

**ADVERTISEMENT FOR  
CONSTRUCTION MANAGER AT RISK  
CITY OF HOUSTON**

The General Services Department will receive proposals utilizing online bidding services via Civcast at <https://www.civcastusa.com/bids> for the following Project(s):

<b>Project Name and WBS Number</b>	Fire Station 40 Replacement WBS No. C-000181-0001-4-01  Fire Station 64 Renovation WBS No. C-000200-0001-4-01  Fire Station 80 Renovation WBS No. C-000222-0001-4-01  Fire Station 104 Replacement WBS No. C-FS0104-0001-4-01
<b>Project Description</b>	<p>FS 40: Construction of a new 4-bay fire station will relieve existing over-extended resources by increasing the potential to add additional resources for the growing population and high emergency call volume. The new construction shall increase living area and equipment storage thereby providing a safer and healthier living environment for City firefighters.</p> <p>Fire Station 40 is amongst the busiest stations in the City's southeast sector. It serves the Lawndale community, which is continuously growing in population and emergency service call volume. The station currently consists of two (2) bays and has limited resources and living accommodations for firefighters, affecting its ability to serve the community's needs effectively.</p> <p>FS 64 &amp; FS 80: The interior of the current fire station will be demolished and re-designed for space optimization. The planned upgrades include enhancements to the walls, electrical systems, plumbing, mechanical systems, flooring, ceilings, millwork, appliances, and furniture. Additionally, improvements will be made to the carbon monoxide exhaust system, overhead doors with operators, security systems, and the IT/radio communication system.</p> <p>FS 104: The scope of work is to design and construct a new 5-bay replacement station on a site to be determined. The existing 2-bay Fire Station 104 was severely flooded and damaged during Hurricane Harvey. The station is currently located near the San Jacinto River and within the 100-year flood plain. This station is too small for the current area's service needs and does not meet current HFD standards for apparatus or living conditions.</p>
