Vision Zero Map Tool

We need your help to end traffic deaths and serious injuries by identifying streets and intersections where you are concerned about traffic safety.

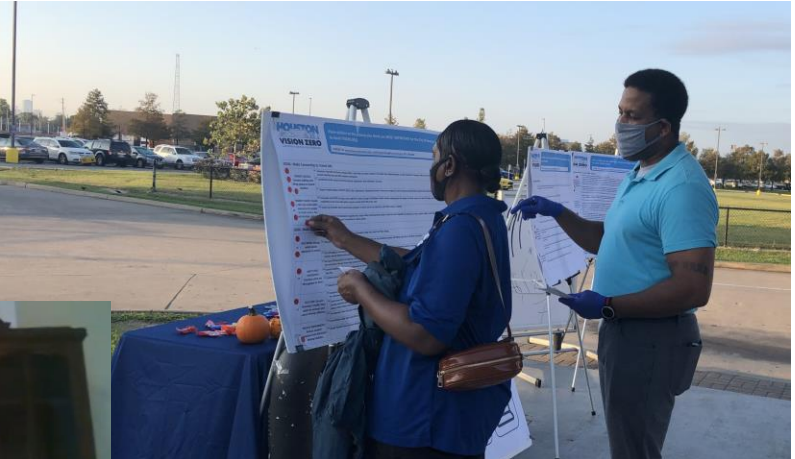

Directions:

1. click the + icon on the left to place a pin on streets and intersections which make you feel unsafe when driving, walking, using a wheelchair, or riding a bike.
2. answer the one-question prompt "what concerns you the most about traffic safety in this area?" after placing the pin.
3. upload a photo and add comments! optional, but highly encouraged.

Orange lines indicate streets with the highest percent of fatal and serious injury crashes. They make up 6% of Houston streets and 60% of traffic deaths and serious injuries.

Houston Vision Zero Action Plan

2020:
Release
Vision Zero
Action Plan

Priority Actions

COMMUNICATION

- Report Vision Zero efforts and effectiveness with a public-facing dashboard and an annual report card.
- Implement a citywide communication campaign on street safety to celebrate the reality that people use different modes of transportation to get around Houston.
- Train city employees about how to speak to public and media about crashes.

SAFE SPEEDS

- Determine vehicle speeds that are safest for all people using the street and then design the street to support that speed.
- Use design as a tool to support and enforce pedestrian right-of-way at intersections and crosswalks.
- Use signal timing to maximize safety and comfort of all modes over vehicle throughput.

SAFE SYSTEMS

- Reframe the City's transportation planning tools: shift citywide standards to Multimodal Level of Service and prioritize Vision Zero goals in the Infrastructure Design Manual (IDM).
- Evaluate every City roadway reconstruction project for multimodal safety needs and opportunities at project inception.
- Identify high-risk roadway features and develop templates to simplify consistent safety redesigns.

PROGRAMMING

- Redesign 10 locations on the High Injury Network every two years and implement reconstruction within the following fiscal year.
- Construct at least 50 miles of sidewalks each year.
- Construct at least 25 miles of high-comfort bicycle facilities each year.
- Inventory and prioritize street improvements within a half-mile of transit centers to improve safety and access for persons with a disability.
