of 0.6 GPM per connection."During the investigations, conducted between 09/21/2023 and 10/03/2023, the investigator documented that the system failed to provide adequate production capacity. Historically, the manganese levels from the raw groundwater were lower and thus the use of the filters were sometimes optional. Therefore, the filters must be utilized. The design capacity of the filters is 250 GPM. The minimum capacity is 0.6 GPM per connection times 495 connections, which equals 297 GPM. The wells can pump 275 GPM plus 270 GPM to the plant, but the flow is bottlenecked down to 250 GPM through the filters (16% deficiency). In addition, on 09/12/2023, the maximum daily demand was 413,000 gallons, which equals 287 GPM (more than the plant could treat). | Submit compliance documentation | Review | | Expansion under construction |

During an April 4, 2023 investigation, the outstanding alleged violation was evaluated. Aqua Utilities claimed that Golden Acres Water Company Company had a valid contract with Nueces WSC; however one was not provided after requests on March 24, 2024, April 4, 2024, and April 18, 2023. Additionally without a contract, production capacity could not be evaluated. During a file record review conducted on January 8, 2024, the status of this outstanding alleged violation was evaluated. | The water system must submit an adequate purchase water contract that authorizes the purchase of enough water to meet the monthly or annual needs of the purchaser to the Region 14 Office. Additionally, the contract shall establish a maximum rate at which water may be drafted on a daily and hourly basis. In the absence of specific maximum daily or hourly rates in the contract, a uniform purchase rate for the contract period must be used. | Report | | Working with Seller. As purchaser little negotating ability. |

All facilities for potable water storage shall be covered and designed, fabricated erected, tested, and disinfected in strict accordance with current American Water Works Association (AWWA) standards and shall be provided with the minimum number, size and type of roof vents, man ways, drains, sample connections, access ladders, overflows, liquid level indicators, and other appurtenances as specified in these rules. The roof of all tanks shall be designed and erected so that no water ponds at any point on the roof and, in addition, no area of the roof shall have a slope of less than 0.75 inch per foot. | Obtain an exception to the AWWA design and construction standards for the polyethylene (plastic) ground storage tank or replace the ground storage tank with an AVVVVA approved alternative | Repair/Replace - Minor | | |
| 388 | TX - Central - Kerrville | Ingram | 6373 | 1/10/2023 | 09/25/2024 | Orders w/ Actions & Multiple Event Citations | Safe Drinking Water Inspection | Routine Compliance Inspection | ORDER-With Actions | Ingram TX1330011_NOE for file record review_09252024 | NEGOTIATING | Track No. 836986 - At the time of the investigation, as a whole, the water system was providing 1,053.4 gallons per minute (gpm) of well capacity or 0.54 gpm per connection. Based on 1,967 connections, the water system is required to provide at least 1,180.2 gpm of well capacity or 0.6 gpm per connection. Specifically, the system is 10.7% deficient in the Primary pressure plane and 32.2% deficient in the Goat creek Rd. Cut-off pressure plane. The Goat creek Rd. Cut-off pressure plane was being provided 43.5 gpm of well capacity or 0.40 gpm per connection. Based on 107 connections, this pressure plane is required to have at least 64.2 gpm of well capacity provided or 0.6 gpm per connection. The primary pressure plane was being providing approximately 883.3 gpm of well capacity or 0.53 gpm per connection. Based on 1,649 connections, this pressure plane is required to have at least 989.4 gpm of well capacity or 0.6 gpm per connection. Be advised, even after well no. 11 is completed and the additional well capacity is provided, the system will still be exceeding well capacity in the Goat Creek Rd. Cut-off pressure plane.30 TAC 290.45(b)(1)(D)(i) - two or more wells having a total capacity of 0.6 gpm per connection. Where an interconnection is provided with another acceptable water system capable of supplying at least 0.35 gpm for each connection in the combined system under emergency conditions, an additional well will not be required as long as the 0.6 gpm per connection requirement is met for each system on an individual basis. Each water system must still meet the storage and pressure maintenance requirements on an individual basis unless the interconnection is permanently open. In this case, the systems' capacities will be rated as though a single system existed.Investigation: 1937706Comment Date: 01/26/2024This violation remains outstanding. On 10/20/2024, the entity submitted a copy of well readings from the ten wells that the system has; however, the Goat Creek cut-off pressure plane still remains 22.12 percent deficient.Investigation: 2000441Comment Date: 07/15/2024This violation remains outstanding.Recommended Corrective Action: Increase the water system's well production capacity to meet the requirement of 0.6 gpm per connection throughout the system. Options for increasing well capacity include installing larger well pumps, interconnecting to another approved public water system, or drilling additional wells. The water system may also request an alternate capacity requirement. | Increase the water system's well production capacity to meet the requirement of 0.6 gpm per connection throughout the system. Options for increasing well capacity include installing larger well pumps, interconnecting to another approved public water system, or drilling additional wells. The water system may also request an alternate capacity requirement. | Repair/Replace - Major | | |

At the time of the investigation, a pressure tank had been leaking and was temporarily patched. The operator advised that both existing pressure tanks were going to be replaced by a lager one; however, the system was awaiting approval from the TCEQ Plan Review Team. On 11/10/2022, the entity provided copies of the TCEQ Public Water System Submittal Forms and associated data for the replacement and change in pressure tanks. The grounds and facilities shall be maintained in a manner so as to minimize the possibility of the harboring of rodents, insects, and other disease vectors, and in such a way as to prevent other conditions that might cause the contamination of the water. | Repair damaged pressure tank and provide photographic documentation, invoices and/or completed work orders indicating that the pressure tank has been replaced and that prior approval was granted to this office by the due date. Additionally, continue required maintenance to minimize potential contamination of water. | Repair/Replace - Major | | |
